Microsoft Teams Roadmap

Lot's coming to Microsoft Teams

- I watch the roadmap and message center very closely
- I have picked my top 10 to disucss

Queues app

▼ ■■■ Microsoft Teams: Queues app (Premium)

Rollout Start: August 2024

The new Queues app is a solution for collaboratively handling customer calls natively in Teams. Starting with surfacing call queue calls, your team members can use the Queues app to handle inbound calls, be it PSTN or VOIP. They can make outbound calls on behalf of the call queues or auto attendant that they are assigned to. And they can review the call queue statistics and seamlessly collaborate with their lead and colleagues within the flow of work. Authorized users, with permissions from Teams admins, can monitor their call queues and auto attendants in realtime, generate reports on queue and agent performance, configure their call queues and auto attendants using Teams settings, and opt in or out their team members to optimize for business needs. This is a Teams Premium feature.

Feature ID: 379980

Added to roadmap: 3/26/2024

Last modified: 5/1/2024

Product(s): Microsoft Teams

Cloud instance(s): Worldwide (Standard Multi-Tenant)

Platform(s): Desktop

Release phase(s): General Availability

Optimised Screen Sharing with AV1

✓ ■■■ **Microsoft Teams: Optimize for Video setting for screensharing**

Rollout Start: May 2024

Provide setting to optimize screen sharing for video clip by reducing the lag and improving the quality of video playback when sharing video clips in Teams meetings

Feature ID: 93483

Added to roadmap: 2/2/2024

Last modified: 5/2/2024

Product(s): Microsoft Teams

Cloud instance(s): GCC High, DoD, Worldwide (Standard Multi-Tenant), GCC

Platform(s): Desktop, Mac

Release phase(s): General Availability, Targeted Release

MTR-A Custom Backgrounds

▼ ■ ■ ■ **Microsoft Teams: Custom background for Teams Rooms on Android**

Rollout Start: July 2024

IT admins can upload custom background images on the Teams admin center to reinforce their company brand on their Teams Rooms devices. The main room display, extended room display, and touch console can each have its own specific background image. PNG, JPG, and JPEG, formats are supported. This feature is only available with the Teams Rooms Pro license.

Feature ID: 380671
Added to roadmap: 1/30/2024
Last modified: 4/25/2024
Product(s): Microsoft Teams
Cloud instance(s): Worldwide (Standard Multi-Tenant), GCC High, GCC
Platform(s): Teams and Surface Devices
Release phase(s): General Availability

▼ ■ ■ ■ **Microsoft Teams: Manage Custom backgrounds in Teams admin center for Teams Rooms on Android devices**

Rollout Start: June 2024

Administrators can upload and set images as custom themes in the Teams admin center for Teams devices, allowing images that reflect their organization's branding. The feature will first launch for Teams Rooms on Android devices and then gradually release for other device types.

Feature ID: 81537
Added to roadmap: 5/7/2024
Last modified: 5/7/2024
Product(s): Microsoft Teams
Cloud instance(s): GCC, Worldwide (Standard Multi-Tenant), DoD, GCC High
Platform(s): Android
Release phase(s): General Availability

Stop hiding my tabs!

▼ ■ ■ ■ **Microsoft Teams: Draggable Presenter Toolbar while screensharing**

Rollout Start: June 2024

Introducing the ability for presenters to freely drag Presenter Toolbar appearing on top of screen while screensharing.

Feature ID: 394270

Added to roadmap: 4/22/2024

Last modified: 4/23/2024

Product(s): Microsoft Teams

Cloud instance(s): Worldwide (Standard Multi-Tenant), DoD, GCC High, GCC

Platform(s): Desktop, Mac

Release phase(s): General Availability, Targeted Release

Intelligent Call Recap

▼ ■ ■ ■ **Microsoft Teams: Intelligent call recap (Premium)**

Rollout Start: June 2024

The Calls app in Teams will soon have AI-generated notes and action items from your calls, so you can pay attention to your conversations and save time coordinating next steps. Intelligent call recap will work for both VoIP and PSTN calls, and summaries will be generated from calls for which transcription was enabled.

Feature ID: 393229

Added to roadmap: 4/18/2024

Last modified: 4/18/2024

Product(s): Microsoft Teams, Microsoft Copilot (Microsoft 365)

Cloud instance(s): Worldwide (Standard Multi-Tenant)

Platform(s): Desktop, iOS, Mac, Android

Release phase(s): General Availability

Lots of Transcript and Recording Controls

Who can record and transcribe

Microsoft Teams: Meeting organizers can manage who can record and transcribe meetings (Premium)

Rollout Start: June 2024

We are expanding the existing 'Who can record' control for meeting organizers to include transcription. With this change, meeting organizers with a Teams Premium license will see a control called 'Who can record and transcribe' in the meeting options, which allows meeting organizers to select from two options: (1) organizers and co-organizers, or (2) organizers, co-organizers, and presenters. This control allows meeting organizers to manage which roles are able to initiate recording and transcription for a meeting.

Feature ID: 116819

Added to roadmap: 2/2/2024

Last modified: 4/26/2024

Product(s): Microsoft Teams

Cloud instance(s): Worldwide (Standard Multi-Tenant), GCC High, DoD, GCC

Platform(s): Desktop, Web, Mac

Release phase(s): General Availability, Targeted Release

Explicit Consent to Transcribe and record

▼

Microsoft Teams: Explicit consent for transcription in Teams meetings

Rollout Start: June 2024

The meeting policy that requires explicit consent to be recorded is expanding to include transcription. When the policy is applied, a notification will pop-up when the recording or transcription is initiated requesting consent of all participants to be transcribed and recorded. Before a user gives consent, the user cannot unmute, turn on camera or share content in the meeting.

Feature ID: 389368
Added to roadmap: 3/25/2024
Last modified: 4/26/2024
Product(s): Microsoft Teams
Cloud instance(s): Worldwide (Standard Multi-Tenant), DoD
Platform(s): Desktop
Release phase(s): General Availability

Where is a recording saved

▼ ■ ■ ■ **Microsoft Teams: Teams meeting recordings will be saved to meeting organizer's OneDrive for Business**

Rollout Start: June 2024

With this change Teams meeting recordings will be saved to the meeting organizer's OneDrive for Business instead of to the OneDrive for Business folder of the person who initiated the recording. This improves the compliance of recordings as meeting organizers can then manage access permissions and recording file management.

Feature ID: 116251

Added to roadmap: 3/22/2024

Last modified: 4/26/2024

Product(s): Microsoft Teams

Cloud instance(s): GCC, DoD, GCC High, Worldwide (Standard Multi-Tenant)

Platform(s): Mac, Desktop

Release phase(s): General Availability

Control Transcripts

Microsoft Teams: Improvements to the view, download, and delete experience of Teams meeting transcript files Rollout Start: June 2024

We are streamlining the storage of meeting transcript files. Starting with this feature, all meeting transcript entry points in Teams app will point to the OneDrive for Business copy only. The rollout of this feature also improves the delete experience of the transcript for meeting organizers. Now, when a meeting organizer or co-organizer deletes the transcript in the Microsoft Teams app, this will delete both copies of the transcript (from OneDrive for Business and Exchange Online) at the same time. If the meeting organizer deletes the transcript from Stream, only the copy in OneDrive for Business will be deleted. At the same time, meeting transcripts will stop saving in Exchange Online altogether and all transcript storage will be standardized on OneDrive for Business.

Feature ID: 365720

Added to roadmap: 1/24/2024

Last modified: 4/26/2024

Product(s): Microsoft Teams

Cloud instance(s): GCC, DoD, GCC High, Worldwide (Standard Multi-Tenant)

Platform(s): iOS, Mac, Android, Desktop, Web

Release phase(s): General Availability

Intelligent recap for transcript only

Microsoft Teams: Intelligent Meeting Recap for transcript-only meetings (Premium)

Rollout Start: June 2024

Intelligent recap will support meetings with only transcript enabled, and without recording enabled. In the case when only transcript is enabled for a meeting, the features from intelligent recap that users can access are AI-generated meeting notes, AI-generated tasks, and name mentions. Intelligent recap features are also available as a part of the Copilot for Microsoft 365 license.

Feature ID: 185802

Teams

Hide general channel

The screenshot shows the Microsoft Teams application interface. On the left, the 'Teams' sidebar lists the 'Contoso' team, with the 'General' channel selected. A context menu is open over the 'General' channel name, showing options: 'Channel notifications', 'Pin', 'Hide' (highlighted with a mouse cursor), 'Manage channel', 'Get link to channel', 'Get email address', and 'Open in SharePoint'. The main chat area displays the 'General' channel with a 'Start a new post' button and a post from Mona Kane. A reply from Colin Ballinger is also visible. The right sidebar shows the 'In this channel' section with 102 members, a description, and shared files.

Teams Rooms on Windows 5.0.111.0

Teams Rooms on Windows 5.0.111.0: What's New

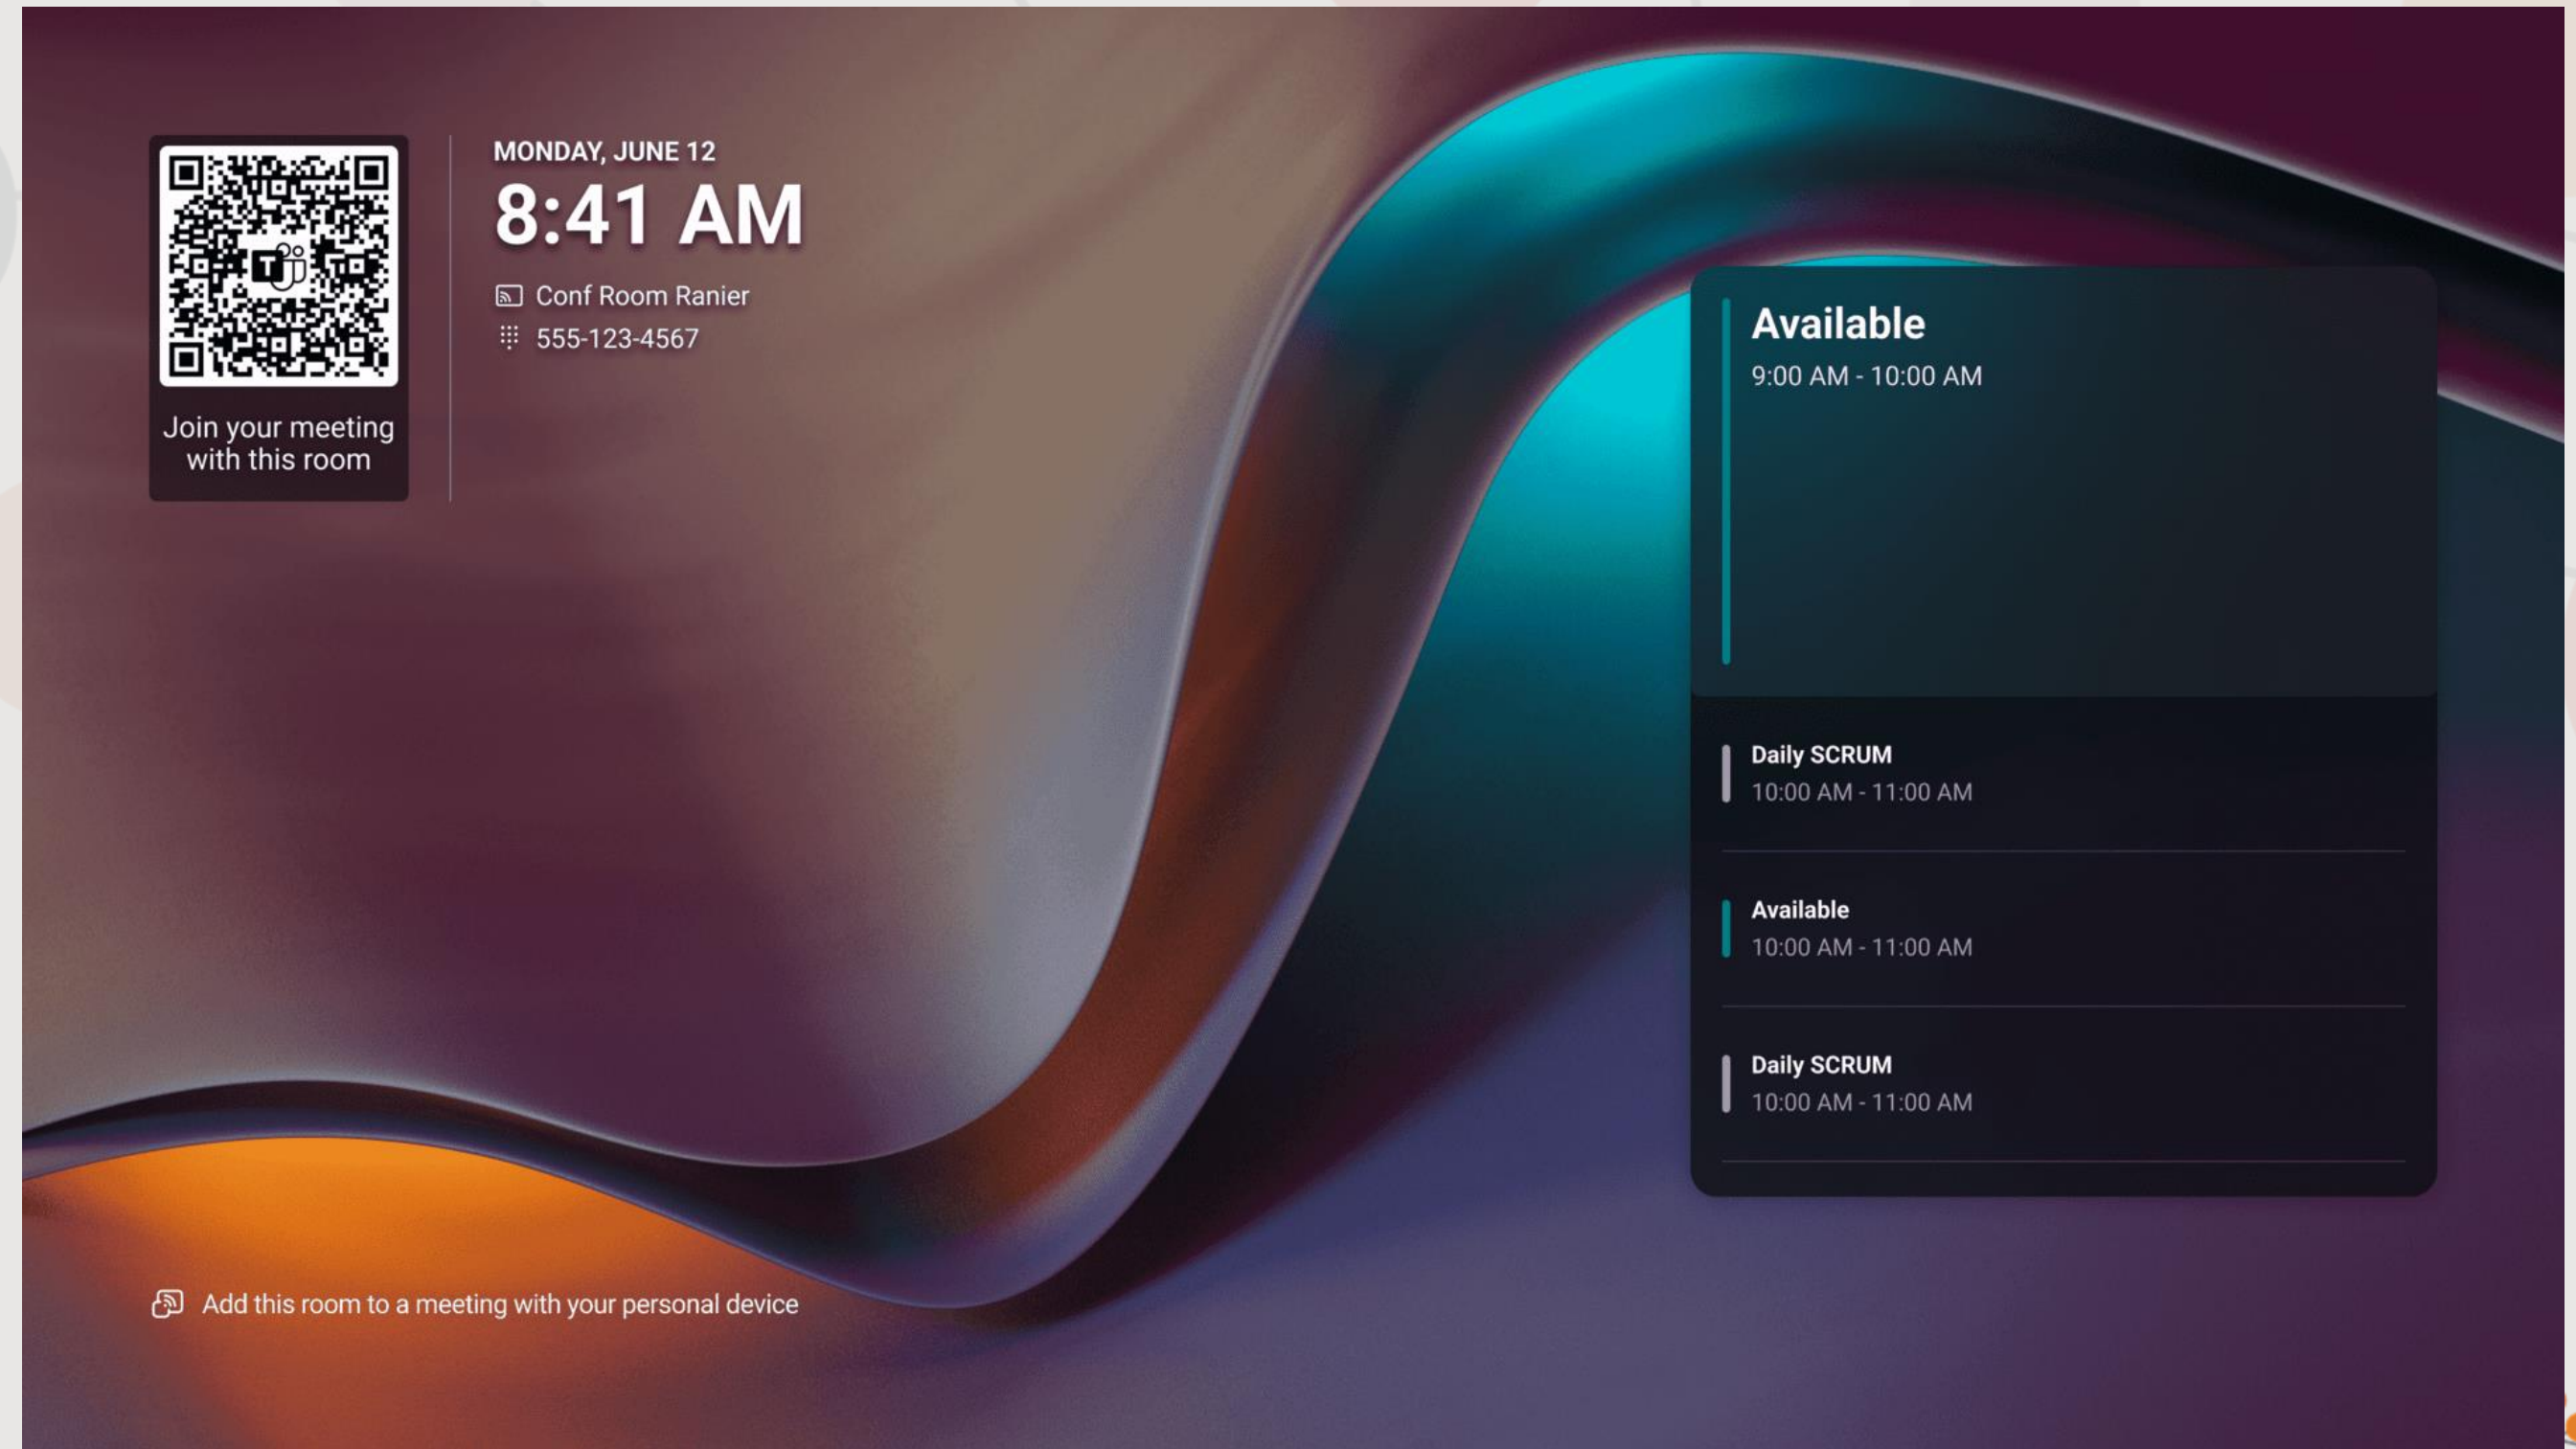

- Questo aggiornamento porta il nuovo client Teams in Microsoft Teams Rooms per Windows.
- Implementazione Zero Touch con Windows Autopilot e Pro Management Portal: Questo aggiornamento include il supporto dell'app per abilitare l'esperienza di implementazione end-to-end.
- Possibilità di cambiare lingua su Microsoft Teams Rooms su Windows: Con questa nuova funzionalità, gli utenti finali possono cambiare la lingua delle Microsoft Teams Rooms sull'app Microsoft Windows.
- Deprecazione di Skype for Business: Con questo aggiornamento, abbiamo ritirato le impostazioni XML per SfB e la possibilità di accedere o supportare le riunioni di Skype for Business.
- Unirsi alle riunioni con un codice QR: Gli utenti possono unirsi rapidamente alle riunioni imminenti scansionando un codice QR sulla schermata home di Teams Room utilizzando una fotocamera mobile.

Main news about SharePoint and OneDrive

SharePoint version history limits

Version History Limits – Setting Version history limits from SharePoint Admin Center

SharePoint admin center

Settings

Set version history limits

Limit the number of file versions kept in new OneDrive accounts and new SharePoint document libraries to save storage. Site owners can override this setting for individual libraries.

This setting does not apply to existing OneDrive accounts or SharePoint document libraries.

Automatically RECOMMENDED

- Most optimal storage option without having to estimate the version count or age limits
- Deploys algorithm to preserve sufficient high-value versions - more versions in the recent past and fewer farther back in time - in case restores are required.

Versions are deleted over time based on activity and how long ago the file was first created.

Manually

Offers two modes of manual configuration:

- **Major Version Count and Time Limits** : Versions are deleted after exceeding the set number of major versions **or** after the set period of time
- **Major Version Count Limits Only**: Versions are deleted after they exceed the set number of major versions. No Time limits are set on versions.

Number of major versions ⓘ

Delete versions when this number is exceeded.

500

Time ⓘ

Delete versions after this period of time.

Never (Default)

Admins can set intelligent version deleting options and default organization limits.

The Public Preview begins in May 2024, with GA starting in August 2024.

New capabilities include automatic and manual version limits, consistent default settings, and detailed version storage reporting.

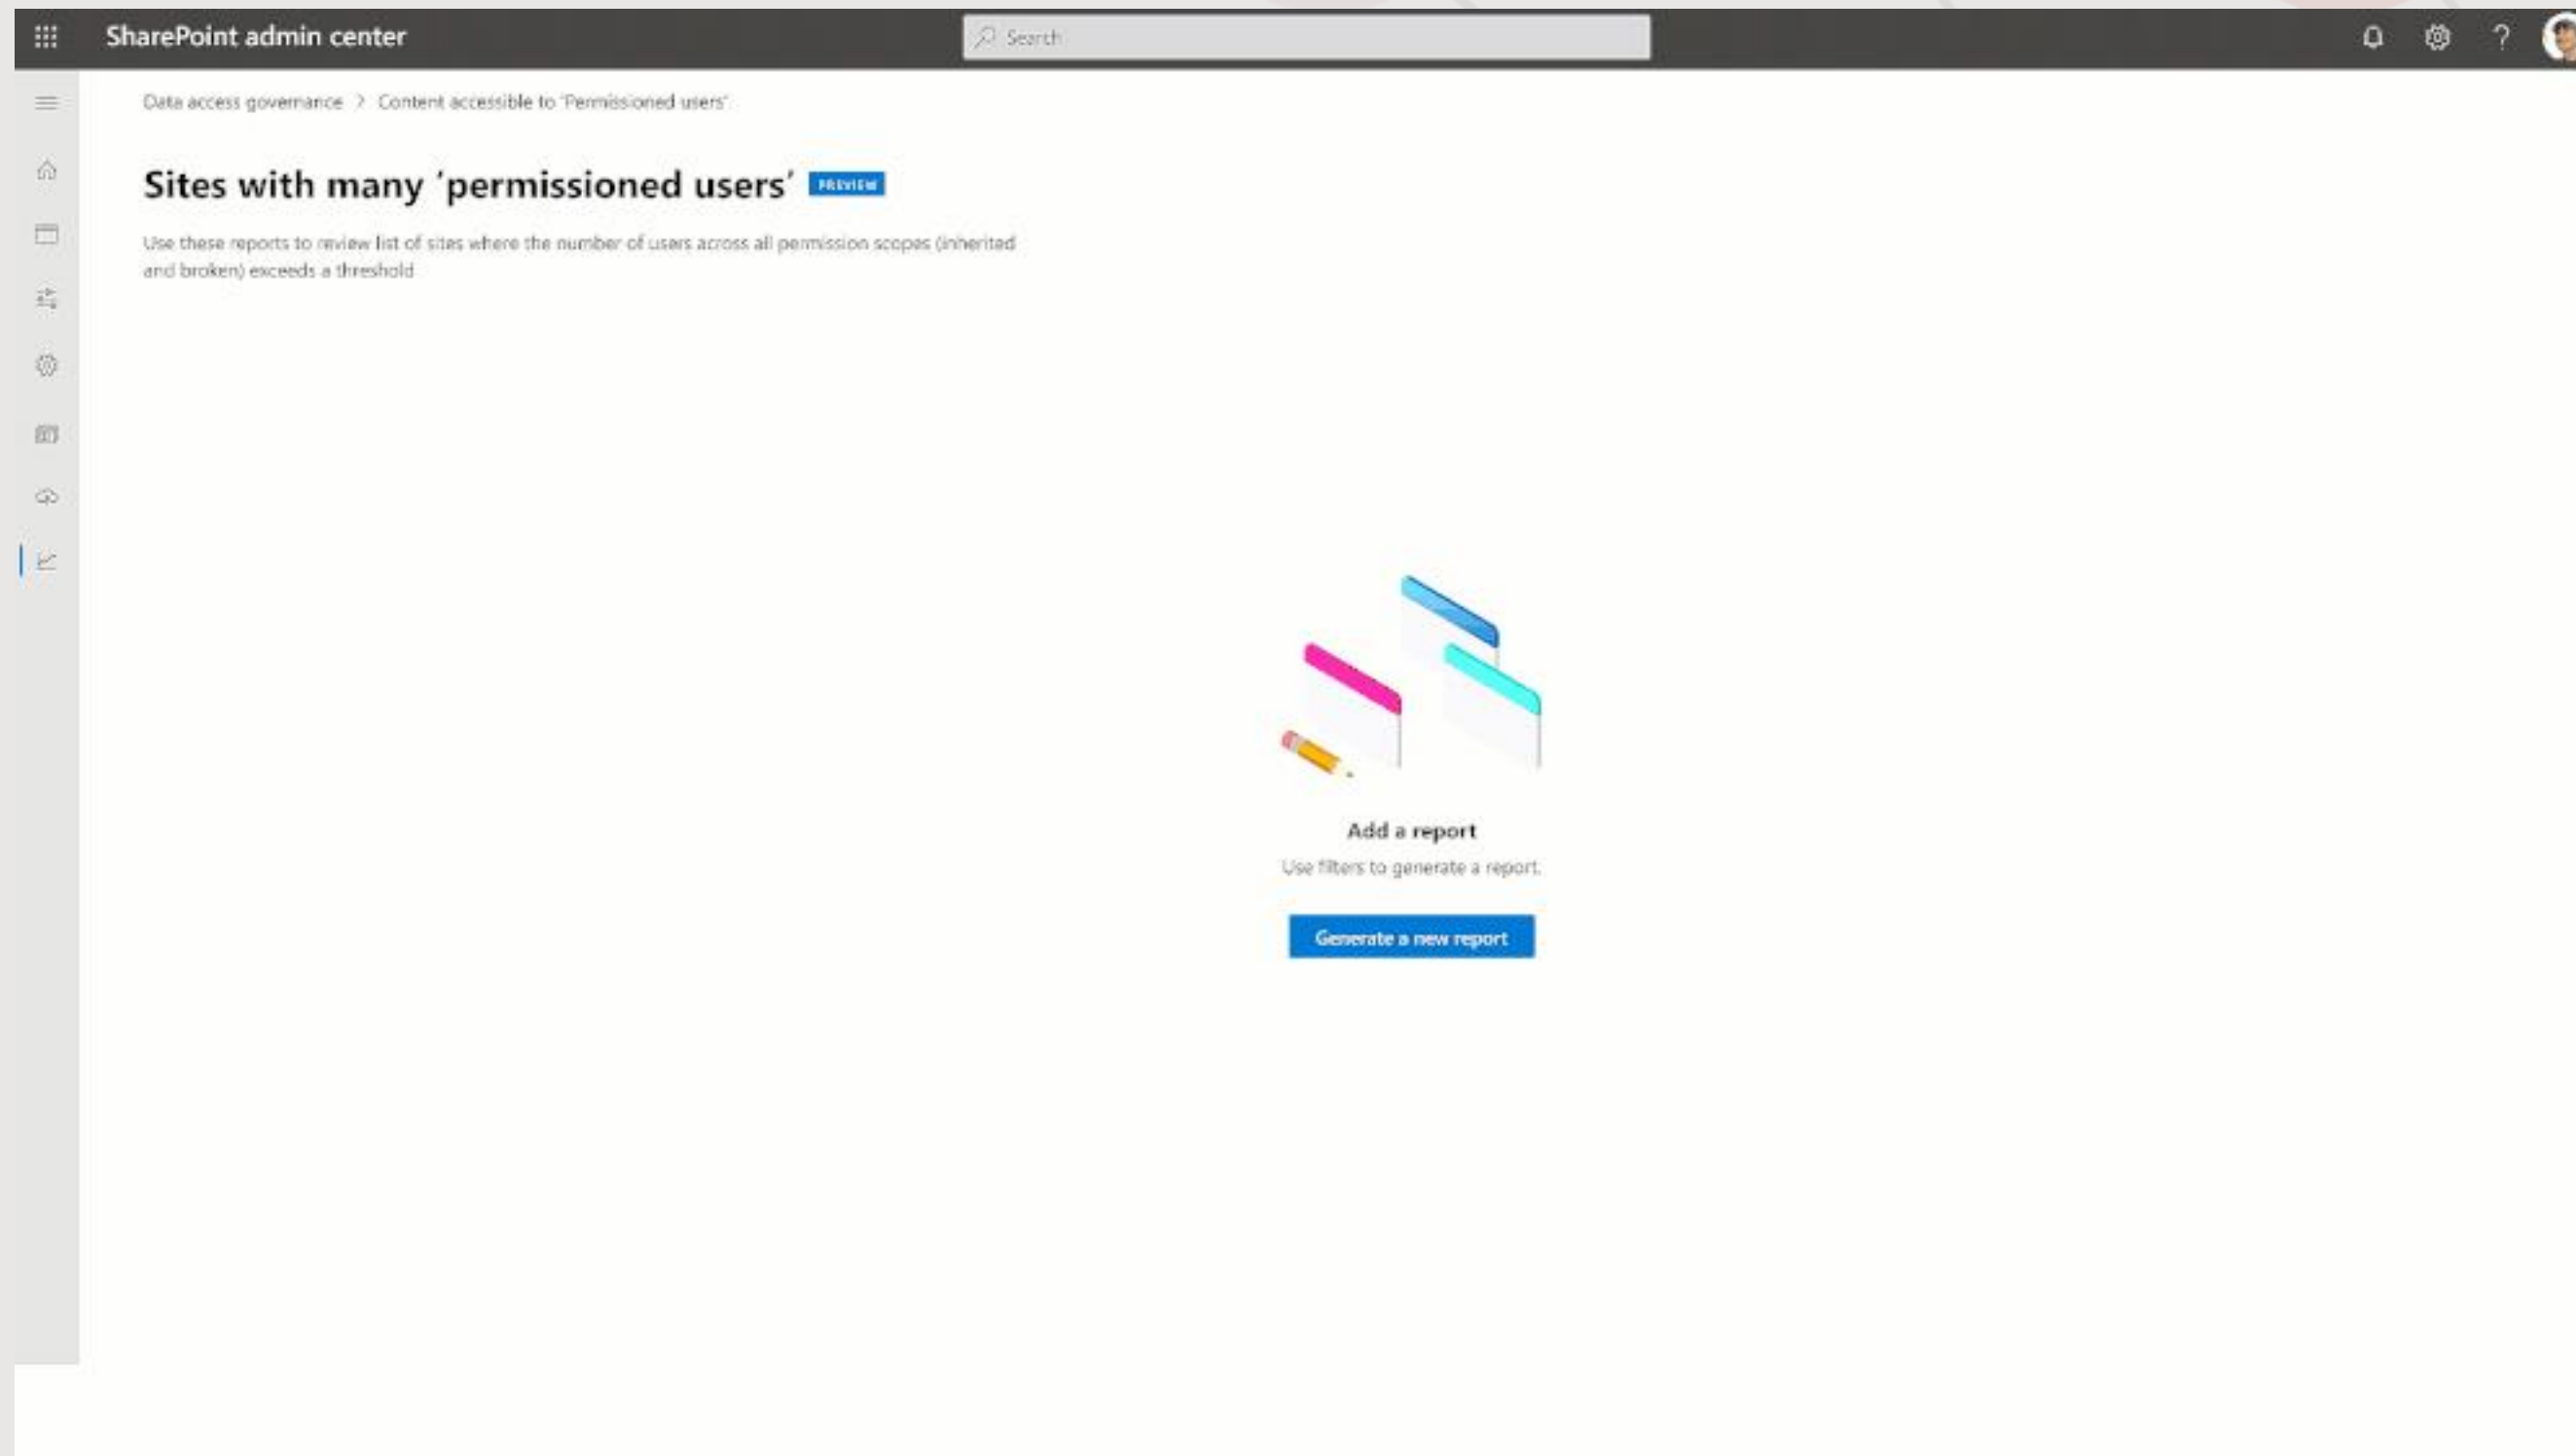

Users can view and adjust file version expirations. Admins should review updated documentation to prepare for these changes.

Using the new permission state report, SharePoint admins can get details on sites that are permissioned for greater than X users

This report can be run for OneDrive and SharePoint sites.

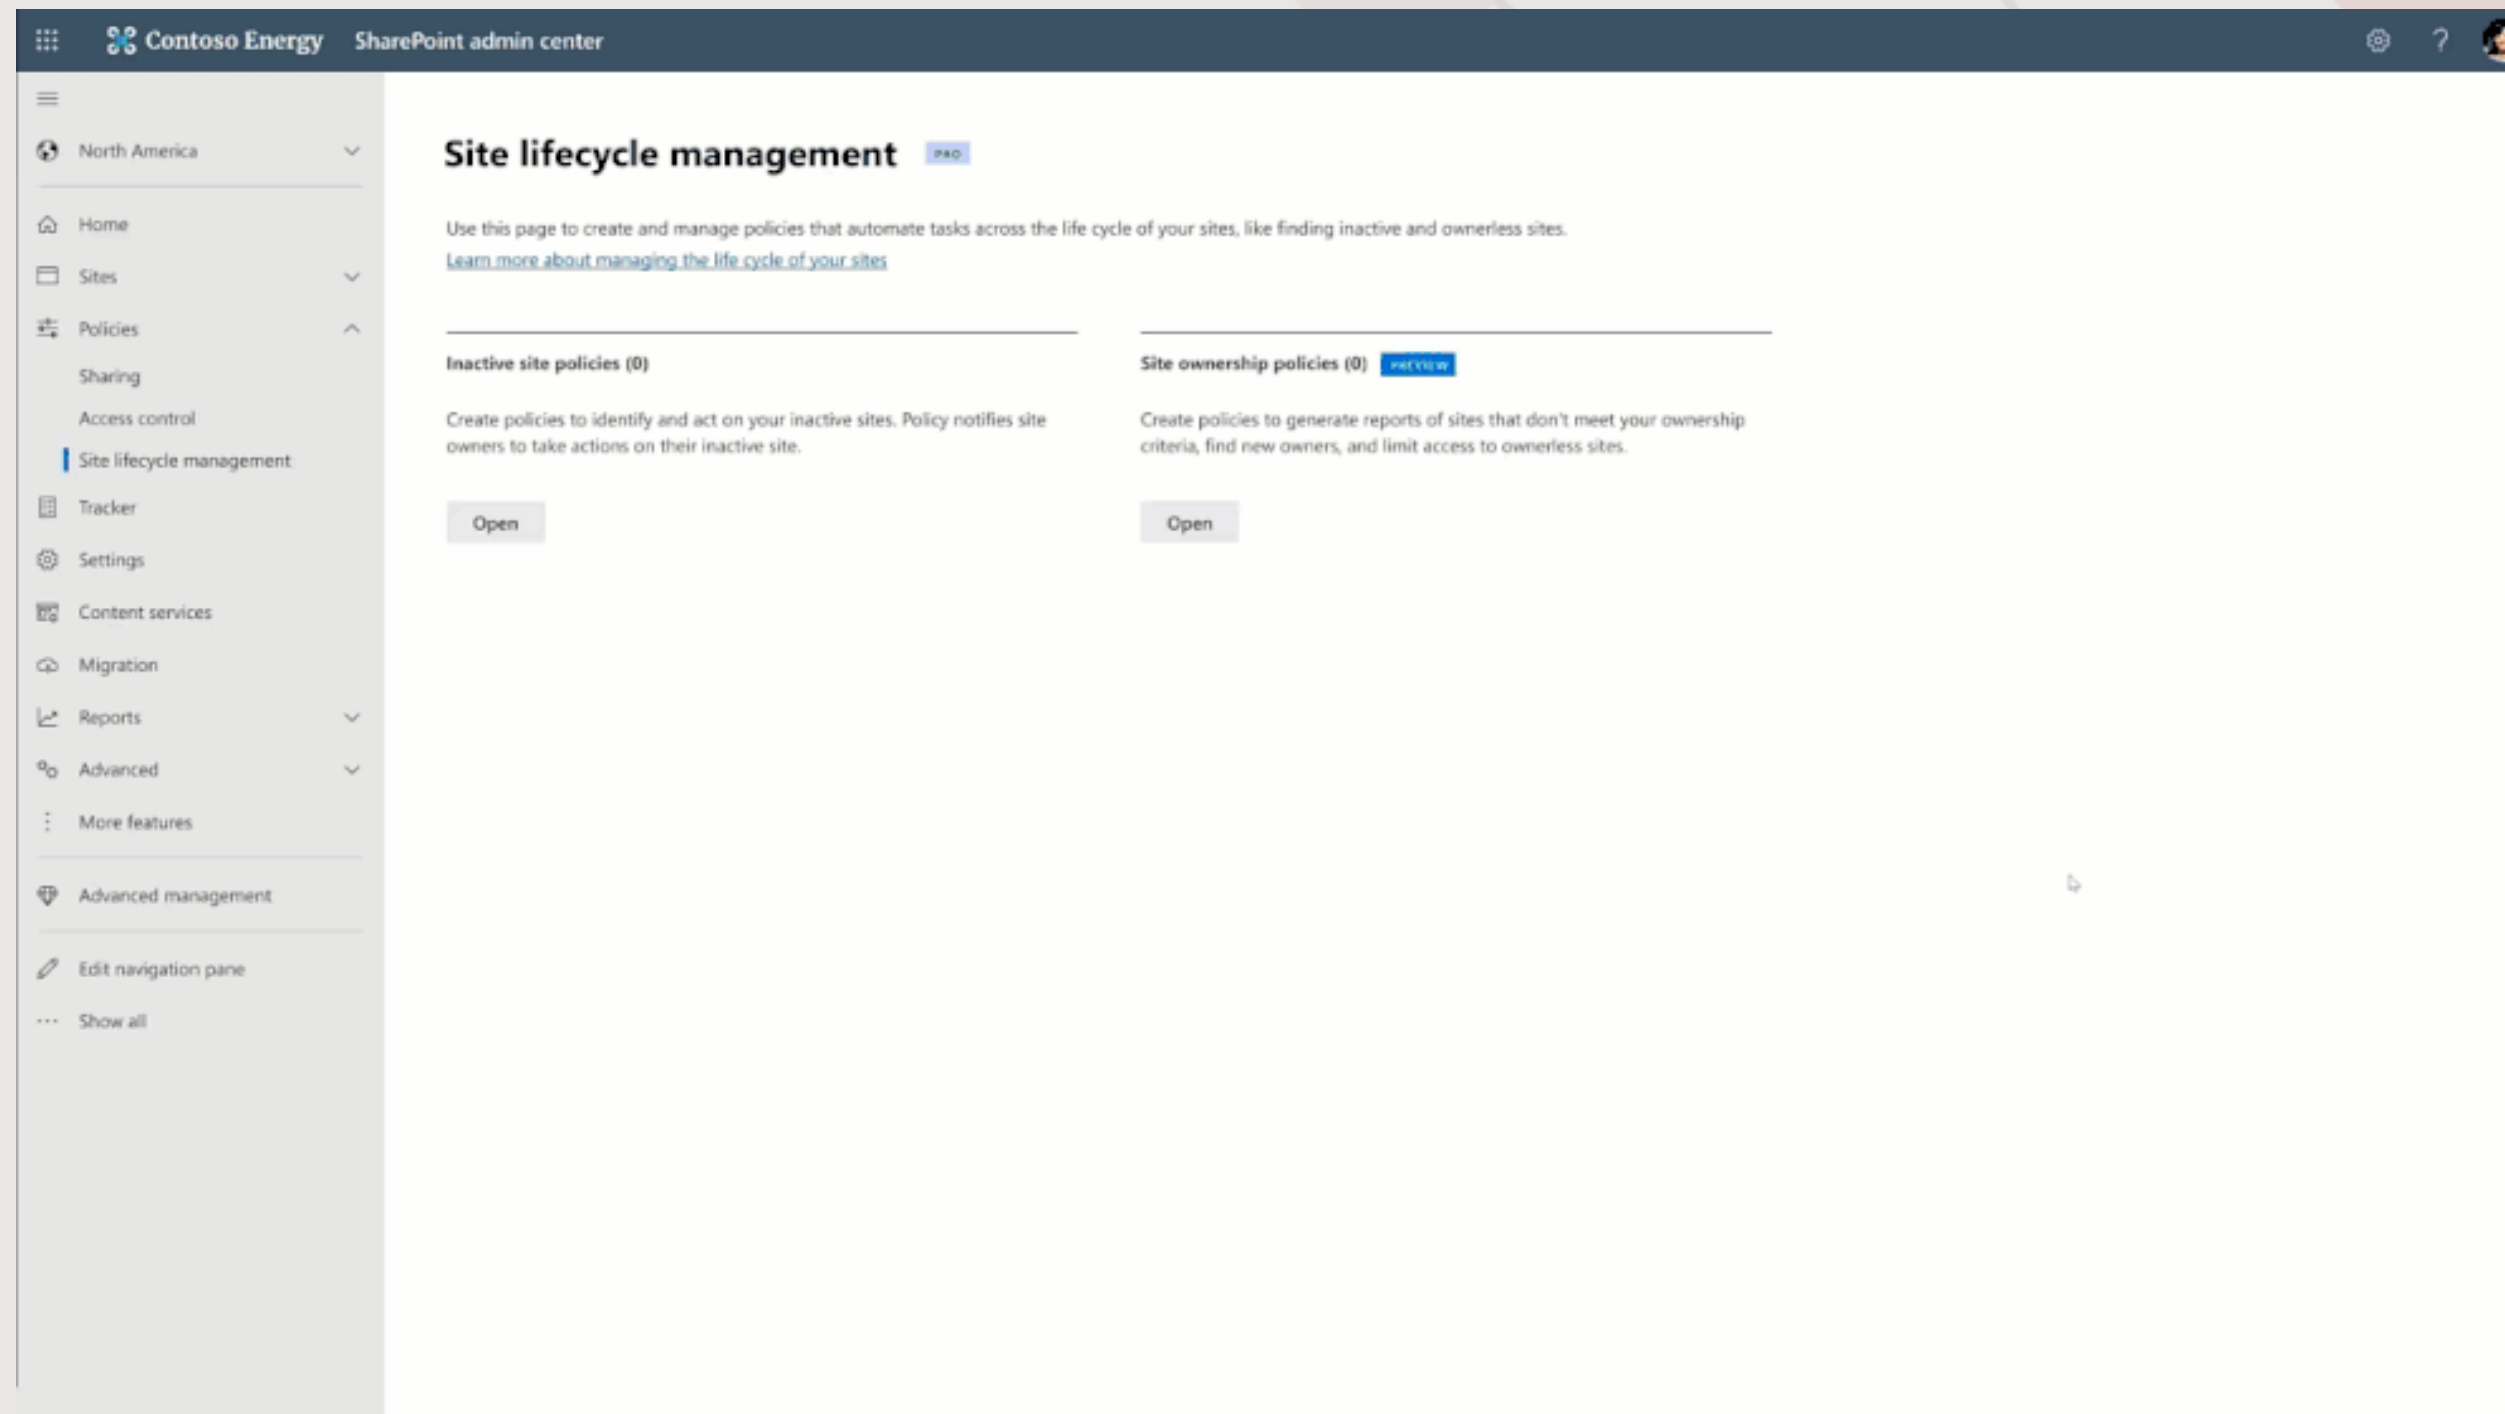

SharePoint Data Access Governance: Site Access Review

With the new site access reviews capability, SharePoint admins initiate access review with the owners of sites that are noted in Permission state and EEEU reports.

This requests site owners to review and attest that the access pattern seen in their sites is expected or requires action.

SharePoint Data Access Governance: Inactive Sites Policy

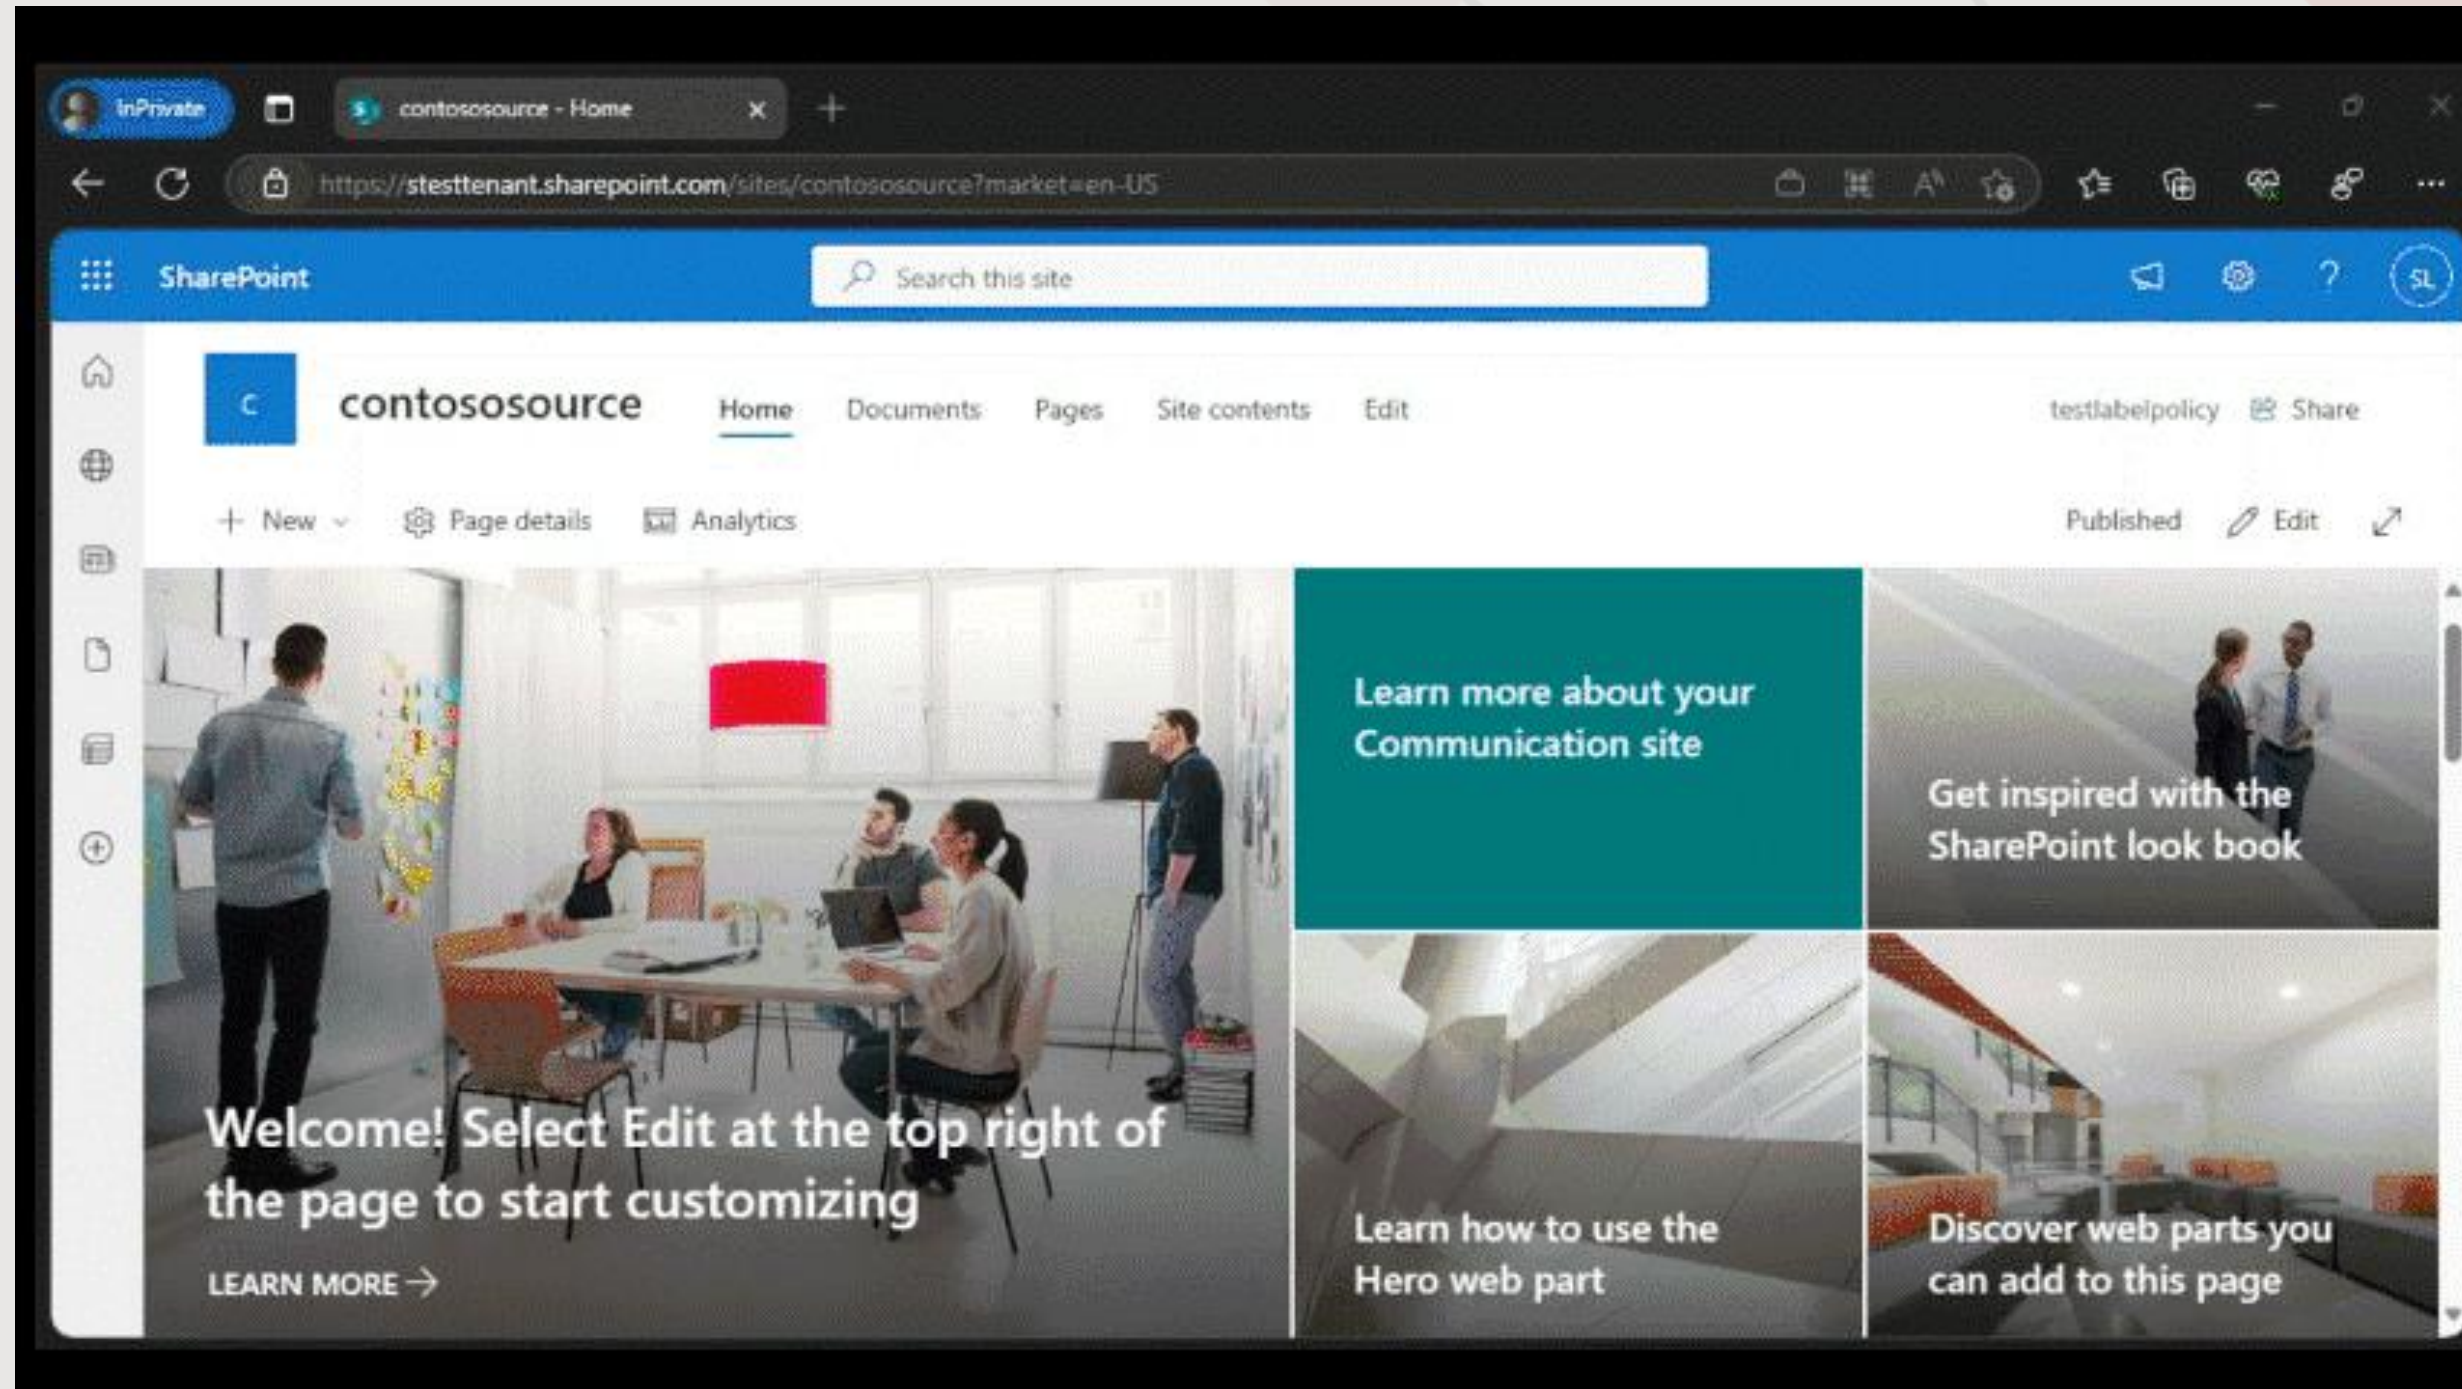

SharePoint admins can create custom inactive site policies that target specific SharePoint sites, such as Teams-created sites or sites labeled as “Public

Once these policies are in place, site owners of inactive sites will receive automated alerts and can choose to keep, delete, or archive using the Microsoft 365 Archive product as needed.

As a SharePoint admin, you'll also have the option to apply policies to inactive sites to protect their content and remove any unauthorized access. And for sites connected to Teams, the inactivity status will be determined by evaluating user actions in both Teams and the SharePoint site.

SharePoint cross-tenant sites content migration – Public Preview

You can now move SharePoint sites across two tenants using a simple set of SharePoint PowerShell cmdlets. This includes all kinds of sites like Communication sites, Modern team sites, Teams-connected or Groups-connected sites, etc.

One another notable capability upon site move is that the sharing links to old URLs will continue to work although the URL of the site has changed! This is made possible by the cross-tenant redirect capability that ensures any hit to old URLs is redirected to new URL.
