Entra ID Governance

What is Microsoft Entra ID Governance?

01

Who has/should have access to which resources?

02

What are they doing with that access?

03

Are there effective organizational controls for managing access?

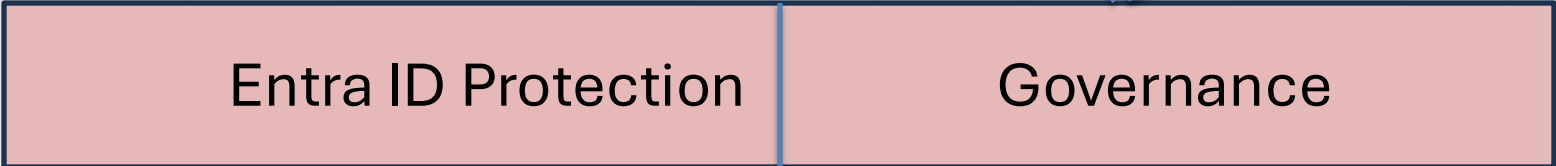

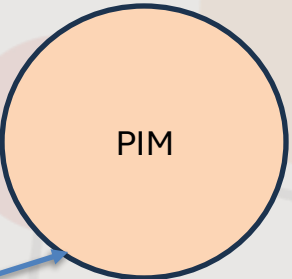

04

Can auditors verify that the controls are working?

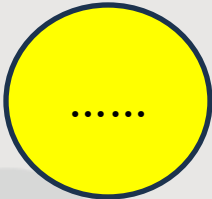

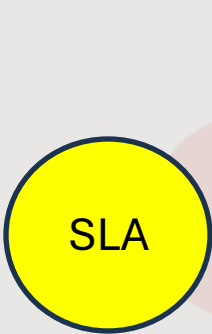

Entra ID

Lifecycle Workflows (LCW)
LCW + Custom Extensions (Logic Apps)
Entitlement management with Verified ID
Entitlement management + Custom Extensions (Logic Apps)
Entitlement management + Auto Assignment Policies
Entitlement management - Directly Assign Any User(Preview)
Entitlement management - Guest Conversion API
Access reviews - PIM For Groups(Preview)
Access reviews - Inactive Users reviews
Access reviews - Machine learning assisted access certifications and reviews

Microsoft Entra ID Governance

Microsoft Entra ID P2

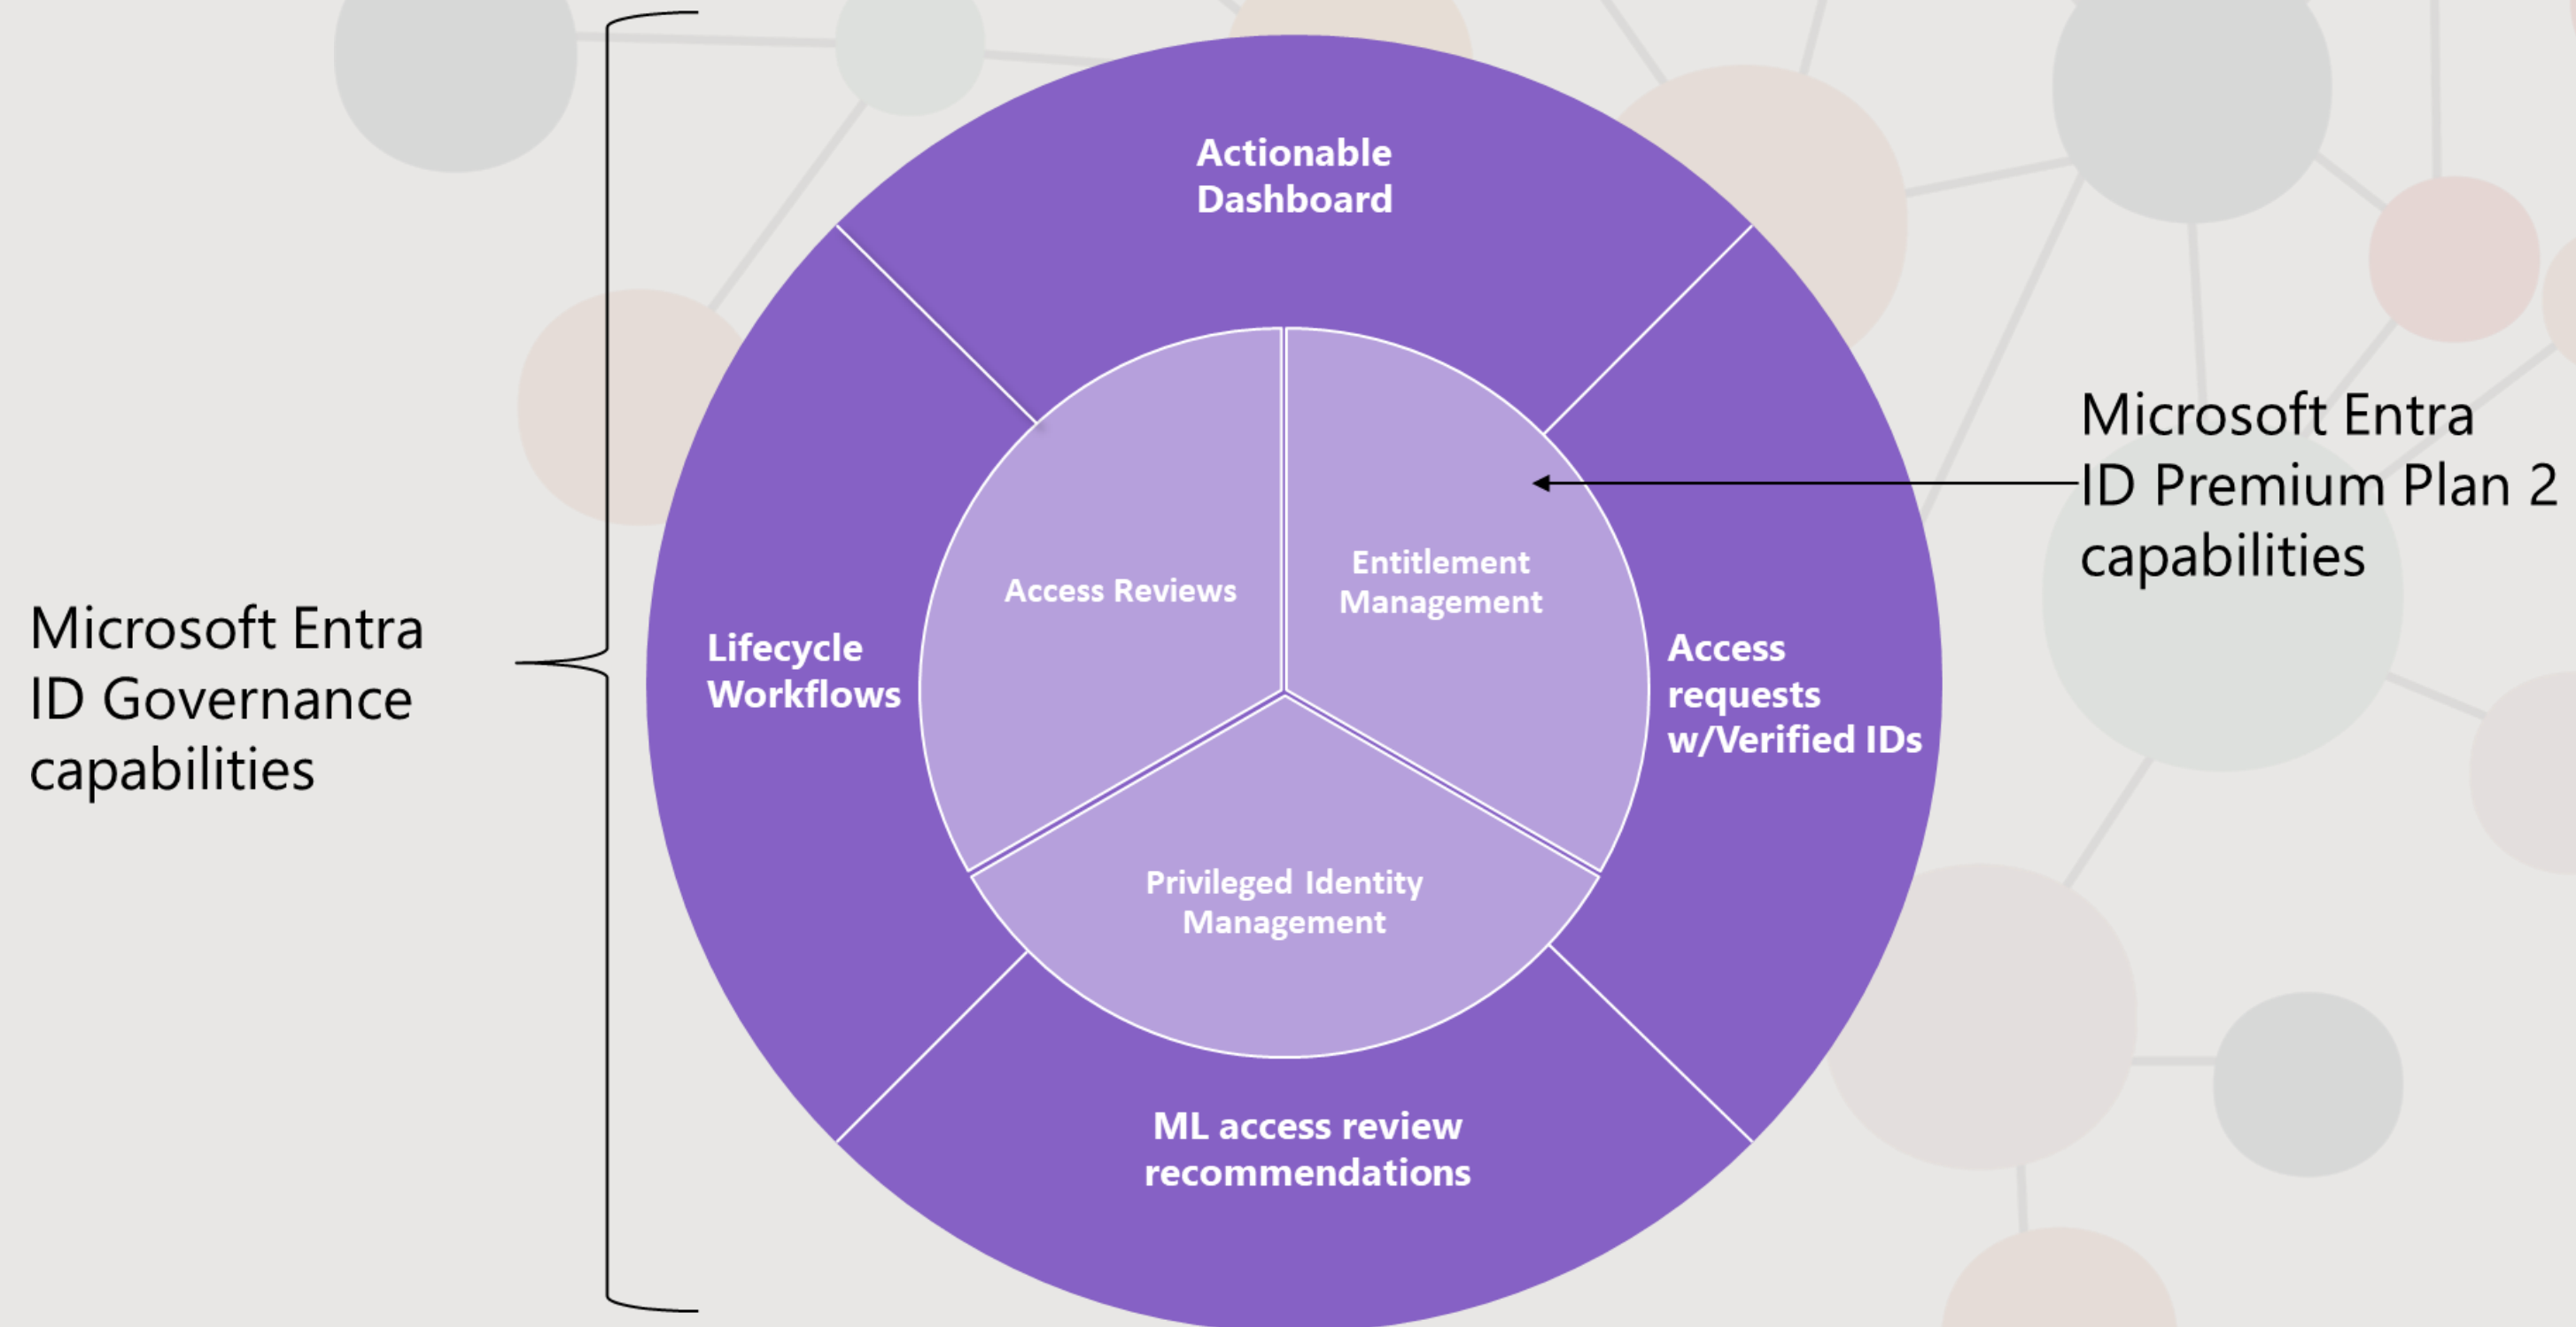

Microsoft Entra ID P1

Microsoft Entra ID Free

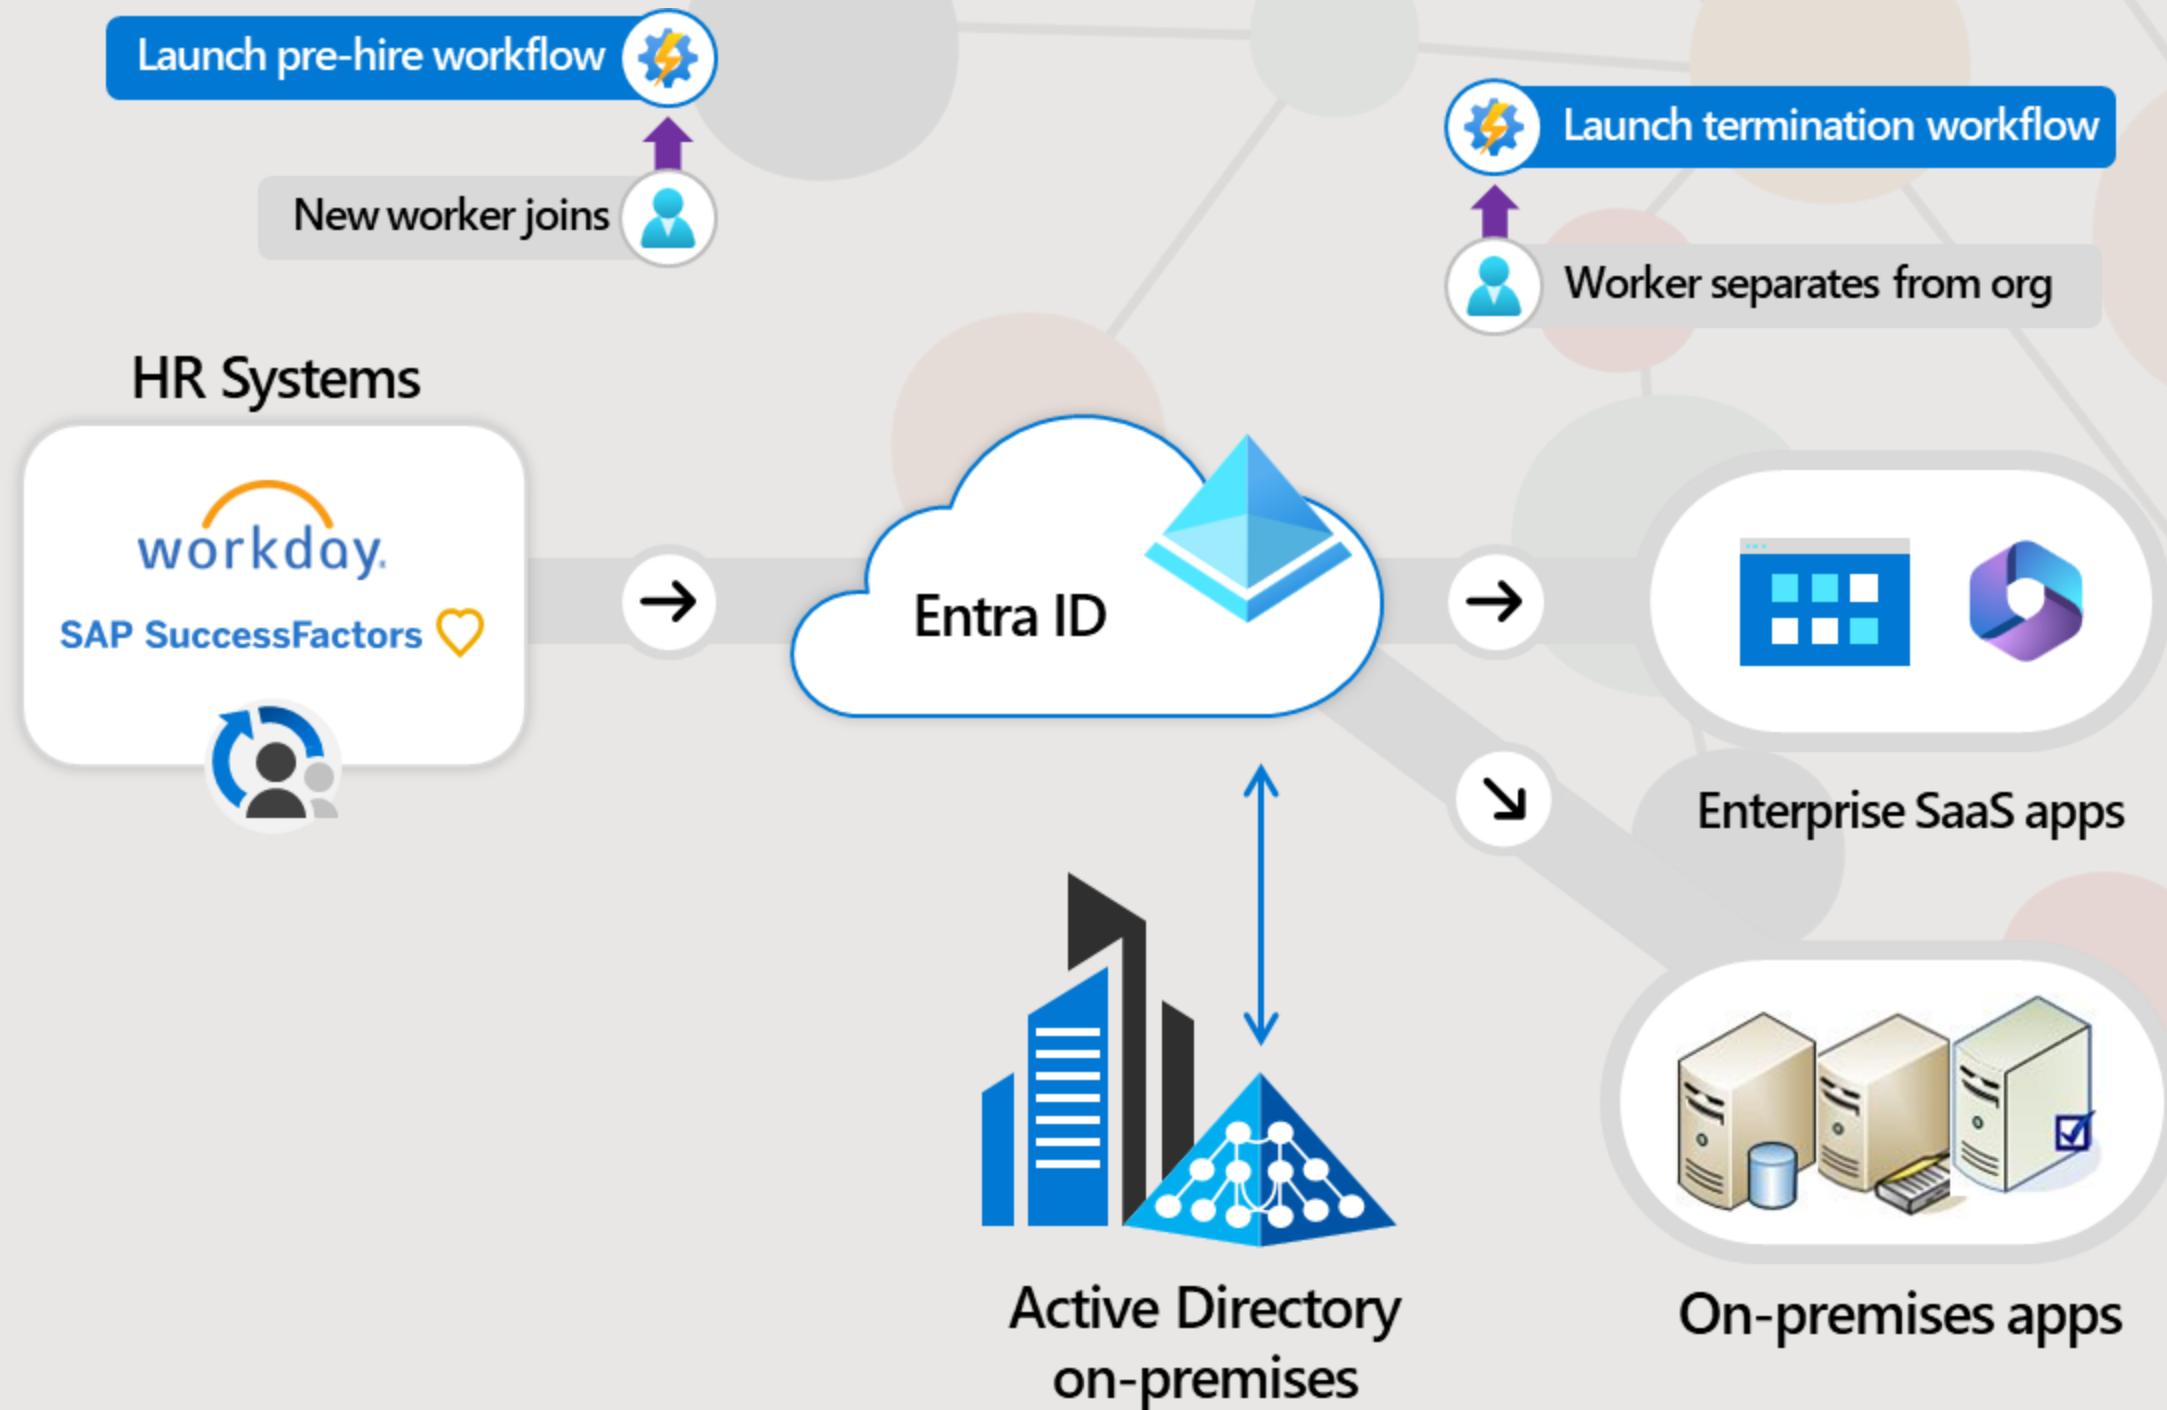

Microsoft Entra ID Governance

A premium identity governance product, built on the Microsoft Entra ID framework

Lifecycle Workflow

Automate join/move/leave employee lifecycle events

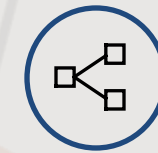

- Organizations can schedule task to occur before, at or after a join or leave date; these can also be run on-demand.
- Built-in tasks include generating temporary credentials, sending emails, assign memberships or removing licenses
- Additional tasks with Azure Logic Apps

Access requests, workflow and approval

Entitlement management

Let users request access (to any connected app, group, Teams site and more) while automating access assignments, approval, workflows, reviews and expiration for all human identity types (users, guests, etc.)

Supports multi-stage approval workflow, separation of duties enforcement and recurring access recertification

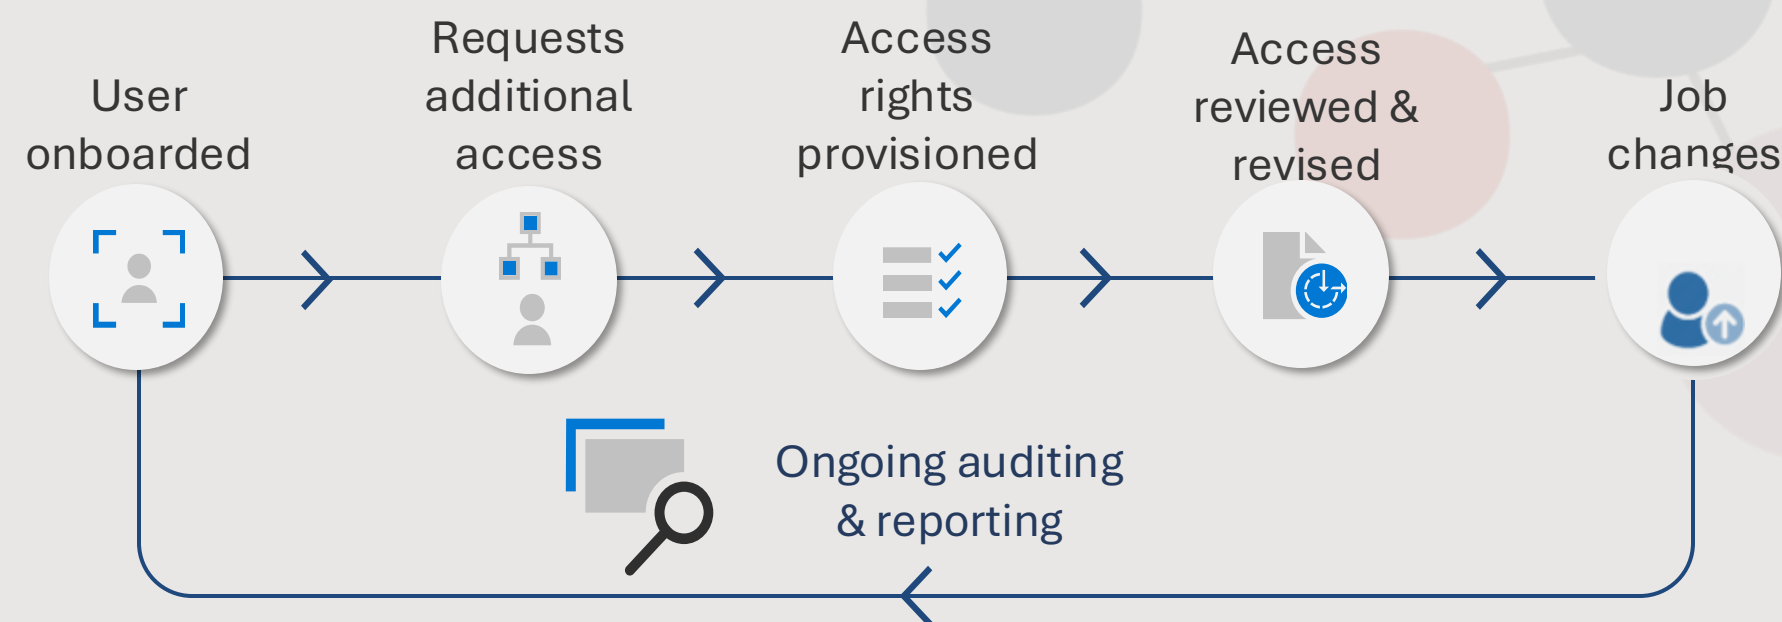

Supports custom workflows for access lifecycle (through Logic Apps integration)

Self-service policy and workflow can be defined by app, group or site owners

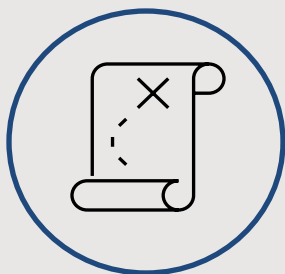

Access time-limited, guests removed when last access expires

Access recertification to reduce risk

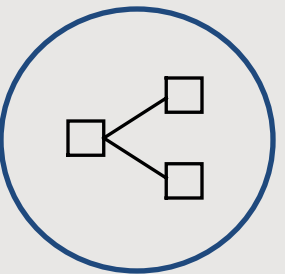

Access Reviews

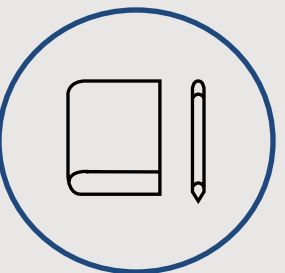

Policy-based access certification for automation

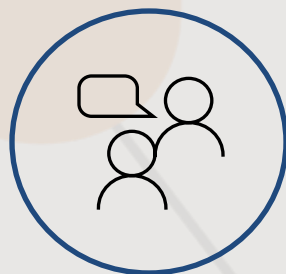

Intelligent recommendations based on sign-in history

Multi-stage reviews

Audit history for compliance reviews

Native support for **B2B guest** users, privileged roles, non-human workload identities

Customizable notifications to reviewers

Downloadable reports to see how reviewers are performing

Out-of-the-box integration with Microsoft Teams

Access Review: Inactive Guest User Report and Review

[*Review type](#) [*Reviews](#) [Settings](#) [*Review + Create](#)

Schedule an access review to ensure the right people have the right access to access packages, groups, apps, and privileged roles. [Learn more](#)

Novità su SharePoint

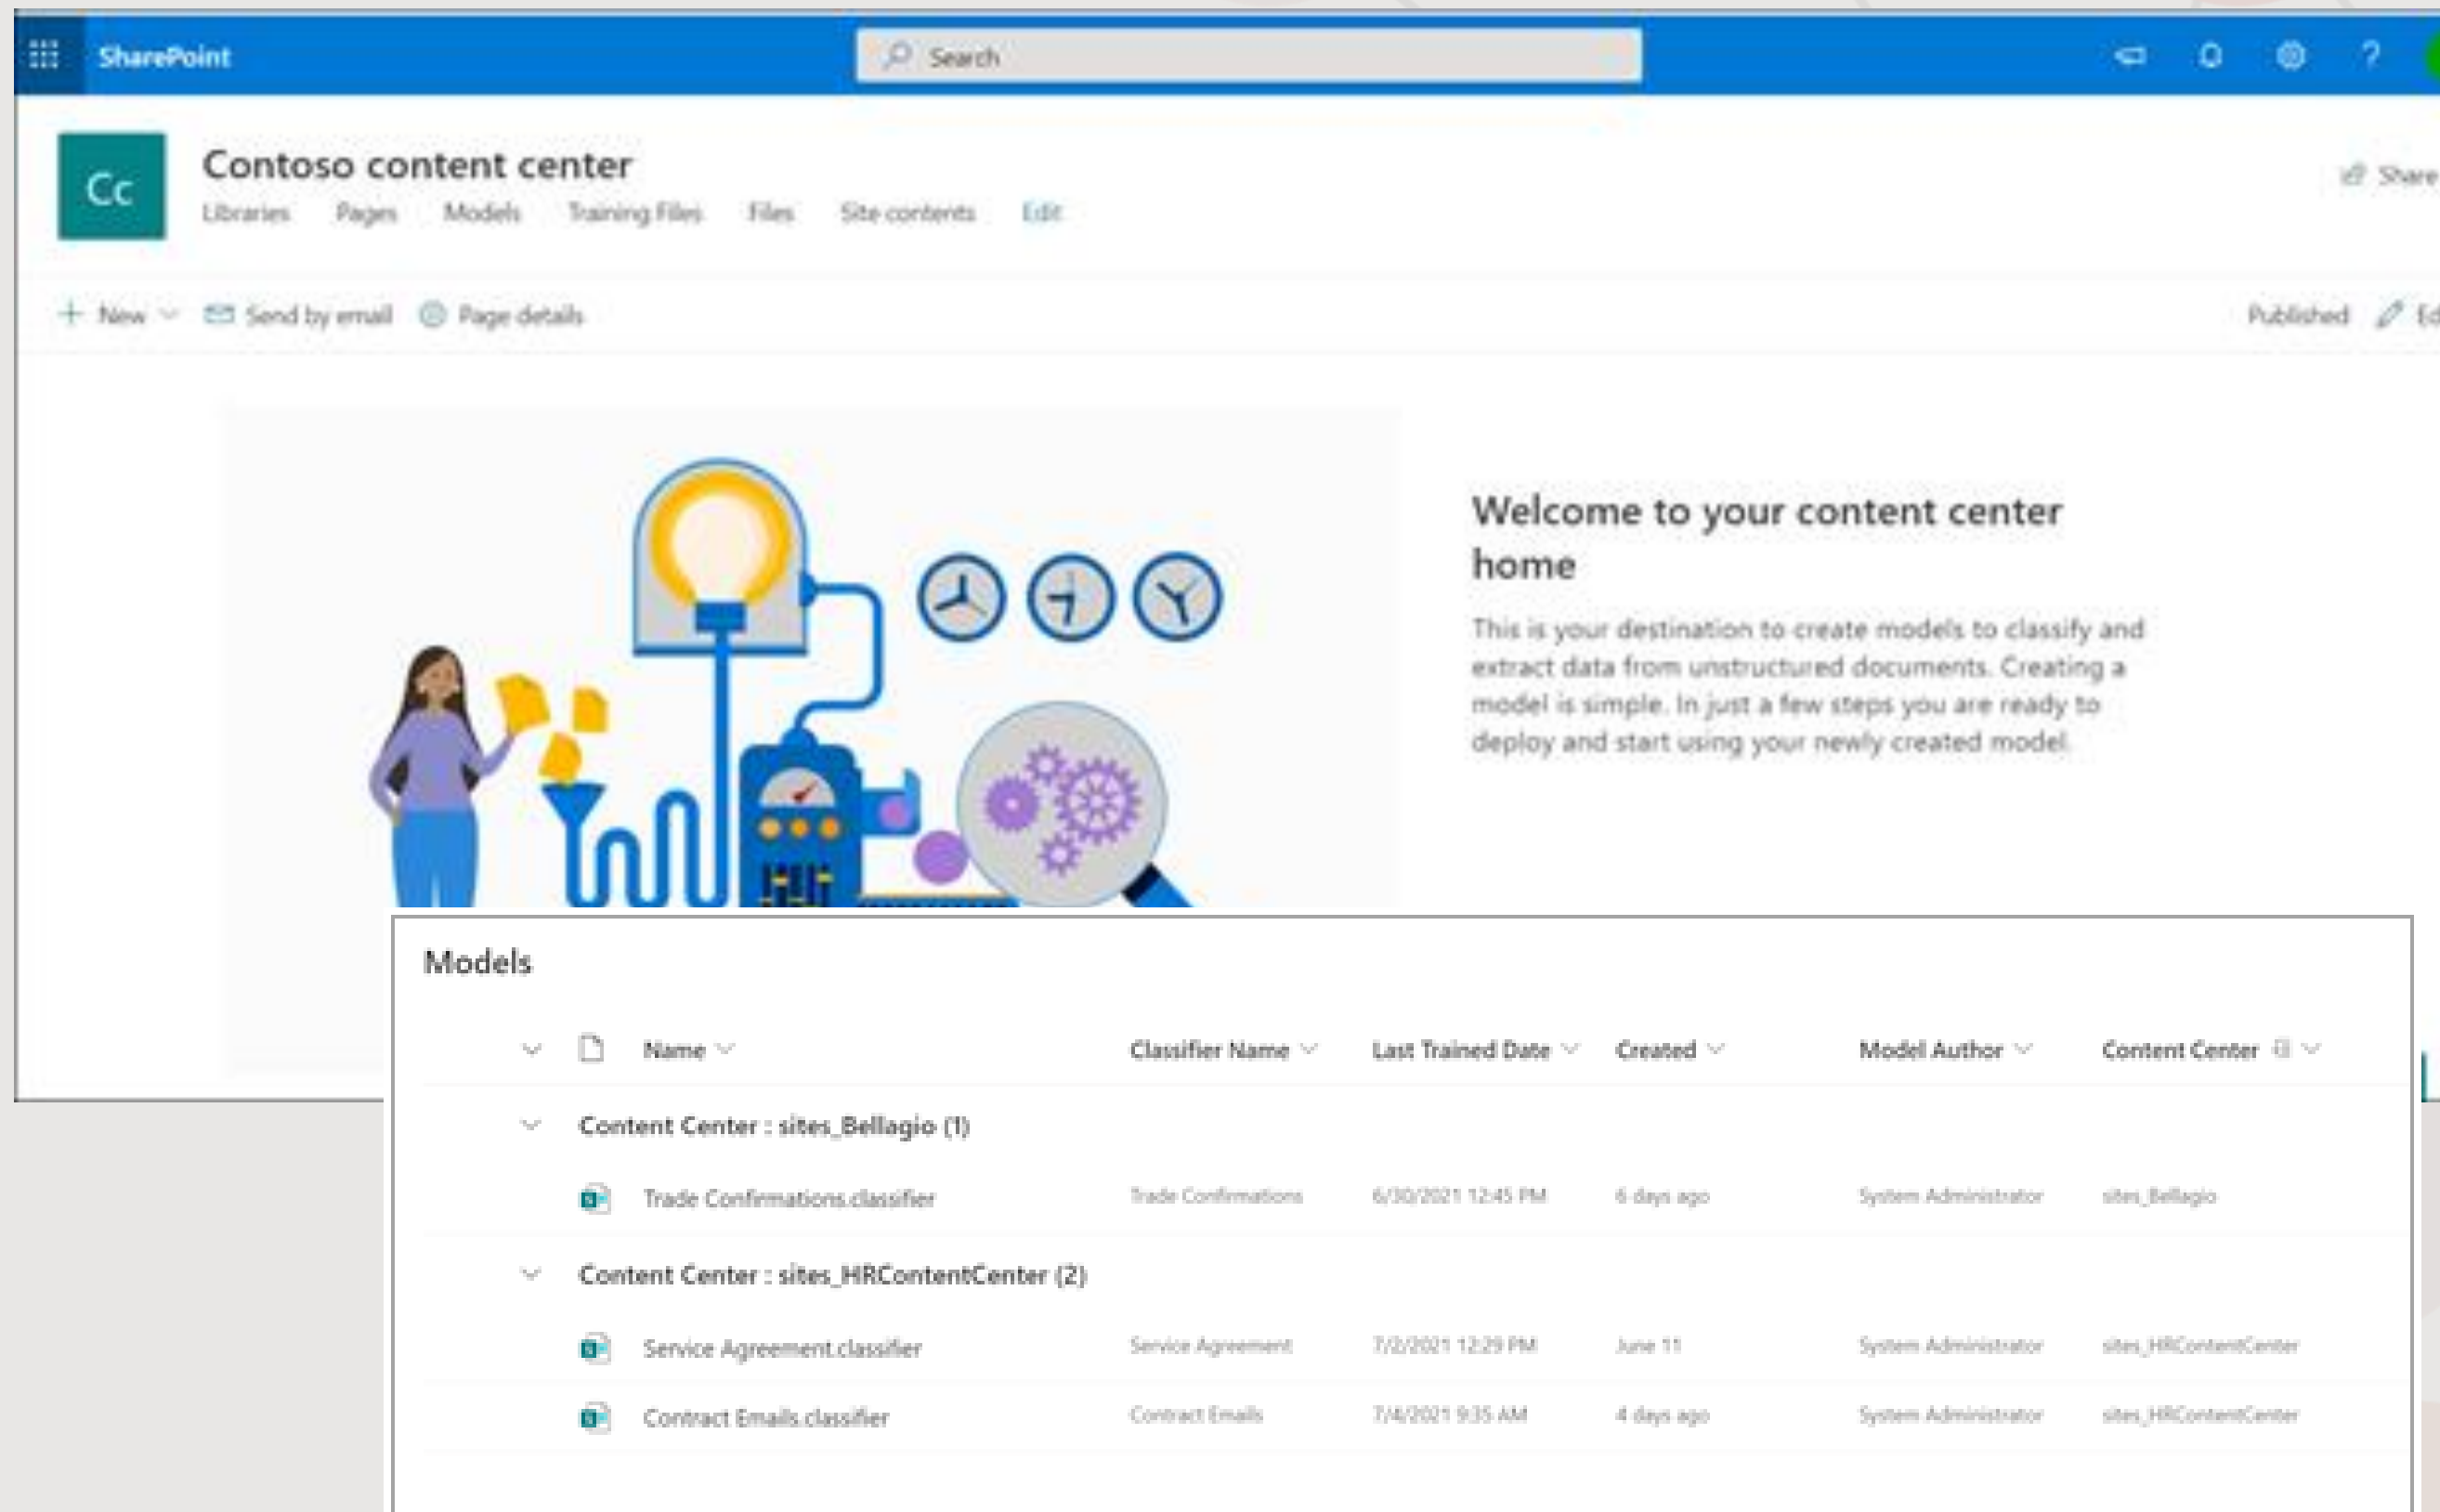

SharePoint Premium

SharePoint Premium offre funzionalità aggiuntive rispetto alla versione standard di SharePoint. Alcune delle funzionalità più importanti includono:

- **Intelligenza artificiale:** SharePoint Premium utilizza l'AI, attraverso **Microsoft Syntex**, per migliorare la gestione dei contenuti e l'automazione dei processi.
- **Automazione avanzata:** SharePoint Premium offre strumenti per automatizzare i processi documentali cruciali come contratti, fatture e SOW.
- **Sicurezza avanzata:** SharePoint Premium offre strumenti robusti per la gestione del ciclo di vita dei contenuti e il controllo degli accessi, garantendo un ambiente digitale strutturato e sicuro.
- **Microsoft 365 Backup:** soluzione built-in per mettere in sicurezza i contenuti di SharePoint, OneDrive ed Exchange
- **Microsoft 365 Archive:** modalità di archiviazione dei contenuti SharePoint, per ragioni di ciclo di vita o di compliance, alleggerendo il carico dello storage prezioso di SharePoint

Microsoft Syntex

SharePoint Search

Contoso content center Libraries Pages Models Training Files Files Site contents Edit

+ New Send by email Page details Published Edit

Welcome to your content center home

This is your destination to create models to classify and extract data from unstructured documents. Creating a model is simple. In just a few steps you are ready to deploy and start using your newly created model.

Models

Name	Classifier Name	Last Trained Date	Created	Model Author	Content Center
Content Center : sites_Bellagio (1)					
Trade Confirmations.classifier	Trade Confirmations	6/30/2021 12:45 PM	6 days ago	System Administrator	sites_Bellagio
Content Center : sites_HRContentCenter (2)					
Service Agreement.classifier	Service Agreement	7/2/2021 12:29 PM	June 11	System Administrator	sites_HRContentCenter
Contract Emails.classifier	Contract Emails	7/4/2021 9:35 AM	4 days ago	System Administrator	sites_HRContentCenter

- Microsoft Syntex sfrutta le funzionalità di AI per riconoscere, taggare, processare e classificare documenti di:
 - SharePoint Libraries
 - Teams
 - OneDrive
 - Exchange
- Abilita il Content Center site
- Nello specifico:
 - Document Processing (Prebuilt document processing, Structured and freeform document processing, Unstructured document processing)
 - Image tagging
 - Document translation
 - SharePoint eSignature
 - Optical Character Recognition (OCR)
- Funzionalità “pay-as-you-go” di Azure
<https://learn.microsoft.com/en-gb/microsoft-365/syntex/syntex-pay-as-you-go-services>

SharePoint eSignature

SharePoint eSignature

1

Originator creates a signature request and sends to recipients

2

Recipients review the document to be signed

3

Recipients sign and submit the document

Microsoft 365 Backup (Preview)

- Funzionalità “pay-as-you-go” di Azure
- Esegue il Backup/restore di contenuti OneDrive, SharePoint ed Exchange
- Si paga in base ai GB archiviati (0,15\$/GB/Mese)
- Il Deleted content resta ripristinabile per 1 anno
- La granularità del restore, per contenuti SharePoint e OneDrive, è file-level (in-place o new site)
- I Restore Point consentono:
 - un RPO con frequenza di 15’ per SharePoint e OneDrive e di 10’ per Exchange, per le ultime 2 settimane
 - un RPO con frequenza di una settimana per SharePoint e OneDrive e di 10’ per Exchange nel periodo da 15 a 365 gg

Microsoft 365 Archive (Preview)

The screenshot displays the Microsoft 365 admin center interface. The left sidebar contains navigation links: Home, Users, Teams & groups, Roles, Marketplace, Billing, and Setup. The main content area is titled 'Use content AI with M' and includes a 'Get started' section with a 'Manage billing' card. A modal window titled 'Archive' with a 'PREVIEW' badge is open, showing a description of the feature and a 'Turn on' button.

Use content AI with M

Microsoft Syntex uses content and artificial intelligence to help you manage document processing solutions for your organization. [Learn more about Microsoft Syntex](#)

Get started

Manage billing
Your Azure subscription has been set up.

User Impact

With Microsoft Syntex, users can automate their document processing tasks.

Archive **PREVIEW**

Optimize storage quota consumption in SharePoint by archiving. Use Microsoft 365 Archive to reduce the cost of storing inactive sites. You can reactivate archived sites at any time to regain access for a fee. [Learn more about Microsoft 365 Archive](#)

Turn on

- Funzionalità “pay-as-you-go” di Azure
- Si paga in base ai GB archiviati e riattivati
- Si aggiunge come status dei siti SharePoint (active, archived, deleted)
- La riattivazione di un sito archiviato può richiedere fino a 24 ore
- Per ora non sono supportati:
 - Gli HUB Sites
 - I siti collegati a Teams con canali Private e Shared

SharePoint Translation (Preview)

The screenshot displays the SharePoint 'Translated Files' interface. At the top, there's a search bar and navigation tabs for 'Home', 'Documents', 'Models', 'Pages', 'Translated Files' (selected), 'Site contents', and 'Edit'. Below the navigation bar, a toolbar contains various actions like 'New', 'Edit in grid view', 'Open', 'Share', 'Copy link', 'Delete', 'Pin to top', 'Favorite', 'Add shortcut', 'Download', 'Rename', 'Automate', 'Move to', and 'Copy to'. The main area shows a table of translated files with columns for 'Name', 'Modified', and 'Modified By'. A 'test' folder and several PDF files are listed, including 'Contoso - purchase-order1.pdf' and 'Contoso - purchase-order1_ja.pdf'. A 'Translate documents' dialog box is open in the foreground, prompting the user to 'Enter a language' and providing a list of popular languages: English (en), French (fr), German (de), Japanese (ja), and Spanish (es). A 'Translate' button is also visible in the dialog.

Name	Modified	Modified By
test	January 17	Automation Syntax
Contoso - purchase-order1.pdf	December 7, 2023	Automation Syntax
Contoso - purchase-order1_ja.pdf	December 7, 2023	SharePoint App
Contoso - purchase-order2.pdf	December 7, 2023	Automation Syntax
Contoso - purchase-order2_ja.pdf	December 7, 2023	SharePoint App
Contoso - purchase-order3a.pdf	December 7, 2023	Automation Syntax
Contoso - purchase-order3a_ja.pdf	December 7, 2023	SharePoint App
Contoso_HR_Benefits_Change_1.pdf	December 1, 2023	Automation Syntax
Contoso_HR_Benefits_Change_1_de.pdf	December 7, 2023	SharePoint App
Contoso_HR_Benefits_Change_1_ja.pdf	December 1, 2023	SharePoint App

- Funzionalità “pay-as-you-go” di Azure, pagandola sulla base al numero dei caratteri tradotti
- Supporta diversi formati file (csv, docx, html, msg, pdf, pptx, txt, xlsx)
- Supporta dozzine di lingue e dialetti
- Gestisce file di dimensioni fino a 40 MB
- Non gestisce testi su immagine e file protetti da password

Novita su Forms

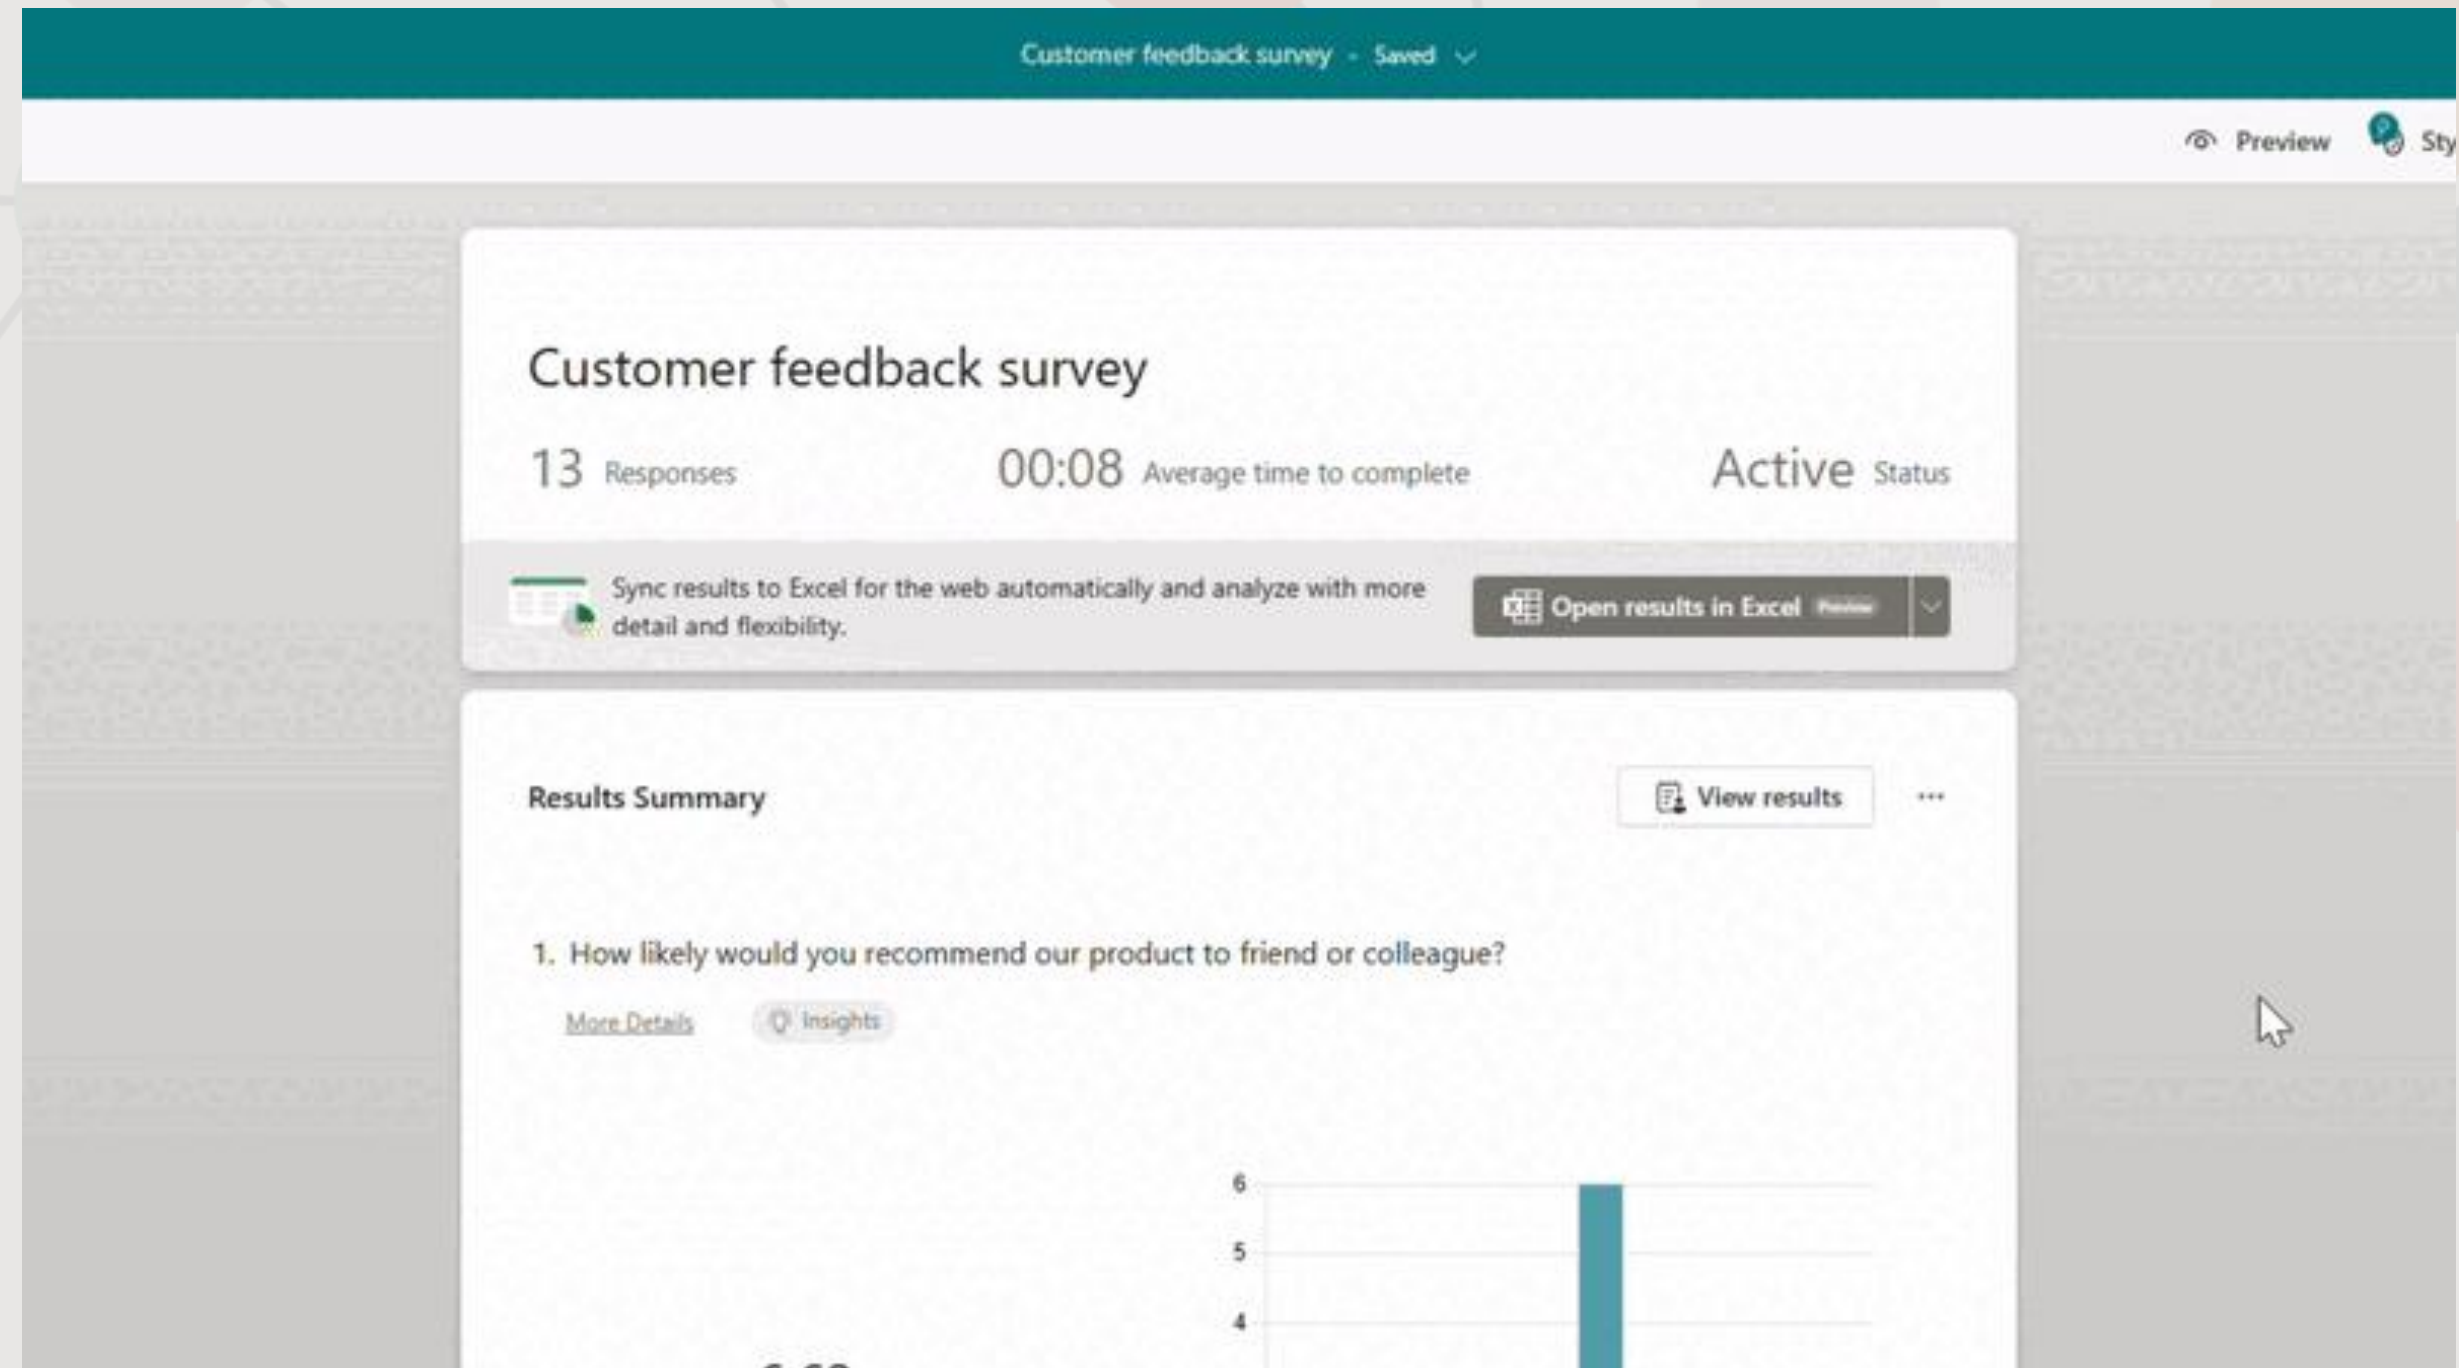

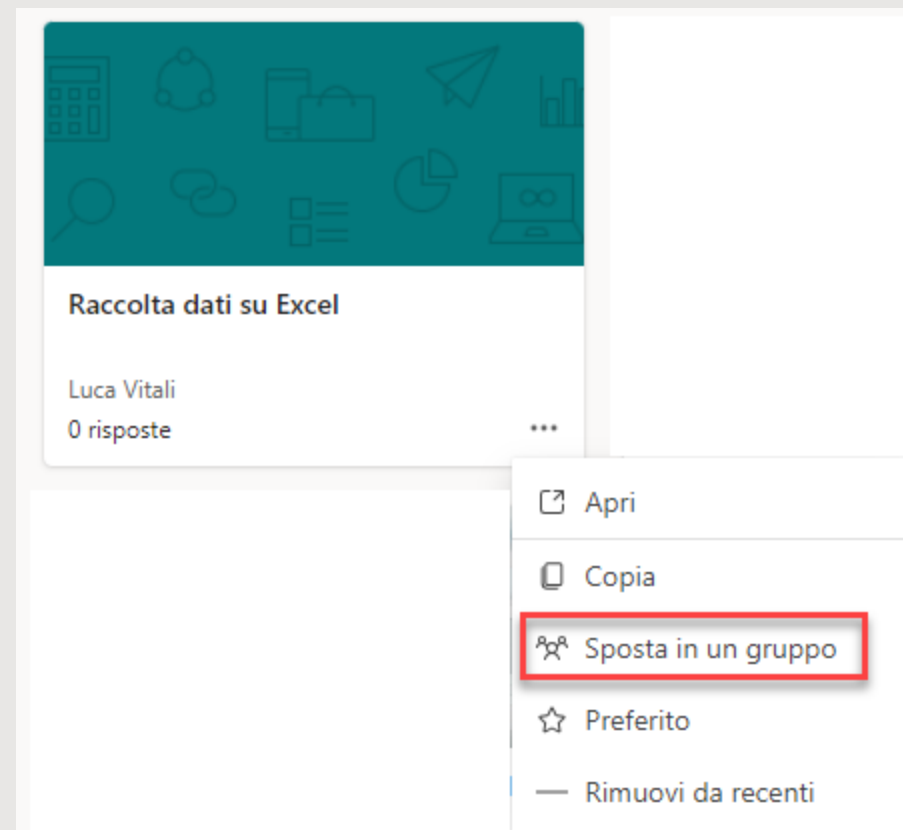

Forms data sync to Excel

E' finalmente possibile visualizzare, in tempo reale, i risultati dei Form in Excel!

Punti di attenzione:

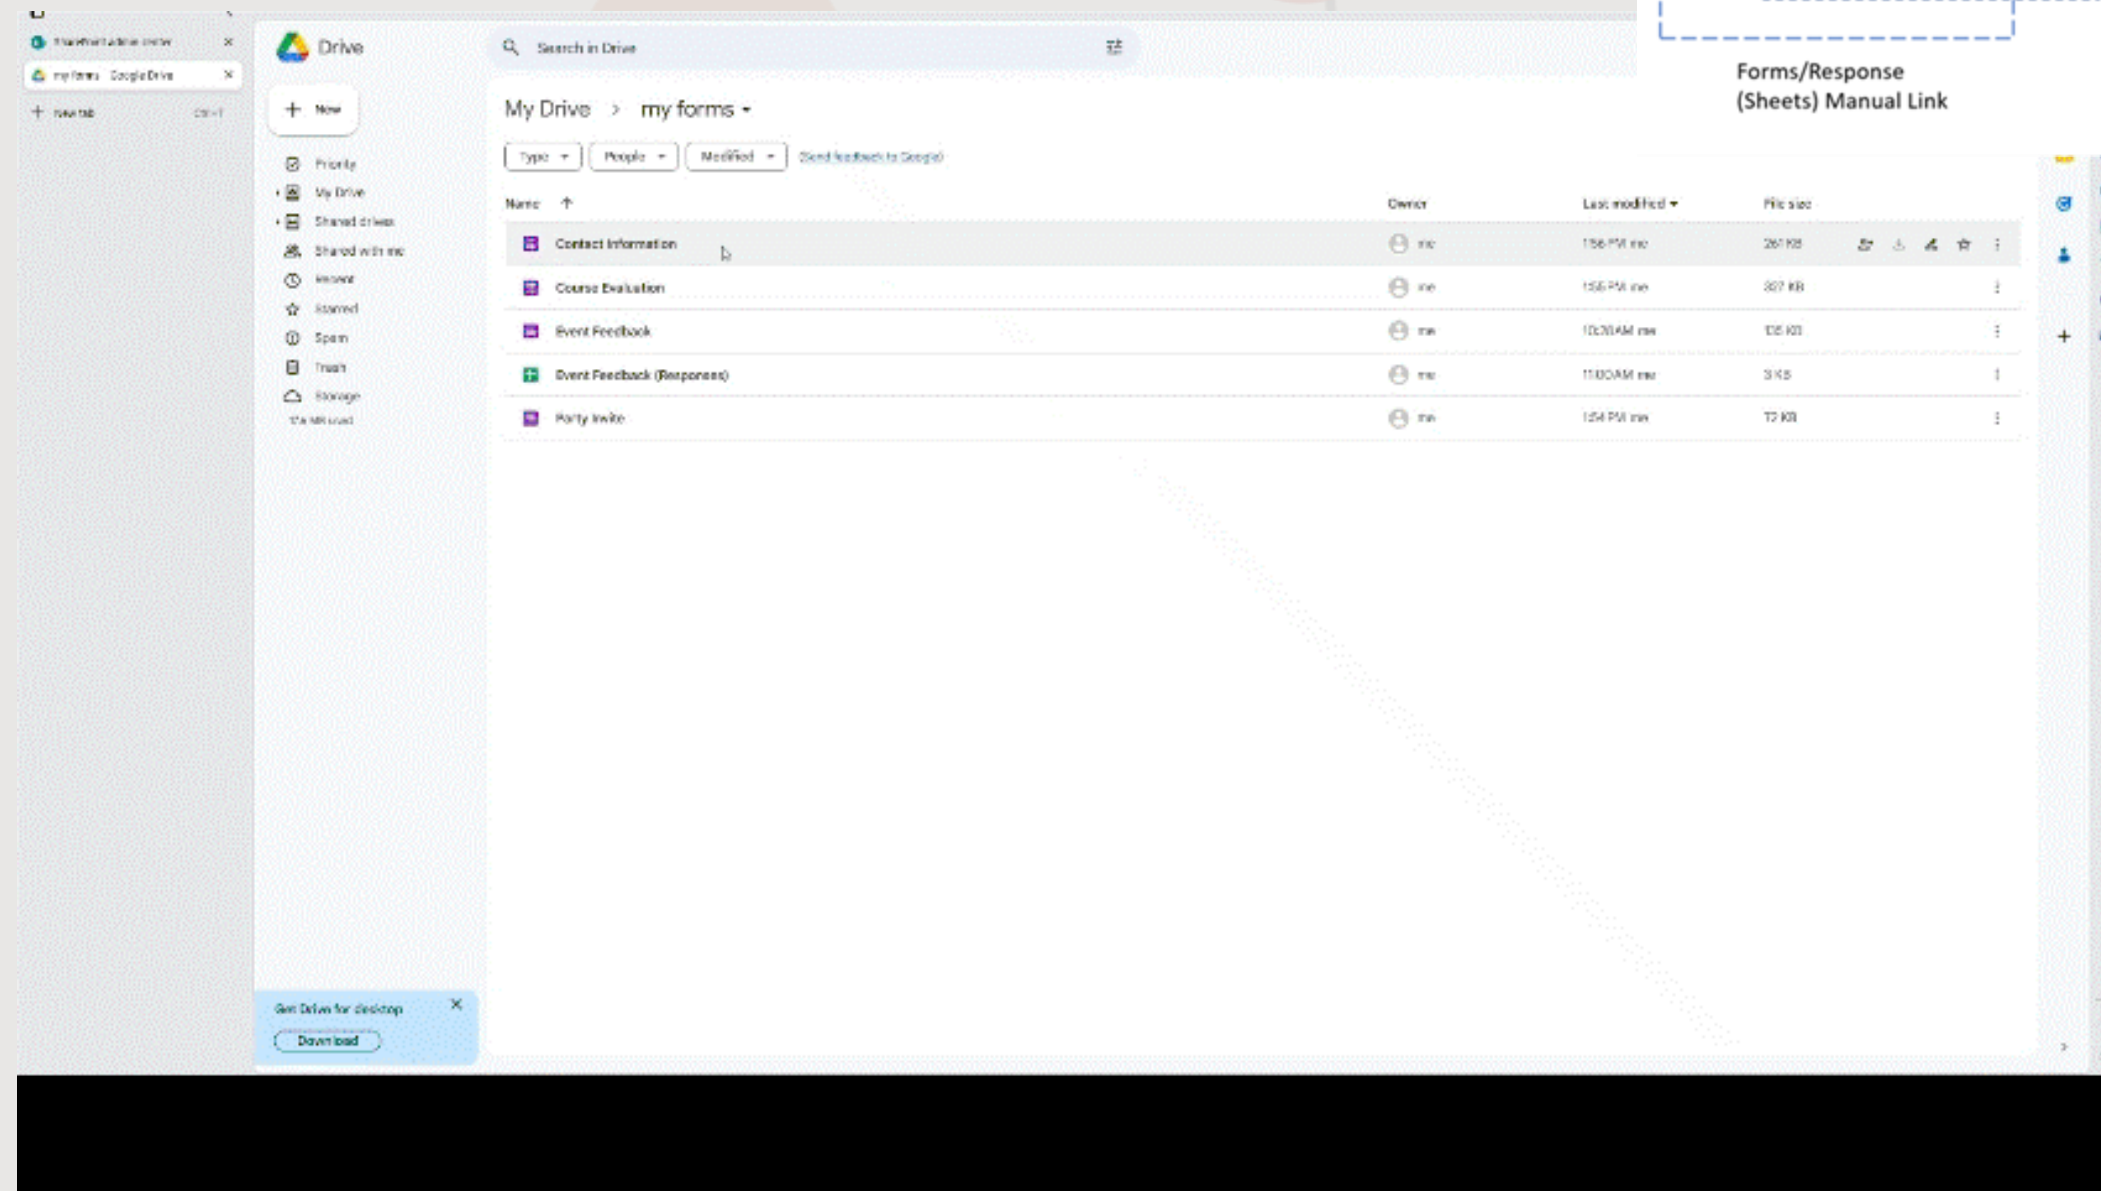

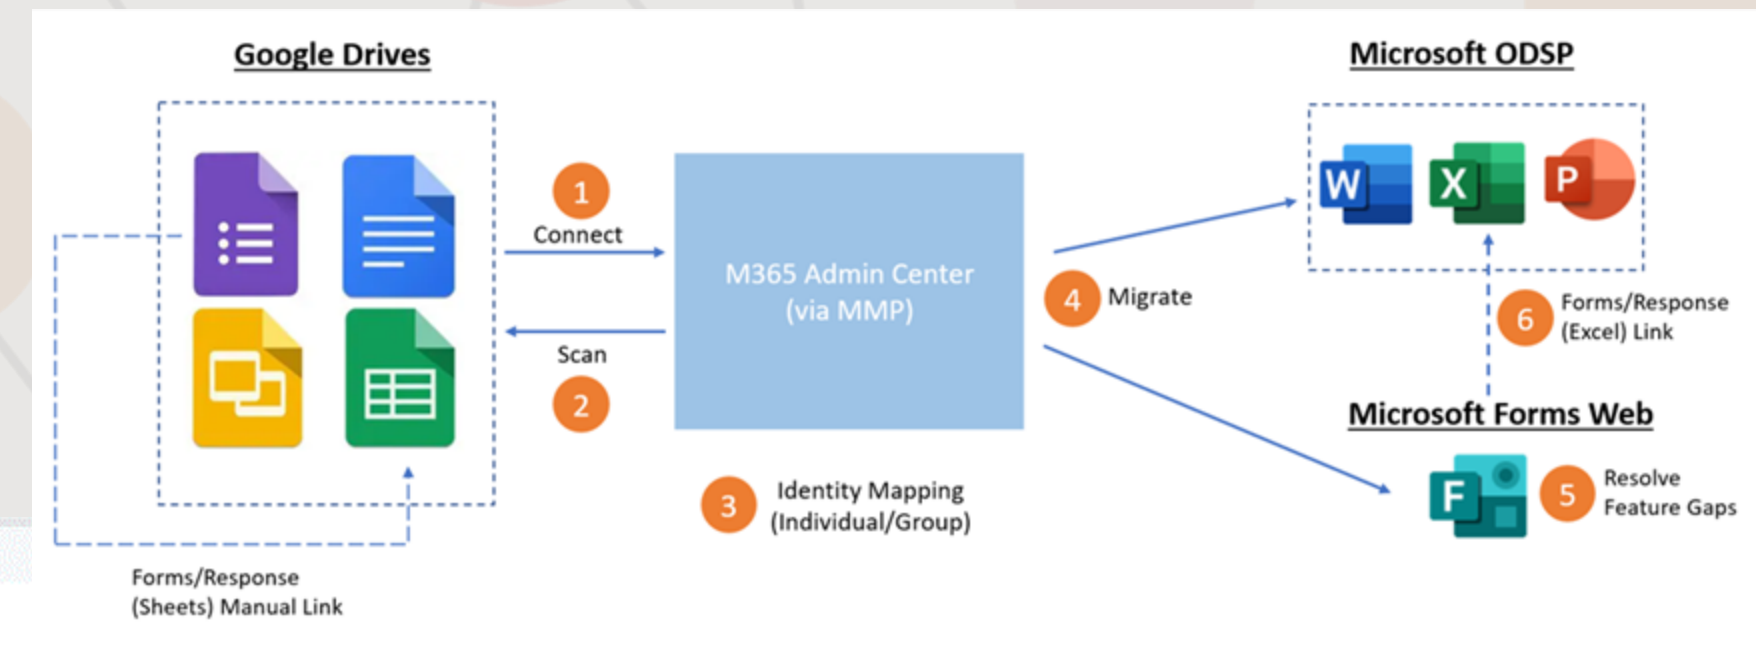

1. il Form deve essere salvato dentro un Gruppo M365
2. Il file Excel deve essere aperto via Web

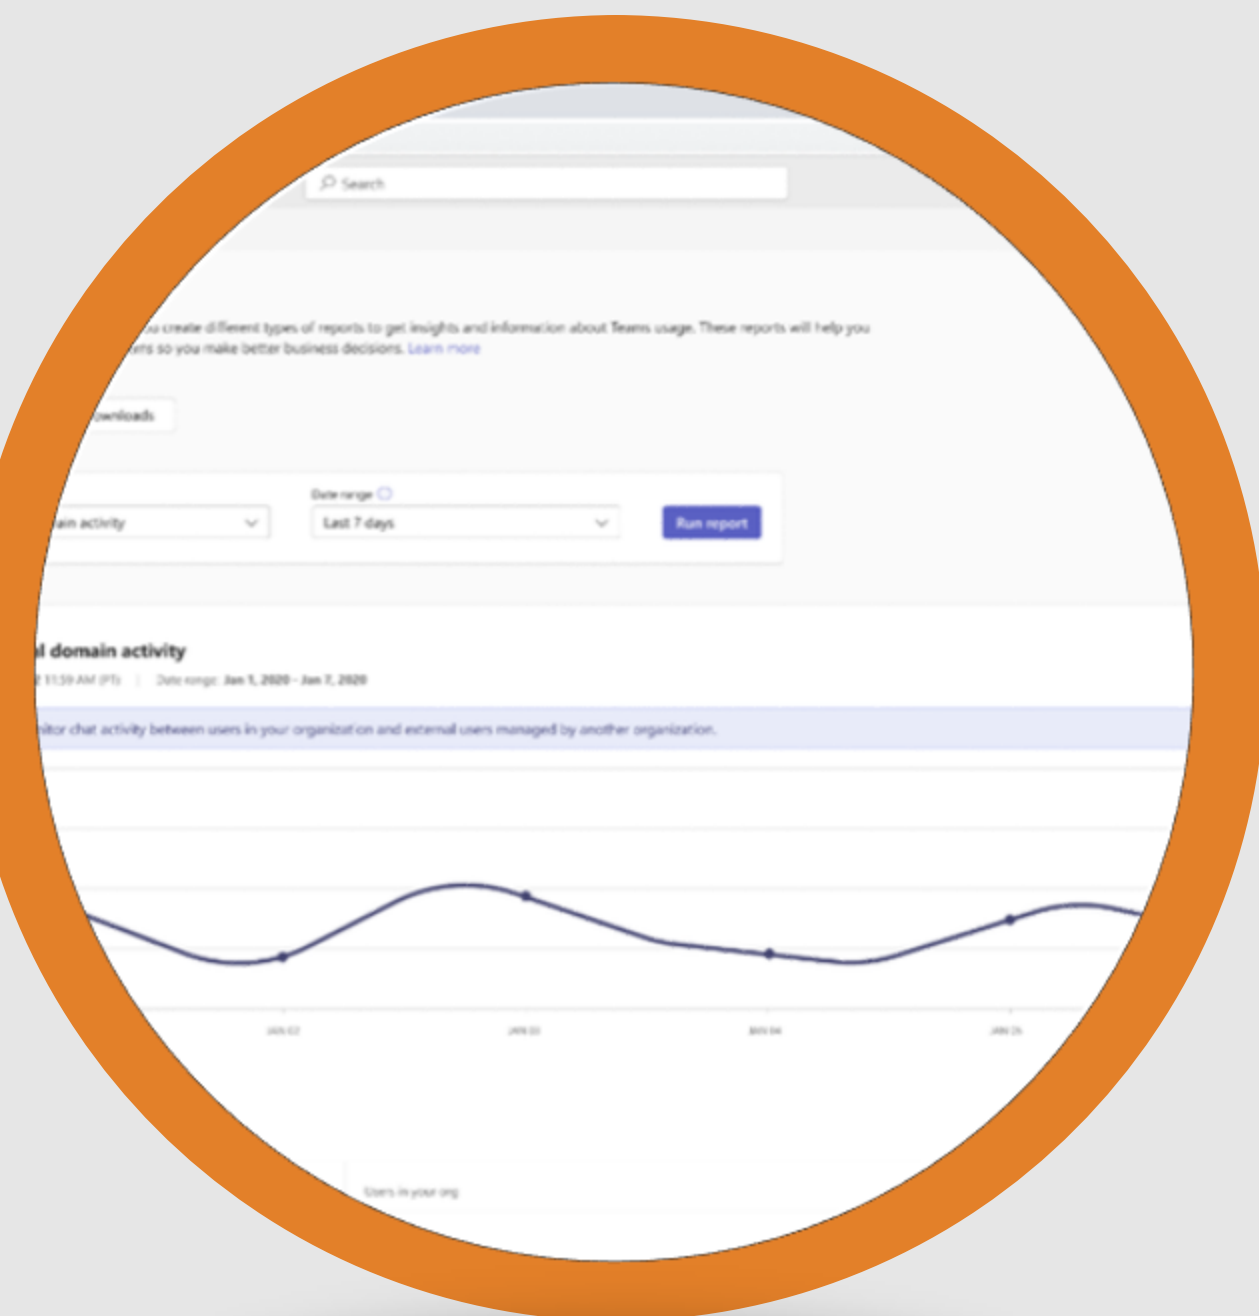

Migrate Your Google Forms to MS Forms in M365 Admin Center

E' ora possibile migrare i Google Forms a Microsoft Forms, direttamente dal portale M365 Admin Center

[Migrate Your Google Forms to Microsoft Forms in Microsoft 365 Admin Center - Microsoft Community Hub](#)

Novità su Teams

Simplified audio and video controls

The screenshot displays a Microsoft Teams meeting window titled "Q4 Planning". The top toolbar includes icons for Chat, People, Raise, React, View, Apps, More, Camera, Mic, Share, and a red "Leave" button. The "Mic" icon is highlighted with a red box. A simplified audio settings menu is open, showing options for Speaker and Microphone. The Speaker section has "Built-in speaker" selected. The Microphone section has "Built-in microphone" selected. A volume slider is visible. Below these are toggles for "Spatial audio" and "Noise suppression", both of which are turned on. A link for "More audio settings" is at the bottom of the menu. The meeting grid shows eight participants: Daniela Mander, Kristin Watson, Wade Warren, Cameron Williamson, Ralph Edwards, Reta Taylor, Floyd Miles, and Jerome Bell. Savannah Nguyen is also listed at the bottom right of the grid.

Telefoni Alcatel certificati SIP GW

Prodotti | Telefoni, Softphone e Dispositivi

Telefoni SIP Alcatel-Lucent Enterprise

I telefoni SIP forniscono comunicazioni di livello enterprise grazie a Rainbow Hub, RingCentral MVP® o server Open SIP.

La gamma dei telefoni SIP Alcatel-Lucent Enterprise comprende tre linee di prodotti: Myriad, Halo e **Cloud Edition**.

La gamma Myriad consente agli utenti di gestire facilmente le chiamate, di godere di un'esperienza utente fluida e di migliorare la produttività. È adatta a dirigenti, manager e professionisti che necessitano di servizi di telefonia di qualità. Offre prestazioni eccezionali con una qualità audio HD migliorata, un'interfaccia utente moderna e intuitiva e funzionalità di telefonia migliorate.

La gamma Halo offre funzionalità di telefonia standard che aiutano a migliorare l'efficienza della comunicazione aziendale tra il personale che lavora in ufficio, nei call center e per gli ospiti degli hotel. La gamma Halo è pensata per i knowledge worker. È progettata per chiamate VoIP di fascia media, call center e applicazioni di pubblica utilità. È conveniente e facile da installare.

Nuovo ruolo RBAC: Teams Telephony Admin

Great news! Microsoft Teams has recently introduced a highly-anticipated feature for the RBAC role, known as Teams Telephony Admin. This role is specifically designed to manage telephony-related functions in the Teams Admin Center. With this new feature, you can have more precise control at a granular level, catering to specific job functions with ease. This is a game-changer for managing telephony functions within Teams.

1. User Management feature allows you to easily view the list of all the users and manage their voice settings and voice-related policies. This way, you can ensure that each user has the best experience with their voice settings.
2. With Voice Management, you will have access to phone numbers, locations, voice apps, and direct routing settings for the entire tenant. This feature streamlines the process of managing voice-related issues for the entire organization.
3. For Analytics and Reporting, you can view and manage public switched telephone network (PSTN) related reports such as PSTN Blocked Users, PSTN Minute pools, PSTN & SMS Usage, and Audio Conferencing dial-out usage. With this feature, you can keep track of all the important metrics related to your organization's voice communication.

Aggiornamenti di Febbraio

February 22, 2024

- **Specific People Link support for Collaborative Notes:** This feature brings improvement to the shareable link type that is created by Collaborative Notes making meetings more effective and secure. The new Collaborative Notes file will generate a Specific People Link (PSL) by default. This link type offers more controlled access than Company Specific Link (CSL). This change also aligns with tenants who have their file-sharing policy set as Specific People. Tenants who previously had Collaborative Notes disabled due to lack of PSL support can now enable and use the feature.
- **Set sensitivity labels for meetings from your phone (iOS):** This feature enables you to set the sensitivity label for meetings when scheduling from mobile. Admins can set mandatory and default labels, and this will reflect in their mobile apps as well. Enforcement of the label will also be honored on mobile.
- **Meeting invite improvements:** Meeting invite is the first thing that the user who is invited to the meeting sees before joining. Some design improvements are being made to ensure that the most important information is presented and it's better grouped.
- **New admin policy for enabling/disabling tenant users to join externally hosted meetings:** As an admin, you can control which meetings your organization users can attend - only internally hosted meetings or externally hosted meetings as well. This can help your organization to meet compliance needs and strengthen controls around Teams meetings.
- **In form meeting options for Teams town halls and webinars:** Event organizers for town halls and webinars will no longer be sent to a webpage to edit their event's meeting options. The meeting options will now show up as an inline window within the scheduling form. This happens for both create and edit experiences.
- **Microsoft Teams: UX improvements for Multi-Tenant Organization (MTO) users:** This release features user experience improvements when Microsoft Teams users interact with users in another tenant that belong to their organization (e.g., for conglomerates, as a result of M&A). Key changes include removing the possibility of split 1:1 chat threads, richer profile information, removal of the "External" label, and introducing support for an optional admin configurable label.

Aggiornamenti di Febbraio

Microsoft Teams: Open Teams app content in multi-window stageview

Rollout Start:
March 2024

Microsoft Teams enables you to open your app content in new multi-window experiences. Unlock multi-tasking workflows for your users inside Teams. Allow them to engage with content and conversation, side-by-side.

Feature ID: 383404

Added to roadmap: 2/16/2024

Last modified: 2/16/2024
