# News from M365 and Copilot

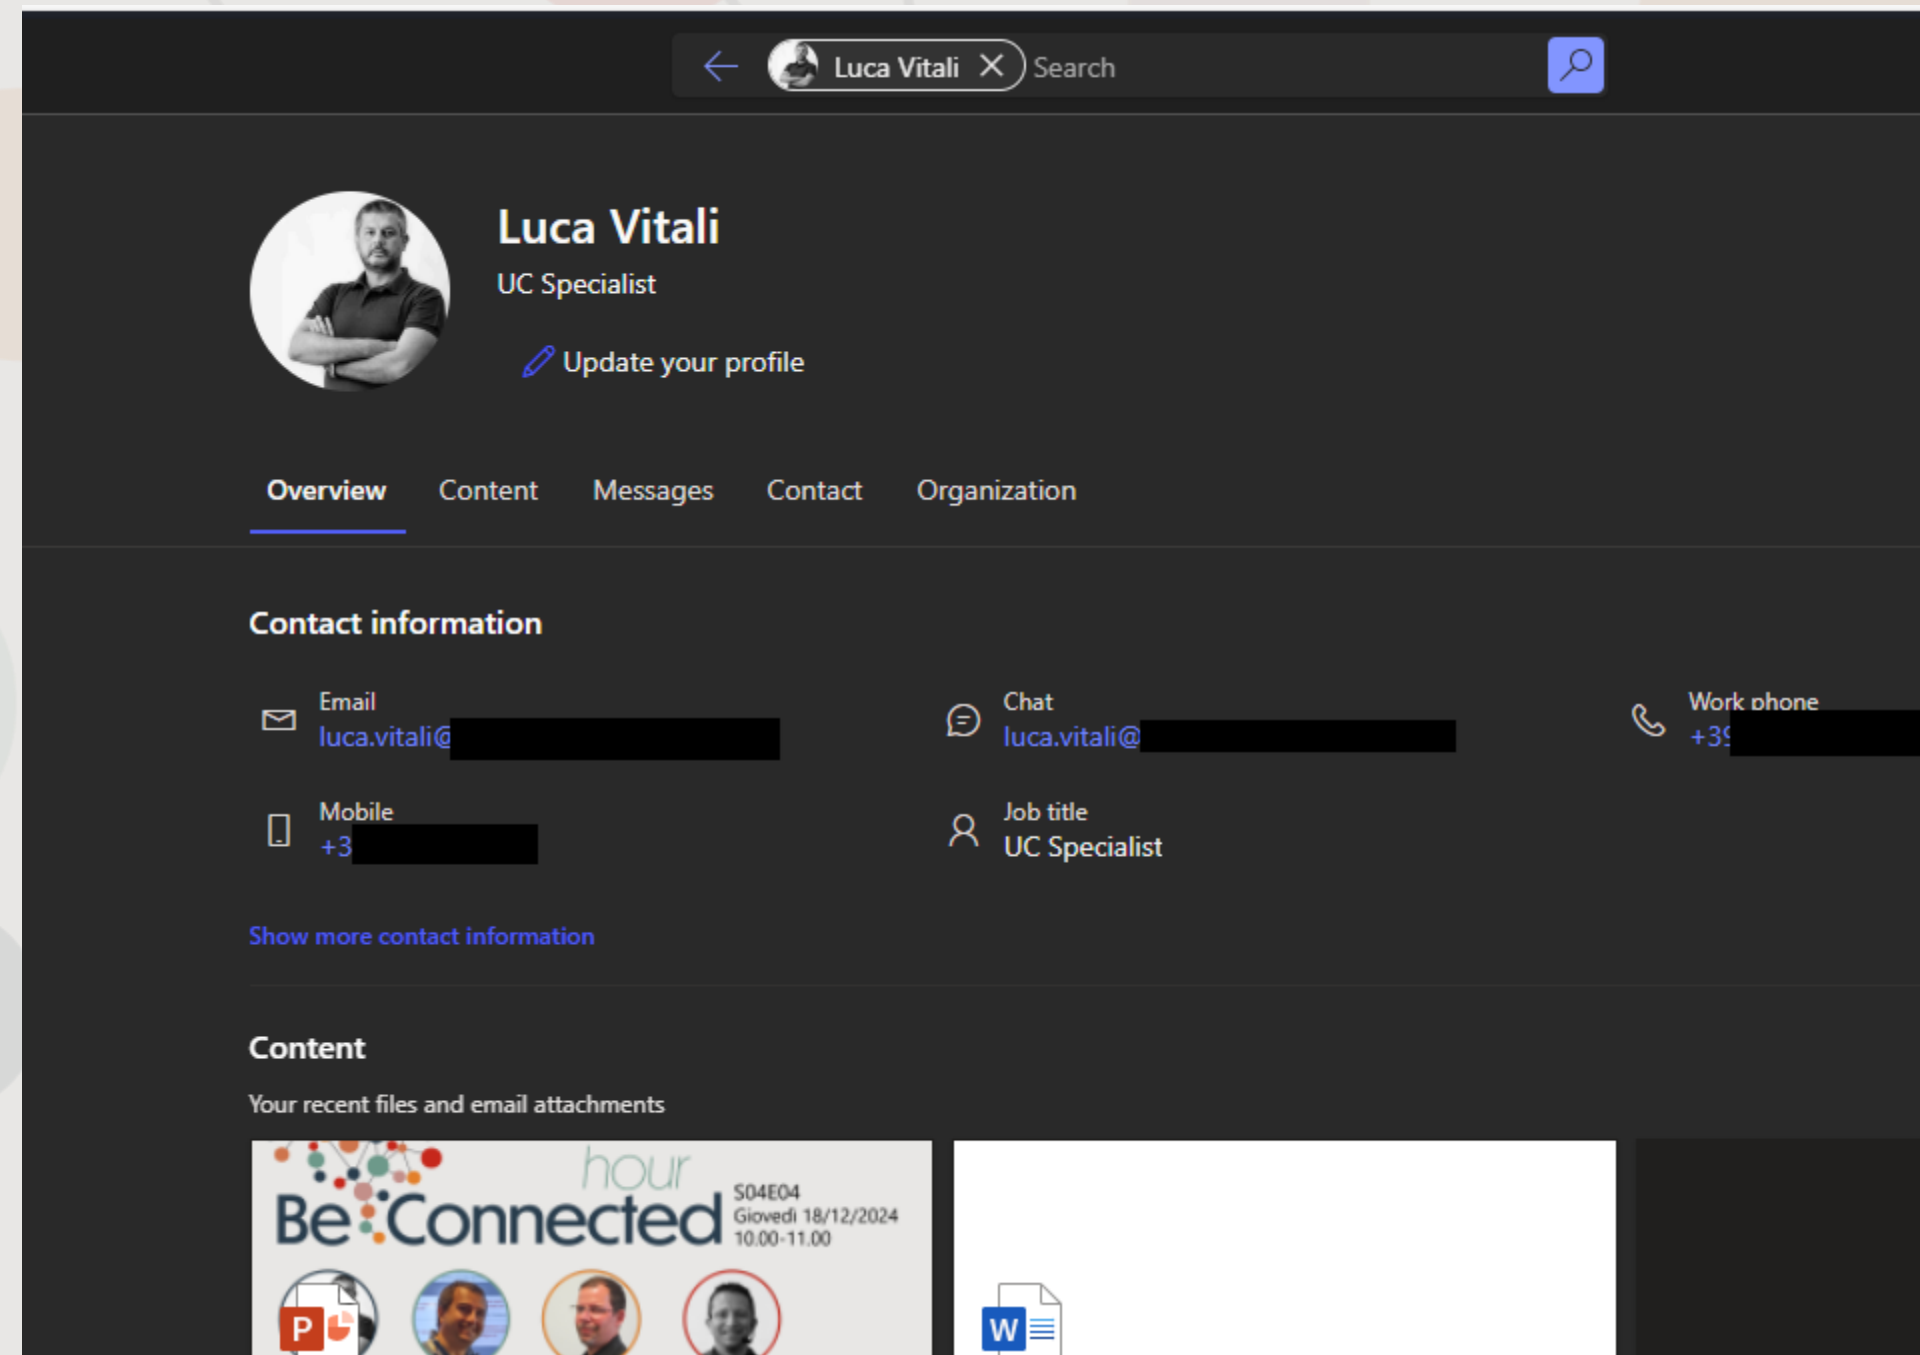

# Ritiro di Delve (16/12/2024) e il nuovo Profile Editor

Disponibile da Dicembre 20024 in SharePoint e Office.com, e dal 2025 anche da Teams e Outlook.

Partendo dalla propria Profile Card, passando alla modalità Edit, si ha modo di accedere a tutti i dati che appaiono nella propria Profile Card, in parte non editabili (sono quelli sincronizzati da Entra) e in parte editabili (sono quelli definiti definiti come disponibili nelle User Profile Properties di SharePoint).

Ogni persona può definire quali proprietà vuole mostrare nella Profile Card (e corrispondono ai Privacy settings definiti per ciascuna proprietà nello User Profile di SharePoint), e per modificare l'impostazione si viene portati alla pagina "classica" del profilo in SharePoint (definito "SharePoint editor")

Lo storage dei dati (non sincronizzati da Entra) rimane la UPA di SharePoint.

# Removal of the 14-day grace period for MFA registration

Removal of the 14-day grace period for MFA registration when Security Defaults are enabled.

This change will take effect starting December 2, 2024, for newly created tenants

- The 14-day grace period for MFA registration will be eliminated when Security Defaults are enabled.
- Users will be required to register for MFA at their first login without any option to skip or delay.
- This change applies to newly created tenants from December 2, 2024.

For existing tenants, the transition will begin in January 2025

# ChatGPT Enterprise Connector in Microsoft Purview

You can register ChatGPT Enterprise workspaces as a data source in Microsoft Purview.

This connector allows you to discover and govern interactions with ChatGPT Enterprise AI across your organization.

Metadata Extraction	Full Scan	Incremental Scan	Scoped Scan	Classification	Labeling	Access Policy	Lineage	Data Sharing	Live view
Yes	Yes	Yes	No	Yes	No	No	No	No	No

# Microsoft Exposure Management is now GA

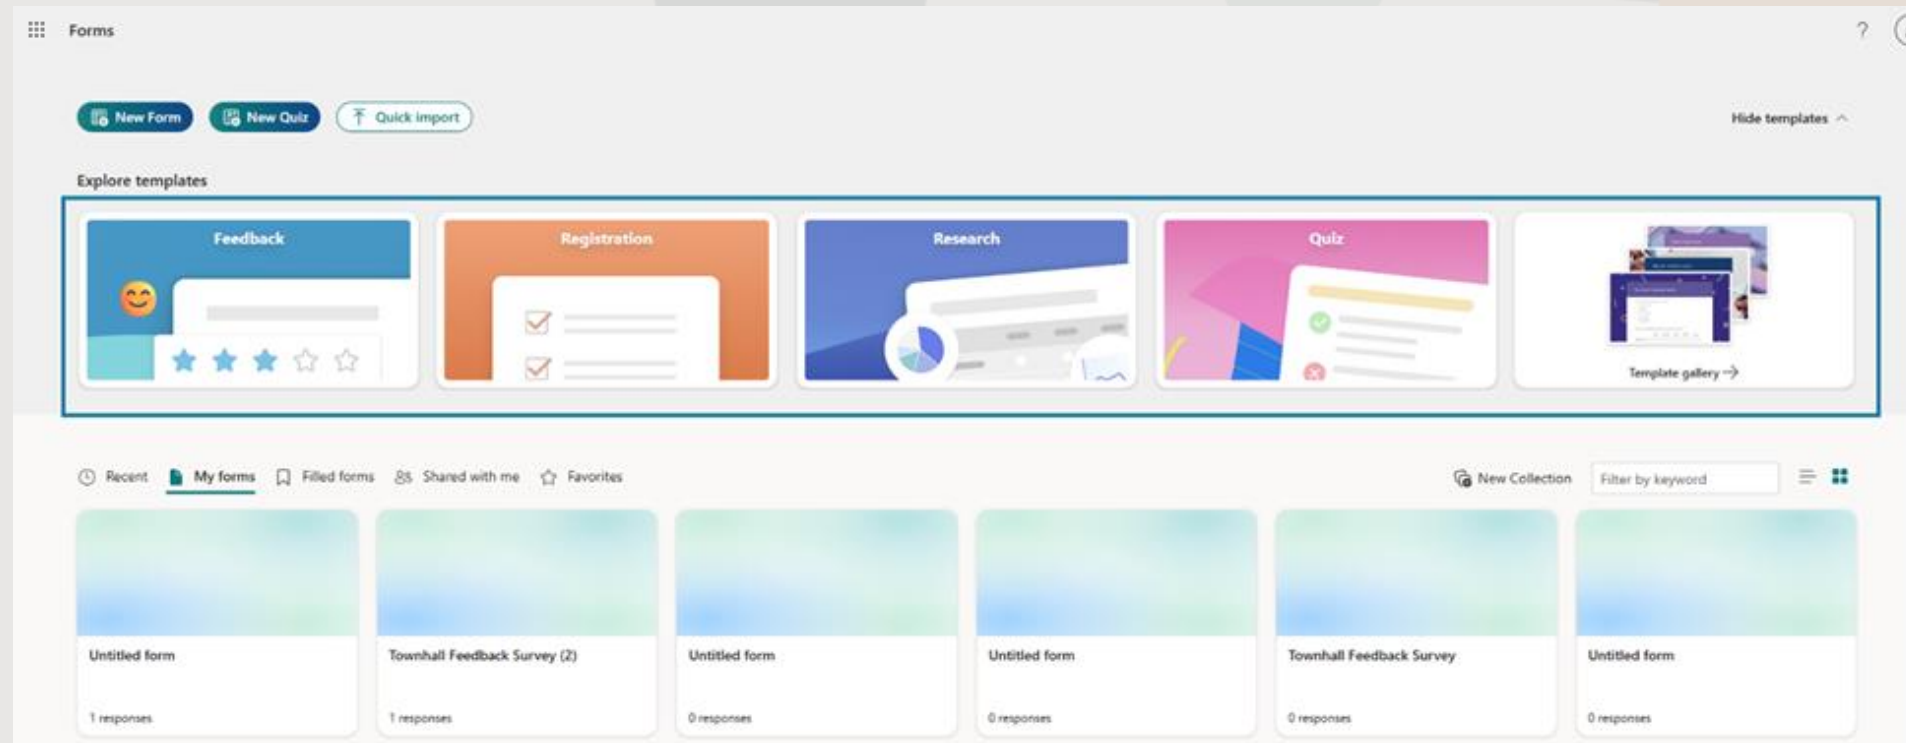

Microsoft Security Exposure Management is a security solution that provides a unified view of security posture across company assets and workloads

- Attack surface management: Users can visualize, analyze, and manage cross-workload attack surfaces using the enterprise exposure graph and attack surface map
- Critical asset protection: The solution marks predefined and customized assets as critical, allowing prioritization of security efforts
- Exposure management: It provides tools to manage security exposure and mitigate risks, including exposure insights, attack path analysis, and actionable recommendations
- Data integration: Security Exposure Management consolidates security posture information from various Microsoft Defender products, Microsoft Entra ID, and external data sources

# Revamped end-to-end experience of Forms for commercial users

Now in the portal page, templates are organized into four categories – feedback, registration, research and quiz. You can choose one that suits your needs to start creating your form.

## Customize style and layout

In the right-hand pane, from the style button, you can select a style from our suggestions or personalize your own. Additionally, you can choose the layout for the cover page of your invitation.

## Versatile distribution options

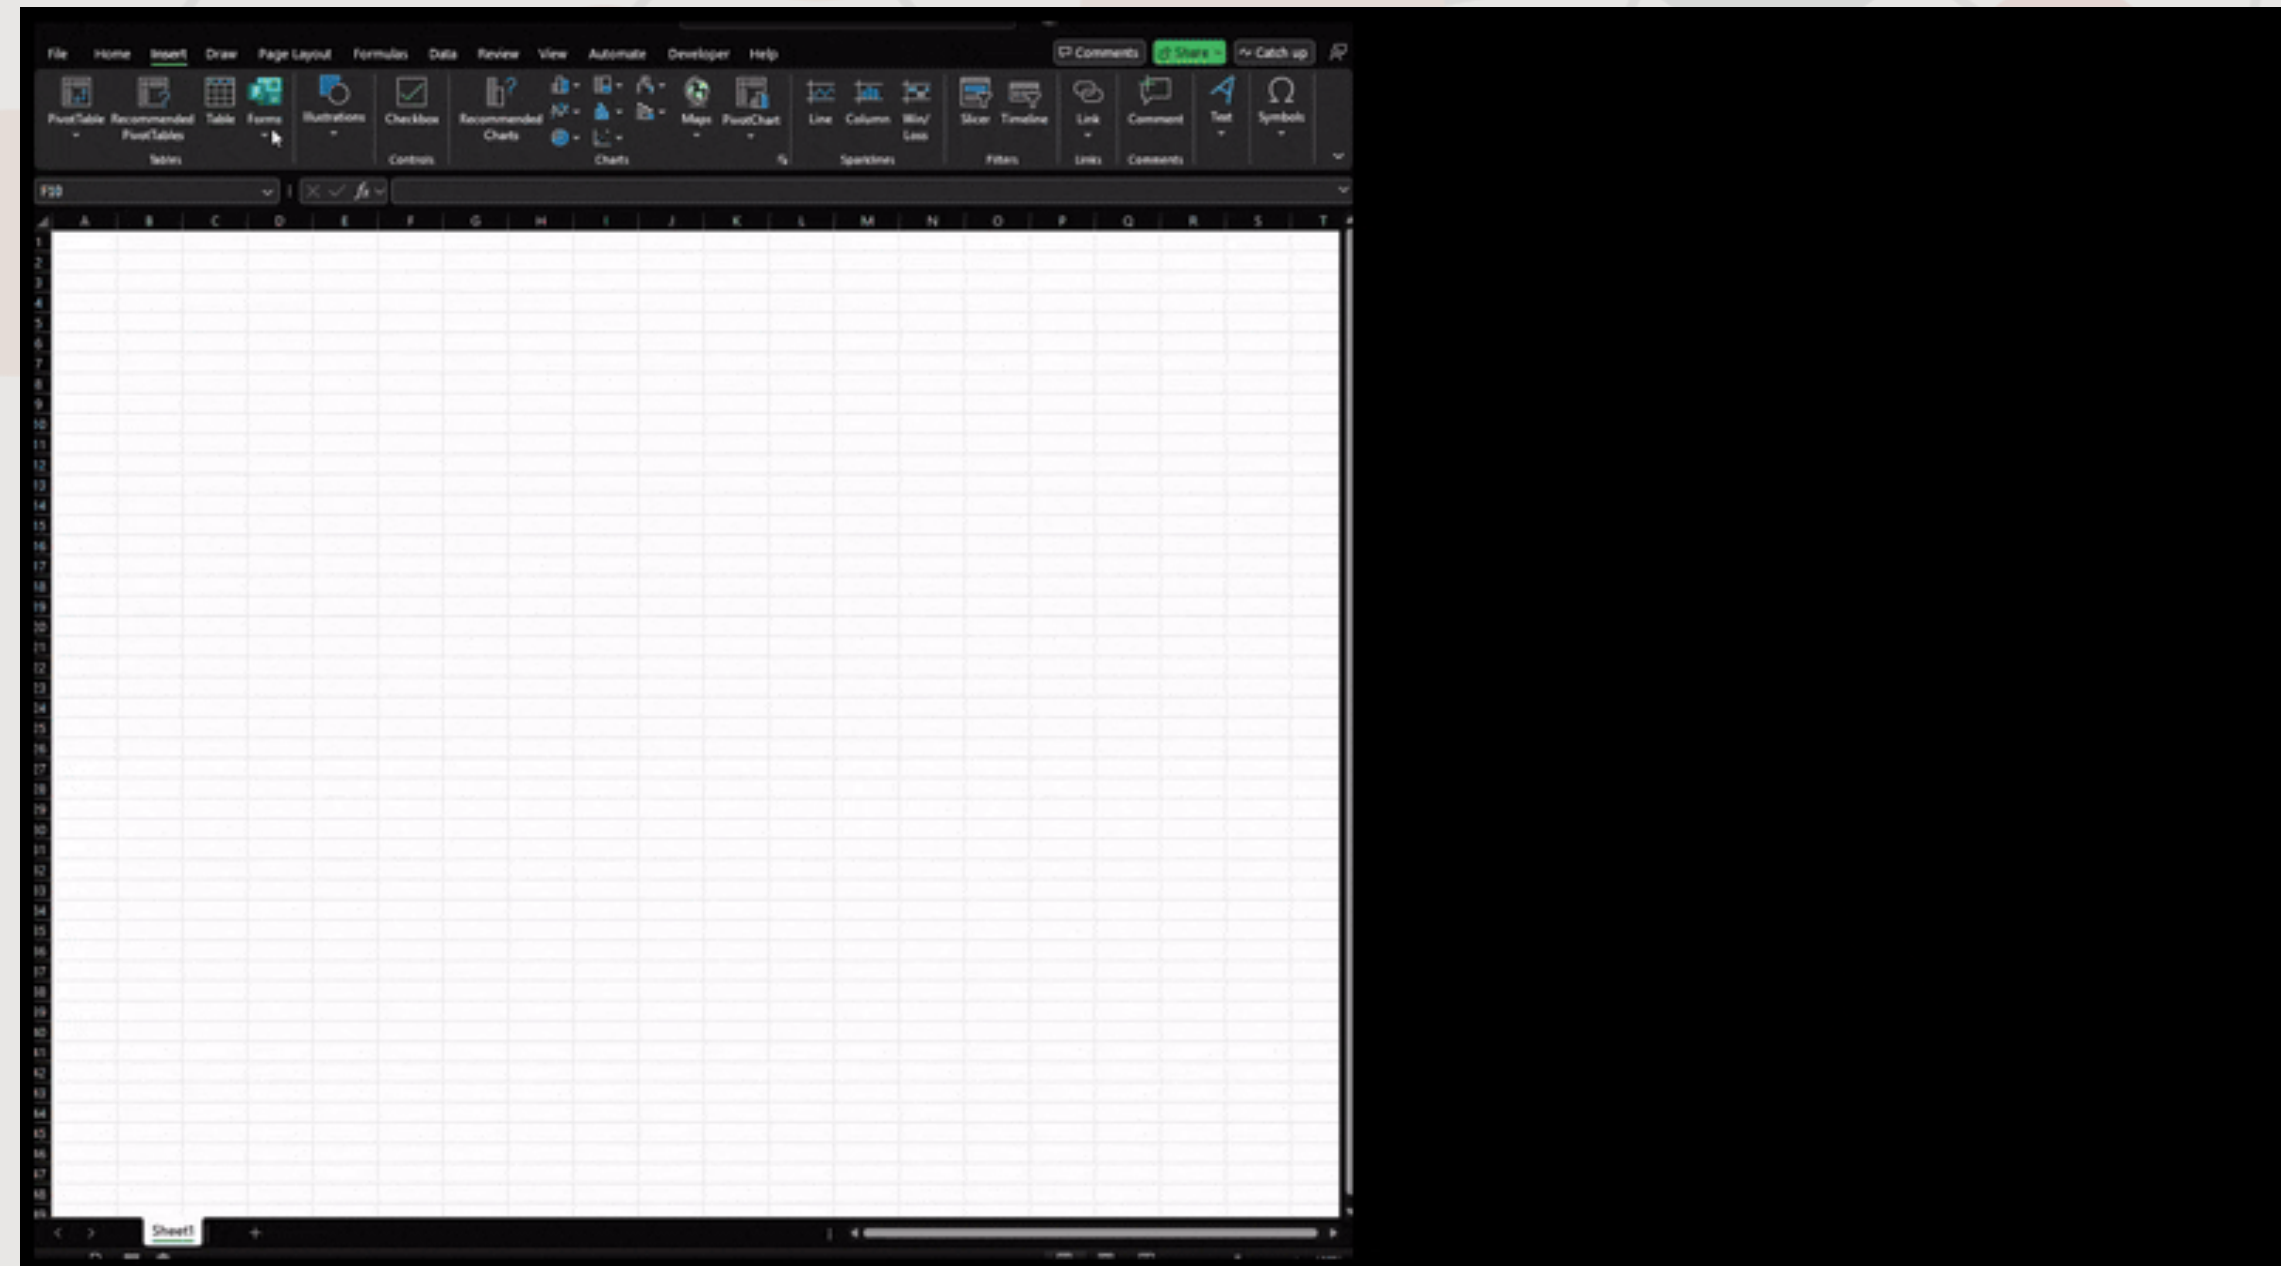

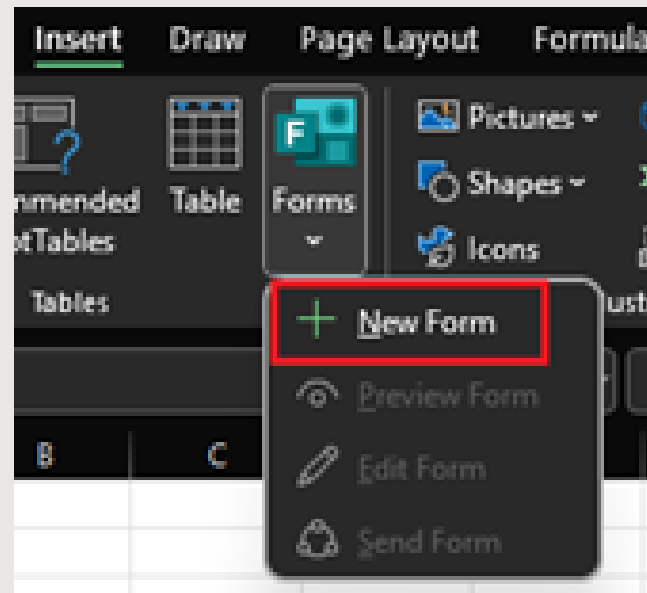

When it's time to send out the form, the new distribution interface allows you to adjust permission settings and send through URL, QR code, Outlook, or Teams.

# Create a new Microsoft Form directly within an Excel workbook

This feature, previously available in Excel for the Web, is now available in the Windows app, with Mac support coming soon. The new Microsoft Forms integration is available to all Current Channel users running Version 2410 (Build 16.0.18227.20000) or later.

# Voice enabled channels deprecation announcement UPDATE!

## **IMPORTANT!**

### Voice enabled channels deprecation announcement - update

[MC932491 - Voice-enabled channels retirement](#)

Over the past few weeks, we have received feedback from our valued customers regarding the proposed deprecation of voice-enabled channels.

After careful consideration and recognizing the importance of these features to our customers, we will not be removing support as previously communicated. This move is a testament to our commitment to delivering solutions that align with the expectations and requirements of our customers.

As we move forward, we remain committed to listening to our customers and adapting our products to better serve their needs. Our priority is to create innovative solutions that empower our users and enhance their experiences.

We thank our customers for their invaluable feedback and ongoing support, and we look forward to the continued partnership.

# Speaker recognition and attribution available in additional meeting spaces

You can now take advantage of speaker recognition and transcript attribution, and AI capabilities in additional meeting spaces, from those equipped with a Teams Room to those relying on a user's PC in a bring your own device (BYOD) room. This feature identifies and attributes people in live transcripts, utilizing a unique voice profile for each participant enabling intelligent recaps and maximum value from Microsoft 365 Copilot in Teams meetings. Users can easily and securely enroll voices via Teams Settings. A Teams Premium license is required on the host desktop in a BYOD room.

# Microsoft Teams: Meeting recap can be shared via link

Meeting participants can now share a link to the meeting recap from the meeting thumbnail in chat and the recap tab, making it easier to reference and share the meeting recap insights with others. Meeting participants can share the meeting recap link with anyone in their organization, for those users who don't have access to the recording or transcript, they need to request recording and transcript access before they can access the meeting recap.

# Microsoft Teams: Extensibility for PSTN calls

Third-party application developers will be able to extend the PSTN calling experience in Teams with contextual information, making it possible for Teams users to have access to relevant data without leaving the call experience. This brings additional context and workflow integration into calling experiences and makes customer facing professionals more efficient by having data from line of business applications readily available. This functionality is available for developers to integrate their applications and add new functionality to calls.

News from Viva

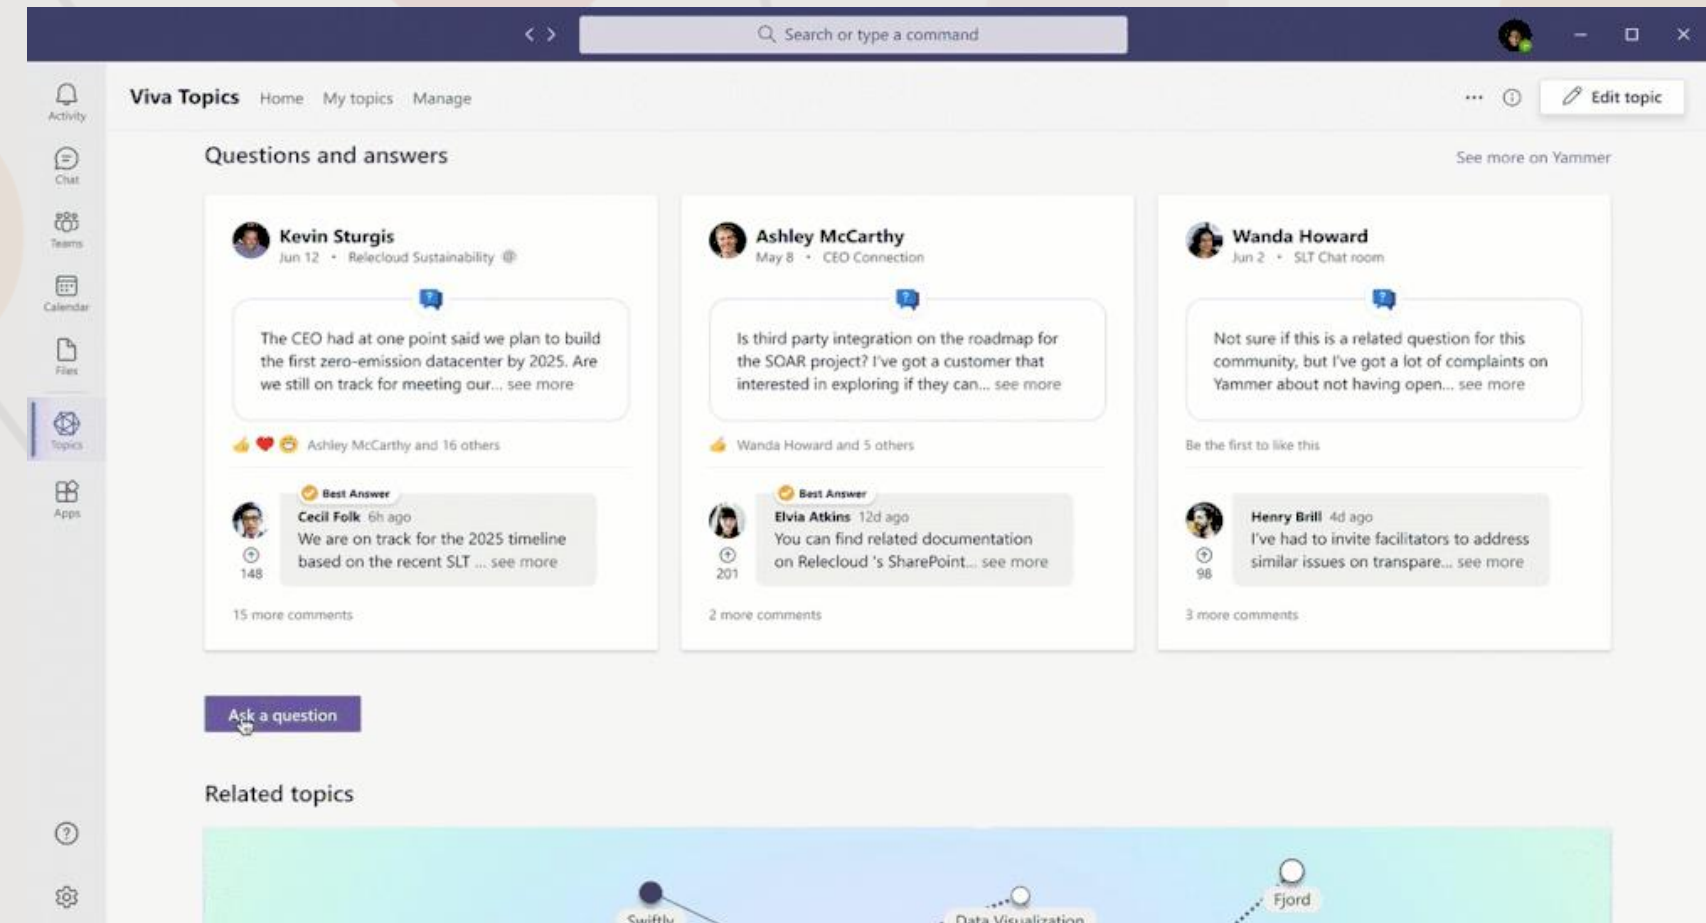

# Viva Topics

Qualche mese fa, Microsoft ha **annunciato il ritiro di Viva Topics**.

Topics era stato introdotto come soluzione per implementare soluzioni di knowledge management, integrata ai contenuti di Microsoft 365 (soprattutto SharePoint).

Viva Topics si basa su meccanismi di machine learning, oggi un po' "superati" dalle soluzioni di Generative AI come Copilot per Microsoft 365.

**Viva Topics sarà disponibile fino al 22 febbraio 2025.**

# Viva Goals

Nei giorni scorsi, Microsoft ha **annunciato il ritiro di Viva Goals**, la soluzione per gestire obiettivi e OKR all'interno delle organizzazioni.

**Viva Goals sarà disponibile fino al 31 dicembre 2025.**

USER IMPACT

Viva Goals will be retired on December 31, 2025. Microsoft will continue to maintain Viva Goals' availability, accessibility and security through retirement. However, as of December 5, 2024, Microsoft will no longer invest in new feature development..

While Viva Goals is being retired, Microsoft remains fully committed to the Viva suite as a whole, continuing to innovate and deliver tools to help our customers drive meaningful business impact.

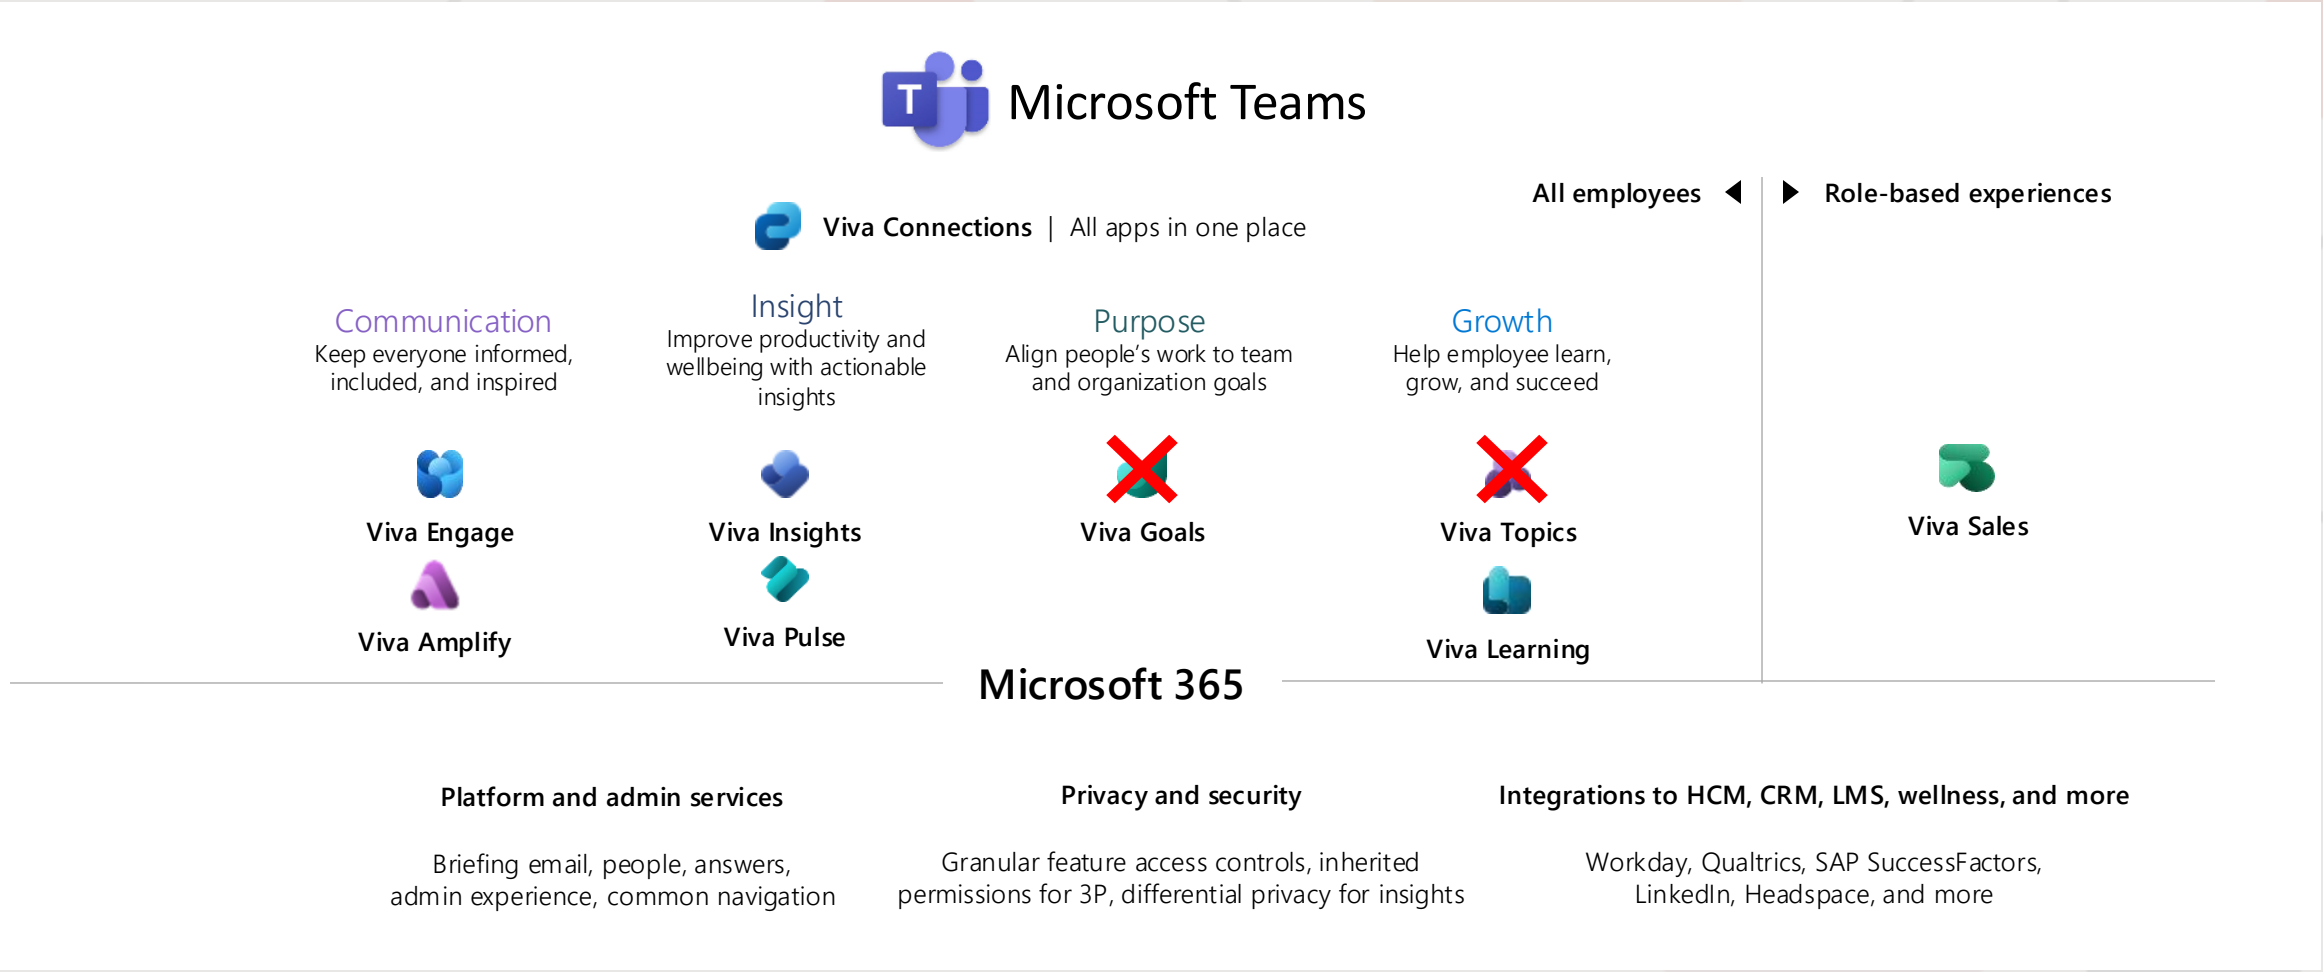

### When this will happen:

December 31, 2025

# Ma che fine sta facendo Viva?

Microsoft Viva resta centrale nella visione Microsoft per l'employee experience.

# Ma che fine sta facendo Viva?

Microsoft Viva resta centrale nella visione per l'employee experience di Microsoft.

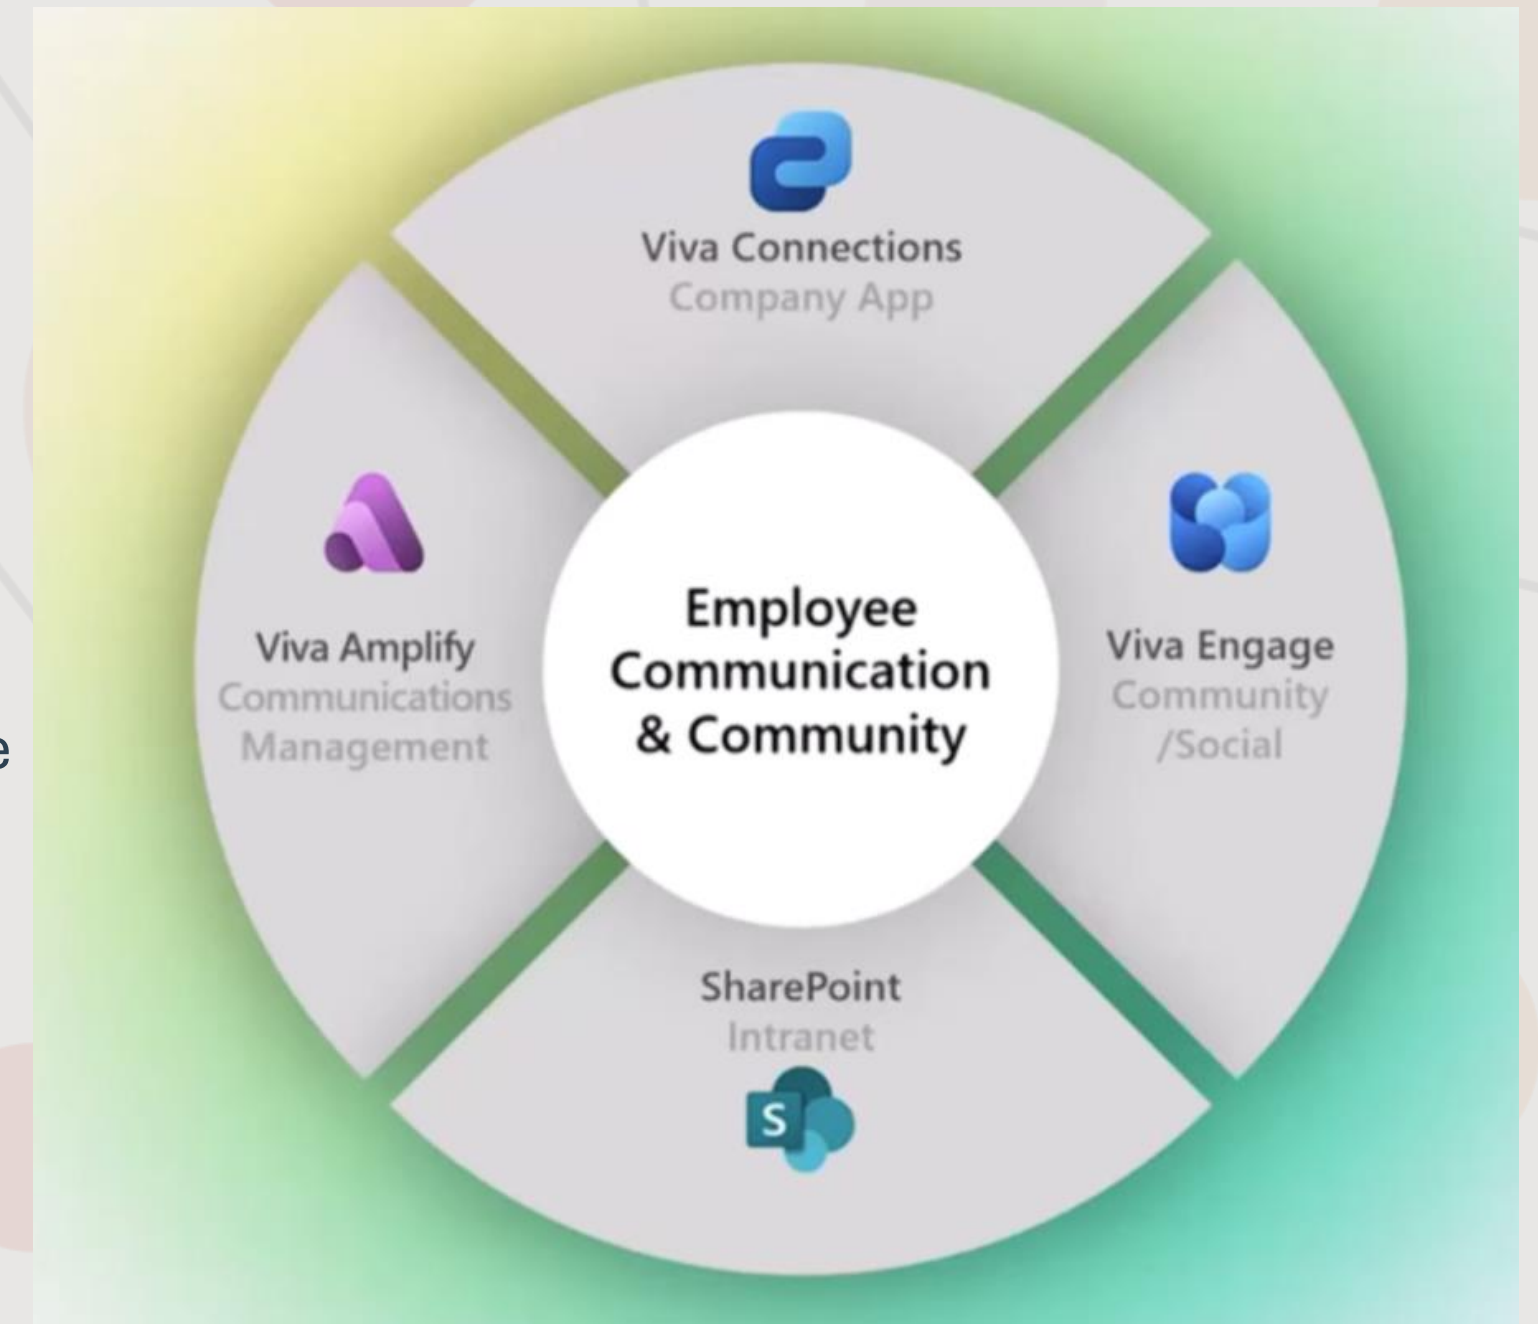

La strategia rivolta a sostenere comunicazione interna e communities è portata avanti con spinta e coerenza.

Le licenze di Viva comprendono elementi "compresi nel prezzo" dei piani di base e altri componenti "premium".

Le licenze premium sono add-on sul singolo strumento, oppure dei bundle di strumenti.

Esistono tre "bundle":

- Viva Suite (comprende tutti i moduli), 11,20€ utente/mese
- Employee Communication & Community Suite (comprende Viva Connections "premium" + Viva Engage "premium" + Viva Amplify), 1,87€ utente/mese
- Workplace Analytics e feedback dei dipendenti (Analytics "premium" + Viva Pulse + Viva Glint), 5,60€ utente/mese

# Addio CARs, si migra alle regole di Conditional Access

Le Client Access Rules (CARs) servono, da tanti anni, per controllare chi usa ExchangeOnline da dove e come.

Sono una tecnologia obsoleta, smetteranno di funzionare il 1 Settembre 2025.

Migrare alle regole di Conditional Access (CA) con Continuous Access Evaluation (CAE) dove ogni specifico token richiesto (OAuth2) verrà validato ogni ora da EntraID "defaticando" Exchange Online dai controlli di accesso.

## Update on Client Access Rules Deprecation in Exchange Online

The\_Exchange\_Team MICROSOFT

Dec 10, 2024

In September 2022, we [announced](#) that we will start the retirement of Client Access Rules (CARs) in Exchange Online. Since then, CARs have already been retired for tenants without active rules. CARs will be deprecated for all tenants on **September 1, 2025**. Additionally, if tenants choose to turn off CARs before the deadline, we will disable it for their tenant. We recommend moving away from CARs as soon as possible to ensure a smooth transition and to take advantage of the enhanced security features offered by Conditional Access (CA) with Continuous Access Evaluation (CAE).

### Background

CARs help you control access to your Exchange Online organization based on client properties or client access requests. However, CARs are now considered legacy technology. Further, CARs defined in the service would work *only* with Exchange Online.

**We recommend using Conditional Access (CA) with Continuous Access Evaluation (CAE) instead of CARs.** CAE ensures your location policies are applied when you configure IP location-based CA policies. Multiple Microsoft 365 services support CAE, including Exchange Online, SharePoint Online, and Teams.

# Nested App Authentication al posto di Exchange Legacy Token

Rimozione completa nel 2025 a favore di autenticazioni "Moderne" -> Niente più Basic over SSL in EOL.

<https://devblogs.microsoft.com/microsoft365dev/naa-and-deprecation-of-legacy-tokens/>

Disabilitabile subito sul tenant con **Set-AuthenticationPolicy** ma attenzione, da fare solo in test.

Lista degli add-in che non sono ancora compatibili e potrebbero smettere di funzionare.

Stanno lavorando ad un report ad-hoc per sapere quali utenti usano ancora Exchange Legacy Token e con quali add-in.

Date	Legacy tokens status
Feb 2025	Legacy tokens turned off for all tenants. Admins can reenale legacy tokens via PowerShell.
Jun 2025	Legacy tokens turned off for all tenants. Admins can no longer reenale legacy tokens via PowerShell and must contact Microsoft for any exception.
Oct 2025	Legacy tokens turned off for all tenants. Exceptions are no longer allowed.

Date	NAA General Availability (GA)
Oct 2024	Complete – NAA is GA in Current Channel.
Nov 2024	Complete – NAA is GA in Monthly Enterprise Channel.
Jan 2025	NAA will GA in Semi-Annual Channel.
Jun 2025	NAA will GA in Semi-Annual Extended Channel.

# Nuovo Outlook per licenze Business e non solo

Dal 1 gennaio 2025 le caselle postali con licenza Business Standard e Premium useranno il Nuovo Outlook

**E le Enterprise?**  
**C'è una data -> Aprile 2026**

Controllabile con:

- GPO (Registri)
- PowerShell

Remove-AppxPackage

### Toggle to new Outlook

 Archive  Share  Copy link  Mark as unread

 Action required by Apr 1, 2026

#### Summary

Starting April 2026, Microsoft 365 for Enterprise users will be switched from classic to new Outlook for Windows, with the option to revert back. This change aims to enhance user experience with modern features. Organizations are notified to prepare, with automatic rollout requiring no admin action but allowing opt-out options.

Is this summary helpful?  

We're making some changes to the migration from classic Outlook to new Outlook for Windows.

We aim to give more than 12 months of notice to help our customers prepare. Starting April 2026, users with Microsoft 365 for Enterprise licenses will be toggled from classic Outlook for Windows to new Outlook for Windows. Users will be toggled into new Outlook once with this roll-out, with potential to be toggled again in the future. Users will maintain the
