Teams 2.1 is
coming...

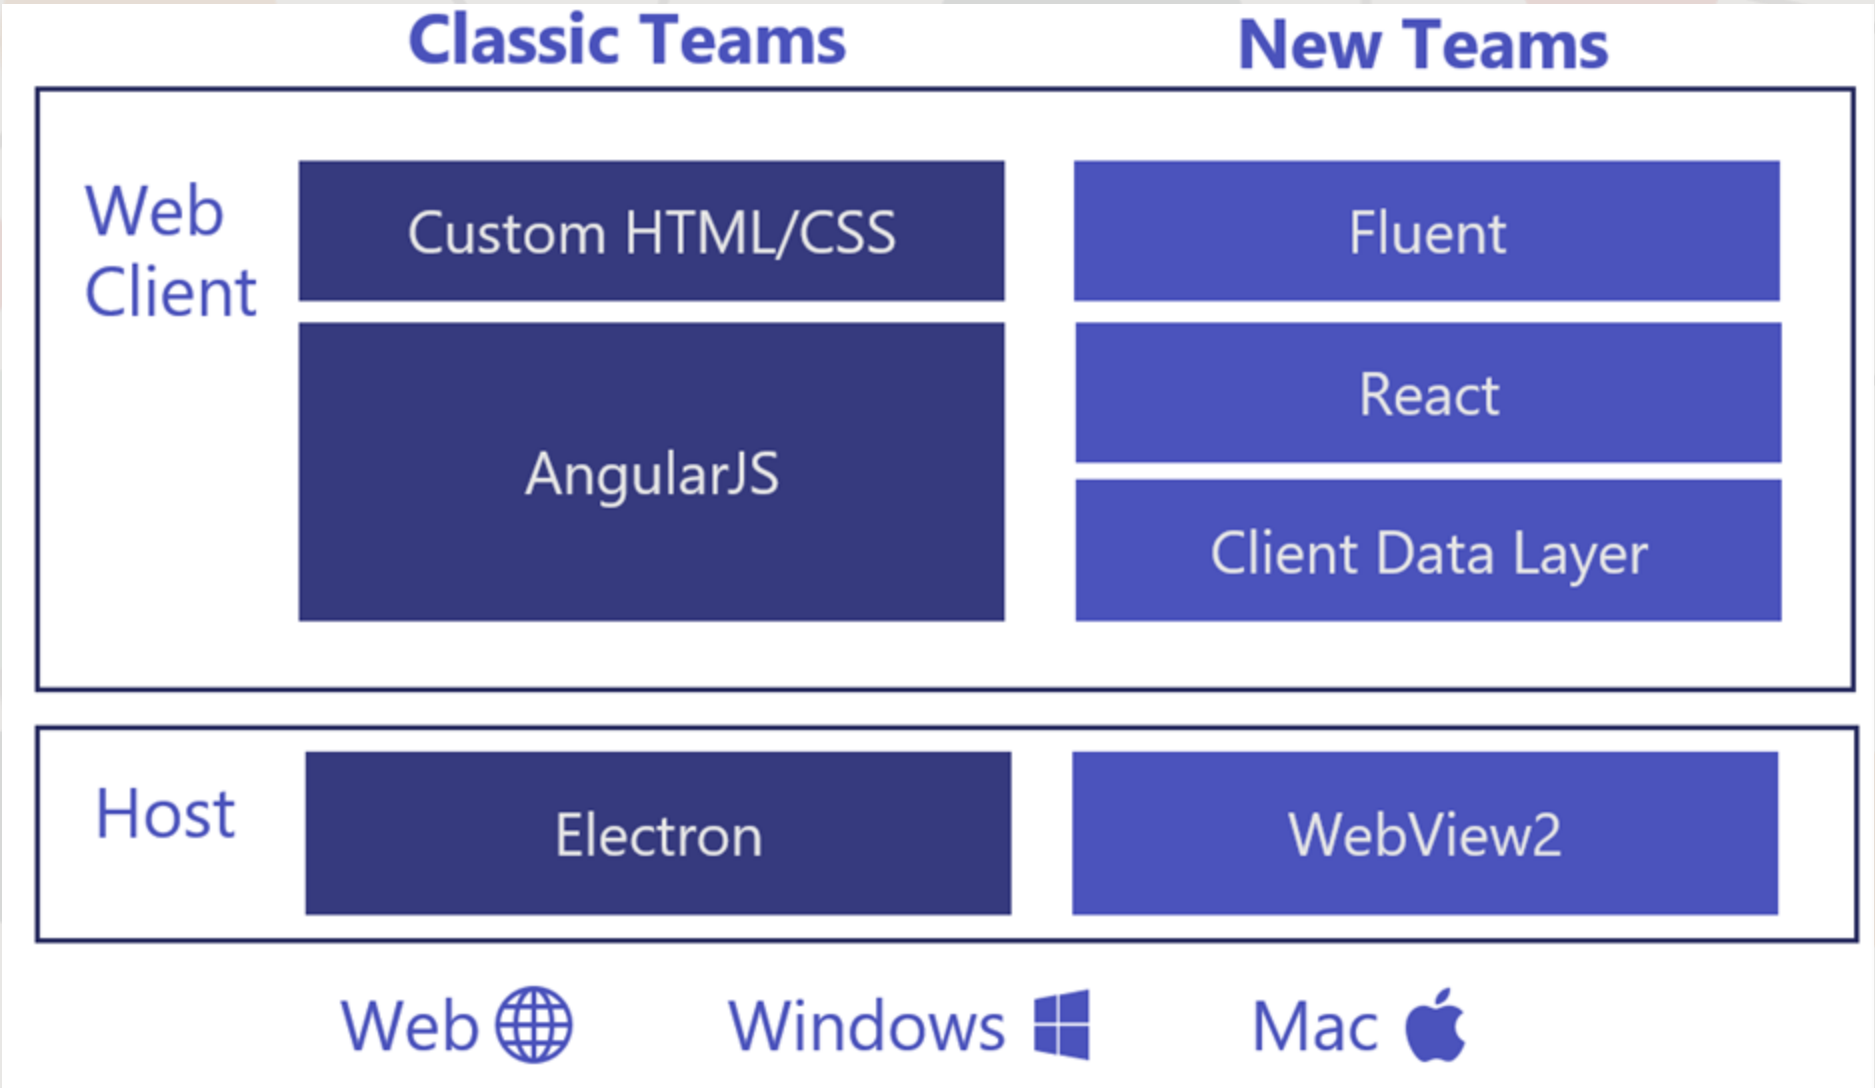

Teams 2.1 is coming...

Fluent UI (v9)

The Fluent UI collection of User Experience (UX) controls enabled us to standardize common components and achieve consistent results across platforms. The use of these responsive, cross-platform styles and controls led to improved responsiveness compared to many of our custom controls and ensured a consistent and cohesive experience across all devices.

React

The decision to transition from AngularJS to React was primarily based on performance characteristics and benchmarking results specific to our use cases. This shift and choices with the re-write, has resulted in a smaller more modular codebase, improved support for shareable components, and increased responsiveness.

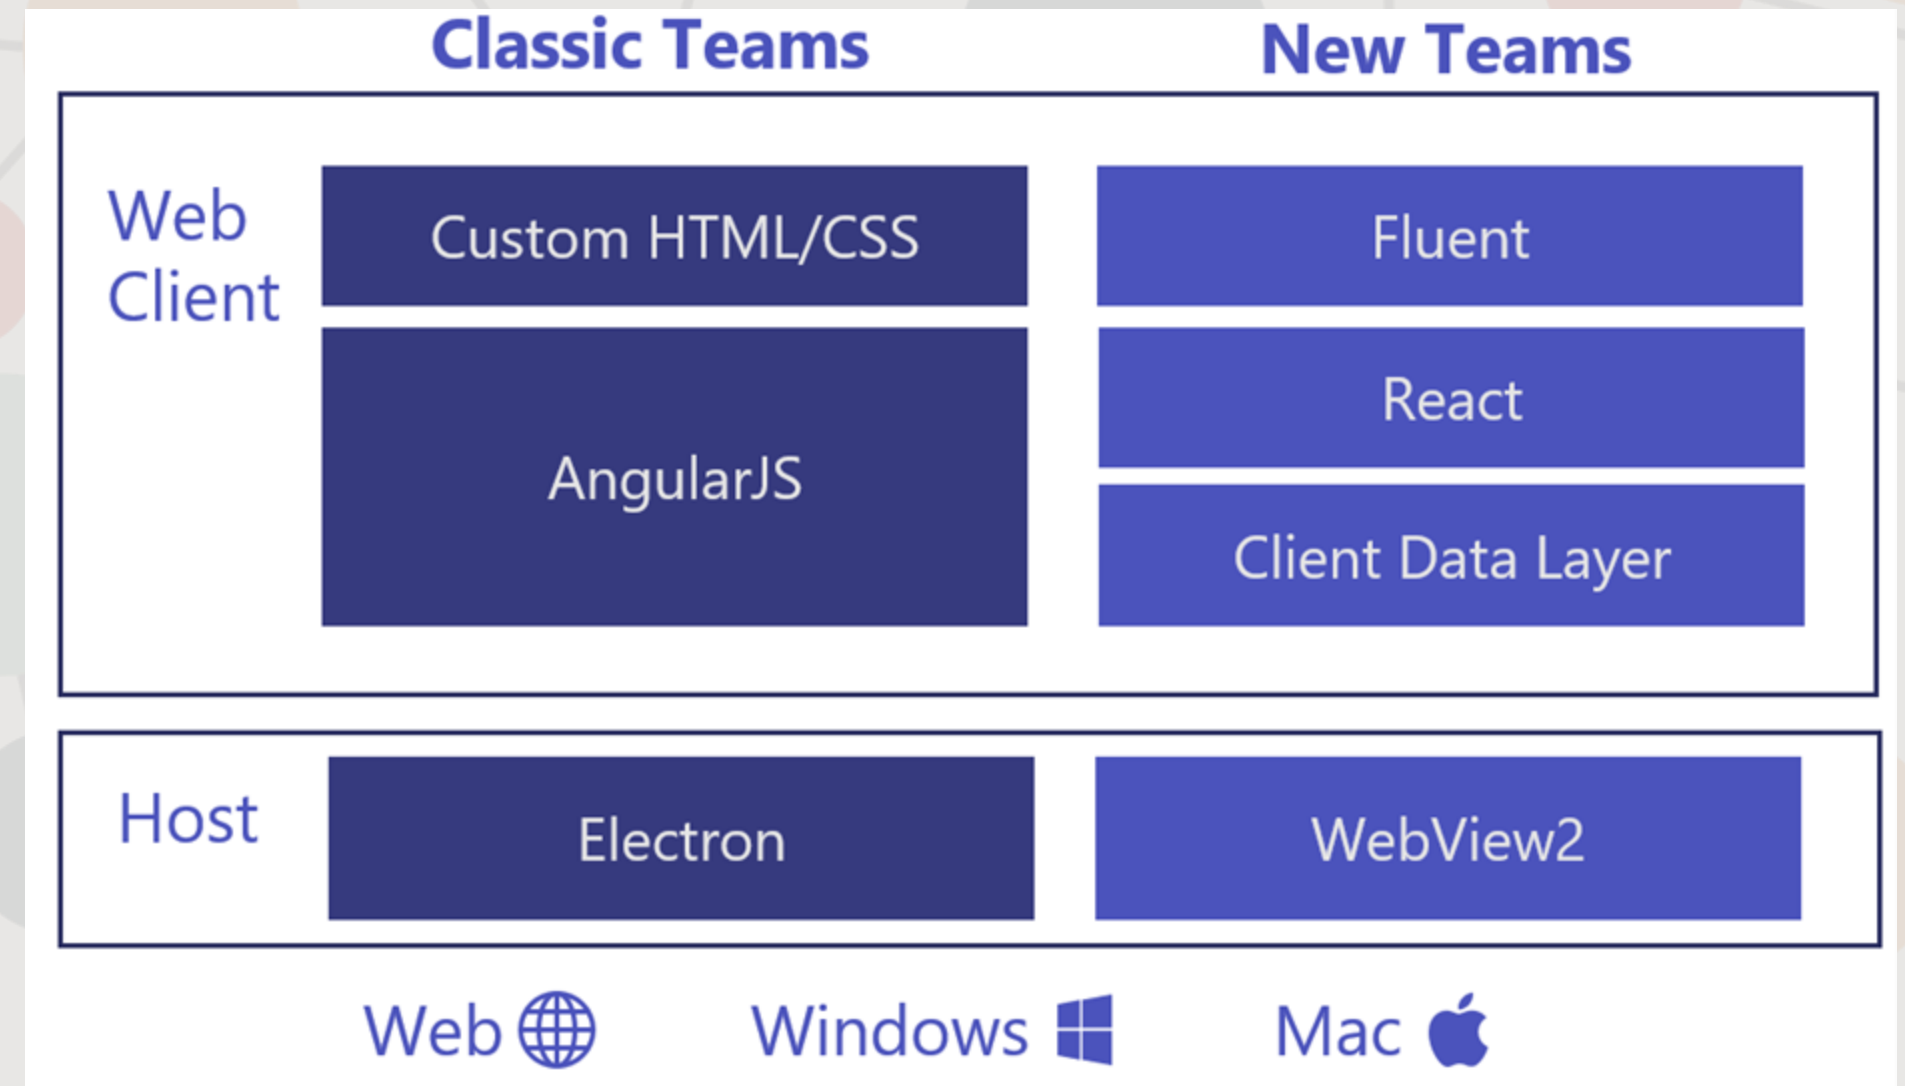

Teams 2.1 is coming...

Client Data Layer

One of JavaScript's core is its single-threaded nature. To overcome this limitation, we implemented a solution by moving the data management to a separate worker, known as the client data layer. This enabled data fetch, data storage, data compliance operations, push notifications, and offline functionality to run in parallel threads, without adding contention to the main user interface thread. By offloading data processing off the main thread, we observed an improvement in the responsiveness of the user experience.

WebView2

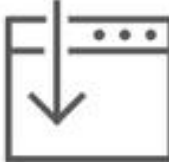

The key benefits observed from the transition from Electron to WebView2 include reduced memory usage and a lowered disk footprint as resources are shared with Edge. Additionally, we have been able to take greater advantage of the native capabilities provided by WebView2 and ensure support for more up-to-date versions of Chromium (latest performance and security updates). This transition has been a positive step towards delivering better user experience.

Teams 2.1 is coming...

 Rearchitected video rendering pipeline / Large scale meetings

 Multi Account / Multi Tenant

 Streamline app installation (MSIX)

 Harden Security

 Optimize Memory / Get what you need (Partial Data)

 Moving from polling to push notifications

 Expand performance infra and tooling

 Embrace Open Source

 Simplify Accessibility

Classic Teams users to be updated to new Teams after 31/03/2024

This automatic update does not apply to Virtualized Desktop Infrastructure (VDI) users. Classic Teams for VDI will reach end of support on June 30th, 2024.

Microsoft Teams Room (MTR) and Surface Hub devices aren't affected by the March 31, 2024 timeline.

Teams 2.1 is coming...

Classic Teams	New Teams
Allow users to follow another user's presence, then notify them of availability	Select a user's avatar or profile photo anywhere in new Teams to quickly get an overview of their online status, next available calendar slot in Outlook, work hours, local time, or work location either remote or in office.
Contacts in chat	You no longer can access Contacts from Chat. Instead, use the new People app. Pin it to your left navigation pane by selecting the (...) menu, right-click People , and then select Pin.
Windows notifications	Teams notifications are now fully served from Teams and all notifications preferences are handled within Teams Settings.
Teams Theme Setting	Consistent with other Office applications, Teams Theme setting follows the OS Theme by default. Users can change this default in Teams Settings > Appearance and Accessibility .
Look up an organizational chart while in a 1:1 chat	Select a user's avatar or profile photo anywhere in Teams and navigate to the organizational chart within the profile card.
Settings dialog	Teams Settings is now an app accessed from the More options menu (...) in the title bar.
Search box commands	The following commands are no longer available in the new Teams search box: /activity, /files, /goto, /help, /join, /keys, /mentions, /org, /saved, /testcall, /unread, /whatsnew, /who.
Adding a Wiki to a channel tab	You no longer see a Wiki app. Instead, select the Notes app.
Adding third party cloud storage service from Files app and Files tab in channels	You no longer see the "Add cloud storage" in the OneDrive app on Teams' left navigation bar or within the Files tab in Teams channels. Now you can add the third party storage app directly from the Teams App Store.
Adding a document library (DocLib) app to a tab in channels	Use the Sharepoint app instead. Then add the document library from there as a tab to the channel. Existing document libraries automatically convert to a SharePoint document library on first use.

Teams 2.1 is coming...

Classic Teams	New Teams
Activity tab in chat	No longer available.
Look up LinkedIn while in a 1:1 chat	Select a user's avatar or profile photo anywhere in Teams and navigate to the LinkedIn tab within the profile card.
Edit team name and change team picture from Edit team view.	Team owners can edit team name and change team picture in the team Settings tab by selecting More options (...) > Manage team .
Ability to choose EDU themed team avatar from a list in the Edit team view In Microsoft Teams for Education	No longer available.
Files app on Teams left navigation pane	The OneDrive app replaces the Files app on the left navigation pane.
Ability to use tags in the "Add member" dialog.	There's now an advanced flow for tags.
About links in the More options menu (...)	About links are now in the Settings app under the About Teams category.
Help in the app bar	The Help entrypoint, including Help links and Give Feedback is now located under the More options menu (...) in the title bar.
Ability to sign out from the notification area at the far right of the taskbar (system tray).	No longer available.
Ability to build Teams personal apps using Adaptive cards	No longer available.

Teams 2.1 is coming...

I contatti sono stati spostati dalla Call App a una nuova App specifica, chiamata Persone (People)

Il problema presente inizialmente (i numeri chiamati tramite Click-to-Call perdevano il +) è stato recentemente risolto

Teams 2.1 is coming...

The screenshot displays the Microsoft Teams application window. The top navigation bar includes a search bar with the text 'Cerca', a user profile for 'ACS Data Systems', and window control buttons. Below this, the main header features the 'Avvia riunione' button, which is highlighted with a red rectangle. To its right are buttons for 'Partecipa con un ID', 'Riunione immediata', and 'Nuova riunione'. The left sidebar contains navigation icons for 'ACS Group', 'Azioni', 'Chat', 'Team', 'Avvia riunione...' (highlighted with a red rectangle), 'Calendario', 'Persone', 'Chiamate', 'OneDrive', 'Tasks di Pla...', and 'App'. The main content area is divided into two sections: 'A seguire' (Up next) and 'Recenti' (Recent). The 'A seguire' section shows two upcoming meetings: '[BCD & CD] Onsite Board Meeting' (Today, 09:00 - 17:00) and 'TAP100: Teams Devices CAB/Validations/Quality Hour' (Today, 17:30 - 18:15). The 'Recenti' section shows two recent meetings: 'Azure Logic Apps - Rules Engine Deep Dive - Optio...' (Yesterday, 18:00 - 19:00) and 'Copia: MGCI Office Hours' (Yesterday, 17:05 - 17:30).

Teams 2.1 is coming...

General availability of the new Microsoft Teams app for virtual desktop infrastructure (VDI)

Users and admins can now experience and enjoy all the benefits of the new Teams app within their virtual desktops.

The new Teams App in VDI has feature parity with classic Teams app and also has improved performance, reliability, and security.

Features not supported in VDI

The following features aren't supported in either classic Teams or new Teams.

- QoS
- 1080p
- Custom Backgrounds uploaded by users
- Teams Premium features (End to End Encryption, Watermark, Premium Events aren't optimized, Custom meeting backgrounds for organizations)
- Avatars
- Gallery View 3x3 and 7x7
- Noise Suppression
- Zoom In / Out
- Location Based Routing
- Media Bypass
- HID (Citrix only)
- Share System Audio (Citrix and VMware)
- Broadcast and live event producer and presenter roles
- “Record video clip” doesn't capture screen share
- The call monitor (the small floating window after you minimize the main Teams window) doesn't display video or screen share

Teams Premium: cosa aggiunge (ad oggi)

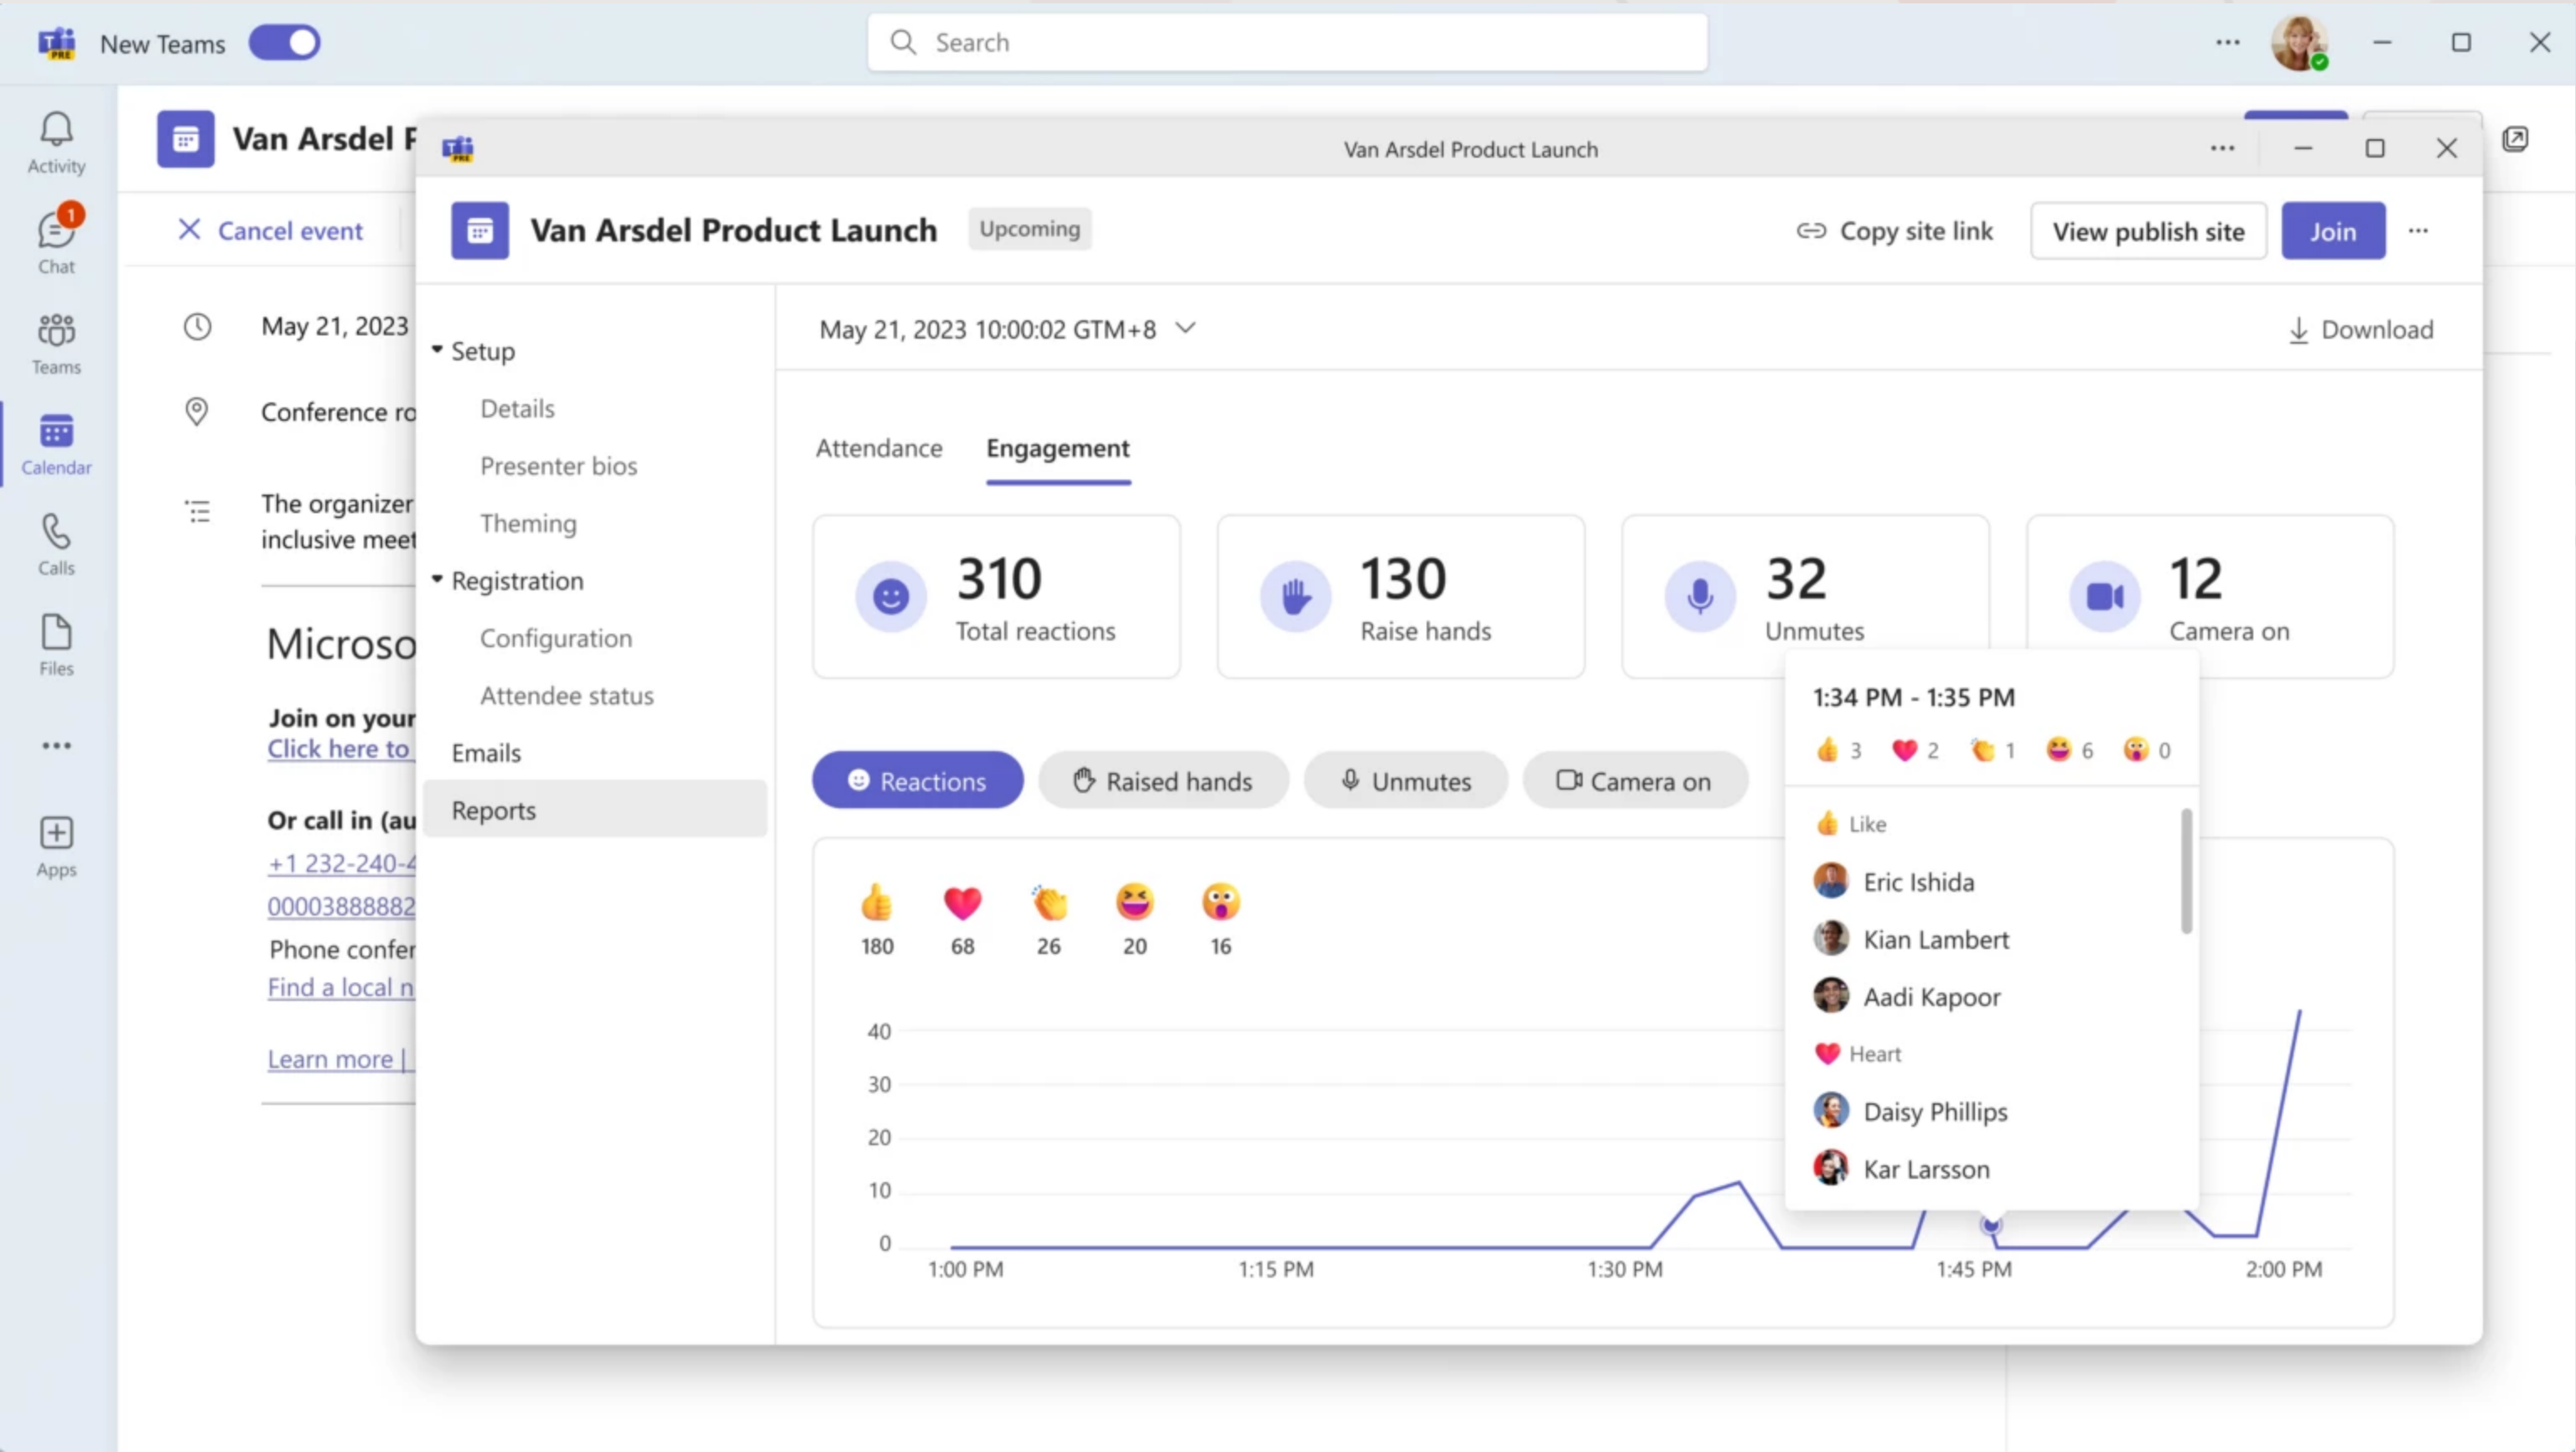

Teams Premium – Meetings - Features

Feature	Teams Premium
Customize meeting templates for your organization	✓
Add organization branding to meeting lobbies	✓
Customize meeting backgrounds for your organization	✓
Customize Together mode scenes for your organization	✓
Read live translated captions during meetings	✓
Manage what attendees see	✓
Use RTMP-In for meetings	✓
Hide attendee names	✓
View engagement reports	✓
Translate post-meeting transcriptions (<i>coming soon</i>)	✓
Turn on eCDN Meetings*	✓

Teams Premium – Engagement Reports

Teams Premium – Meetings protection

Add watermarks to meetings

End-to-end encryption for meetings with up to 50 attendees

Control who can record

Prevent copy/paste in meeting chats

Assign Microsoft Purview Information Protection sensitivity labels for meetings*

Custom user policy packages

Teams Premium – Meeting recap and intelligent recap

Feature	Teams	Teams Premium
View recordings of meetings	✓	
View meeting transcripts	✓	
View and use files added to meetings	✓	
View and use apps added to meetings	✓	
Navigate meeting recordings with autogenerated chapters <i>(coming soon)</i>		✓
View when a screen was shared in the meeting transcript		✓
View time markers in meeting recordings when you joined or left a meeting		✓
Jump to different speakers with speaker timeline markers		✓
View AI-generated notes and tasks from meetings		✓
View when you were mentioned in a meeting*		✓

* Mentions of a user's name is pulled from the meeting transcript, not from an @mention tag in the meeting chat.

📌 Note

Intelligent recap features will be available as a part of the Copilot for Microsoft 365 license.

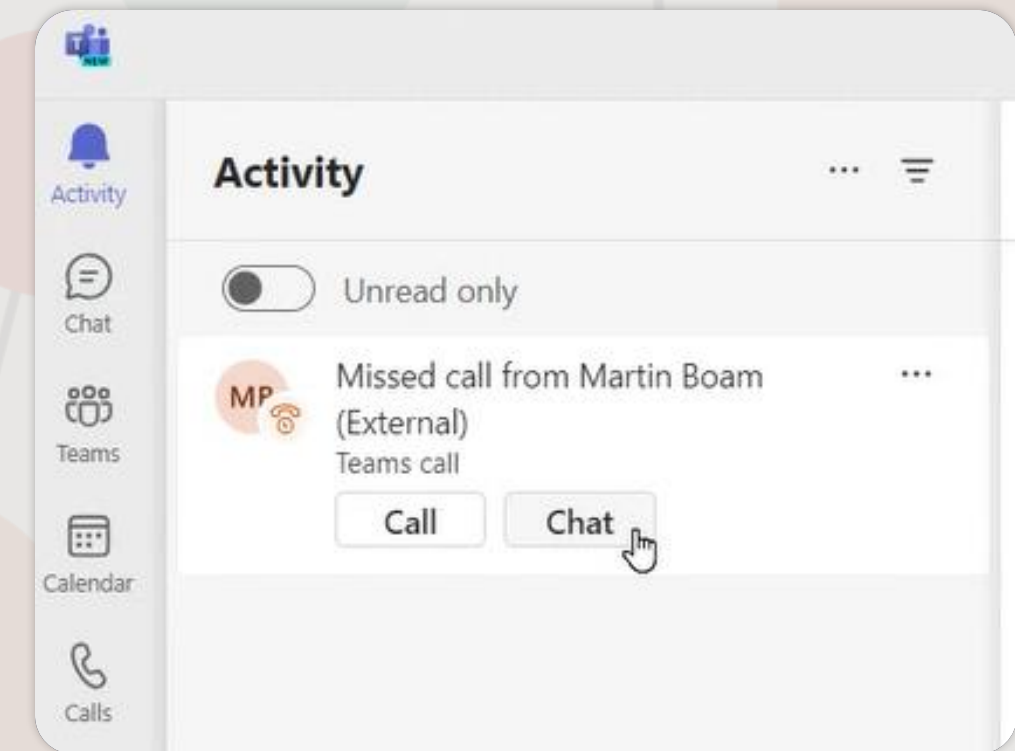

Roadmap Update Highlights

Roadmap Updates – Summary

- New meeting templates in Outlook's Teams add-in
- Chat button on missed call activity
- Teams Webinar Graph APIs for exporting webinar data
- Priority account chat controls for managing unwanted communications (Premium)
- Additional manager-controlled privacy settings in the Shifts app
- Enhancements for importing Excel files into Shifts
- New keyboard shortcuts for initiating calls in Teams
- Support for all-in-one and board device form factors in Teams Rooms on Windows
- Custom backgrounds for channel announcements using DALL-E in Teams (Premium).

Roadmap Updates – Summary

- Message forwarding between chats
- Option to redirect incoming calls directly to voicemail
- Private line feature for a second phone number
- Archiving channels for preservation
- Voice isolation to filter out background noise
- Use of tags in Shared Channels
- Sensitivity labels for controlling shared channels and team discoverability
- External domain activity report for Teams admins
- UX improvements for Multi-Tenant Organization users

Roadmap Update – Highlights

Feature ID: 119789

Rollout Start: February 2024

Microsoft Teams: Teams Connect chat enhancements

IT admins will be able to add external partners with phone-based Teams accounts not managed by an organization to their organization's extended directory. These external users can have a company curated user profile including location and job role. Users in the organization, who are enabled for Teams external access, can search for these external users by name and establish 1:1 or group chats, just like they do with internal users.

(Updated) Microsoft Teams Connect chat - Extended Directory

MC704952 · Published Jan 8, 2024 · Last updated Jan 12, 2024

 Archive  Share  Copy link  Mark as unread

Message Summary

Updated January 12, 2024: We have updated the content below to show as intended. Thank you for your patience.

Microsoft Teams is now introducing enhancements on top of Teams Connect for chats. With the Teams Connect chat extended directory, IT admins can create an **external directory of known external collaborators using their phone numbers.**

Once created, it will be easier for users in the tenant to:

- **Search external users** by name and establish 1:1 or group chats with them.
- View a **company curated profile** that includes information like a user's location, job role, or business unit and even assign an organization manager for these external partners.

In addition to these end user improvements, IT admins can continue to use all compliance and security features available with Teams Connect chat along with enhancements like restricting external chat to the list of users added via phone numbers.

This message is associated with Microsoft 365 Roadmap ID [119789](#)

When this will happen:

Targeted Release: We will begin rolling out in early February 2024 and expect to complete by mid-February 2024.

Standard Release: We will begin rolling out mid-February 2024 and expect to complete by late February 2024.

How this will affect your organization:

The feature requires tenant admin configuration. Therefore, no impact is expected unless the tenant admin plans to use this feature.

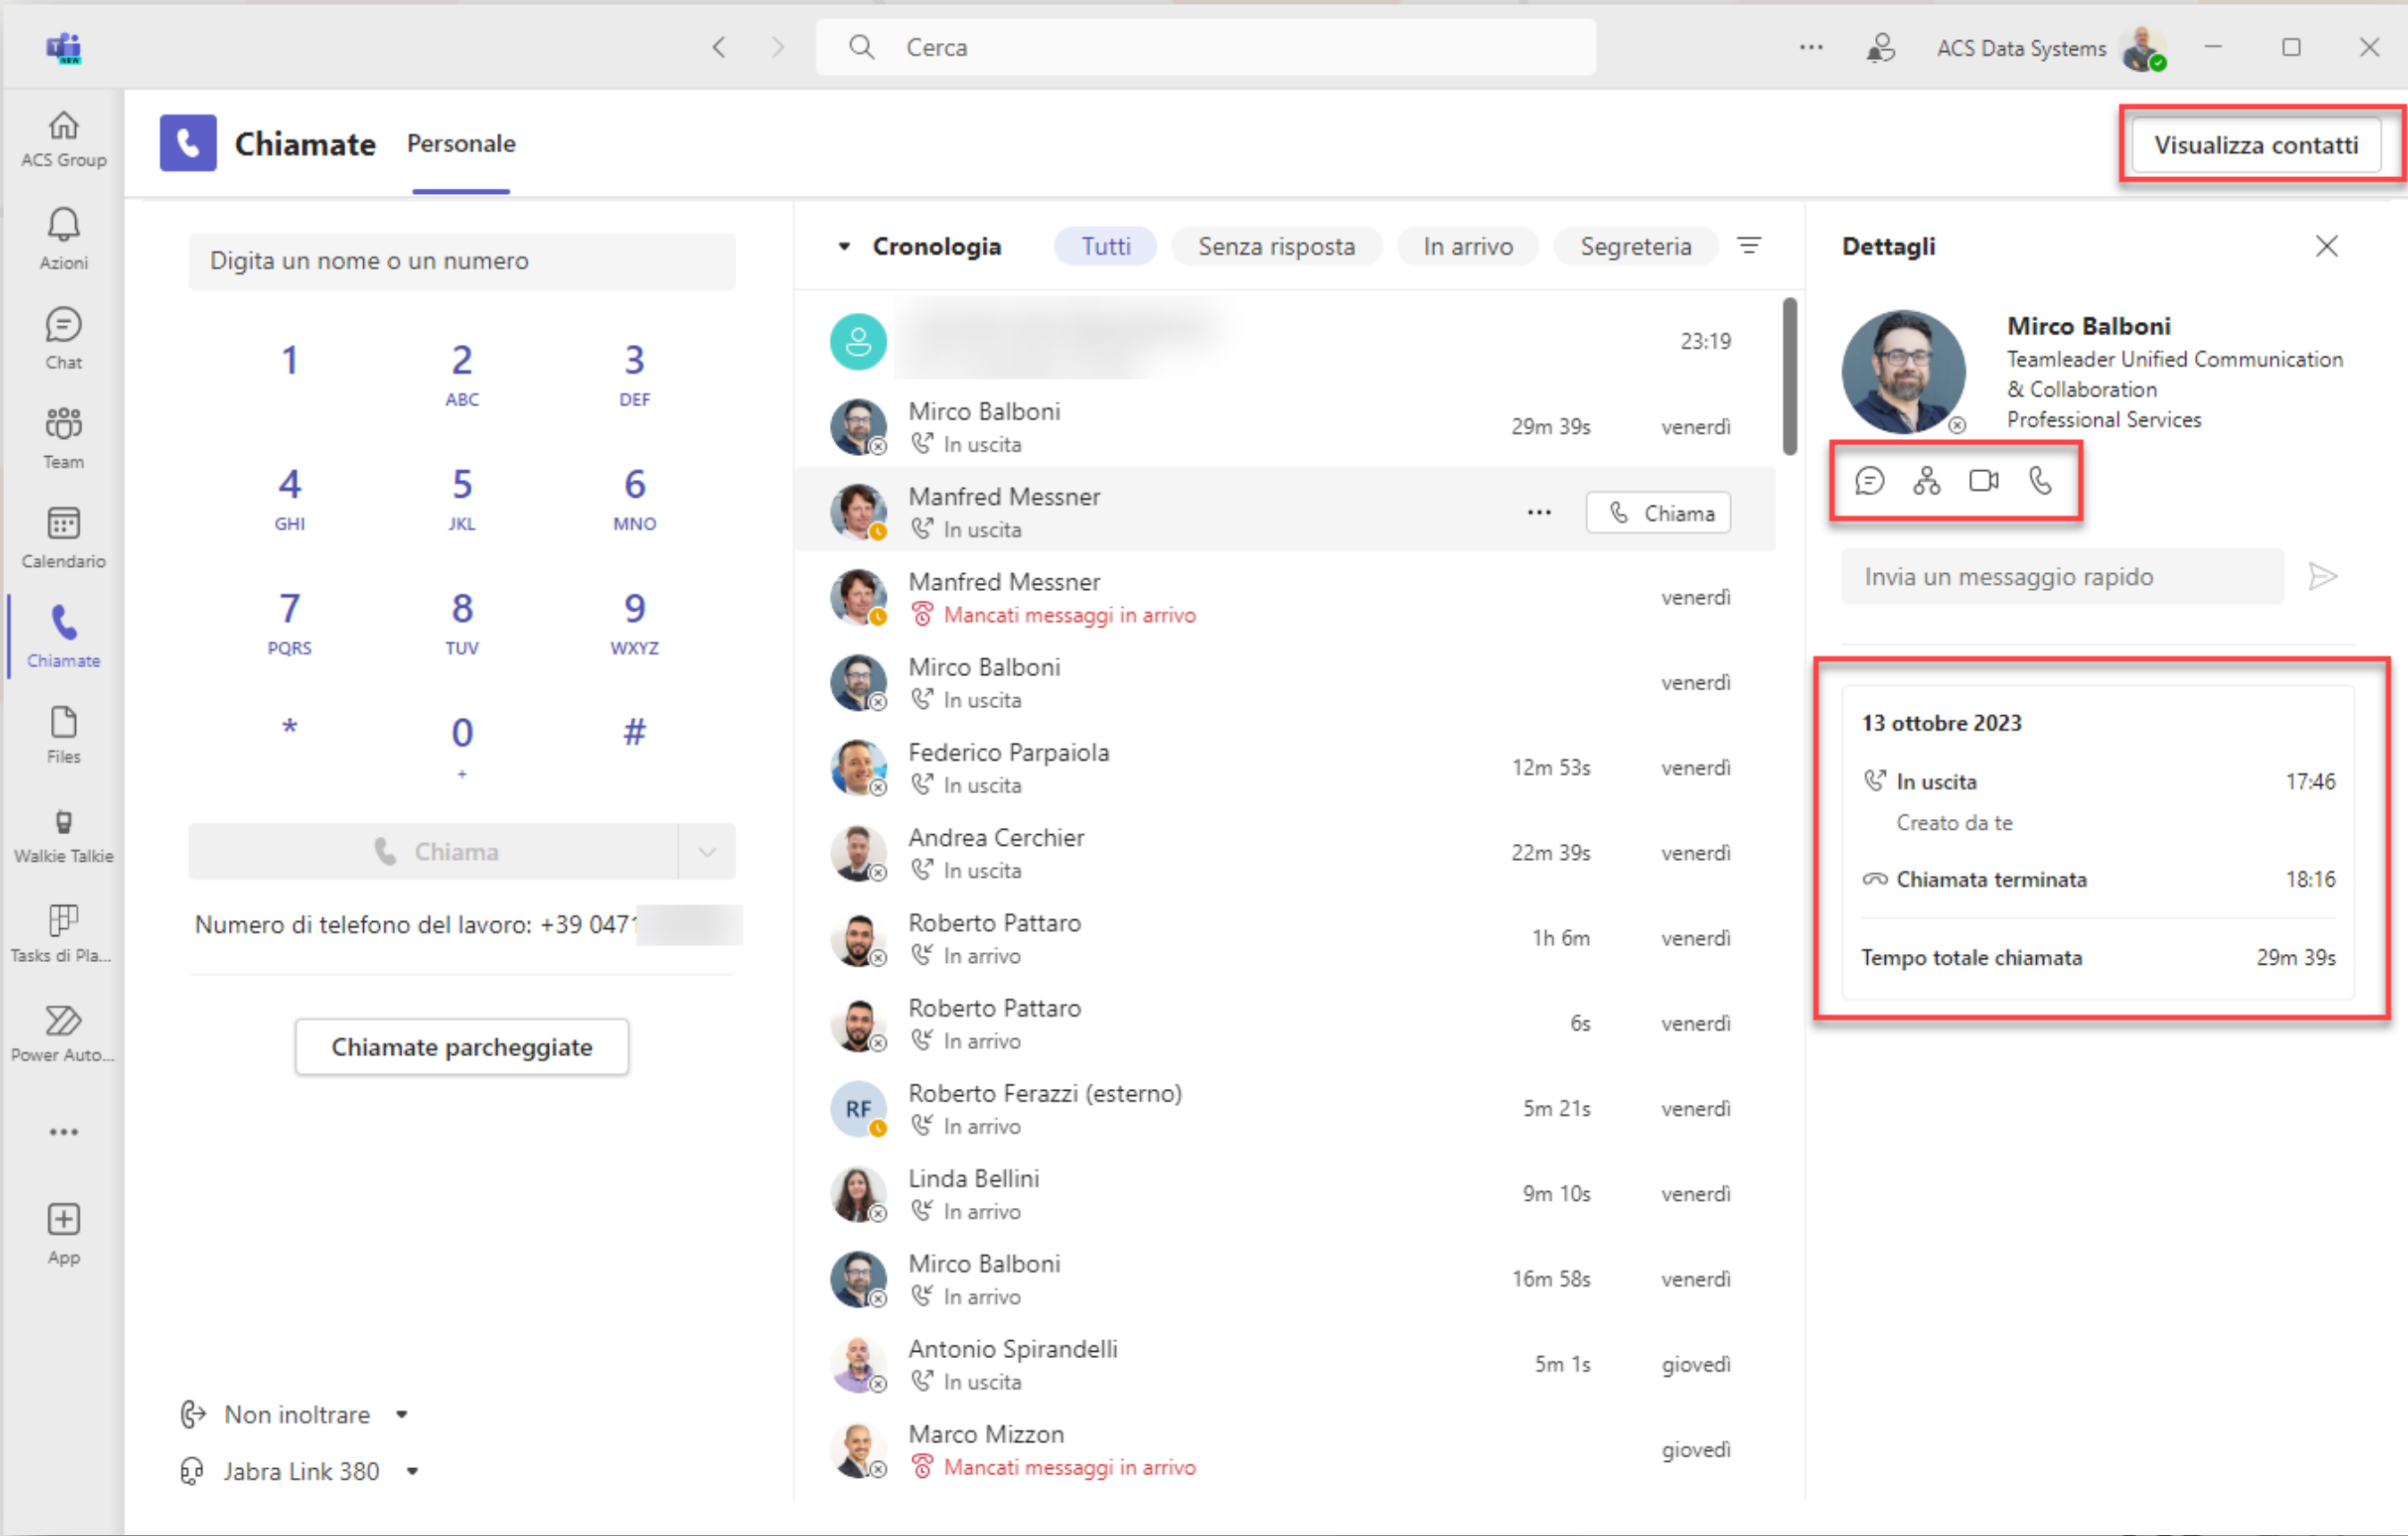

Teams Client: nuove
funzioni più
interessanti

Teams Client: nuove funzioni più interessanti

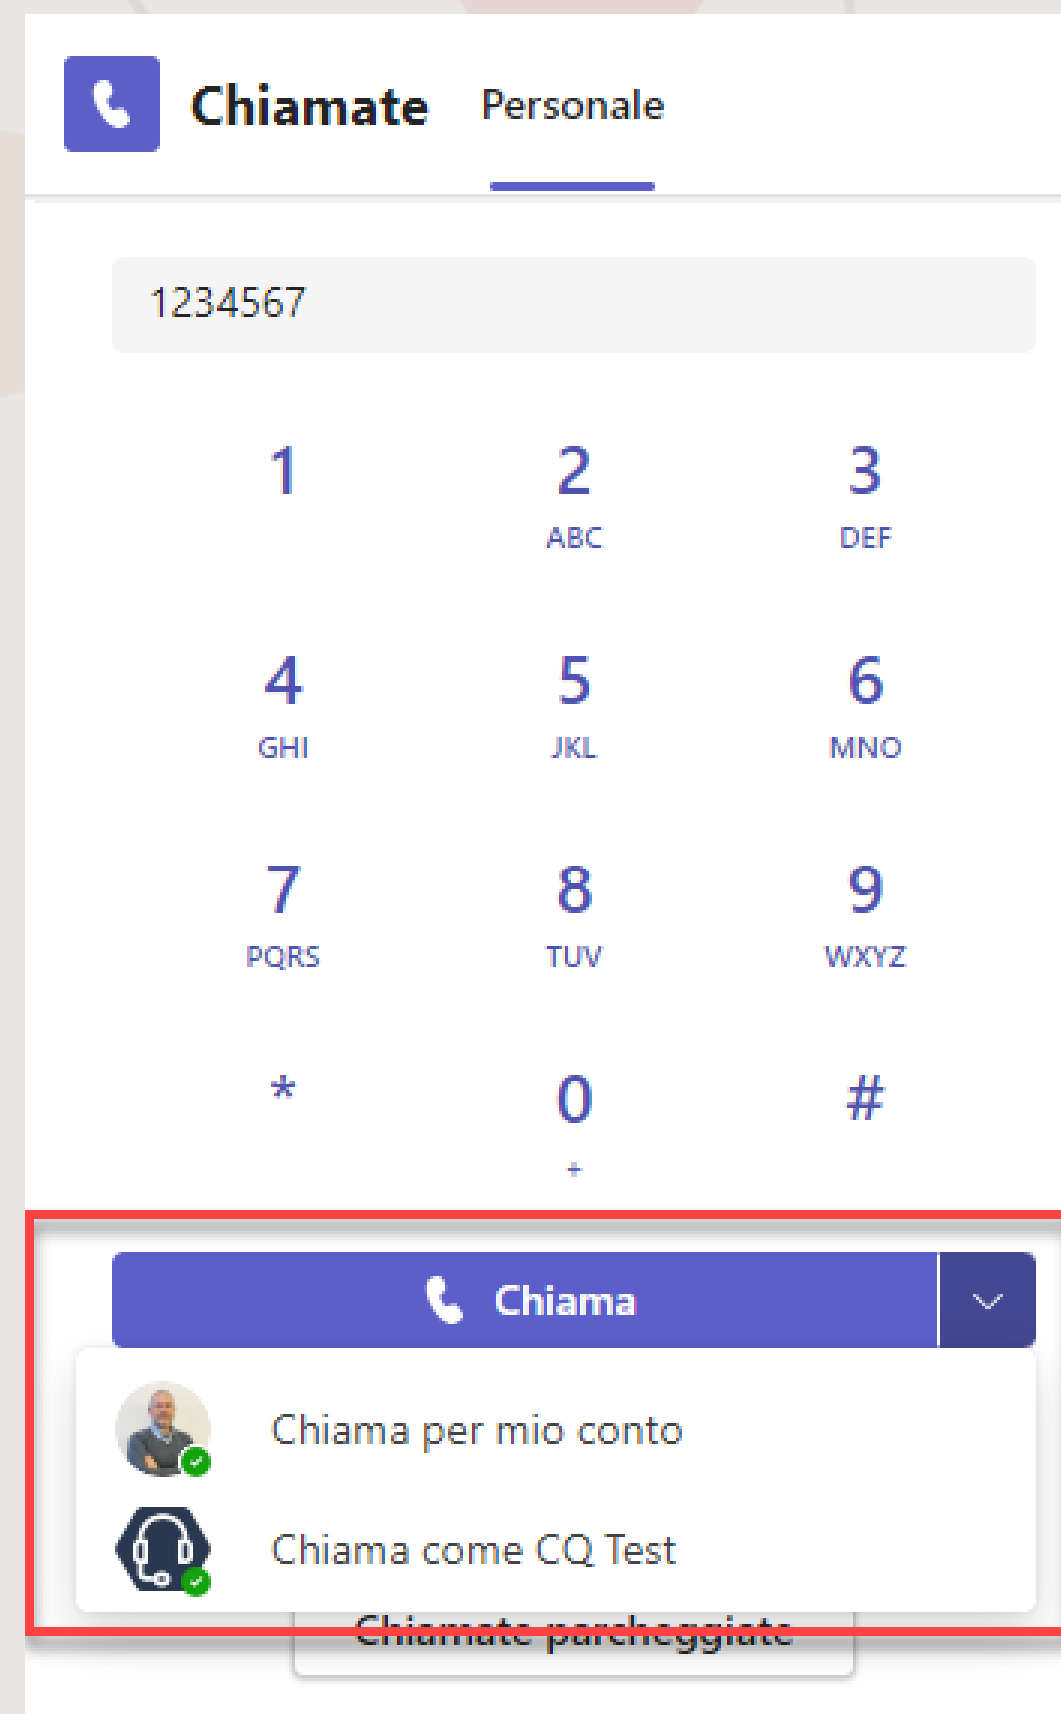

Nella cronologia chiamate ora troviamo i dettagli di ogni chiamata e i tempi.

La scheda utente permette un contatto rapido via chat o chiamata

Teams Client: nuove funzioni più interessanti

Se un utente è membro di una o più Call Queue (opportunamente configurate), potrà decidere con quale numero di telefono effettuare una chiamata: il proprio o uno dei numeri delle Call Queue a cui appartiene

Teams Client: nuove funzioni più interessanti

Auto Attendant e Call Queue sono tra i componenti che hanno ricevuto più aggiornamenti e novità.

Le AA hanno ricevuto molti miglioramenti come la nuova gestione delle fasce orarie di apertura, ora molto più facili da gestire e modificare

Teams Client: nuove funzioni più interessanti

Una funzione poco nota è quella che permette di gestire il Routing delle chiamate in arrivo a numeri non assegnati, all'interno di un range. La chiamata può essere girata a un servizio (AA&CQ), un utente o a un messaggio.

The screenshot displays the Microsoft Teams Admin Center interface. On the left, a navigation pane lists various settings, with 'Phone numbers' highlighted. The main content area is titled 'Phone numbers' and includes a sub-header 'Get support for your phone numbers in the Phone Number Service Center'. Below this, there are three tabs: 'Numbers', 'Routing rules' (which is selected and highlighted), and 'Order history'. The 'Routing rules' tab shows a section titled 'Routing rules for unassigned numbers' with a brief description. Below the description is a table with one rule named 'Test'.

✓	Rule name	Evaluation order	Description	Pattern	Route to
	Test	1		^\+?39028350804[0-9]\$	Greeting

Teams Client: nuove funzioni più interessanti

Altra funzione poco nota, è possibile fare in modo che, all'arrivo di una chiamata, Teams apra una schermata del Browser predefinito sul PC dell'utente, andando direttamente a una URL indicata nella configurazione, appendendo alla fine il numero di telefono del chiamante.

The image shows a configuration window for Teams. It has two sections. The first section is titled 'Open apps in browser for incoming PSTN calls' and features a blue toggle switch that is turned 'On'. The second section is titled 'URL to open apps in browser for incoming PSTN calls' and contains a text input field with the value 'https://example.domain.com/test/{phone}'.

Open apps in browser for incoming PSTN calls	☒ On
URL to open apps in browser for incoming PSTN calls	https://example.domain.com/test/{phone}

Es: <https://crm.cliente.com/ws/+393451234567>

Questa funzione solitamente è assegnata a utenti che rispondono a chiamate verso servizi al Cliente (Call Center, Help Desk ecc), in modo da avere immediatamente pronta la pagina sul CRM/Gestionale del Cliente

Vincolo DMARC per
email verso Google
e Yahoo dal 1
febbraio 2024

Nuovi standard di protezione Google e Yahoo

Cos'è il DMARC?

- Protezione (certificazione) delle email inviate tramite protocollo SPF o (or) DKIM
- Definizione della policy per le email dannose
- Reportistica delle email ricevute dai nostri destinatari

Solo se:

- Invio più di 5000 email al giorno ad indirizzi Google e Yahoo

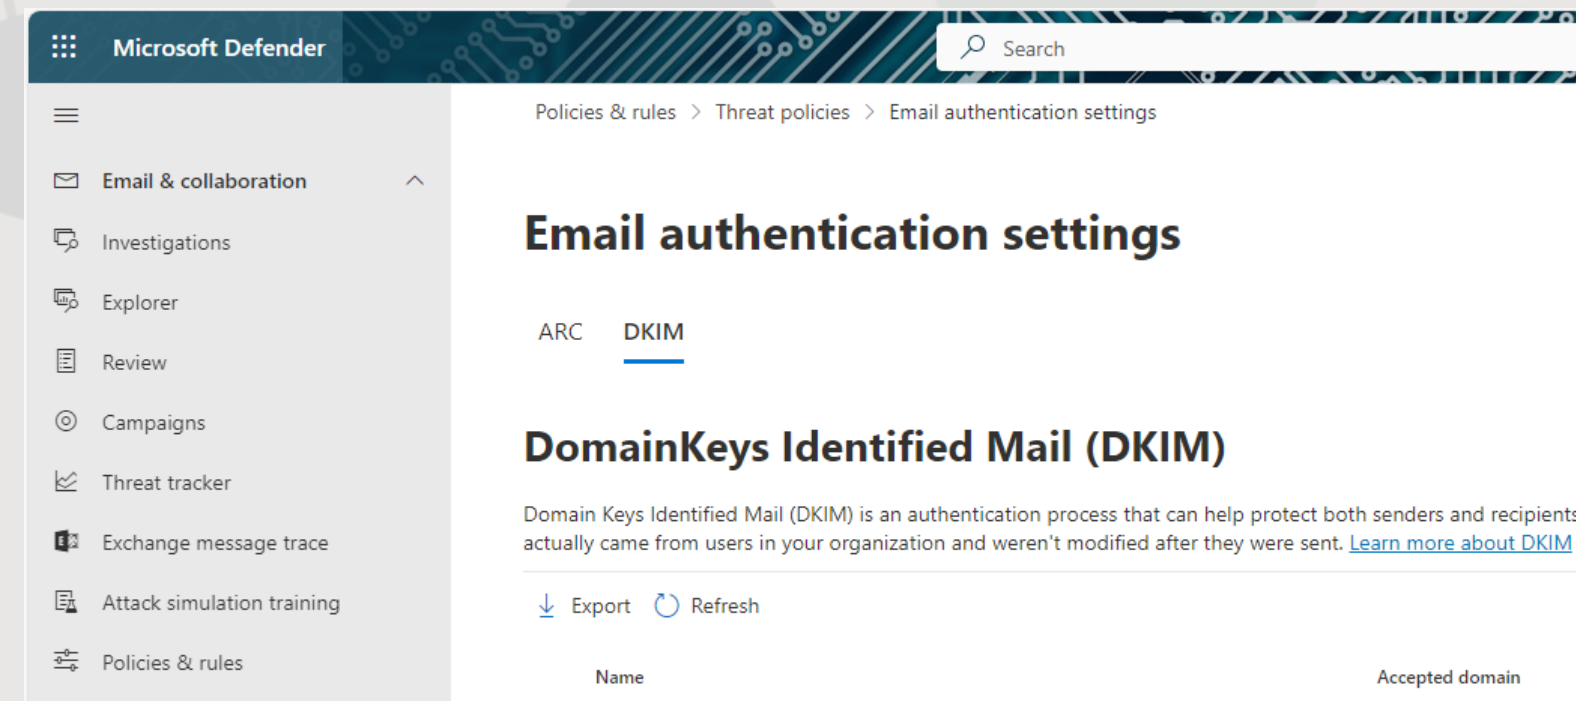

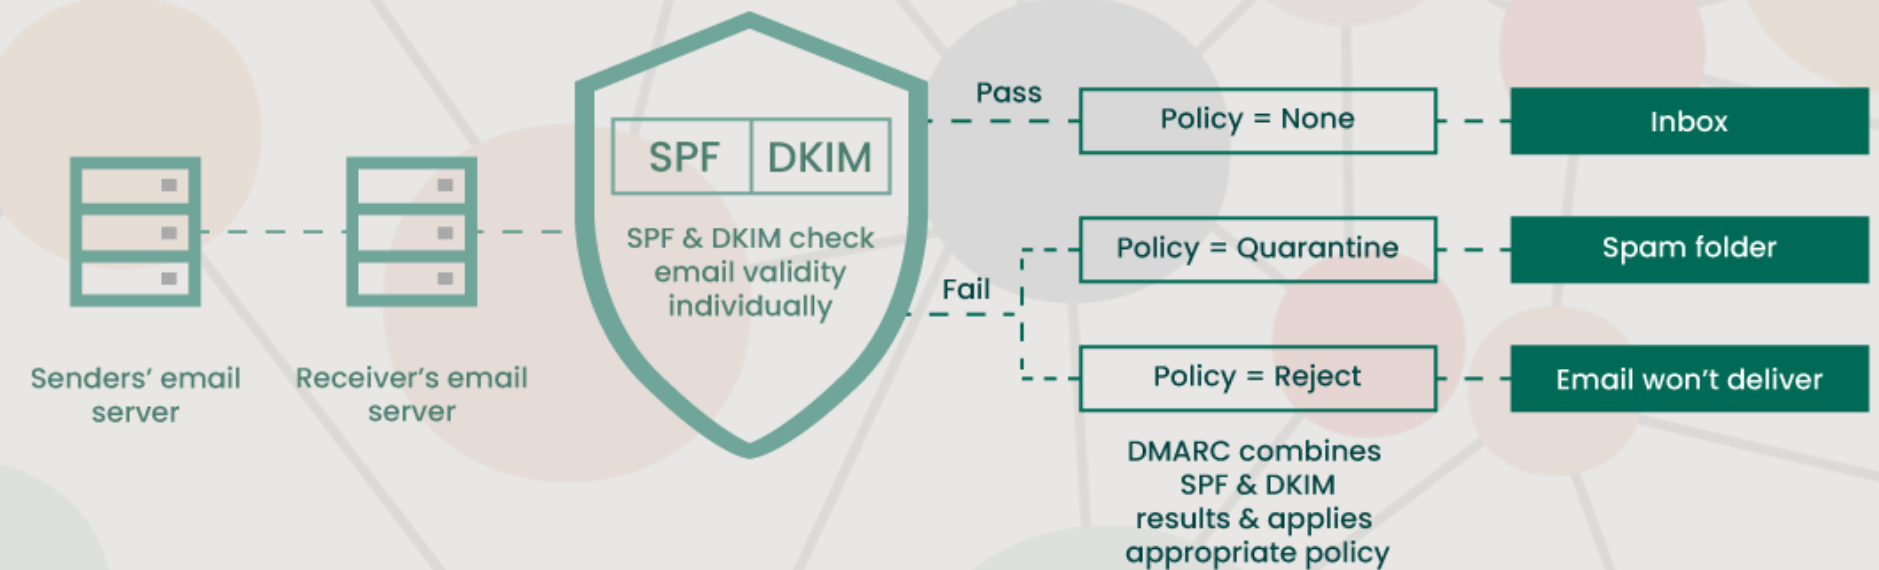

Obbligatorio:

- Configurazione SPF e (and) DKIM
- Allineamento dominio in SPF o (or) DKIM
- Record DMARC presente (qualsiasi policy)

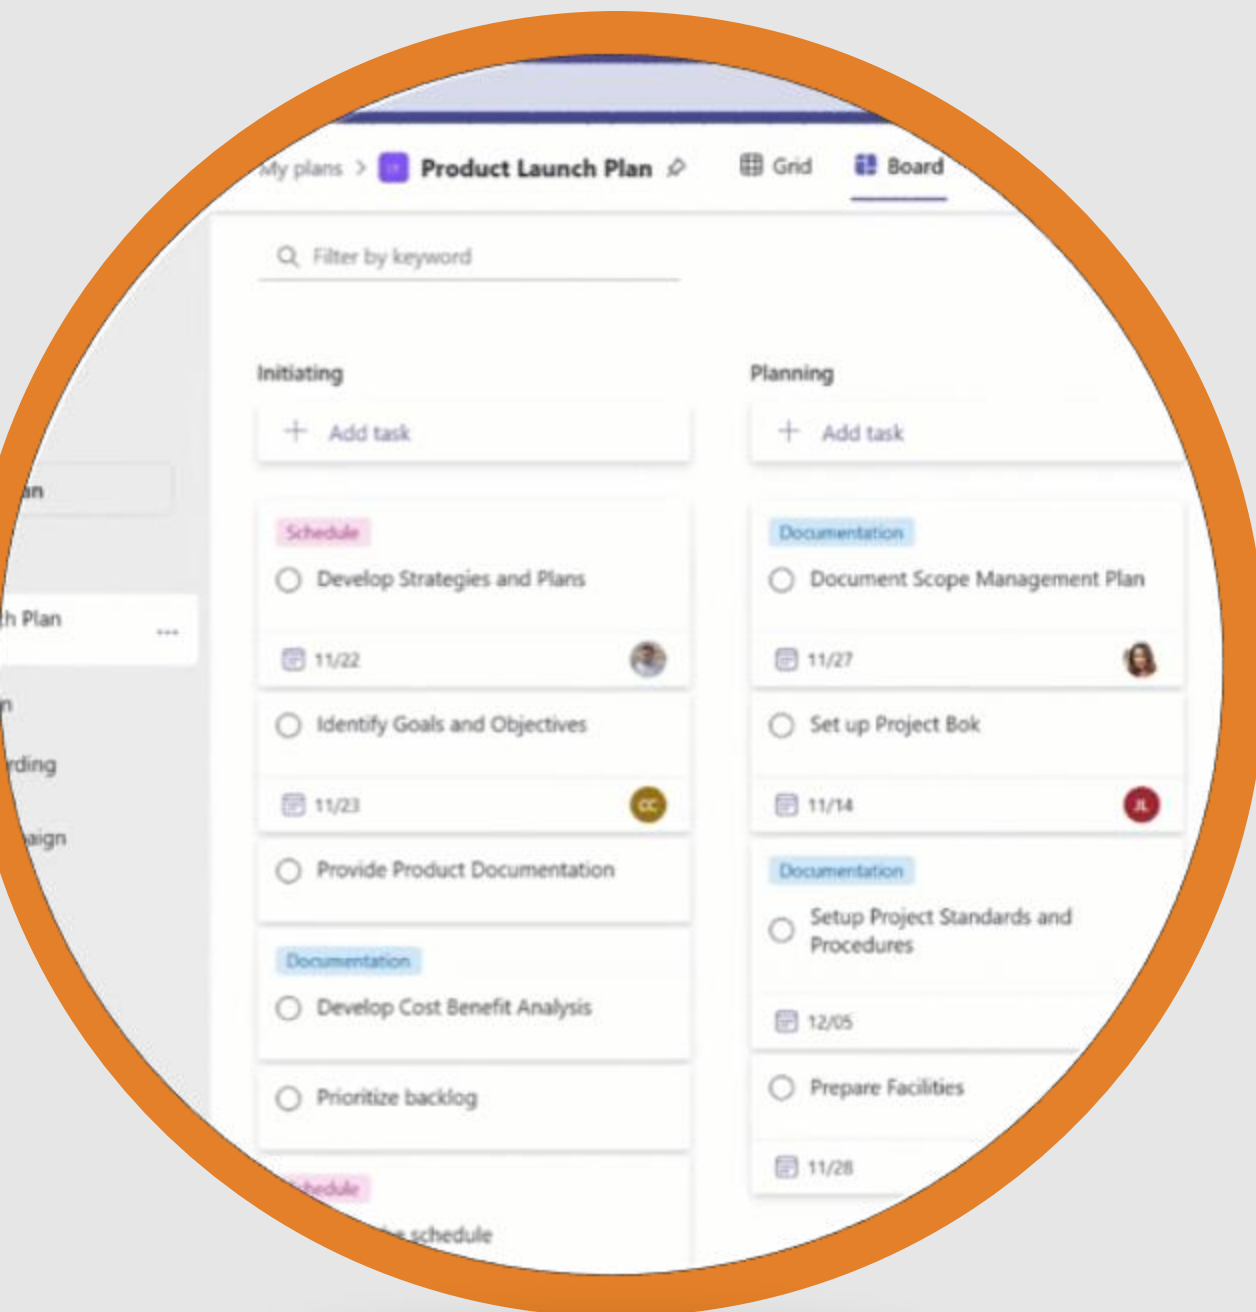

Applicazione

- Dal 1 febbraio 2024, a regime entro aprile 2024

How DMARC Works

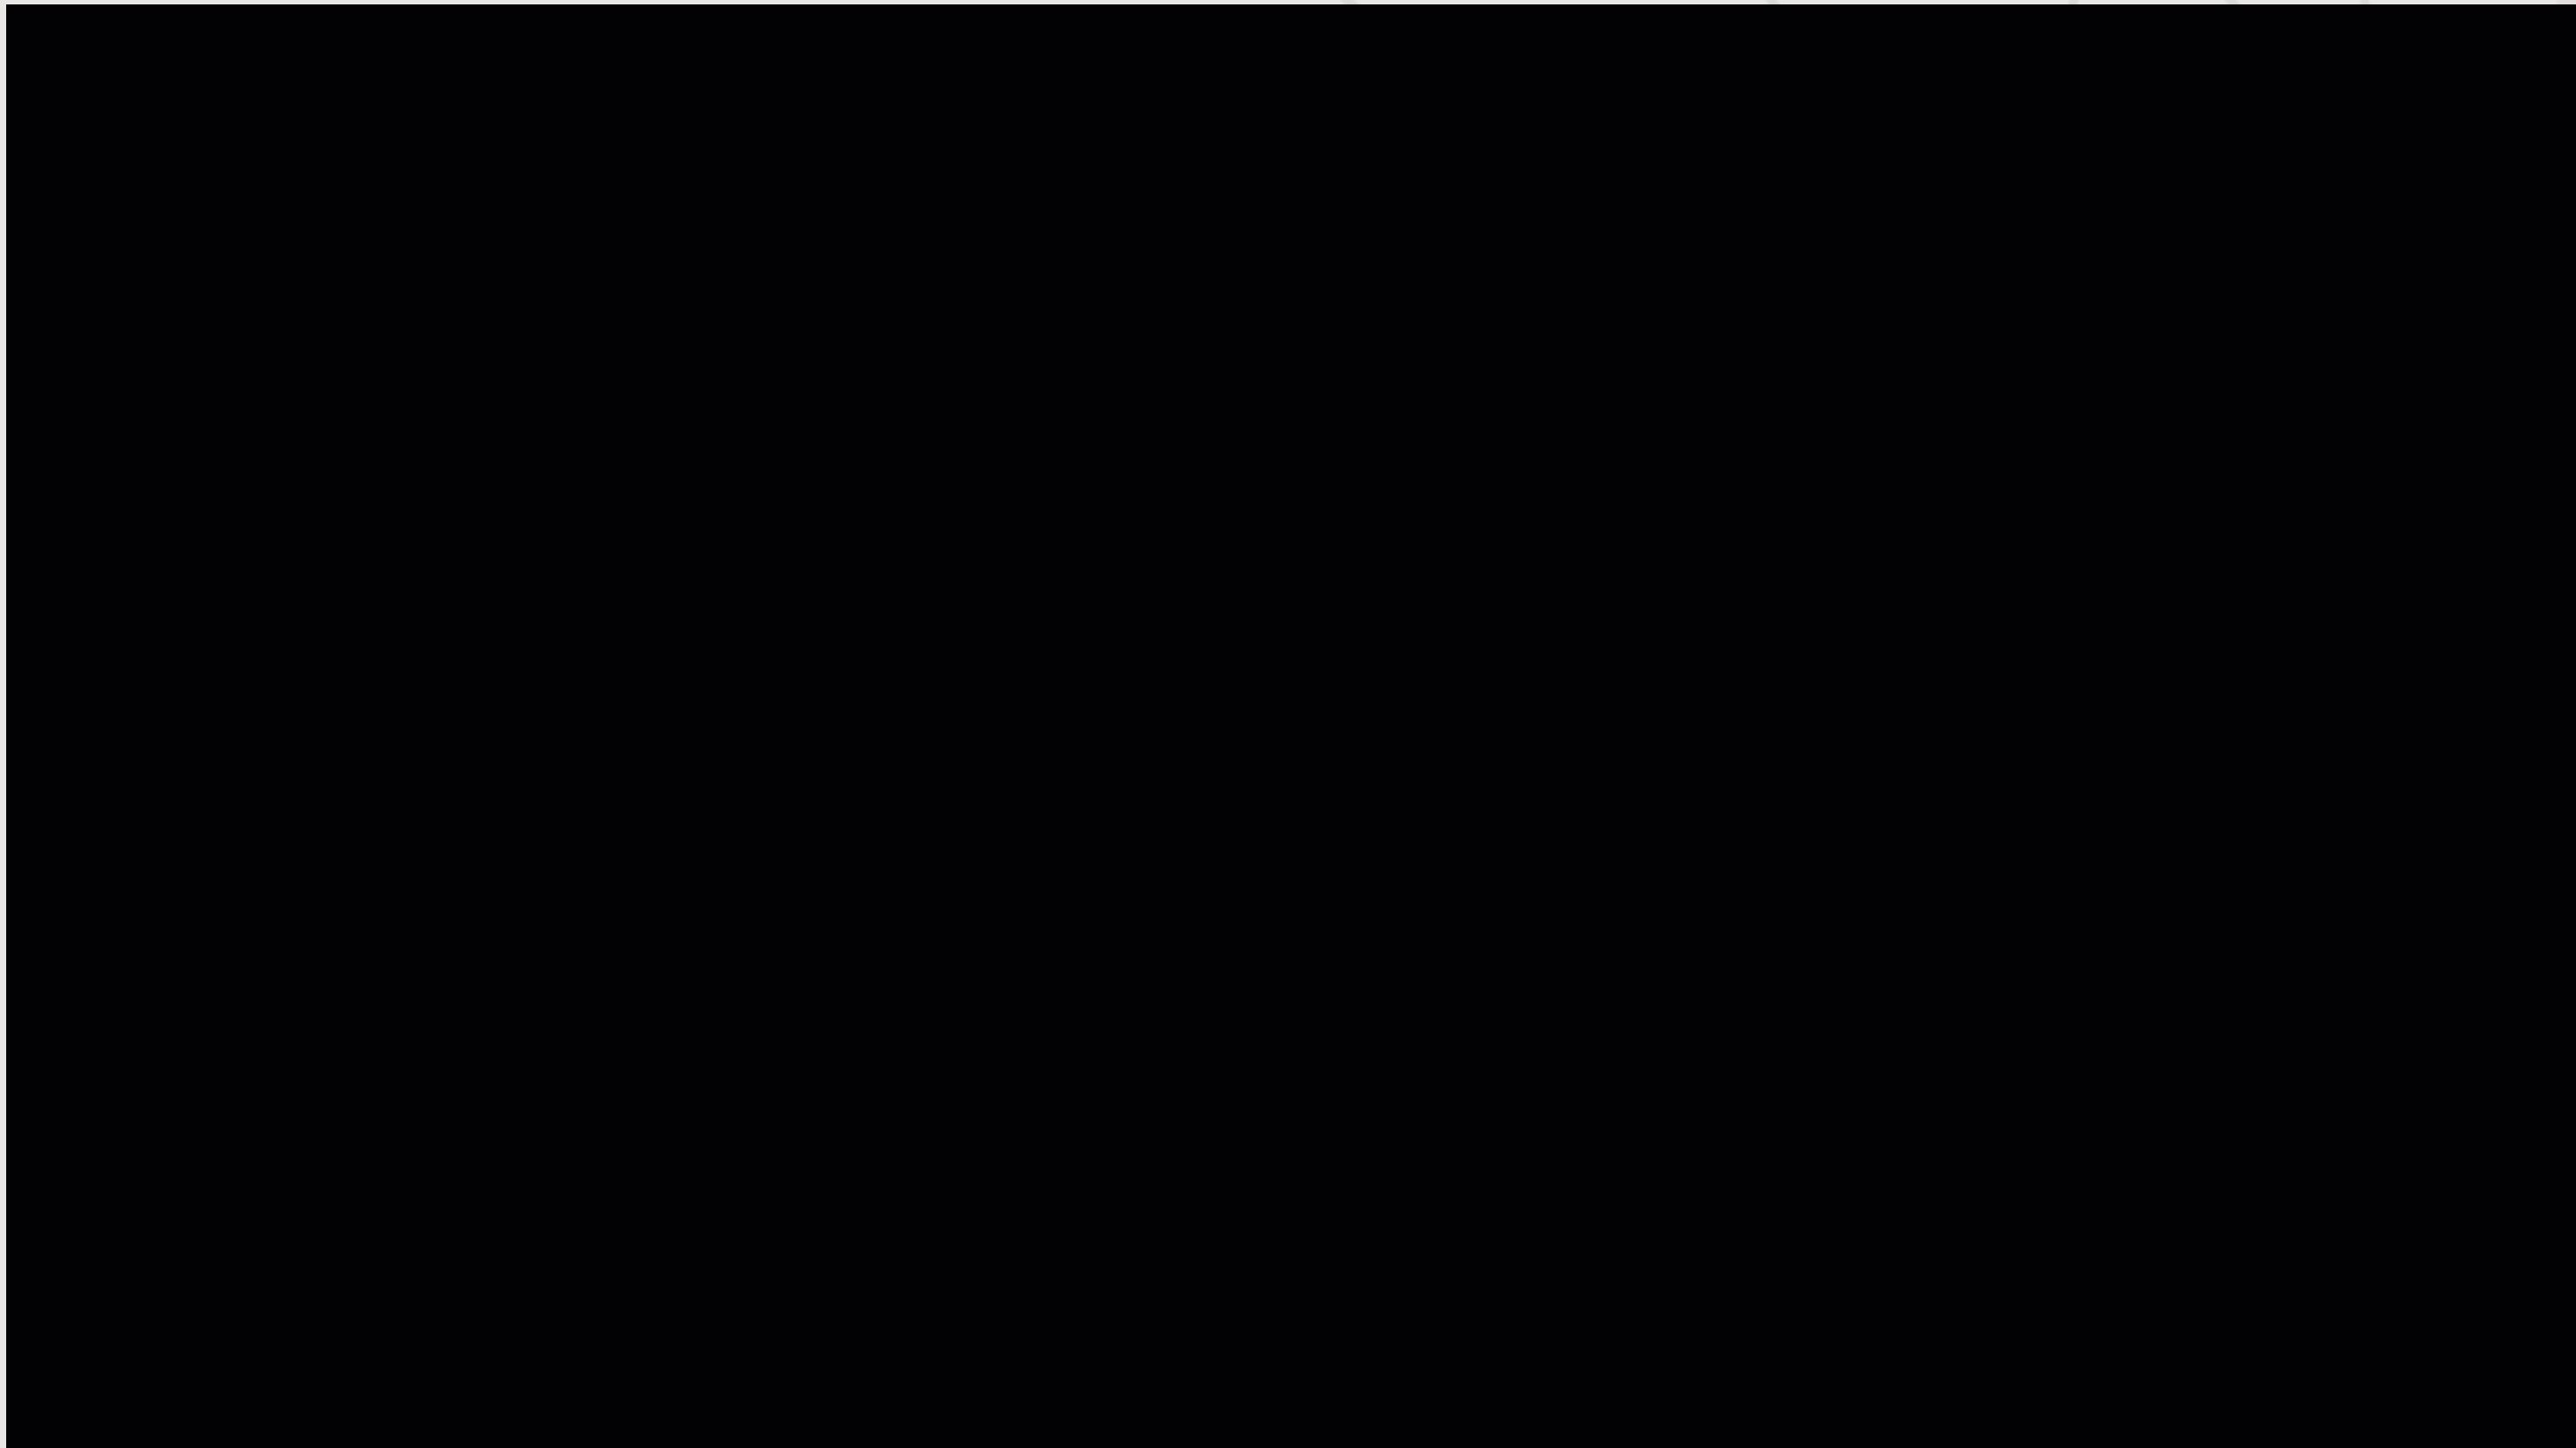

New Planner

New Planner

Early 2024: The new Planner app in Teams will be generally available
(the current Tasks by Planner and To Do app in Teams will be renamed to Planner).

Later in 2024: The web experience of the new Planner will be generally available.
The features you know and love in Project for the web will be available in the new Planner app in Teams and the Planner web app.
