News from Teams

Le novità di Teams

- E' tornata la *"modalità stalker"* per ricevere una notifica quando un utente diventa disponibile.
- Da metà luglio 2024 l'icona del Teams NEW elimina la scrittina NEW
- Il client 2.0 (personal) verrà uniformato/inglobato in 2.1

Classic Microsoft Teams end of support reminder and removing the NEW label

Archive Share Copy link Mark as unread

Summary

Classic Microsoft Teams support will end on July 1, 2024, with the 'NEW' label removed from the new Teams app mid to late July 2024. Classic Teams will be unavailable on certain OS from October 23, 2024, and for all users by July 1, 2025. Users should update their OS and Teams client to avoid disruptions.

Is this summary helpful?

This MC post is a reminder about the upcoming end of support for classic Microsoft Teams and also provides an update on plans to remove the NEW label from the new Teams applications.

How this will affect your organization

Classic Teams will reach the end of support starting July 1, 2024 (excluding VDI and Government cloud customers)

Starting July 1, 2024, classic Teams will become unsupported. Users still running classic Teams will experience in-app messages informing them that the client is no longer supported. These messages are dismissible but will reappear periodically.

NEW label removal from Teams app icon

Starting mid-July to late July 2024, we are removing the *NEW* label from the current new Teams application. The Teams application will be named Microsoft Teams with no additional labels and this change will occur for all platforms and users. We will not change the classic Teams application, which will continue to be called Microsoft Teams classic.

Updated May 23, 2024: We are working on a few changes to the system, and the current Message center post will be updated soon to reflect the latest plan and timelines. In the interim, we have completed one time migration of Teams, contacts to outlook contact store but any changes in Outlook will not reflect in Teams and vice versa. This will be enabled in next steps for this effort. Please stay tuned for further updates on this via the message center post.

Today, users can see Outlook contacts created with their Entra ID (AAD) account in Teams, but contacts created in Teams are not available in Outlook. To provide a consistent experience we

Microsoft Teams: People app on Teams phone devices

Summary

The new Microsoft Teams feature enhances the People app on Teams Phone devices, offering a quicker, more streamlined experience. Users can switch between contact lists rapidly, add people, or create groups. The rollout begins in mid-July 2024, with updates necessary to access the new feature. Microsoft 365 Roadmap ID 396773 details this update.

Is this summary helpful?

With this Microsoft Teams feature, there is a new way to use the People app on Teams Phones devices, which will provide a faster and simplified experience. The People app will let users switch between different contact lists with a faster interface. Users can also add people from the directory or create contact groups.

This message is associated with Microsoft 365 Roadmap ID [396773](#).

When this will happen:

General Availability (Worldwide, GCC): We will begin rolling out in mid-July 2024 and expect to complete by late July 2024.

General Availability (GCCHigh): We will begin rolling out in late July 2024 and expect to complete by late August 2024.

How this will affect your organization:

Once a user updates the People feature app to the latest version on a Teams Phone device, they will see a faster and simplified experience.
