(Reminder) Delve retires December 16, 2024

 Archive  Share  Copy link  Mark as unread

Summary

Microsoft Delve will retire on December 16, 2024. Additional details and guidance can be found in the original announcement MC698136 and the provided support links. Organizations should update their documentation and training accordingly.

Is this summary helpful?  

This is a reminder that we are retiring Microsoft Delve on December 16, 2024, as communicated in MC698136 *(Updated) Retiring Delve Web* (originally published December 2023, updated May 2024).

In addition to the details in MC698136, learn more at:

- [Alternatives to Delve in Microsoft 365 - Microsoft Support](#)
- [Guidance for retiring Delve in your organization](#)

Please review these sources and update your internal documentation and training.

SharePoint e OneDrive: Enhanced versioning controls

Automatic (Recommended) version limits for new document libraries in your organization

Automatically optimize storage by storing versions based on their creation date.

With this setting, users have access to most of the recently created versions.

As versions age, fewer older versions are stored, keeping the few most likely needed ones. No other input is required from admins.

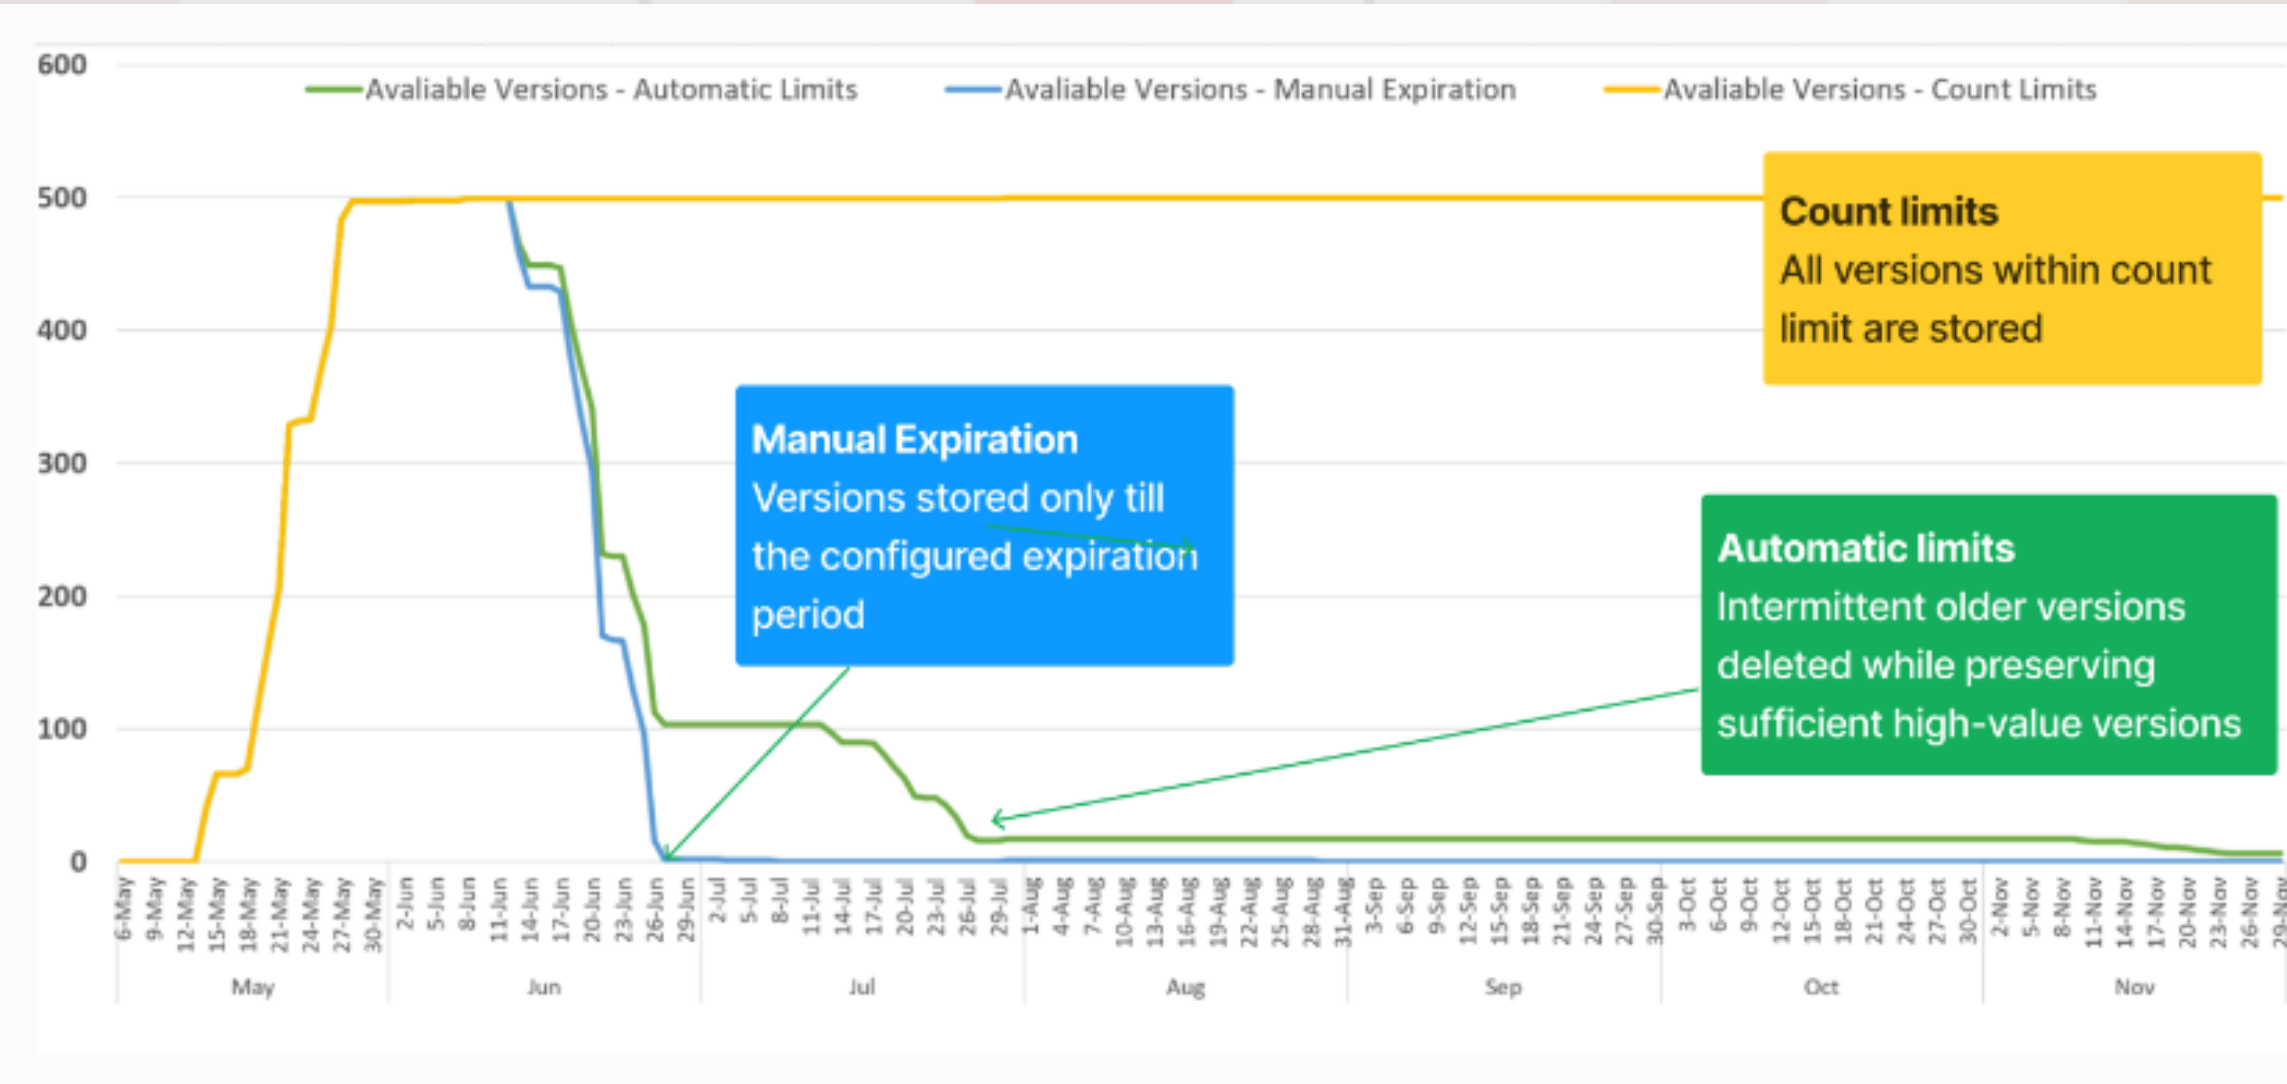

Version storage under Automatic setting is determined by the following algorithm:

As versions are created, users have access to the following versions:

- All versions created within 500 count limit in first 30 days
- Hourly versions (versions created at the top of the hour) between 30 to 60 day period
- Daily versions (versions created at the beginning of each day) between 60 to 180 day period
- Weekly versions (versions created at the beginning of the week) beyond 180 days or more are available indefinitely until the maximum 500 count limit has reached

The service trims the intermediate versions as the above milestones are reached.

<https://learn.microsoft.com/en-us/sharepoint/plan-version-storage>

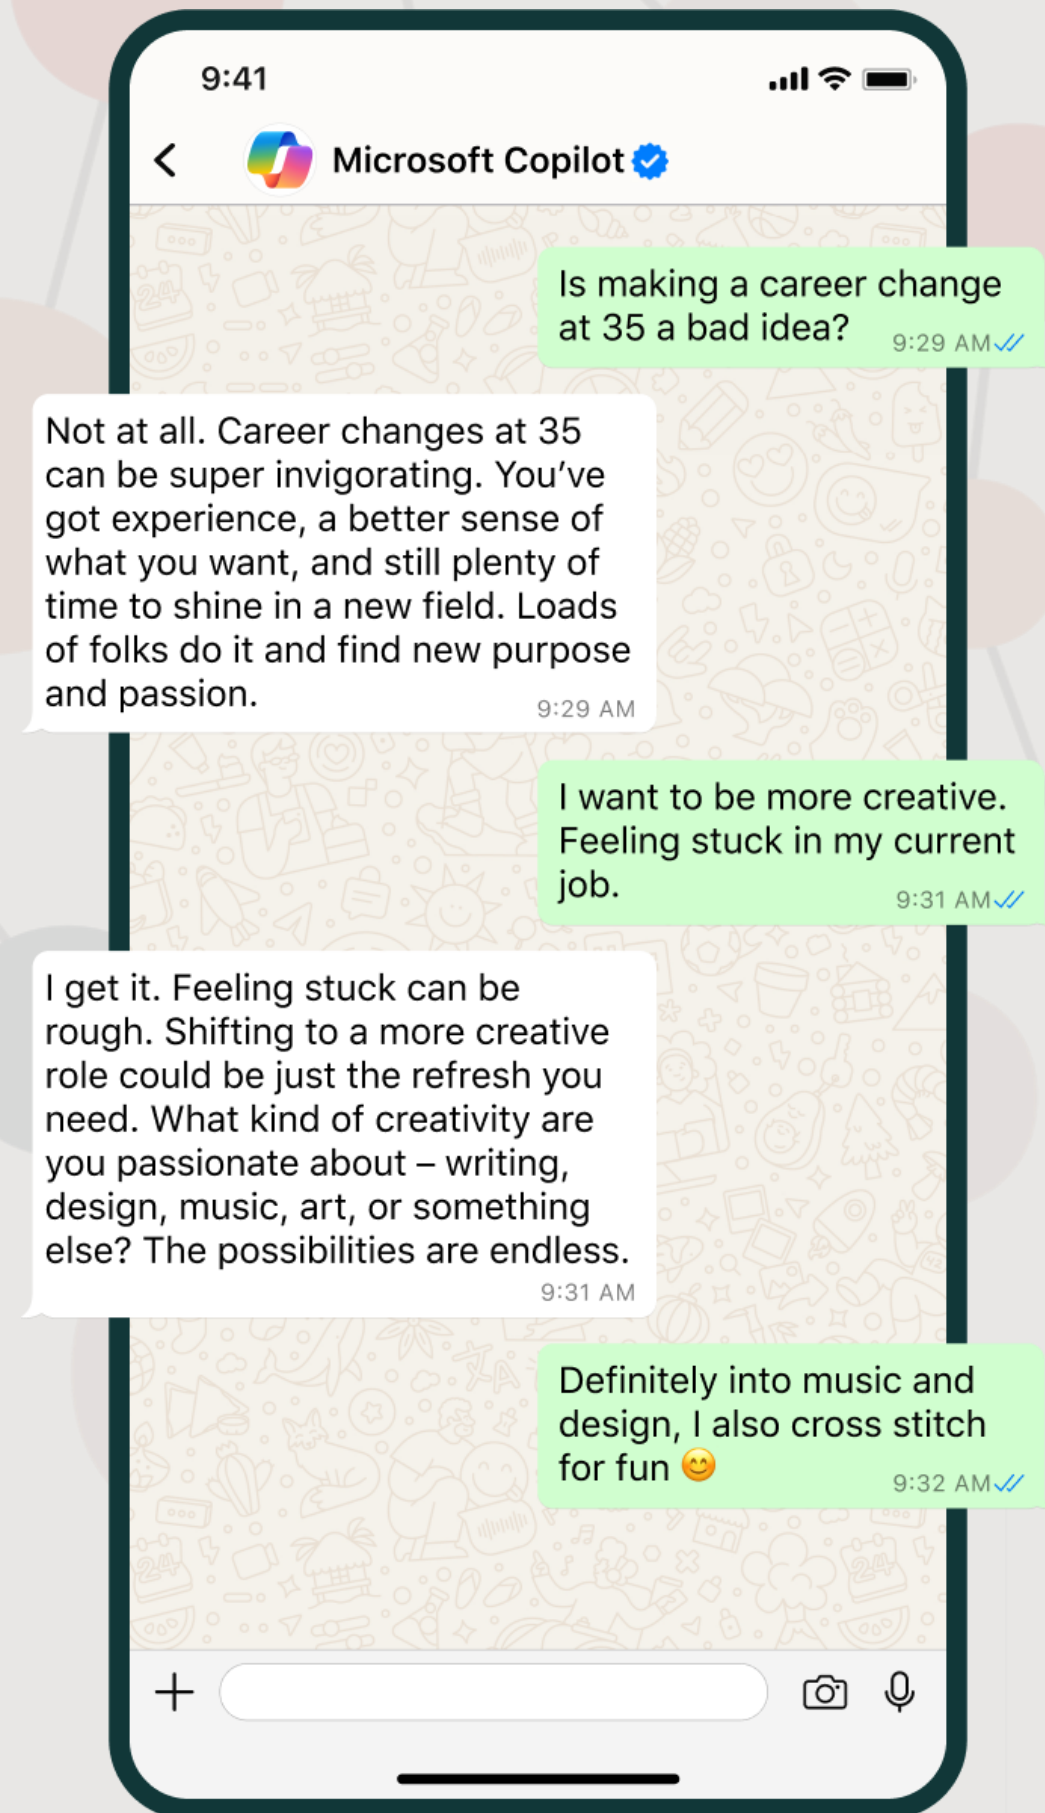

Version Creation		Versions Available		
Date	Versions Created	Manual Expiration limit	Count Limit	Automatic Limits
May	497	497	497	497
Jun	499	499	499	499
Jul	500	2	500	103
Aug		1	500	17
Sep		0	500	17
Oct		0	500	17
Nov		0	500	17

Copilot disponibile in WhatsApp

Copilot è ora disponibile in WhatsApp.
E' possibile interagire tramite Chat 1:1

Self-Service Trial and purchases

E' ora possibile disattivare Trial e acquisti in autonomia da parte degli utenti (era ora!)

The screenshot shows the Microsoft 365 Admin Center interface. The left-hand navigation pane has several items highlighted with red boxes and numbered: 'Settings' (1), 'Org settings' (2), and 'Self-service trials and purchases' (4). The 'Services' tab is selected at the top, and the 'Self-service trials and purchases' item is highlighted in the main list. A red box with the number 3 is also around the 'Services' tab label.

The screenshot shows the 'Self-service trials and purchases' settings page. The 'Copilot for Microsoft 365' product is selected in the list (1). The 'Do not allow' option is selected for self-service purchases (2). The 'Save changes' button is highlighted with a red box and the number 3.

Self-service trials and purchases

View and manage which products users can try or buy on their own, and manage demand.

[Learn more about self-service purchases](#)

Copilot for Microsoft 365 self-service purchases

Give users the flexibility to acquire this product without an administrator's help. This can help admins understand and manage the demand.

[Learn which products offer self-service trials](#)

☐ Allow
Users can try or buy this product on their own.

☐ Allow trials only
Users can try this product for free, but cannot buy it themselves. When the trial ends, it does not convert to a paid subscription, but users might be able to request a paid license from an admin.

☒ Do not allow
No self-service purchases are allowed for this product, but in some cases, free trials might still be available, and users might be able to request a paid license from an admin.

Meeting recap automatically shared in Microsoft Outlook after meeting

After a meeting ends, you will now be able to view a summary of everything that happened by opening the meeting event in calendar for Microsoft Outlook (New)

The summary includes a link to the recap page, transcript, recording, notes, shared files, whiteboard, and meeting details.

If you are licensed for intelligent meeting recap, you will also see highlights such as the number of speakers, number of times you were mentioned, and number of AI-generated tasks.

Intelligent meeting recap is available with a Teams Premium license or Copilot for Microsoft 365 license.

Microsoft Places will be generally available in Q4 CY24

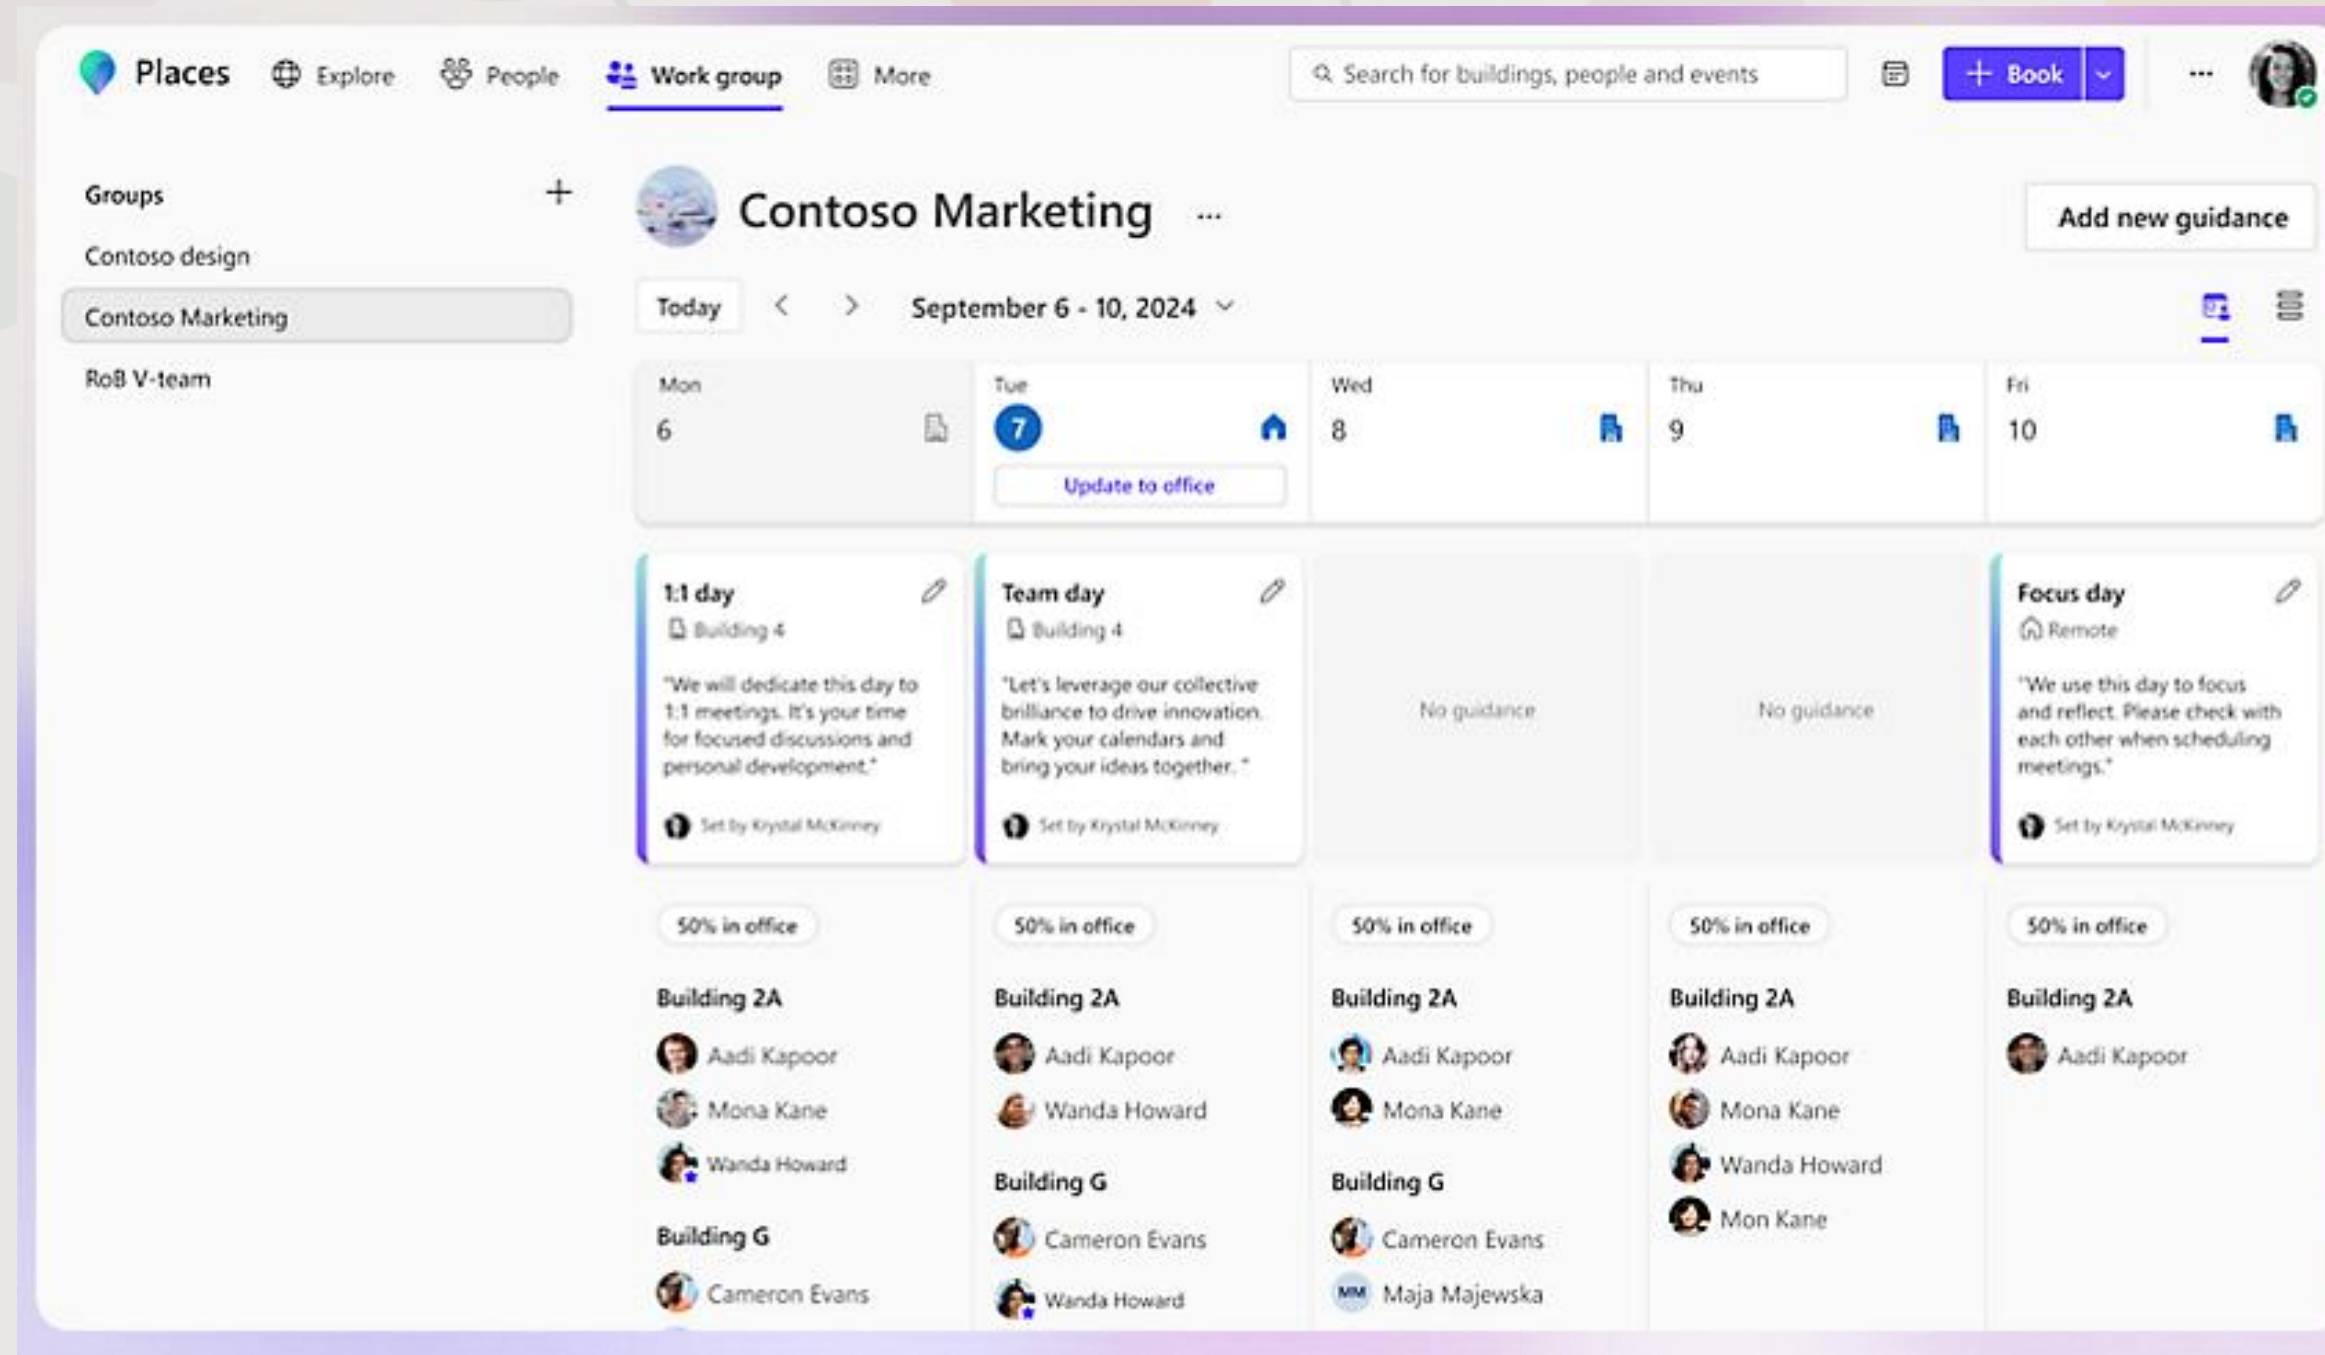

MC901823

There will be two new service plans, Places core and Places Premium (part of Teams Premium).

Microsoft Places Core: Includes setting up location plans, viewing collaborators' plans, scheduling in-person meetings, hybrid RSVP management, and more.

Microsoft Places Premium: Adds features like Places Finder, intelligent booking, Places Explorer, Places Space Analytics, and auto-release policies.

Places Core will be included in most O/M365 plans: Microsoft 365 Business Basic/Standard/Premium and Microsoft 365 or Office 365 E1, E3, E5 Microsoft 365 or Office 365 F3.

Microsoft Places features

Funzionalità principali

Piani di lavoro

Consentire ai dipendenti di condividere la pianificazione della posizione proposta e vedere chi altro sta frequentando di persona.

Eventi di persona

Comunicare facilmente l'intenzione di collaborare con un invito alla riunione di persona.

RSVP ibrido

I partecipanti alla riunione possono condividere se partecipano di persona o in remoto.

Anteprima rapida schede

vedere facilmente chi entra in ufficio e modificare il piano di posizione, direttamente dalla Calendario di Outlook. Ricevere notifiche per prenotare lo spazio nei giorni di ufficio.

Presenza sul posto di lavoro

Aggiungere la posizione al segnale di presenza per indicare quando ci si trova in ufficio, in remoto o in un'altra posizione di lavoro.

Funzionalità avanzate (richiedono Teams Premium)

Places finder

consente agli utenti di prenotare scrivanie, stanze o aree di lavoro con dati aggiuntivi, ad esempio immagini, planimetrie e informazioni sulla tecnologia disponibile in ogni area.

Prenotazione da tavolo

Consenti agli utenti di selezionare e prenotare i singoli desk per la loro giornata in ufficio.

Sale e scrivanie di rilascio automatico

Migliorare l'accesso alle sale conferenze e alle scrivanie, liberandoli per consentire ad altri utenti di riservare se i dipendenti non li usano per incontrarsi in loco.

Analisi dello spazio per edifici e aree di lavoro

Abilitare le visualizzazioni per tenere traccia delle tendenze di utilizzo degli spazi chiave.

Indicazioni per il team

Trovare i migliori modelli di lavoro per i team definendo le aspettative e adattando il ritmo per soddisfare le esigenze del gruppo.

Prenotazione gestita con Copilot

Prenota in modo intelligente in base a vari fattori e fa in modo che Copilot gestisca la tua stanza o scrivania attraverso modifiche, aggiornamenti e conflitti.

Copilot in Planner (Creazione Buckets e Tasks)

Make a plan for a webcast talking about the latest news on Microsoft 365, Copilot and Teams. The podcast is 1 hour and has 3 speakers.

Here is the outline for the webcast I am building:

- Introduction and Welcome:
- Speaker 1 - Microsoft 365 Updates:
- Speaker 2 - Copilot Innovations:
- Speaker 3 - Teams Enhancements:
- Q&A Session:

+ Add goal

Promote the webcast through social media and email campaigns to achieve at least 500 registrations by 11/20/2024

	Name	Assigned to	Priority	Finish
34	<input type="radio"/> Develop social media campaign		Medium	
35	<input type="radio"/> Create email marketing content		Medium	
36	<input type="radio"/> Schedule social media posts		Medium	
37	<input type="radio"/> Send email invitations		Medium	
40	<input type="radio"/> Distribute webcast recording		Medium	
41	<input type="radio"/> Collect feedback from attendees		Medium	
42	<input type="radio"/> Analyze webcast performance metrics		Medium	
<div>+ Add new task</div>				

Develop and finalize the webcast agenda by 11/10/2024

	Name	Assigned to	Priority	Finish
2	<input type="radio"/> Prepare opening remarks		Medium	
3	<input type="radio"/> Create introduction slides		Medium	
7	<input type="radio"/> Gather content for Microsoft 365 updates		Medium	

Speaker 3

+ Add task

☐ Prepare slides for Teams enhancements

☐ Gather content for Teams enhancements

☐ Confirm Speaker 3 availability

Copilot in Planner (Gestione Progetto)

Is there any person in the company with availability in their calendar I can involve for help? Priorise the ones with skills that are relevant.

on the information I found, here are some people in the company with relevant skills who might be available to help:

Megan Bowen: Megan has skills relevant to Microsoft 365, Copilot, and Teams. Megan is involved in

You might want to reach out to Megan Bowen first, as they have the most relevant skills and are involved in multiple related meetings.

Identificare risorse aggiuntive in base al loro calendario e skills

Can you create a report about this project, including a chapter dedicated to the social impact of it, a chapter dedicated to the pros for the company and a chapter with a list of people involved and their skills?

Sure, I can help with that. Here is a report about the webcast project:

Report on Webcast Project

Chapter 1: Social Impact

The webcast project aims to enhance the

The following people are involved in the webcast project:

MOD Administrator: Project Manager, responsible for overseeing the entire project and ensuring its successful completion.

Speaker 1: Responsible for presenting updates on Microsoft 365.

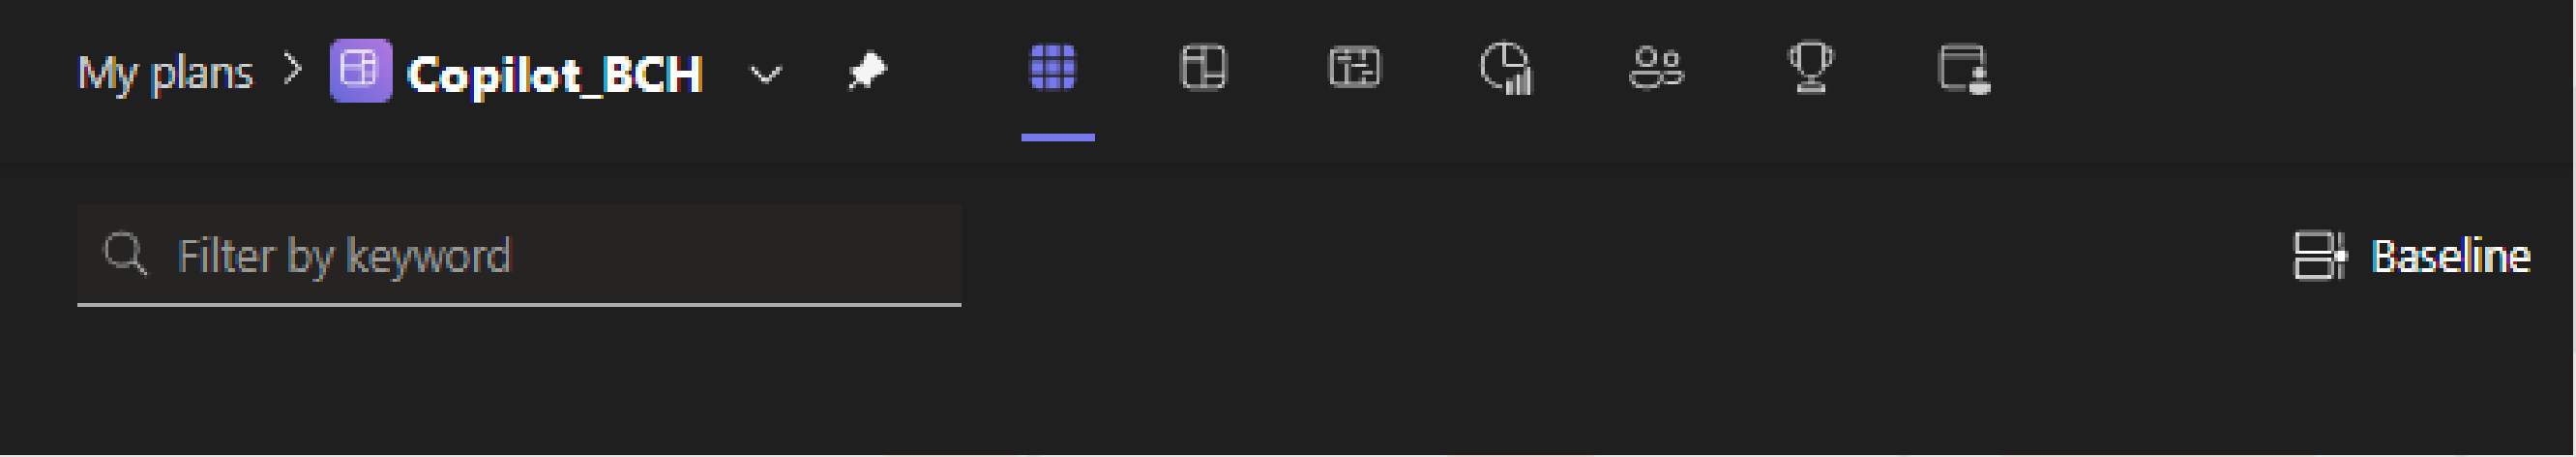

Speaker 2: Responsible for discussing Copilot innovations.

Speaker 3: Responsible for presenting Teams enhancements.

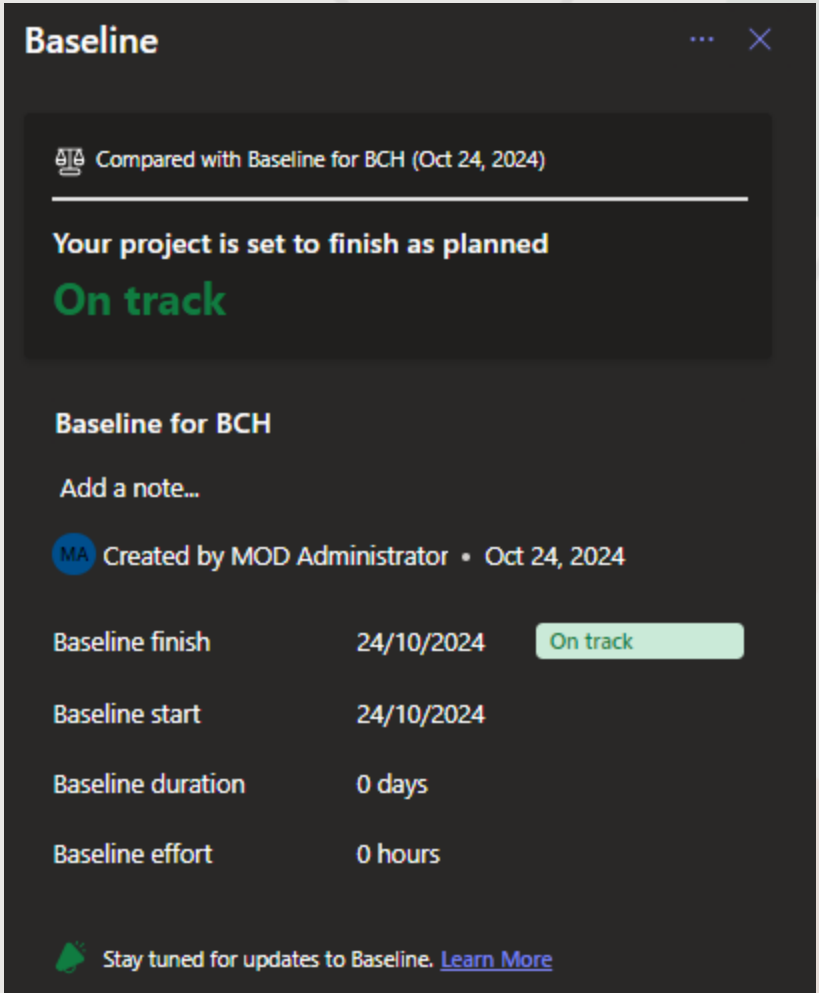

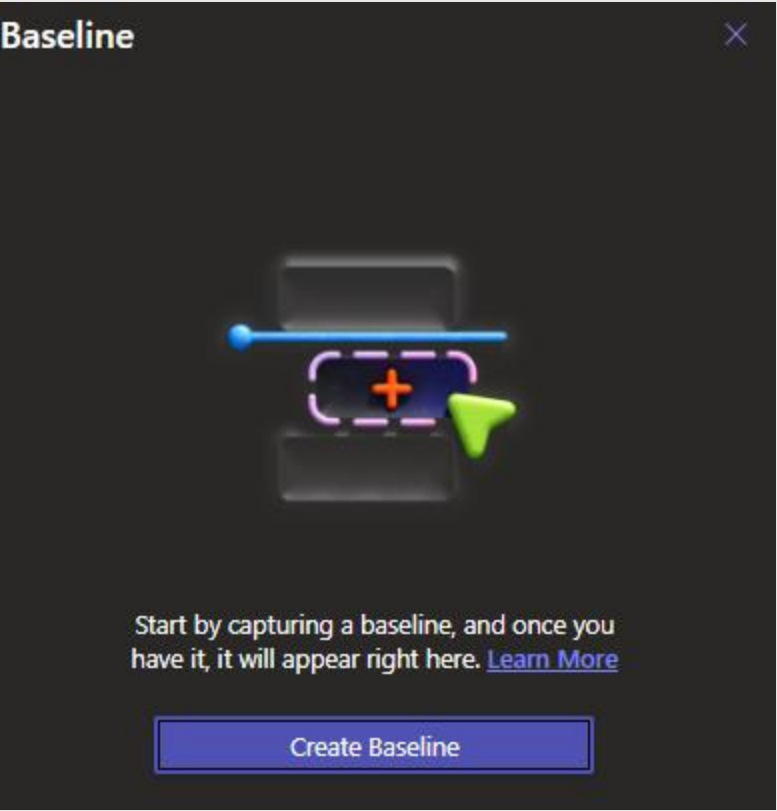

Creare un rapporto basato su una serie di requisiti

Baselines are GA

E' possibile generare una baseline e visualizzare l'impatto dei vari task sul progetto nel corso del tempo.

MFA and Break Glass Accounts

MFA Obbligatoria ed Emergency Accounts

Un account "break glass" è un account specializzato, altamente sicuro, progettato per essere utilizzato solo in situazioni di emergenza.

L'account break glass non viene utilizzato nelle operazioni quotidiane.

Non è assegnato a uno specifico utente.

In alcuni casi, un account break glass può bypassare determinate funzionalità di sicurezza come l'MFA.

"A partire da luglio 2024, i team di Azure inizieranno a implementare ulteriori misure di sicurezza a livello di tenant per richiedere l'autenticazione a più fattori (MFA) per tutti gli utenti. Come già documentato, utilizza un'autenticazione robusta per i tuoi account di accesso d'emergenza.

Raccomandiamo di aggiornare questi account per utilizzare l'autenticazione FIDO2 o basata su certificati (quando configurata come MFA), invece di fare affidamento solo su una password lunga.

Entrambi i metodi soddisferanno i requisiti di MFA.

Queues app for Microsoft Teams now generally available

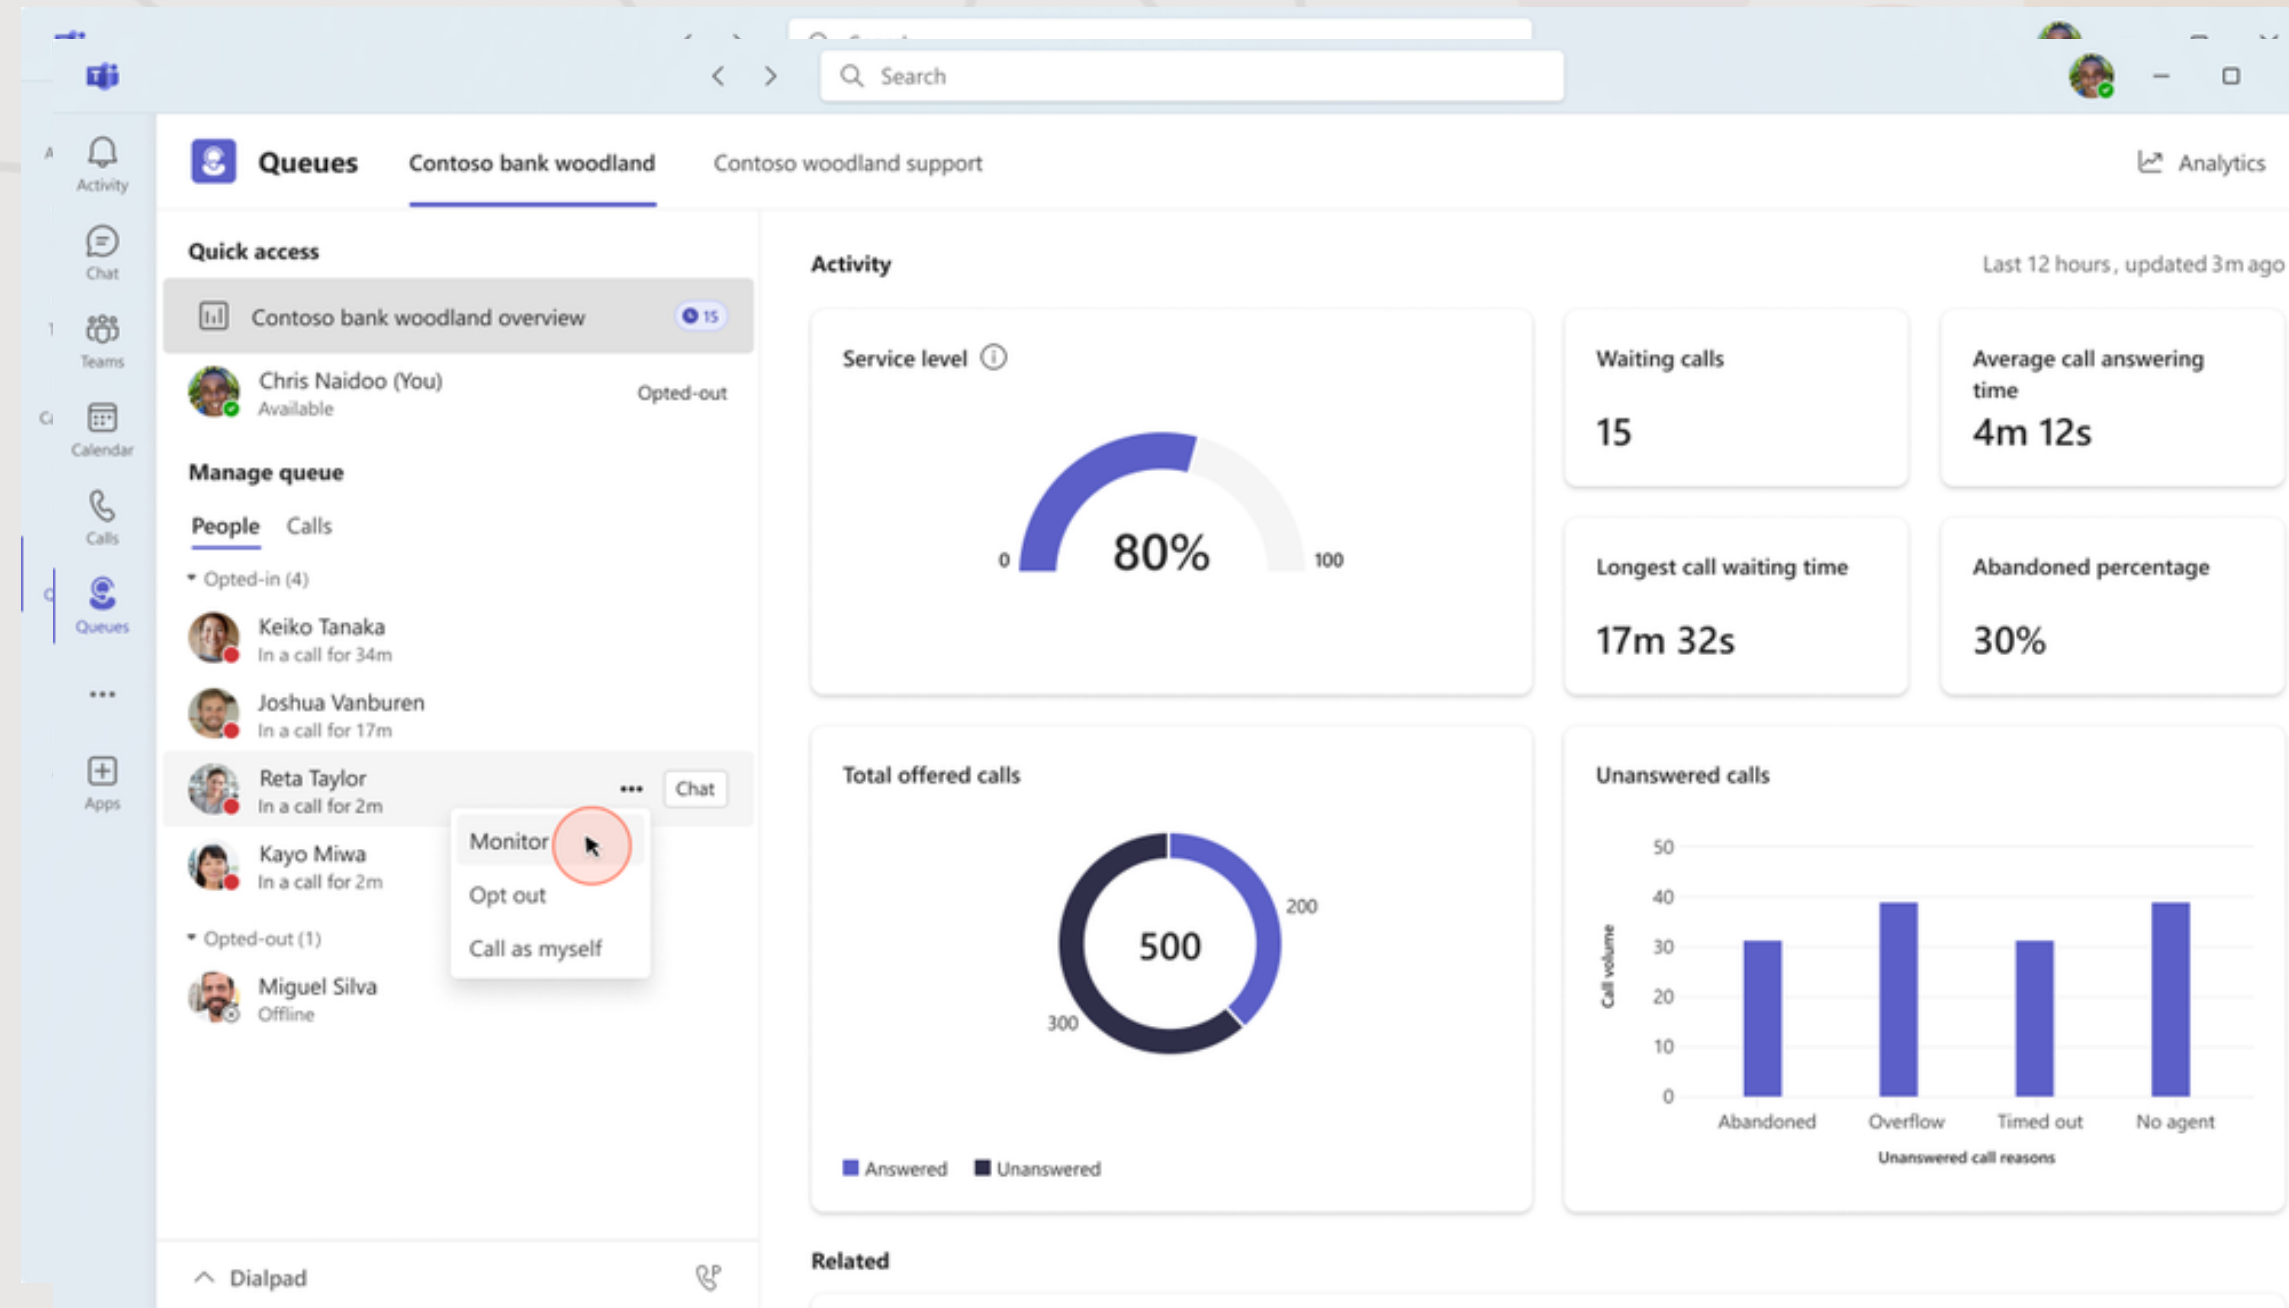

La Queue App è ora in GA

- Call queue management
- Real-time metrics
- Historical reporting

In sviluppo le funzioni di
Monitor/Whispering/Barging/Takeover

Keep the following in mind:

- Queues app is currently only supported on Teams desktop and Mac clients, not on web, mobile, or Virtualized Desktop Infrastructure (VDI) clients
- For the best experience in Queues app, we advise having no more than 100 call queues assigned per user
- There's a limit of 200 agents per call queue

<https://techcommunity.microsoft.com/t5/microsoft-teams-blog/queues-app-for-microsoft-teams-now-generally-available/ba-p/4276837>

Collaborative Call Delegation

■ ■ ■ Microsoft Teams: Collaborative call delegation on Teams phone devices

Rollout Start: January 2025

Teams phone device users will be able to share access to their phone line with a specific group of users, without a structured delegation system. This enables group members to receive calls and initiate calls on behalf of others, enabling a simple and collaborative communication experience.

Feature ID: 416288

Added to roadmap: 10/3/2024

Last modified: 10/8/2024

Product(s): Microsoft Teams

Cloud instance(s): GCC High, Worldwide (Standard Multi-Tenant), GCC

Platform(s): Android

Release phase(s): General Availability

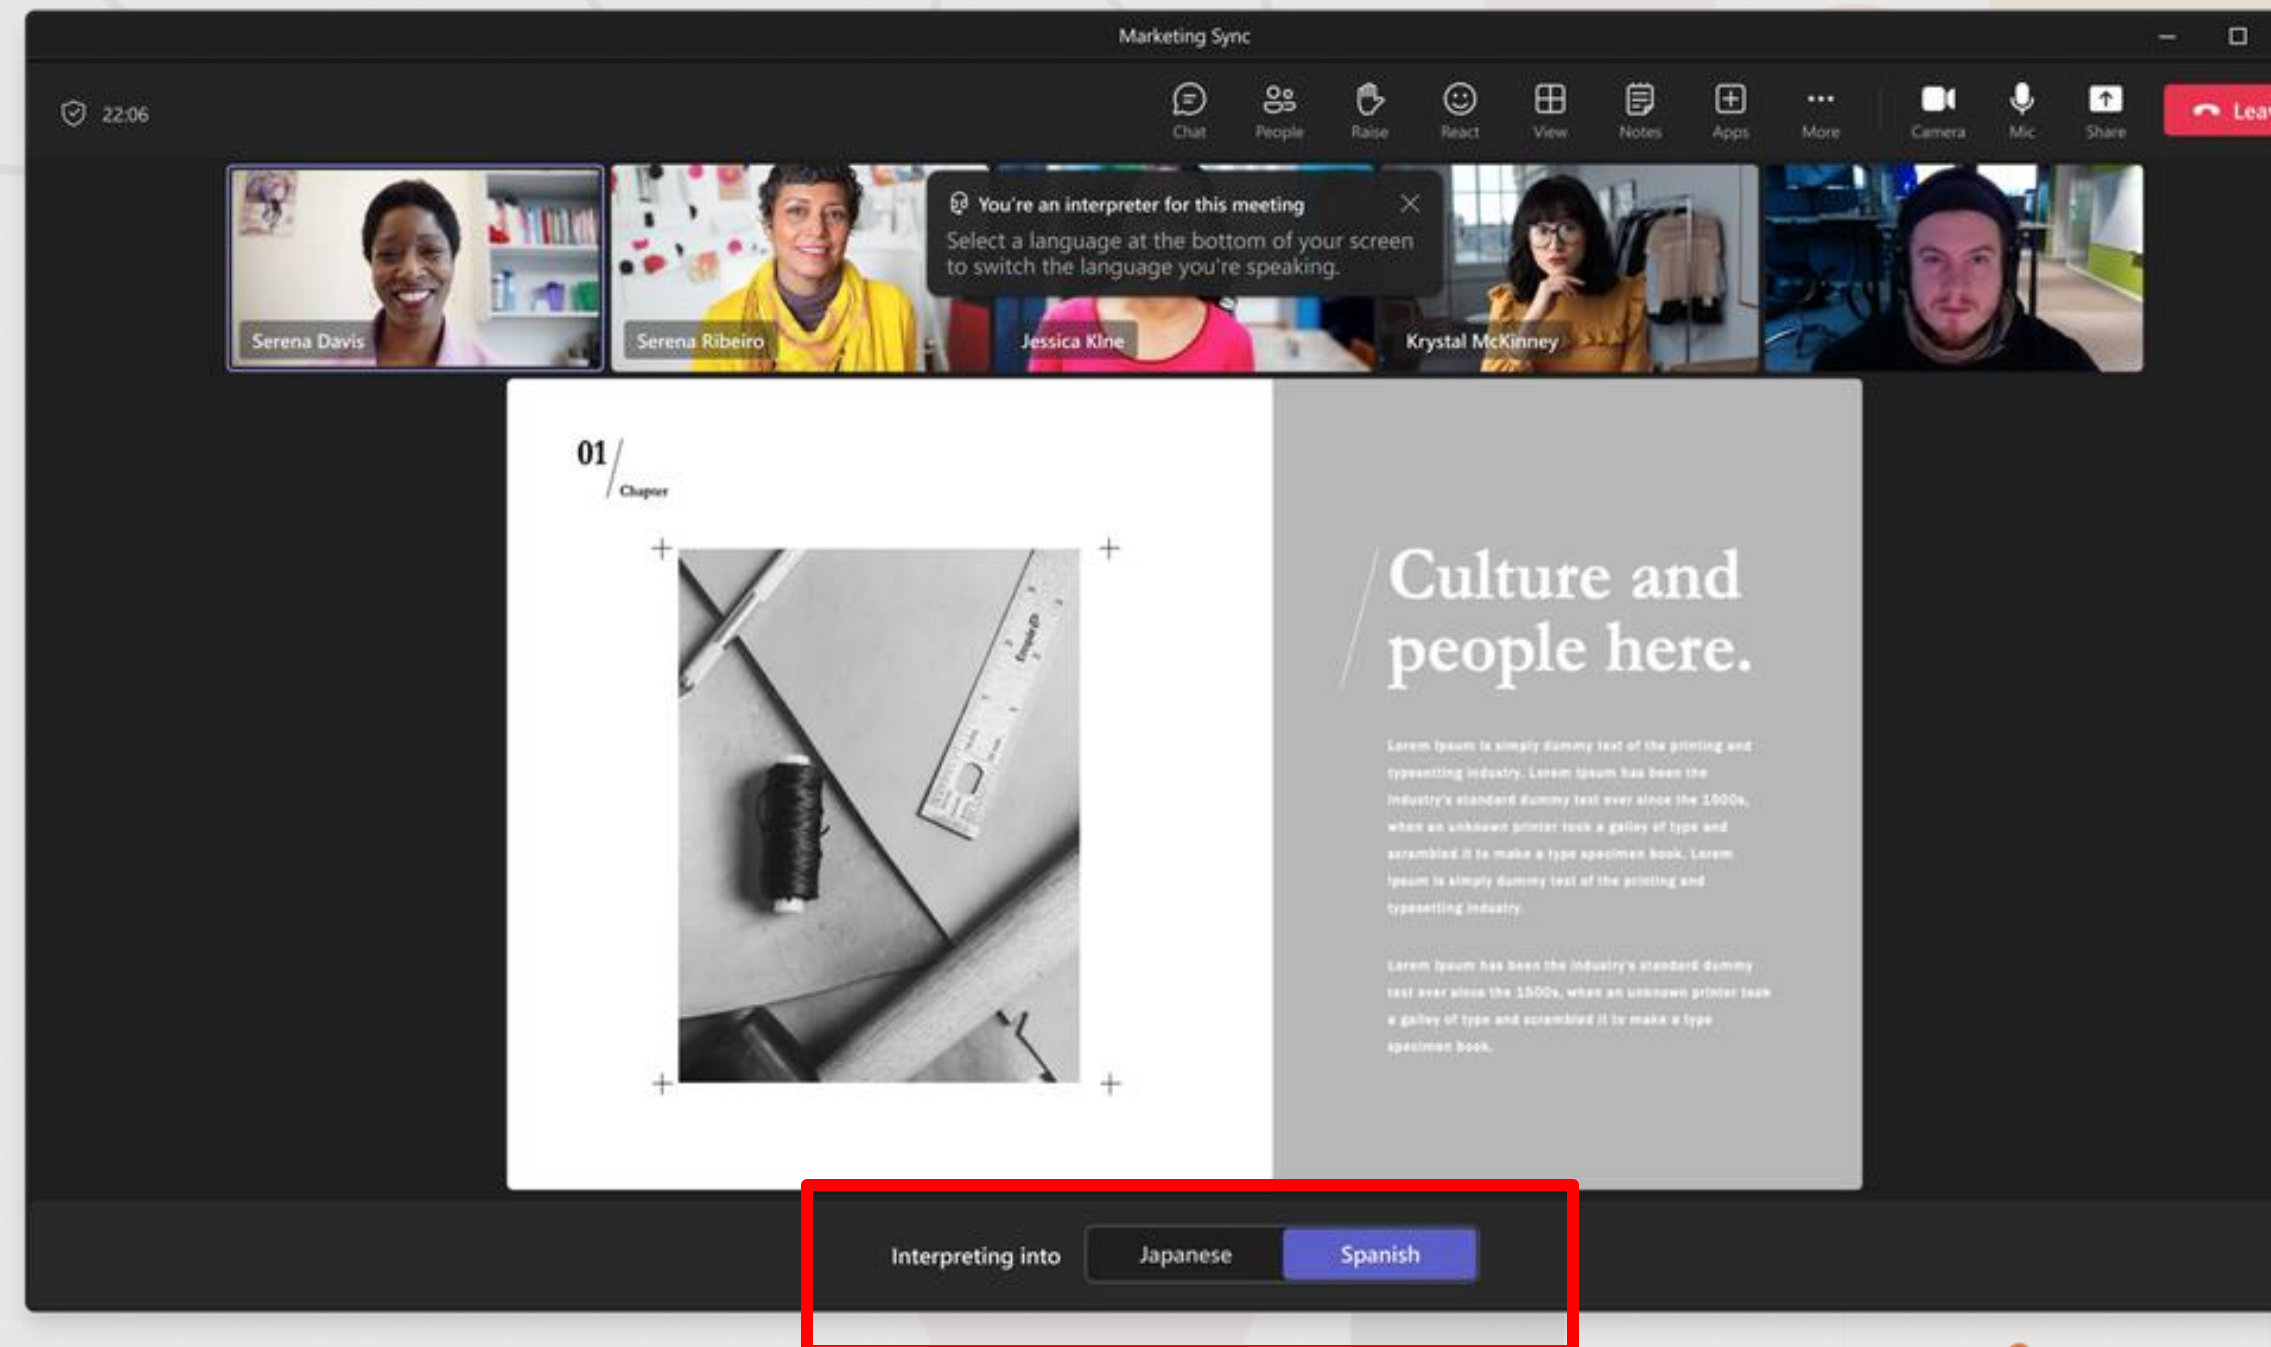

Interpreters can indicate which language they're translating

Now, interpreters using language interpretation in Teams can show which language they are translating with the click of a button.

To highlight the language they will interpret into, they can select one of the two pre-selected options at the bottom of the screen.

When the interpreter wants to translate the other language, they simply switch the toggle.

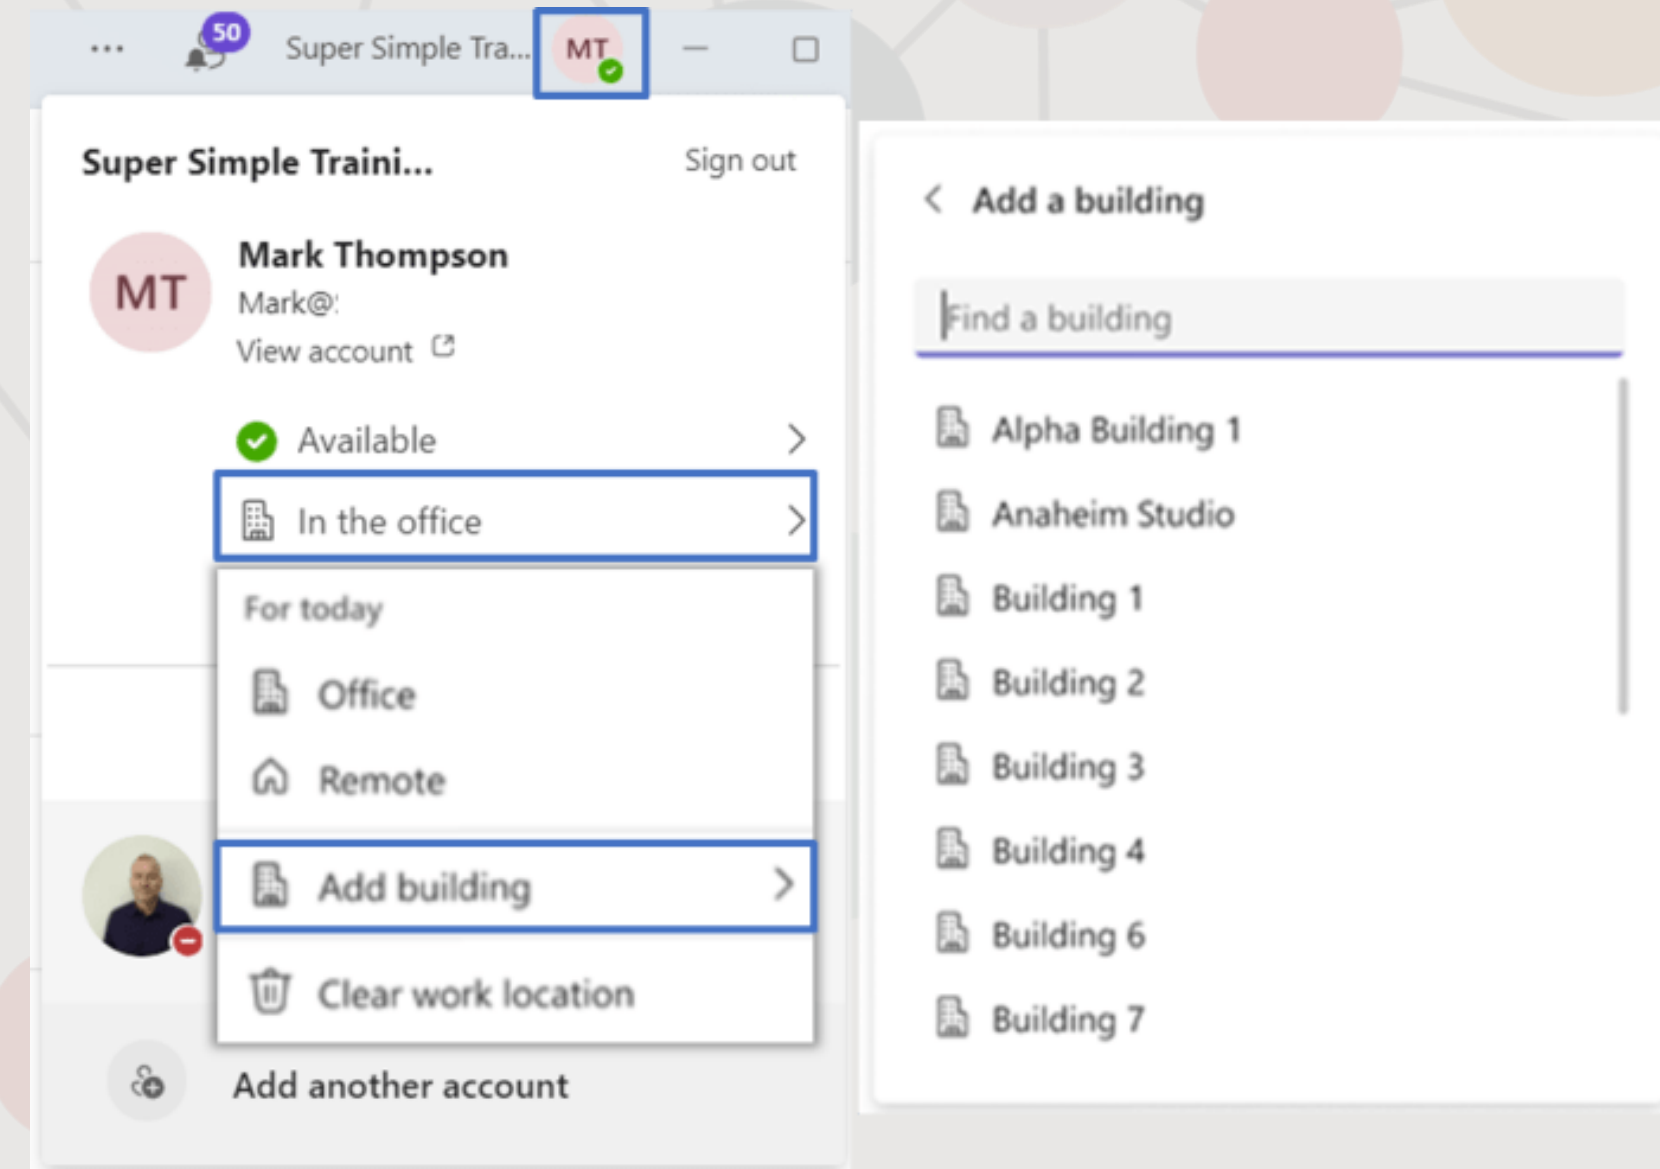

This enables efficient real-time translation using just one interpreter, and eliminates the need for a second interpreter or additional device

Adding a location to your presence in Microsoft Teams

MC896703

If your organisation is using Microsoft Places, you can add a location to your presence signal to indicate when you're in a particular office building.
Due early to mid-November 2024.

Reference: Mark Thompson

Microsoft Teams: UDP Signaling Ports configuration change

Message ID: MC898392

Published: Sep 26, 2024

Tag: ADMIN IMPACT

Coming soon: To enhance the efficiency of Microsoft Teams, we will implement a significant update to the UDP signaling ports used for Calling and Meetings.

Before this rollout, Teams uses UDP Source Ports 49152-65535 for Calling and Meetings signaling API Calls. This includes functionality such as mute/unmute, hold, adding participants, and reactions.

After this rollout, Teams will transition UDP signaling from source ports 49152-65535 to 50070-50089, maintaining the destination UDP port 3478. This change aims to reduce the number of ports used and enable you to apply Quality of Service (QoS) DSCP markers to this traffic.

When this will happen: General Availability (Worldwide): We will begin rolling out early October 2024 and expect to complete by early October 2024.

What you need to do to prepare:

Allow UDP Source Ports 50070-50089 to Destination Ports 3478 to 52.112.0.0/14, 52.122.0.0/15, 2603:1063::/38 (ID 11, Optimized Category for Microsoft Teams). Since the new range is a smaller subset inside of the existing ranges, no changes should be required for admins currently allowing UDP signaling.

Planned maintenance for all certified and supported Teams Android Devices to Company Portal version

Message ID: MC898390

Published: Sep 26, 2024

Tag: ADMIN IMPACT

Sommario

Gli aggiornamenti automatici per i dispositivi Android Teams alla versione 5.0.6152.0 del Portale aziendale sono pianificati a partire da metà ottobre 2024 fino alla fine di dicembre 2024

I dispositivi che eseguono versioni precedenti potrebbero essere instabili dopo il 1° luglio 2025.

Le organizzazioni devono assicurarsi che i dispositivi siano aggiornati e controllare l'interfaccia di amministrazione di Teams per le versioni correnti del firmware e delle applicazioni.

Gli aggiornamenti accelerati verranno eseguiti al di fuori dell'orario di lavoro, sostituendo le normali tempistiche di aggiornamento e le finestre di manutenzione.

I dispositivi non più supportati non riceveranno aggiornamenti.

La preparazione può includere aggiornamenti manuali o consentire l'esecuzione di aggiornamenti automatici.

Ultrasound proximity join (MTR Windows)

Proximity join using ultrasound enables you to accurately identify and add a specific Teams room to your meeting.

Your device will detect ultrasonic signals emitted by Teams rooms and provide a precise list of nearby rooms on the pre-join screen.

The Proximity Join via ultrasound works by emitting an ultrasonic (19.5 kHz - 21.5 kHz) signal from the Teams Room console that isn't audible to humans.

It's more accurate than Bluetooth because at reasonable volume, it won't penetrate through walls. Plus, the signal is paused when the Microsoft Teams Room is either in a meeting or HDMI ingest is active.

Ultrasound supported devices

Roster grouping for proximity join participants (MTR Windows – MTR PRO)

When you are in a Teams Room on Windows and join a meeting through proximity join with a laptop or mobile device, Teams will show that you are in the room, and group you with other in-room participants.

This visibility allows all meeting participants to be able to quickly understand who is in what room all from a quick scan of the roster.

Available in Teams Rooms Pro.

Dynamic video tile re-sizing based on people count

The room video tile dynamically adjusts size based on the number of people in the room.

When one person is in the room, the tile matches the size of a remote participant.

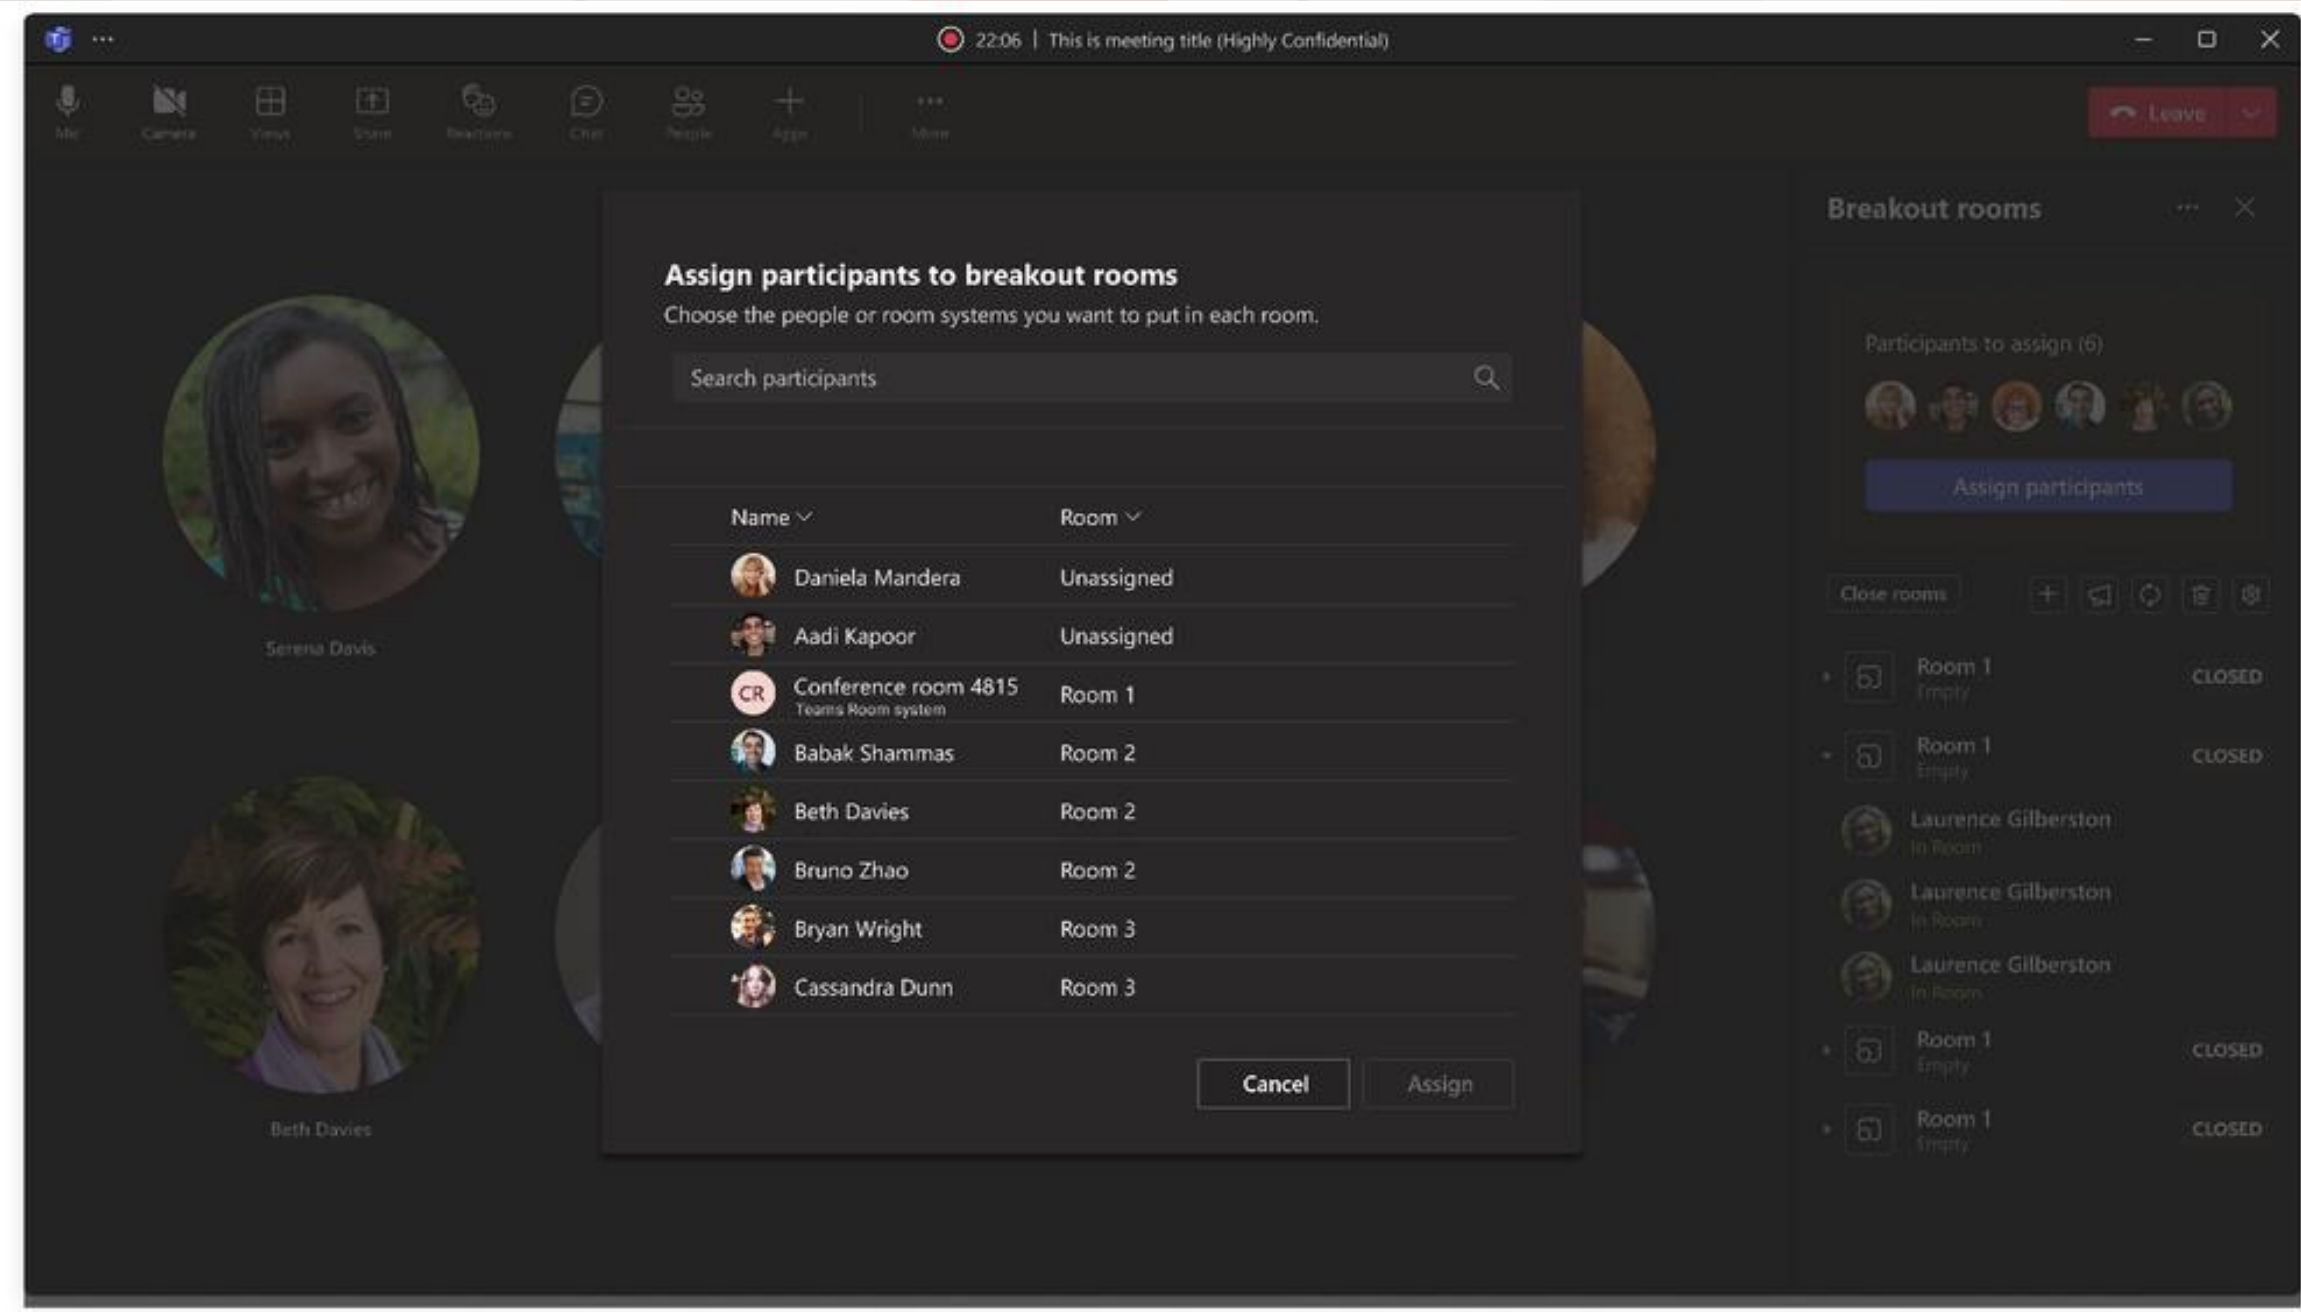

With two or more people, the room tile expands to be four times larger.

Admins have the ability to disable this feature.

Breakout room support

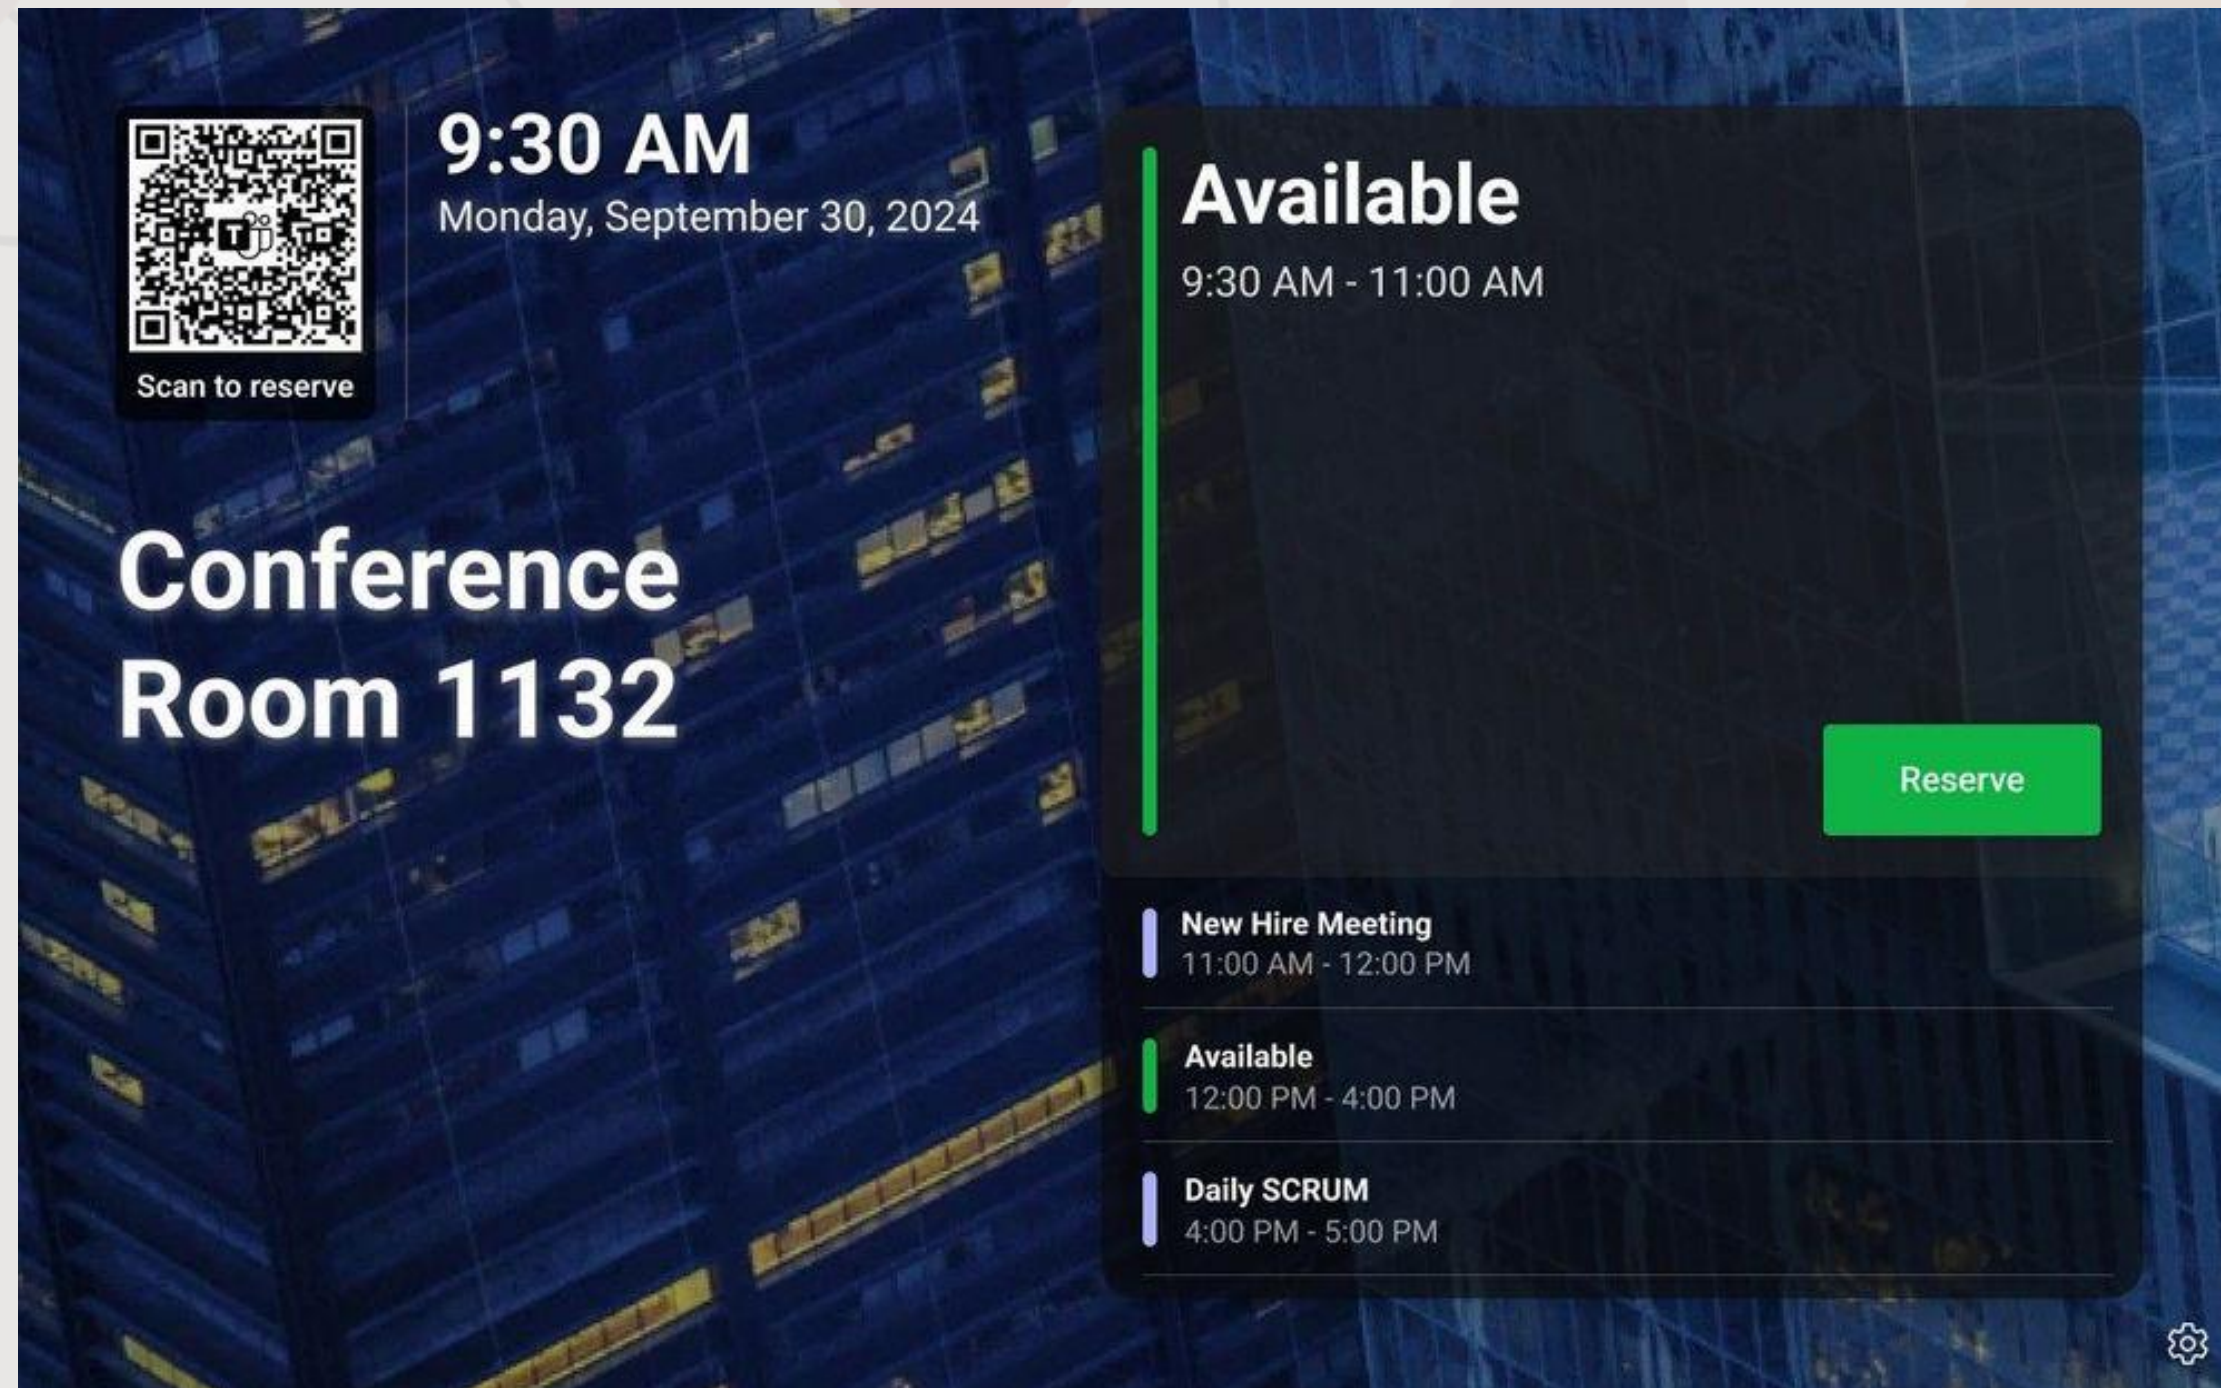

With breakout room support, Teams Rooms on Windows can be added to a breakout room and moved in and out of the main room making it easy for breakout session coordination.

Manage custom background images on Teams panels

Admins can now upload and set images that showcase your organization's branding with custom themes on Teams panels through the Teams admin center (TAC).

This feature is available for panels that are licensed with a Teams Rooms via the Teams Rooms Pro license or standalone via the Teams Shared Device.

Daily restart window on Teams panels

Teams panels will now automatically restart daily like Teams rooms.

By default, the device will restart between 2:00am and 3:00am in its local time zone.

If the device is in use during this window and the window period ends, the restart is rescheduled the following day.

This feature can be turned off or the restart time can be changed in the device settings or Teams admin center.

MAJOR UPDATE ADMIN IMPACT

FEATURE UPDATE USER IMPACT

Updated September 26, 2024: We have updated the content. Thank you for your patience.

Starting October 16, 2024, we're gradually enabling IPv6 for all customer Accepted Domains that use Exchange Online for inbound mail. Microsoft is modernizing Exchange Online so our customers can easily meet their local regulations as well as benefit from the enhanced security and performance offered by IPv6.

More information on IPv6 support for Microsoft 365 services can be found at: [IPv6 support in Microsoft 365 services](#)

When this will happen:

October 16, 2024 (previously October 1, 2024)

How this will affect your organization:

After we enable IPv6 for your Accepted Domains, when someone tries to send an email to one of your users and queries the MX record for the domain, they will receive both IPv4 and IPv6 addresses (AAAA records) in response to their MX record query.

What you need to do to prepare:

To take advantage of IPv6 connectivity, please make sure that you and your partner's update network allow-lists to allow Exchange Online IPv6 endpoints in the same way it allow-lists IPv4.
