Venerdì 19 Aprile 2024

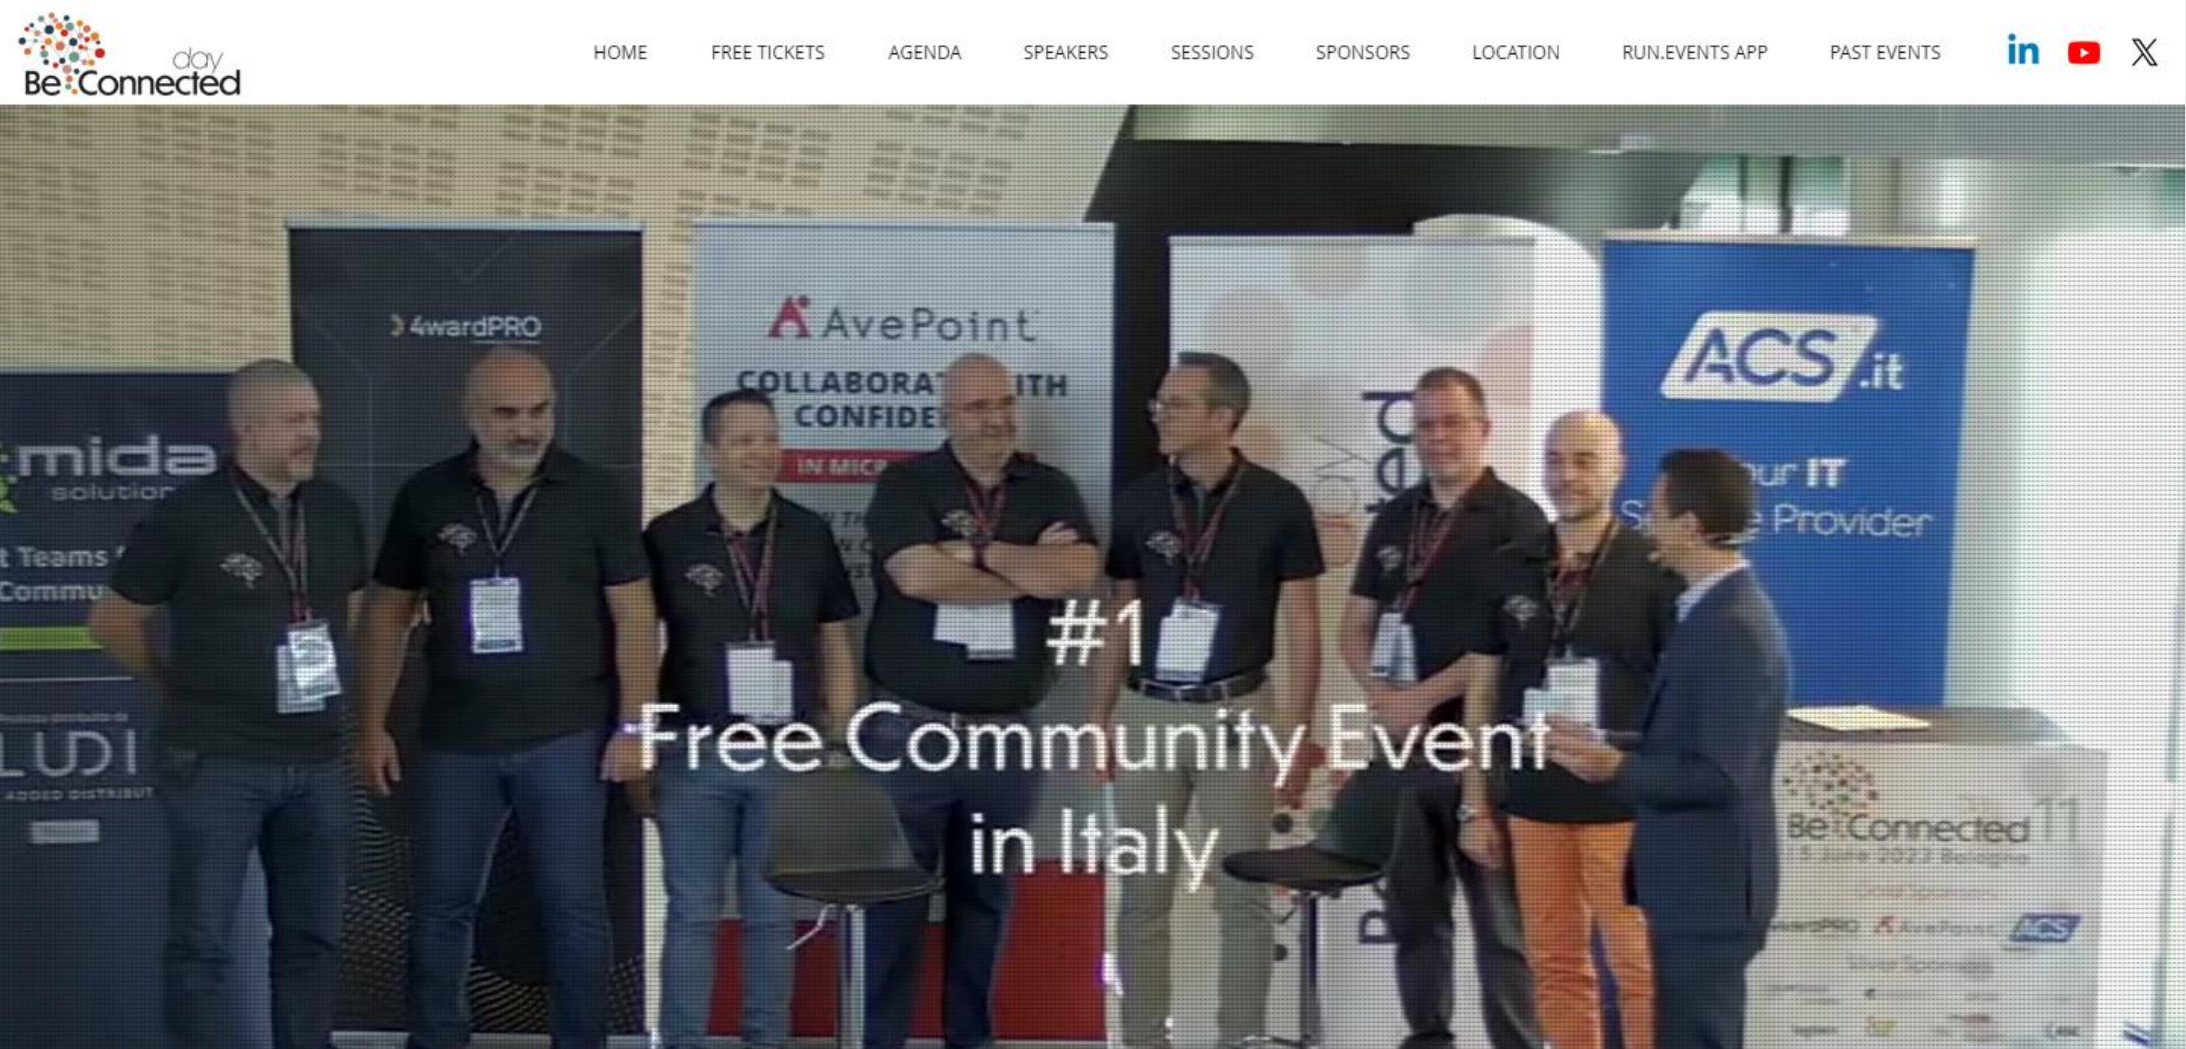

09.45-10.45

Nella puntata di oggi....

- BeConnected day 12 + CollabDays 2024
- Teams Private Line
- Teams Queue App
- Call Record Insights for Microsoft Teams
- Nuovi dispositivi SIP Gateway
- New Microsoft Lists forms experience
- C'è fermento nel mondo della posta elettronica

BeConnected day 12 + CollabDays 2024

Quest'anno il BeConnected day e i CollabDays uniscono le forze per dare vita all'evento Community gratuito sul tema Modern Work più importante d'Italia!

Torniamo a Milano, precisamente all'UCI Cinemas di Assago Milanofiori, con 5 sale a disposizione per 1 Keynote e 30 sessioni tenute da MVP ed esperti Microsoft sui temi

- DATA & AI
- MODERN WORK
- USER ADOPTION
- IDENTITY
- SECURITY
- COMPLIANCE
- EMPLOYEE EXP
- POWER PLATFORM
- CASE STUDIES
- VISION & STRATEGY

Global Azure Torino 2024

Global Azure è un evento mondiale dedicato a tutti gli utenti interessati a conoscere o approfondire il mondo di Microsoft Azure. Questo evento coinvolge comunità di appassionati e professionisti di tutto il mondo.

<https://globalazure.net>

April 18th-20th when	+500 speakers who
6 continents where	+600 sessions online + in person

<https://globalazuretorino.welol.it>

The poster for Global Azure Torino 2024 features a dark blue background with a faint world map. At the top left is the Global Azure logo with the tagline 'BY COMMUNITY • FOR COMMUNITY' and the year '2024'. Below it, the date '20.04.2024' and location 'TORINO' are displayed. The venue 'Fondazione ITS ICT, Via Jacopo Durandi, 13, 10143 Torino' is listed. The main headline reads 'Inviare posta elettronica sicura e garantita da Azure e servizi integrati'. Two speakers are featured in circular portraits: Raffaele Colavecchi and Davide Rasoli. The bottom left corner includes the 'Azure Meetup TORINO' logo. The bottom right corner displays logos for sponsors: PA EXPERTISE RETELIT GROUP, TD SYNnex, and INTR3.

Teams Private Line

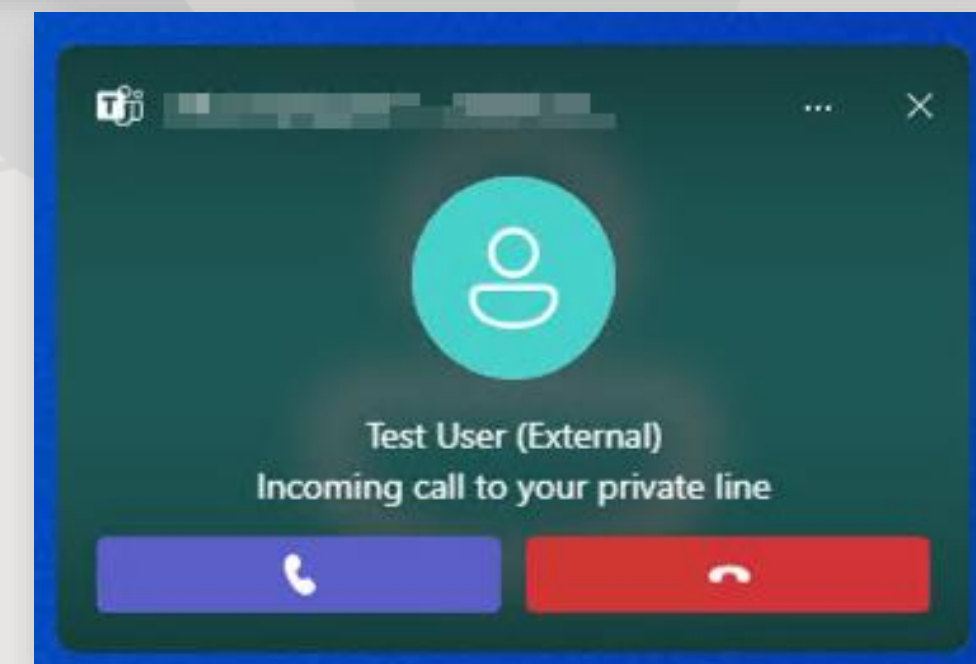

Teams Private Line

A private line is a second phone number assigned to a user. Typically, the user is an executive who shares the second number with only a few people.

- Private lines support inbound calling only
- A private line can't be used to make outgoing calls
- Users can be assigned one private line only.
- Internal or external reverse number lookup (RNL) works with private lines.
- Private lines must be the same number type as the user's primary line.
- Private lines must have the same licensing requirements as the user's primary phone number.
- Users must be "voice enabled" for private lines

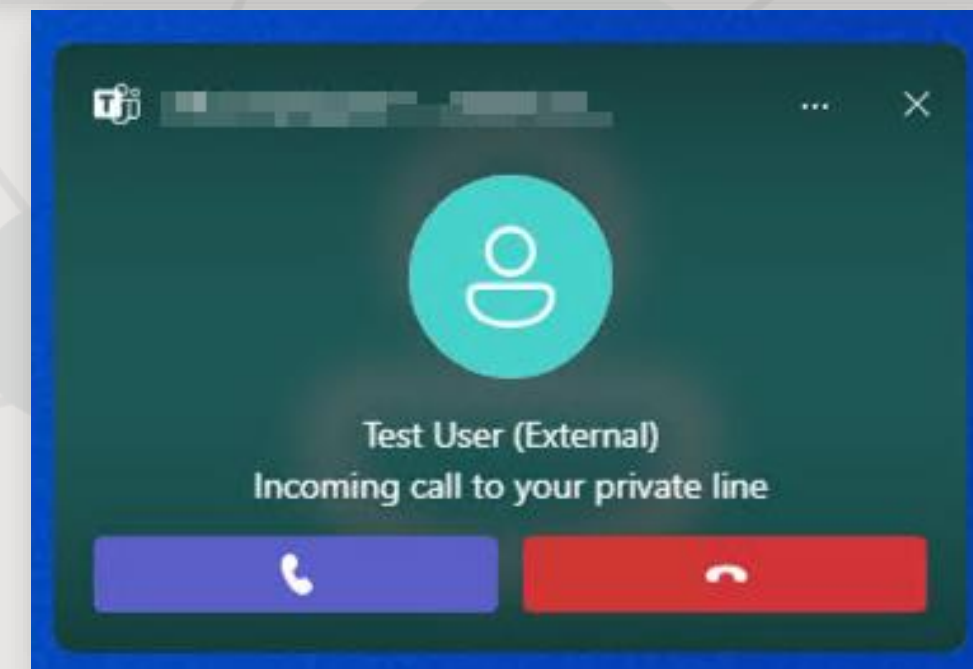

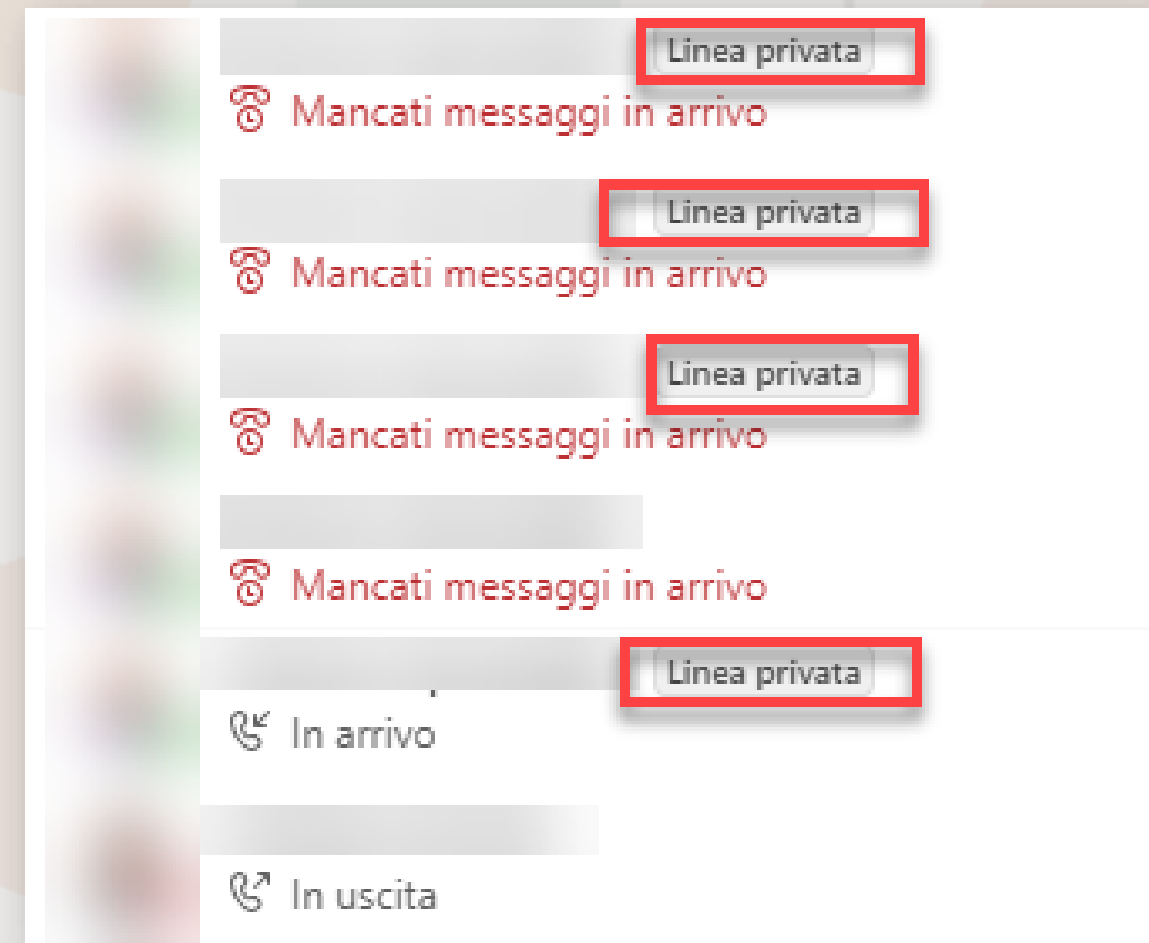

<https://learn.microsoft.com/en-us/microsoftteams/private-line>

Teams Private Line

The following information describes how inbound calls are handled using a private line:

- For calls to a user's private line, all inbound call handling rules are ignored, including call forwarding, simultaneous ringing, and call groups.
- If a user with a private line has voicemail enabled, the call goes to voicemail per normal.
- If the user doesn't have voicemail enabled and the call is unanswered, the busy signal will be played after 1 minute.
- *Calls to a user's private line don't follow "do not disturb" rules (ma non funziona...)*
- Incoming calls to a user's private line have a special ringtone to distinguish them from calls to the user's primary line.
- The Teams notification for the call tells the user that the incoming call is on their private line. The call history in Teams will also show a label that an incoming call was made to the private line.

```
Set-CsPhoneNumberAssignment -Identity <UPN> -PhoneNumber "+39023456789"  
-PhoneNumberType DirectRouting -AssignmentCategory Private

Teams Queue App

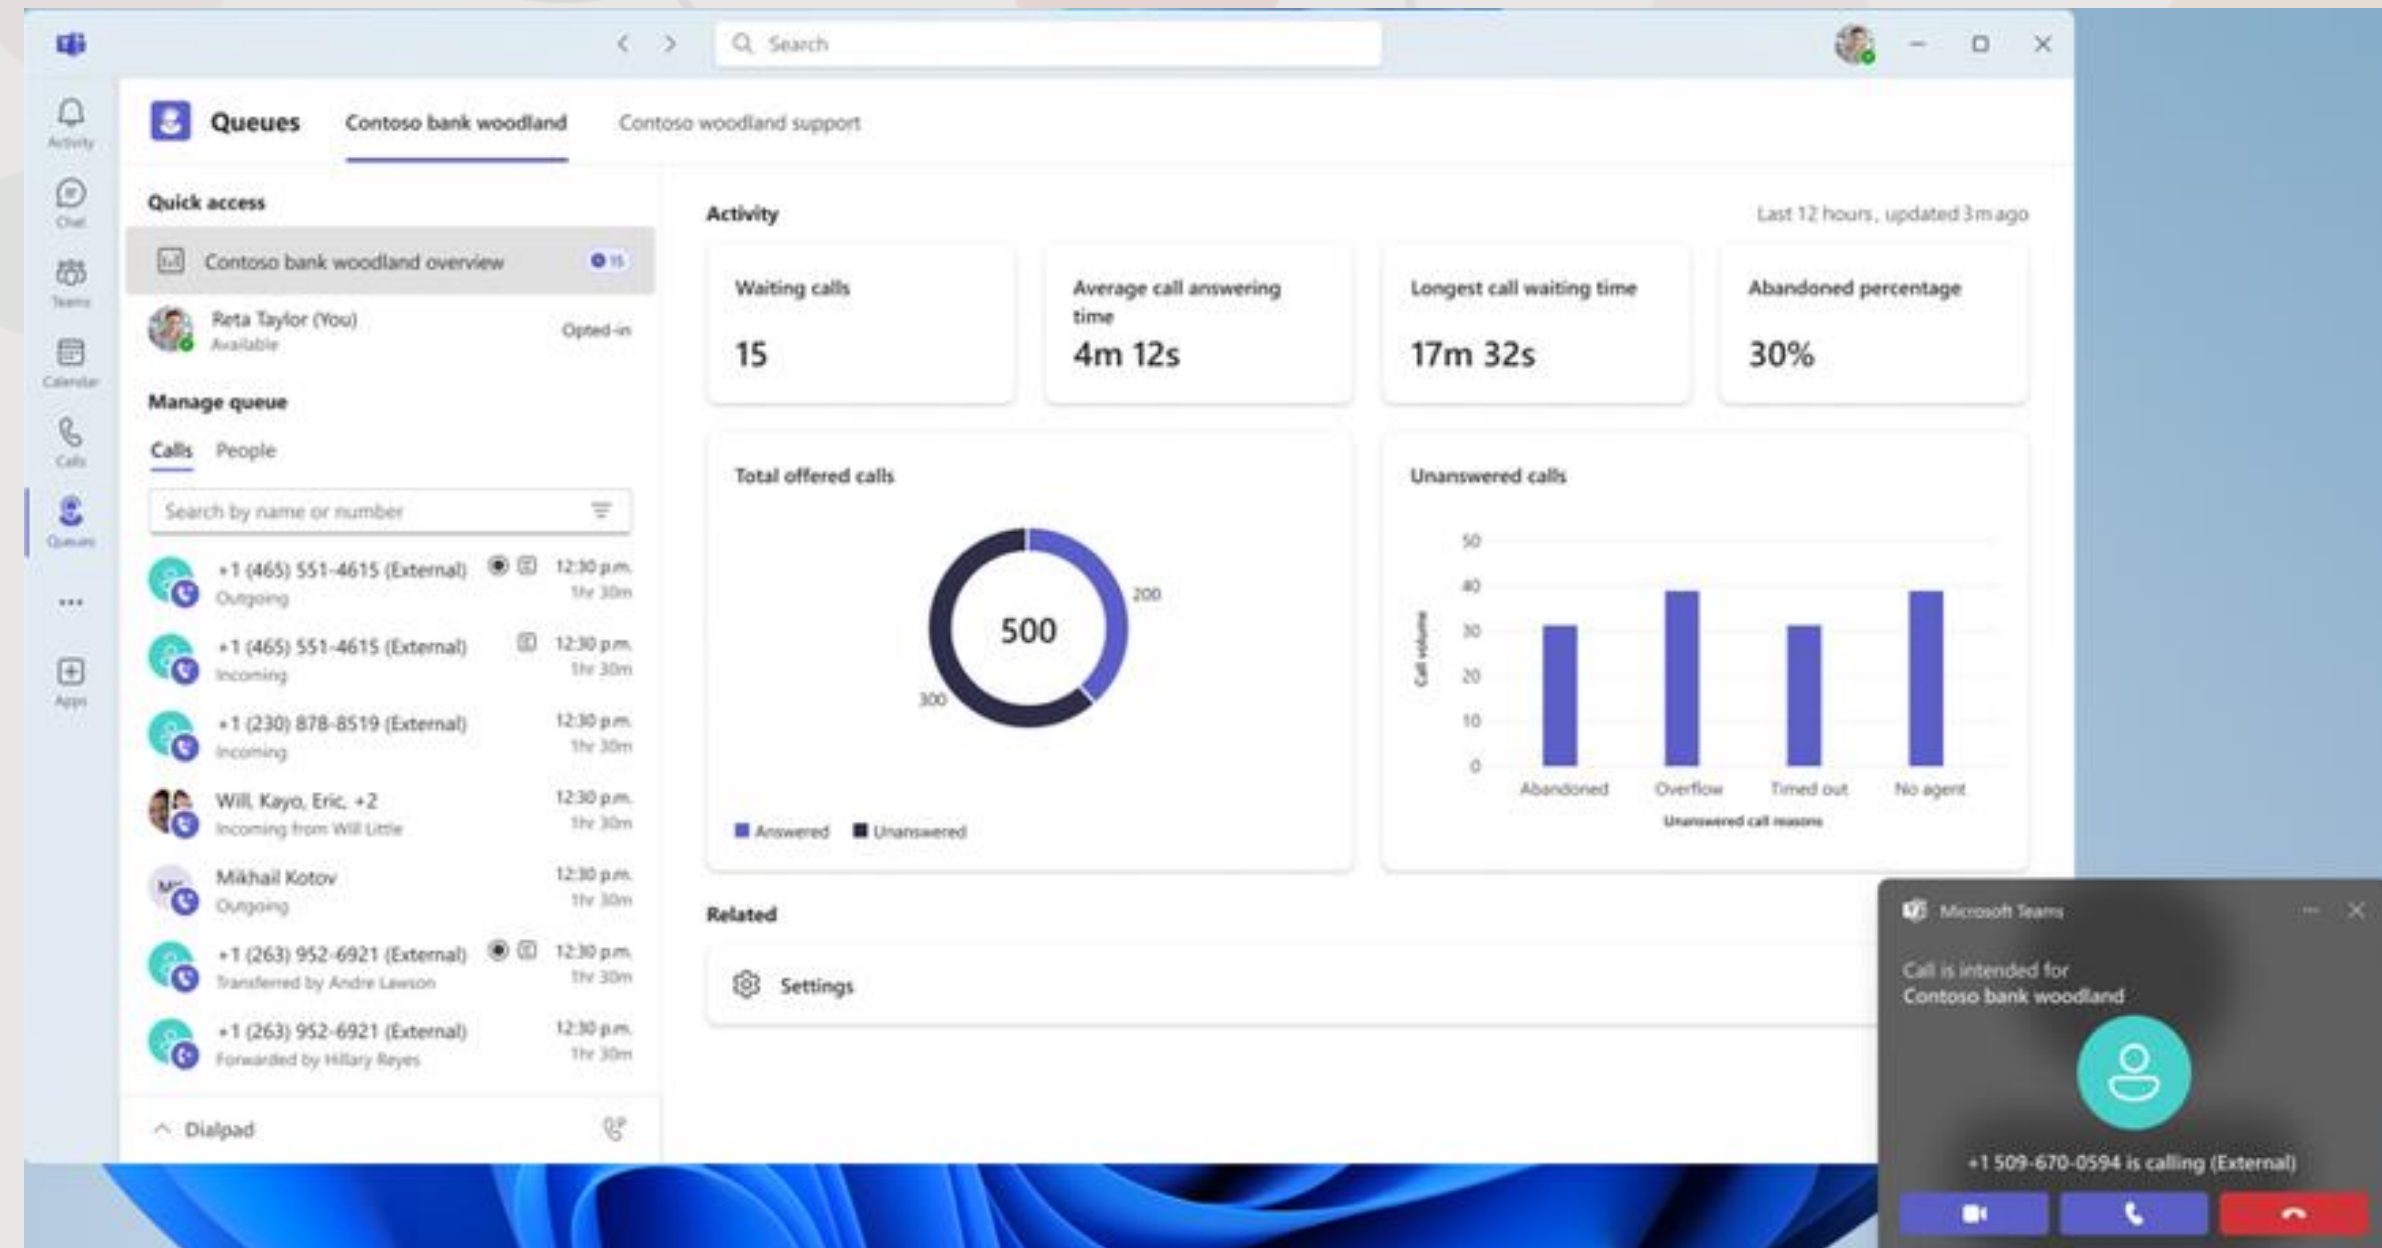

Teams Queue App

Upon opening of the Queues app, users immediately get a 360 view of their call queue performance through real-time statistics.

The app makes it easy for members to opt-in or out of call queues based on these statistics, their availability, and business needs.

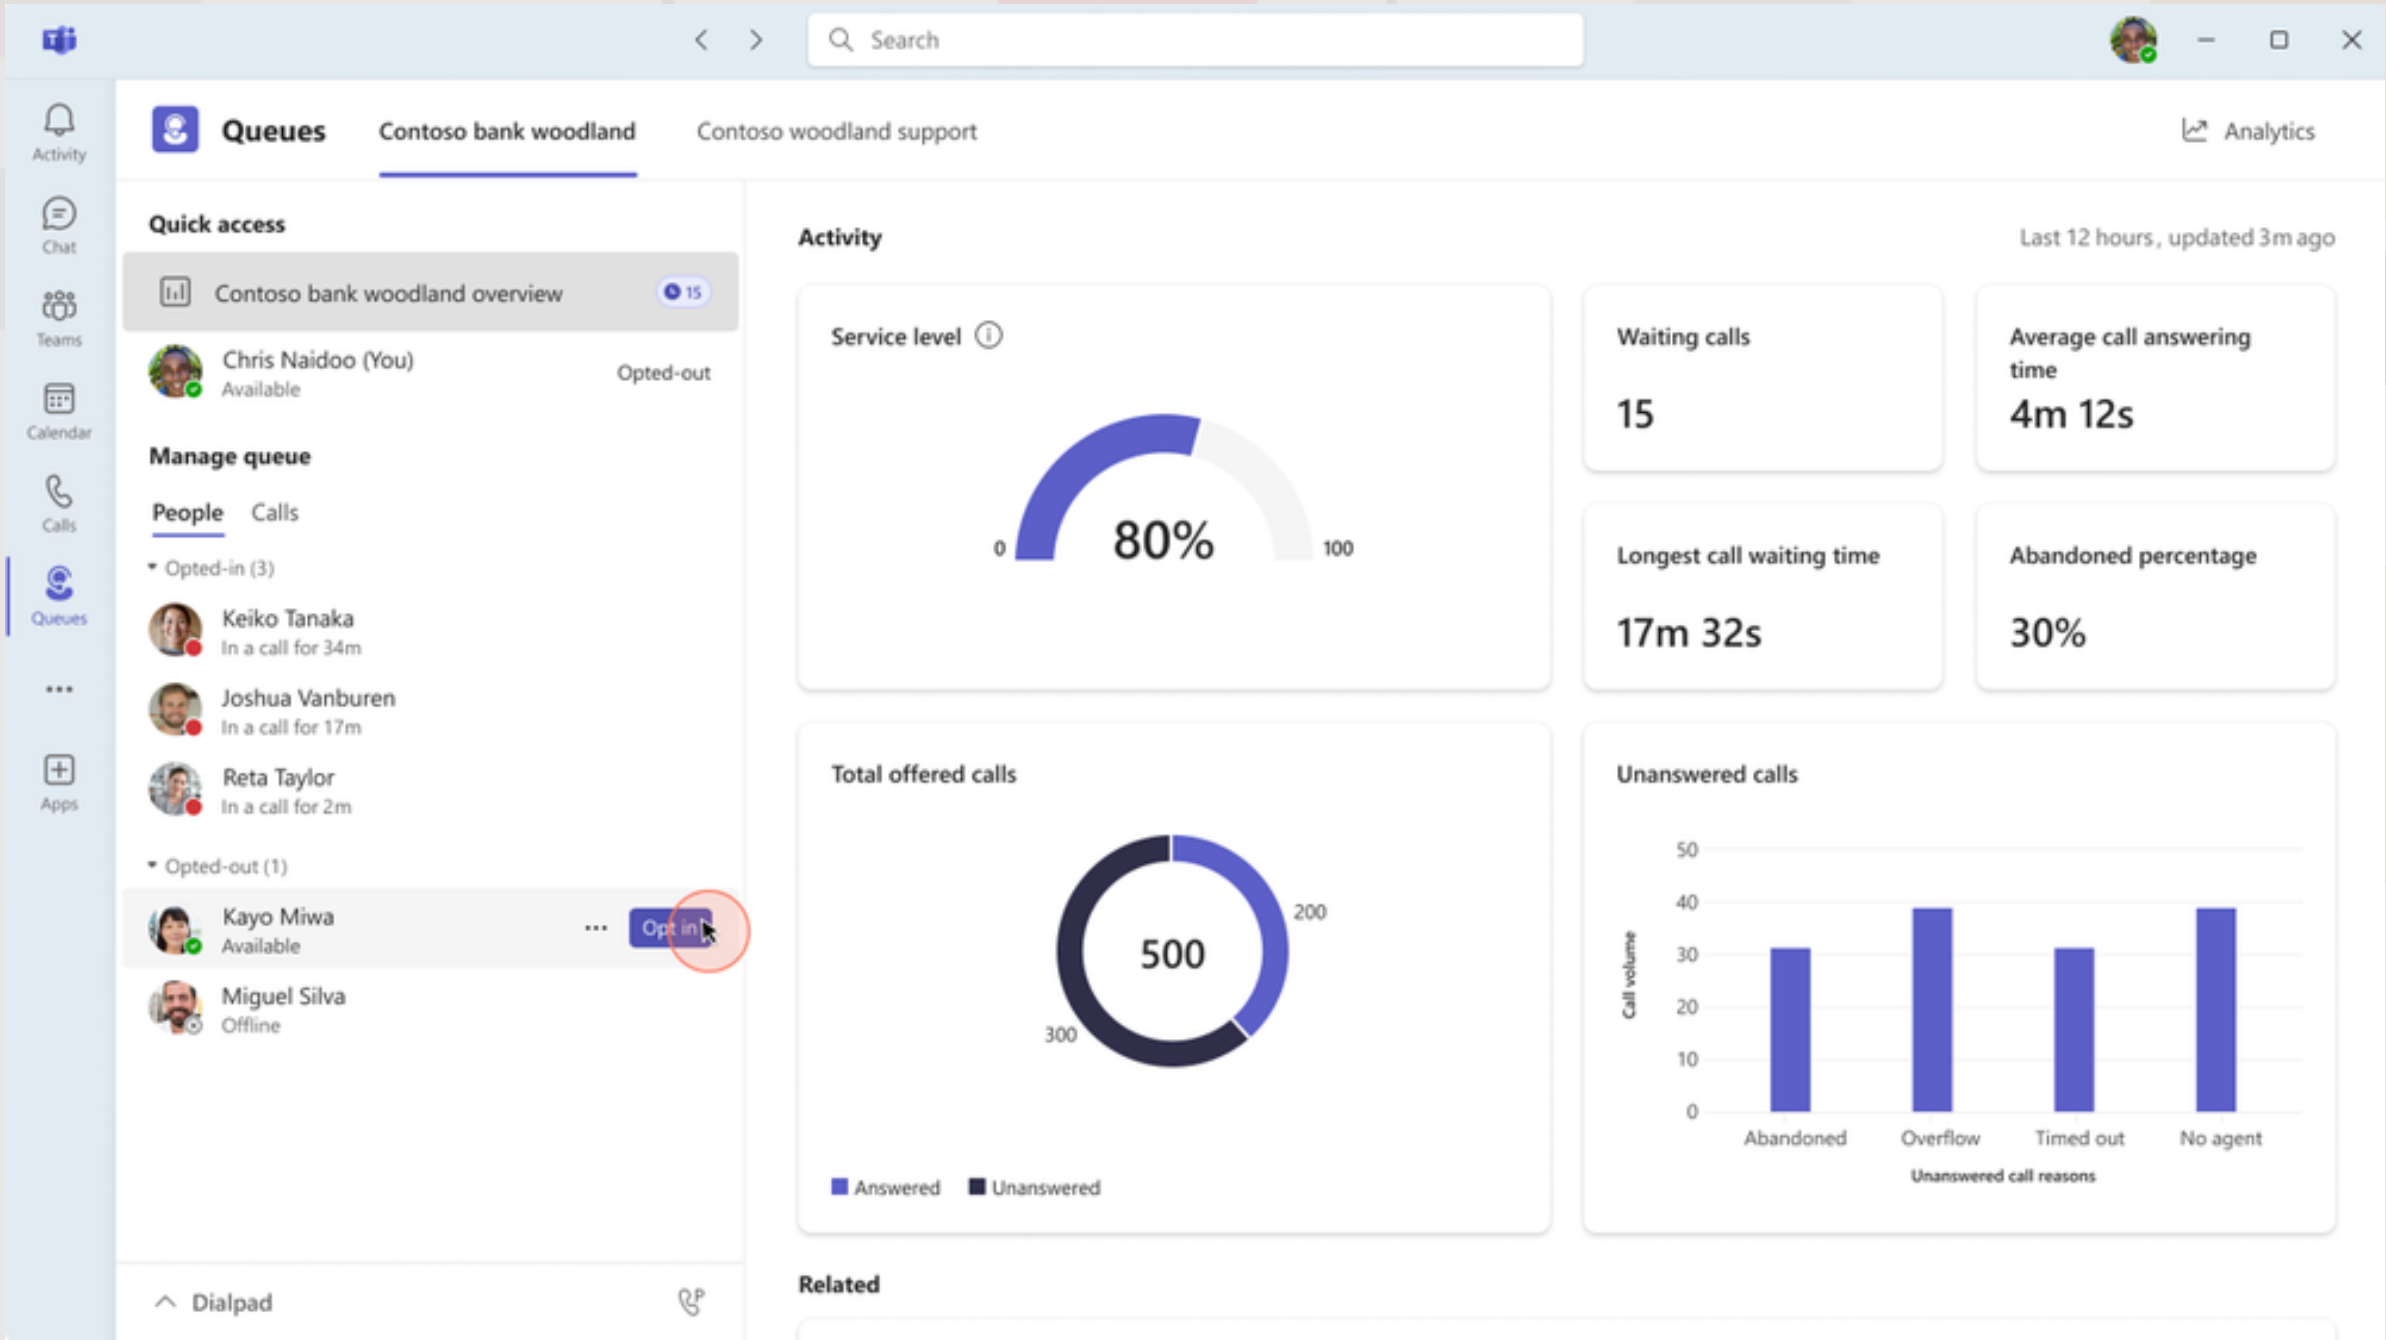

Upon acceptance of a call, members can also see relevant customer profile information from their CRM tool in a browser popout side-by-side, as configured by the organization.

Teams Queue App

With the Queues app, authorized users (leads) can now freely manage their team, call queues and auto attendants based on business needs.

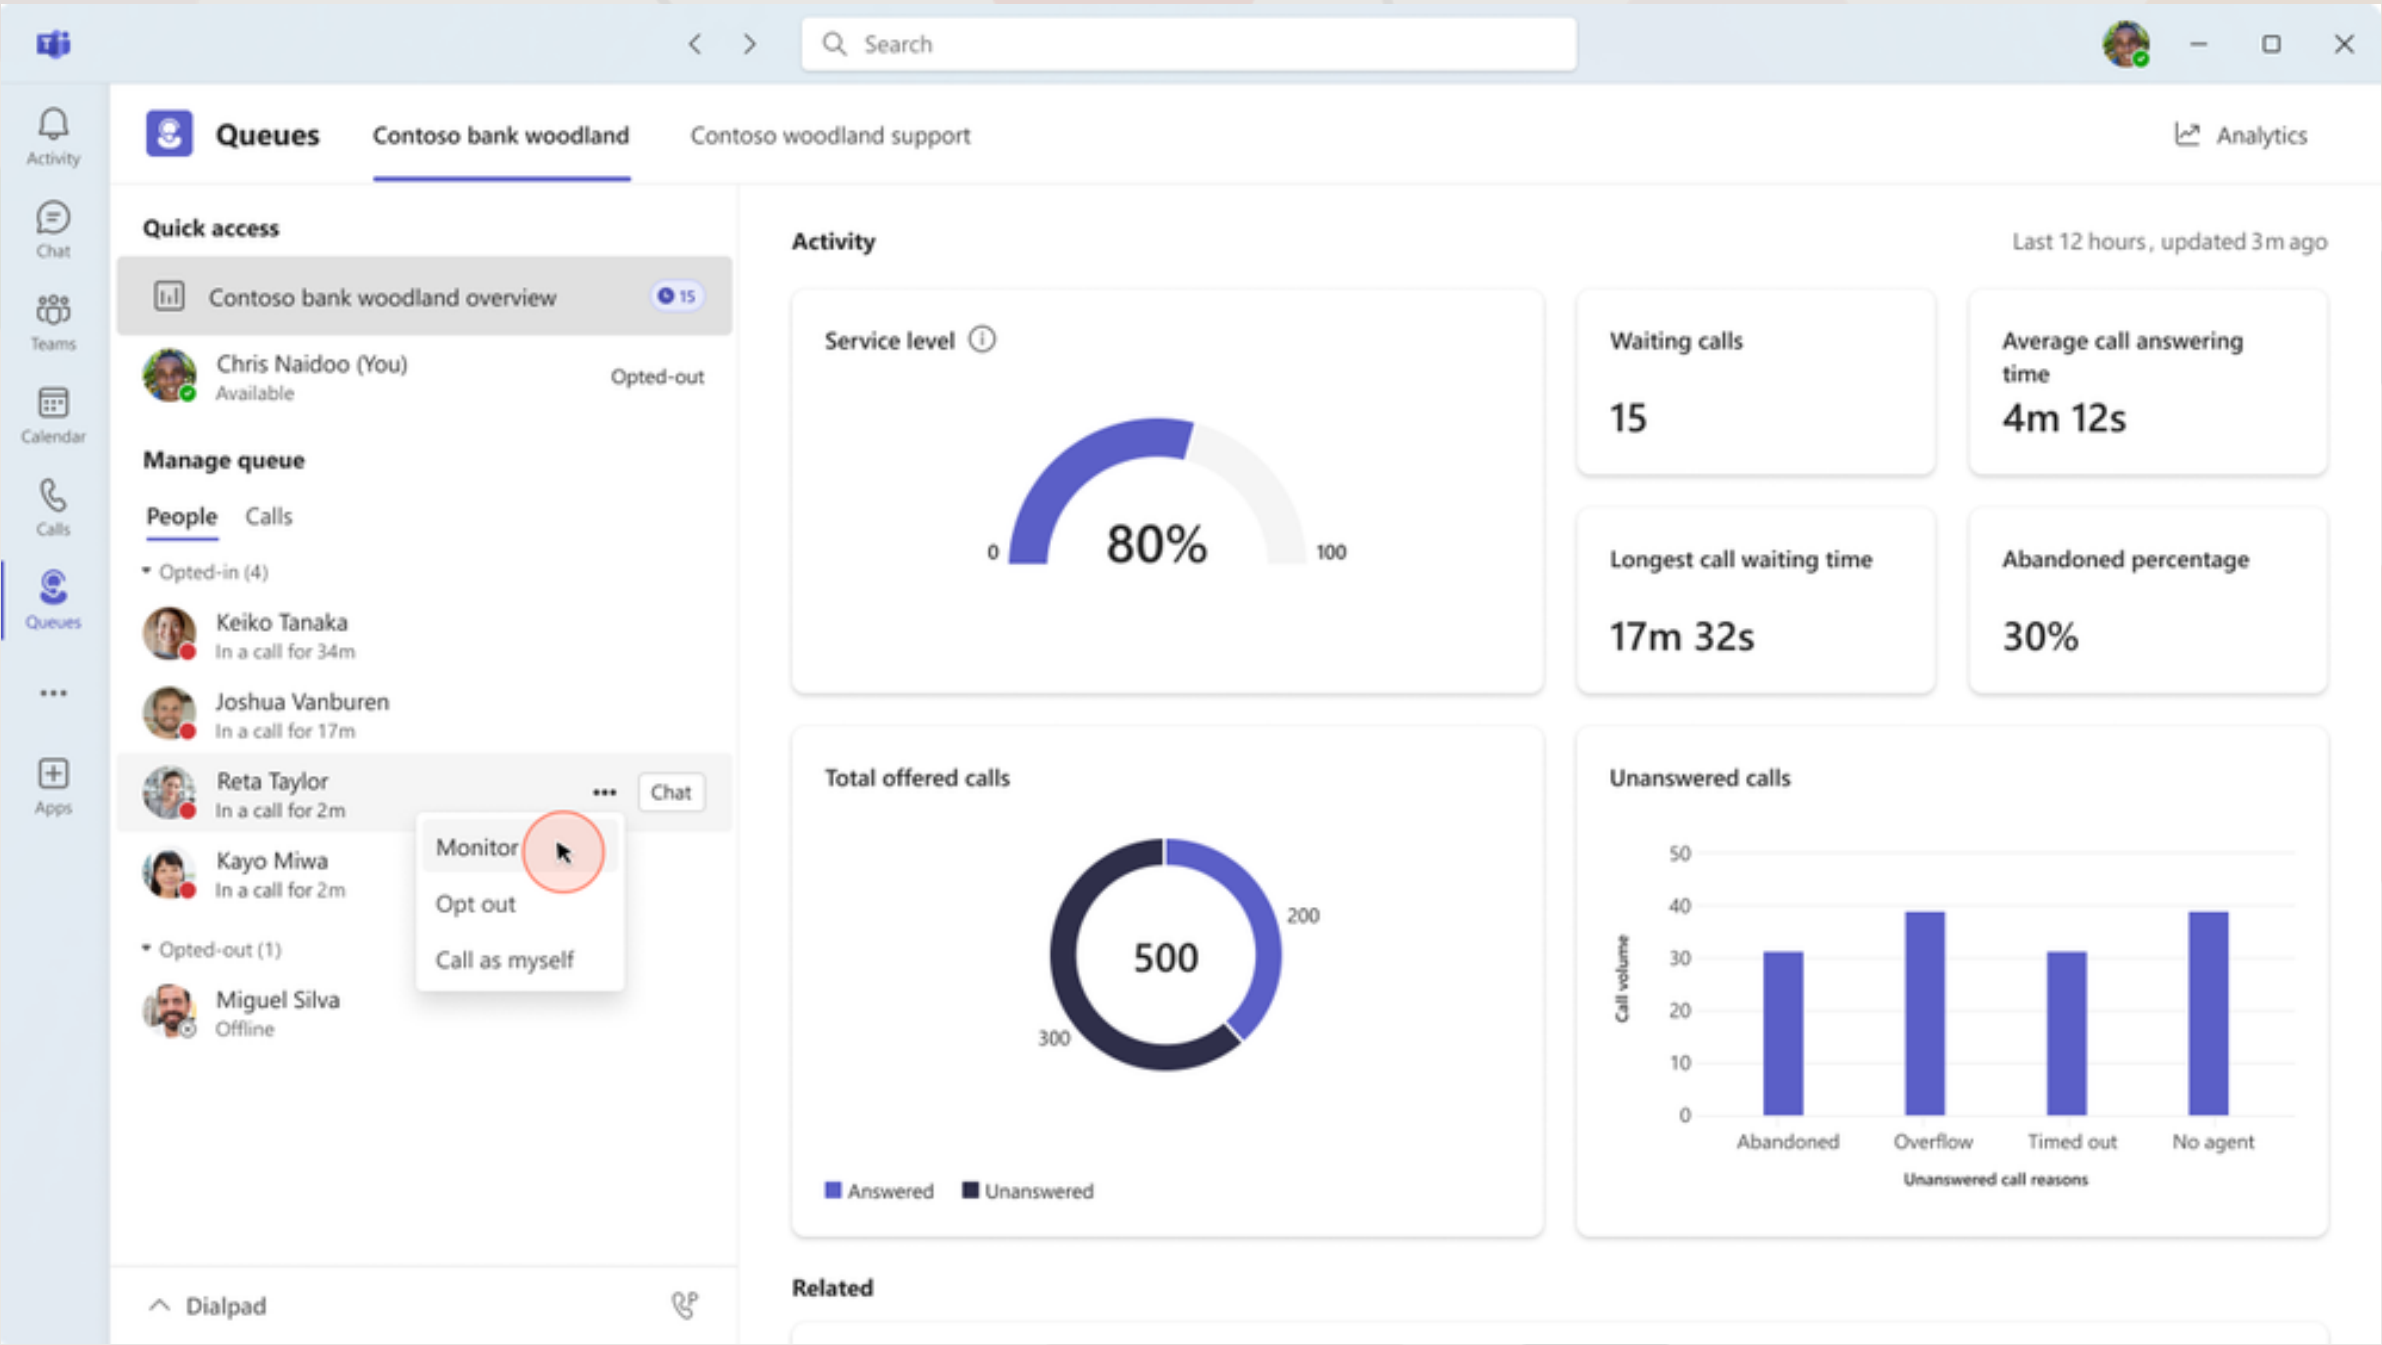

Leads have access to a comprehensive analytics dashboard of real-time and historical reporting (planned in future release) out of box that helps speed decisioning and improvements.

Teams Queue App

Future Queues app functionality will help leads improve team performance by leveraging call Monitor, Barge, Whisper and Takeover functionality

Leads have delegated admin capabilities that allow for adding and removing queue members, changing the call handling flows, configuring auto-attendant greetings and more.

New Microsoft Lists forms experience

The screenshot shows a Microsoft Lists form titled "Corporate Christmas event". At the top, it says "Corporate Christmas event - Saved". Below the title is a message: "Dear all, Christmas is just around the corner and we would like to organize the last corporate event of the year with you! To this respect...". The form is divided into sections, with "Section 1" visible. Under "Section 1", there is a "Date and Time" section. Below this, there is a question "1. Where should we meet?" with two radio button options: "Corporate office" and "Downtown restaurant". At the bottom of the form, there are toggle switches for "Multiple answers" (which is turned off) and "Required" (which is turned on). There are also links for "+ Add option" and "Add 'Other' option".

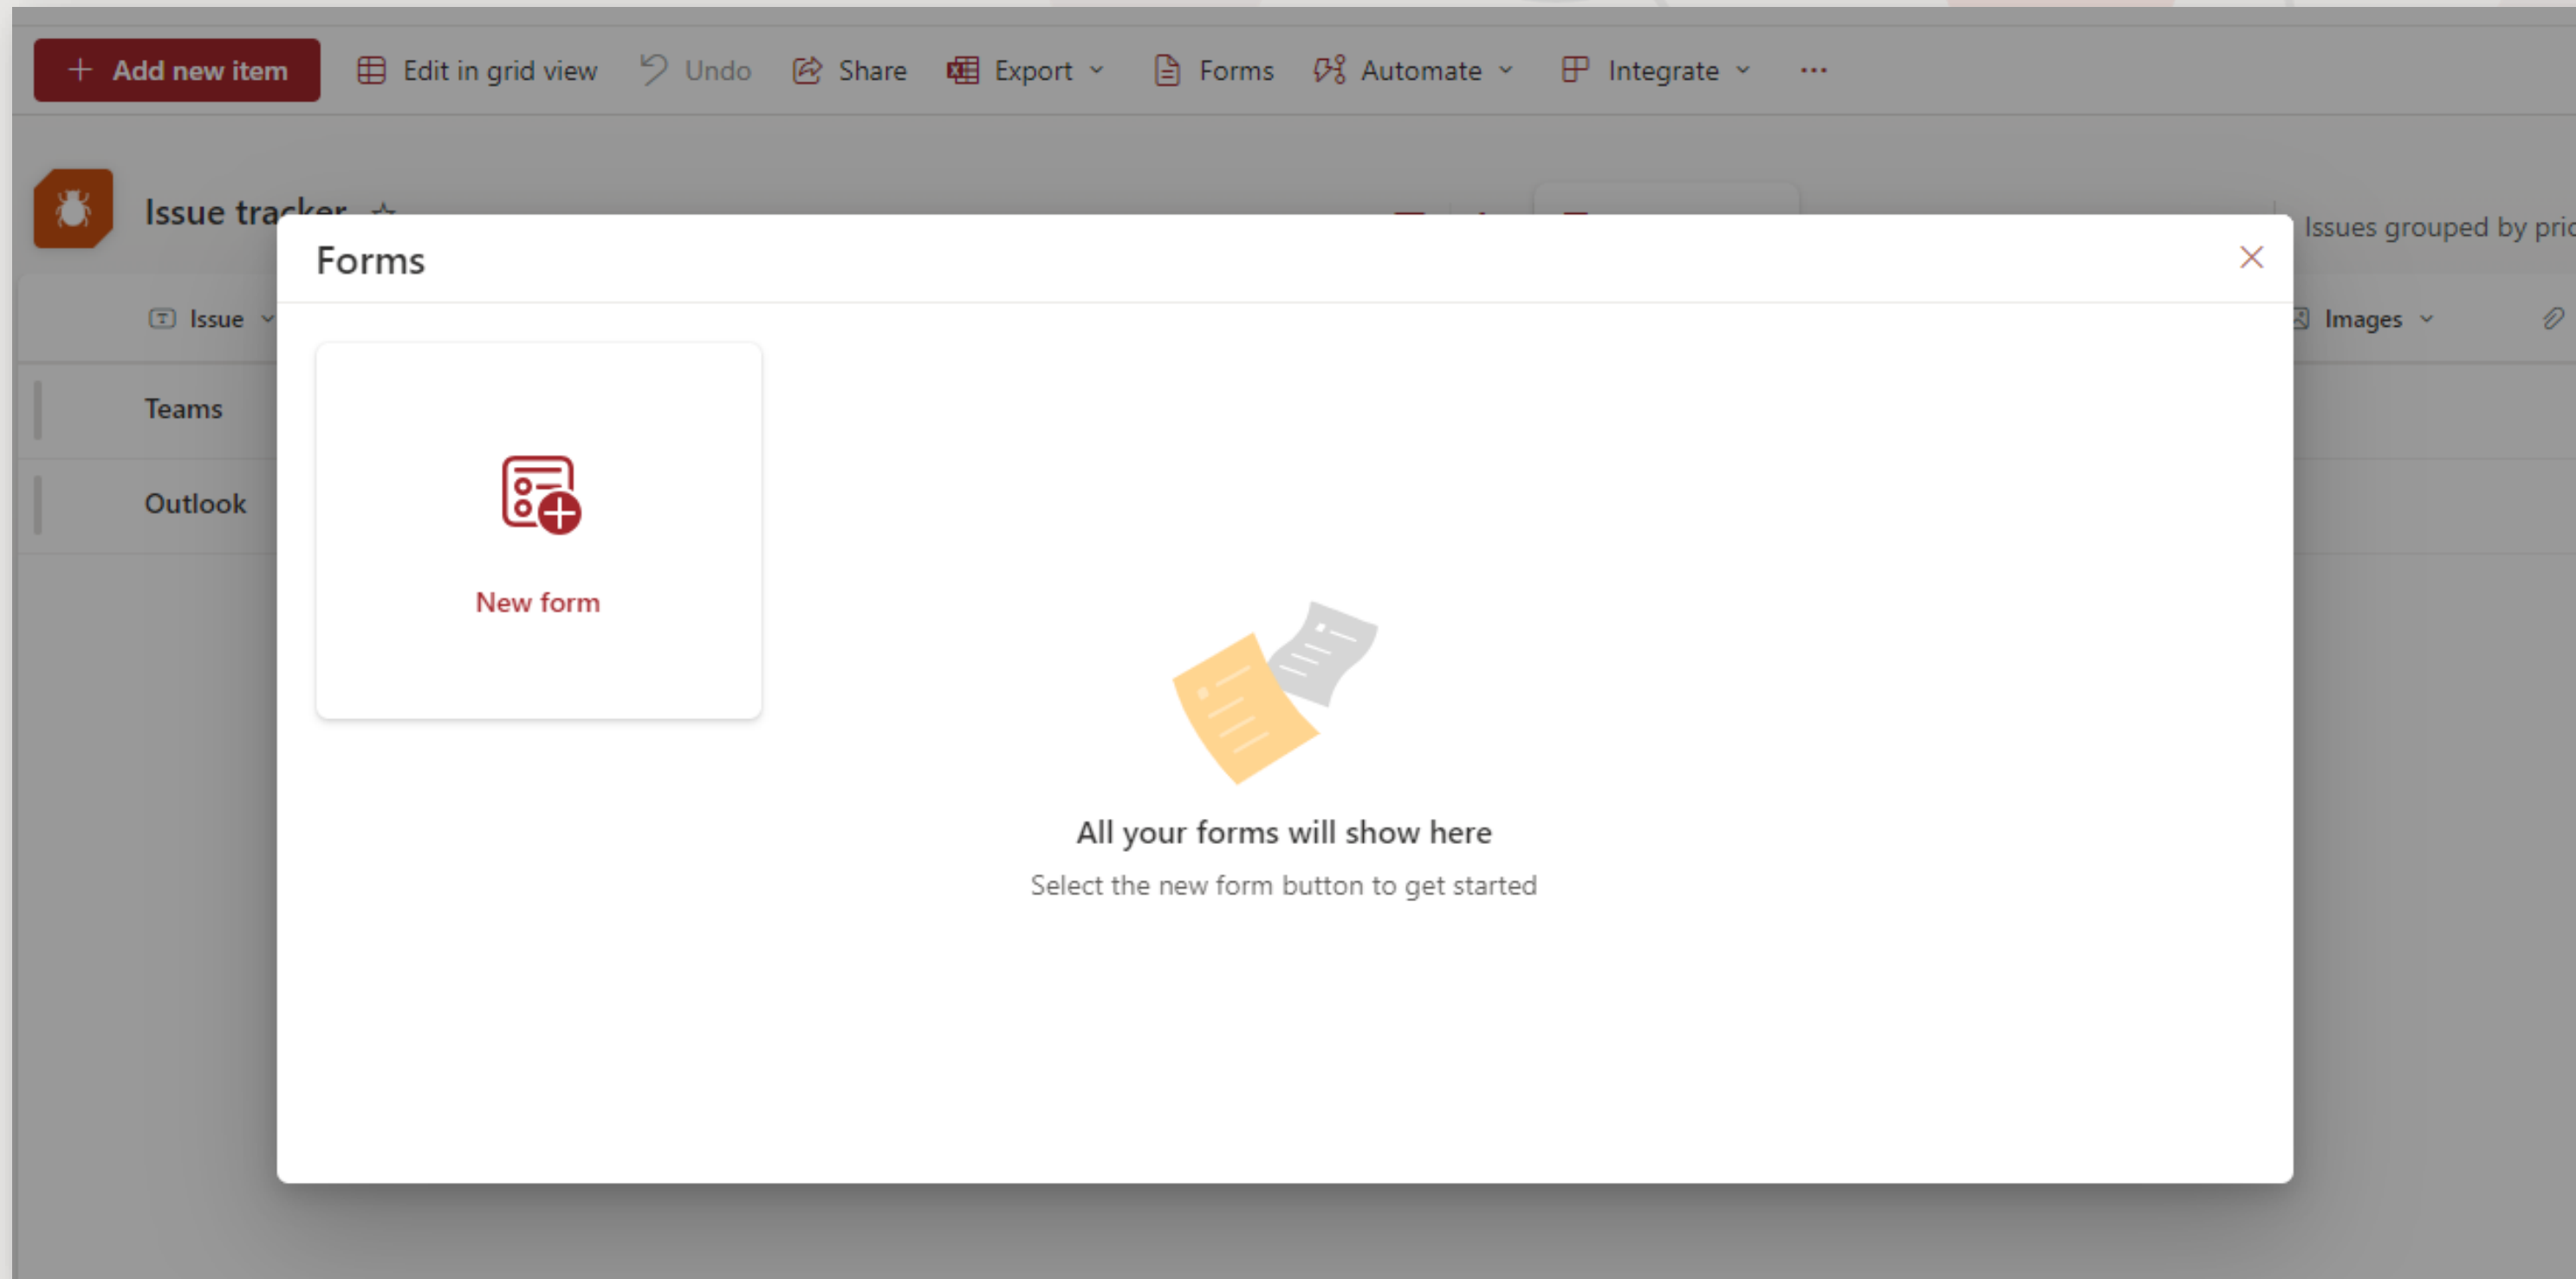

New Microsoft Lists forms experience

The screenshot displays the Microsoft Lists interface for a site named 'Team Consulting'. The left-hand navigation pane includes links to Home, Conversations, Documents, Shared with us, Notebook, Pages, and the selected 'Issue tracker'. The main content area features a toolbar with options like 'Add new item', 'Edit in grid view', 'Undo', 'Share', 'Export', and 'Forms' (which is highlighted with a red rectangular box). Below the toolbar, the 'Issue tracker' list is shown with columns for 'Issue', 'Issue des...', 'Priority', 'Status', 'Assigned ...', 'Date r...', 'Issue sour...', and 'Image'. Two items are visible: 'Teams' with a 'Low' priority and 'Outlook' with a 'High' priority. The 'Outlook' item is assigned to 'Luca Vitali' and dated '4/17/2024'.

New Microsoft Lists forms experience

- la nuova esperienza relativa ai moduli in Microsoft Lists è nativa all'interno di Lists e non utilizza né richiede Microsoft Forms, Power Apps o Power Automate
- possono accedere al Form solo gli utenti Member aziendali
- Esistono ancora tutte le integrazioni precedenti, per configurare e personalizzare ulteriormente i tuoi elenchi, per determinati scenari come raggiungere un pubblico anonimo, mostrare una serie di origini dati in un'unica visualizzazione e aggiungere rispettivamente logica/flusso aziendale ricco

Lo strano alert nei tenant M365

⚠ Exchange Online: Ensure your email authentication records are set up to avoid mail flow issues to third-party email accounts [See Details](#)

- Presente sui nostri tenant, quasi ininterrottamente, dall'estate scorsa
- Configurare SPF, DKIM e DMARC per ogni fonte di spedizione
- Le restrizioni di Google e Yahoo entrano nel vivo

Ensure your email authentication records are set up to avoid mail flow issues to third-party email accounts

✉ Manage notifications for this issue  Copy text

User impact

If action isn't taken, email messages may not send to third-party email providers and return a NDR.

Action needed

If your admins have already confirmed that your organization's DKIM, SPF, and DMARC records have been established already, and your users haven't received the error code mentioned below in NDRs, then you can safely ignore this message.

We've received various reports from users that email sent to specific third-party email providers aren't sending and return a "550 5.0.350 Remote server returned an error -> 554 Message not allowed" error code within the NDR. This is stemming from a result from recent security related changes from said third parties to improve their resiliency against potential spam and other malicious email attempts. Part of these efforts now require users to authenticate to DomainKeys Identified Mail (DKIM) and/or Sender Policy Framework (SPF), depending on your organization's setup. For those who are bulk sending email, both DKIM and SPF are required.

Le specifiche di Google per le mail massive

- Quando un dominio di posta, o suo sottodominio, spedisce a Google più di 5000 mail al giorno viene classificato permanentemente come possibile spammer -> SPF e DKIM e DMARC
- Vale solo per le email inviate a gmail.com, non contano i clienti destinatari in Google Workspace. Anche i clienti Google Workspace hanno le medesime restrizioni
- Da Aprile 2024 ci saranno NDR sporadici, da Giugno 2024 blocchi con richiesta di mitigazione a certe condizioni
- One-click unsubscribe per email di marketing (RFC 8058)

La direzione di Microsoft

- Le mailbox in M365 per il solo uso degli utenti quindi no applicazioni, no mailing-list, no marketing, no invii bulk
- Exchange Online: nuovi limiti per spedizioni esterne (2000 dei 10000, per utente in 24h) da Gennaio 2025
- Exchange Online: blocco dell'autenticazione Basic over SSL per invii SMTP (porta 587) da Settembre 2025
