Operator Connect Mobile

Operator Connect Mobile unlocks the power of mobility in your organization

Realize fixed-mobile convergence for integrating your users' mobile identities with Microsoft Teams.

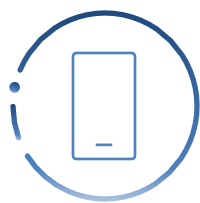

Assign a single business-provided mobile phone number

Users have one number for mobile, desk, and Teams to enable work from any location, device, or network.

Enable secure and compliant mobile communications

Implement enterprise-grade business policies that are secure and compliant across mobile devices.

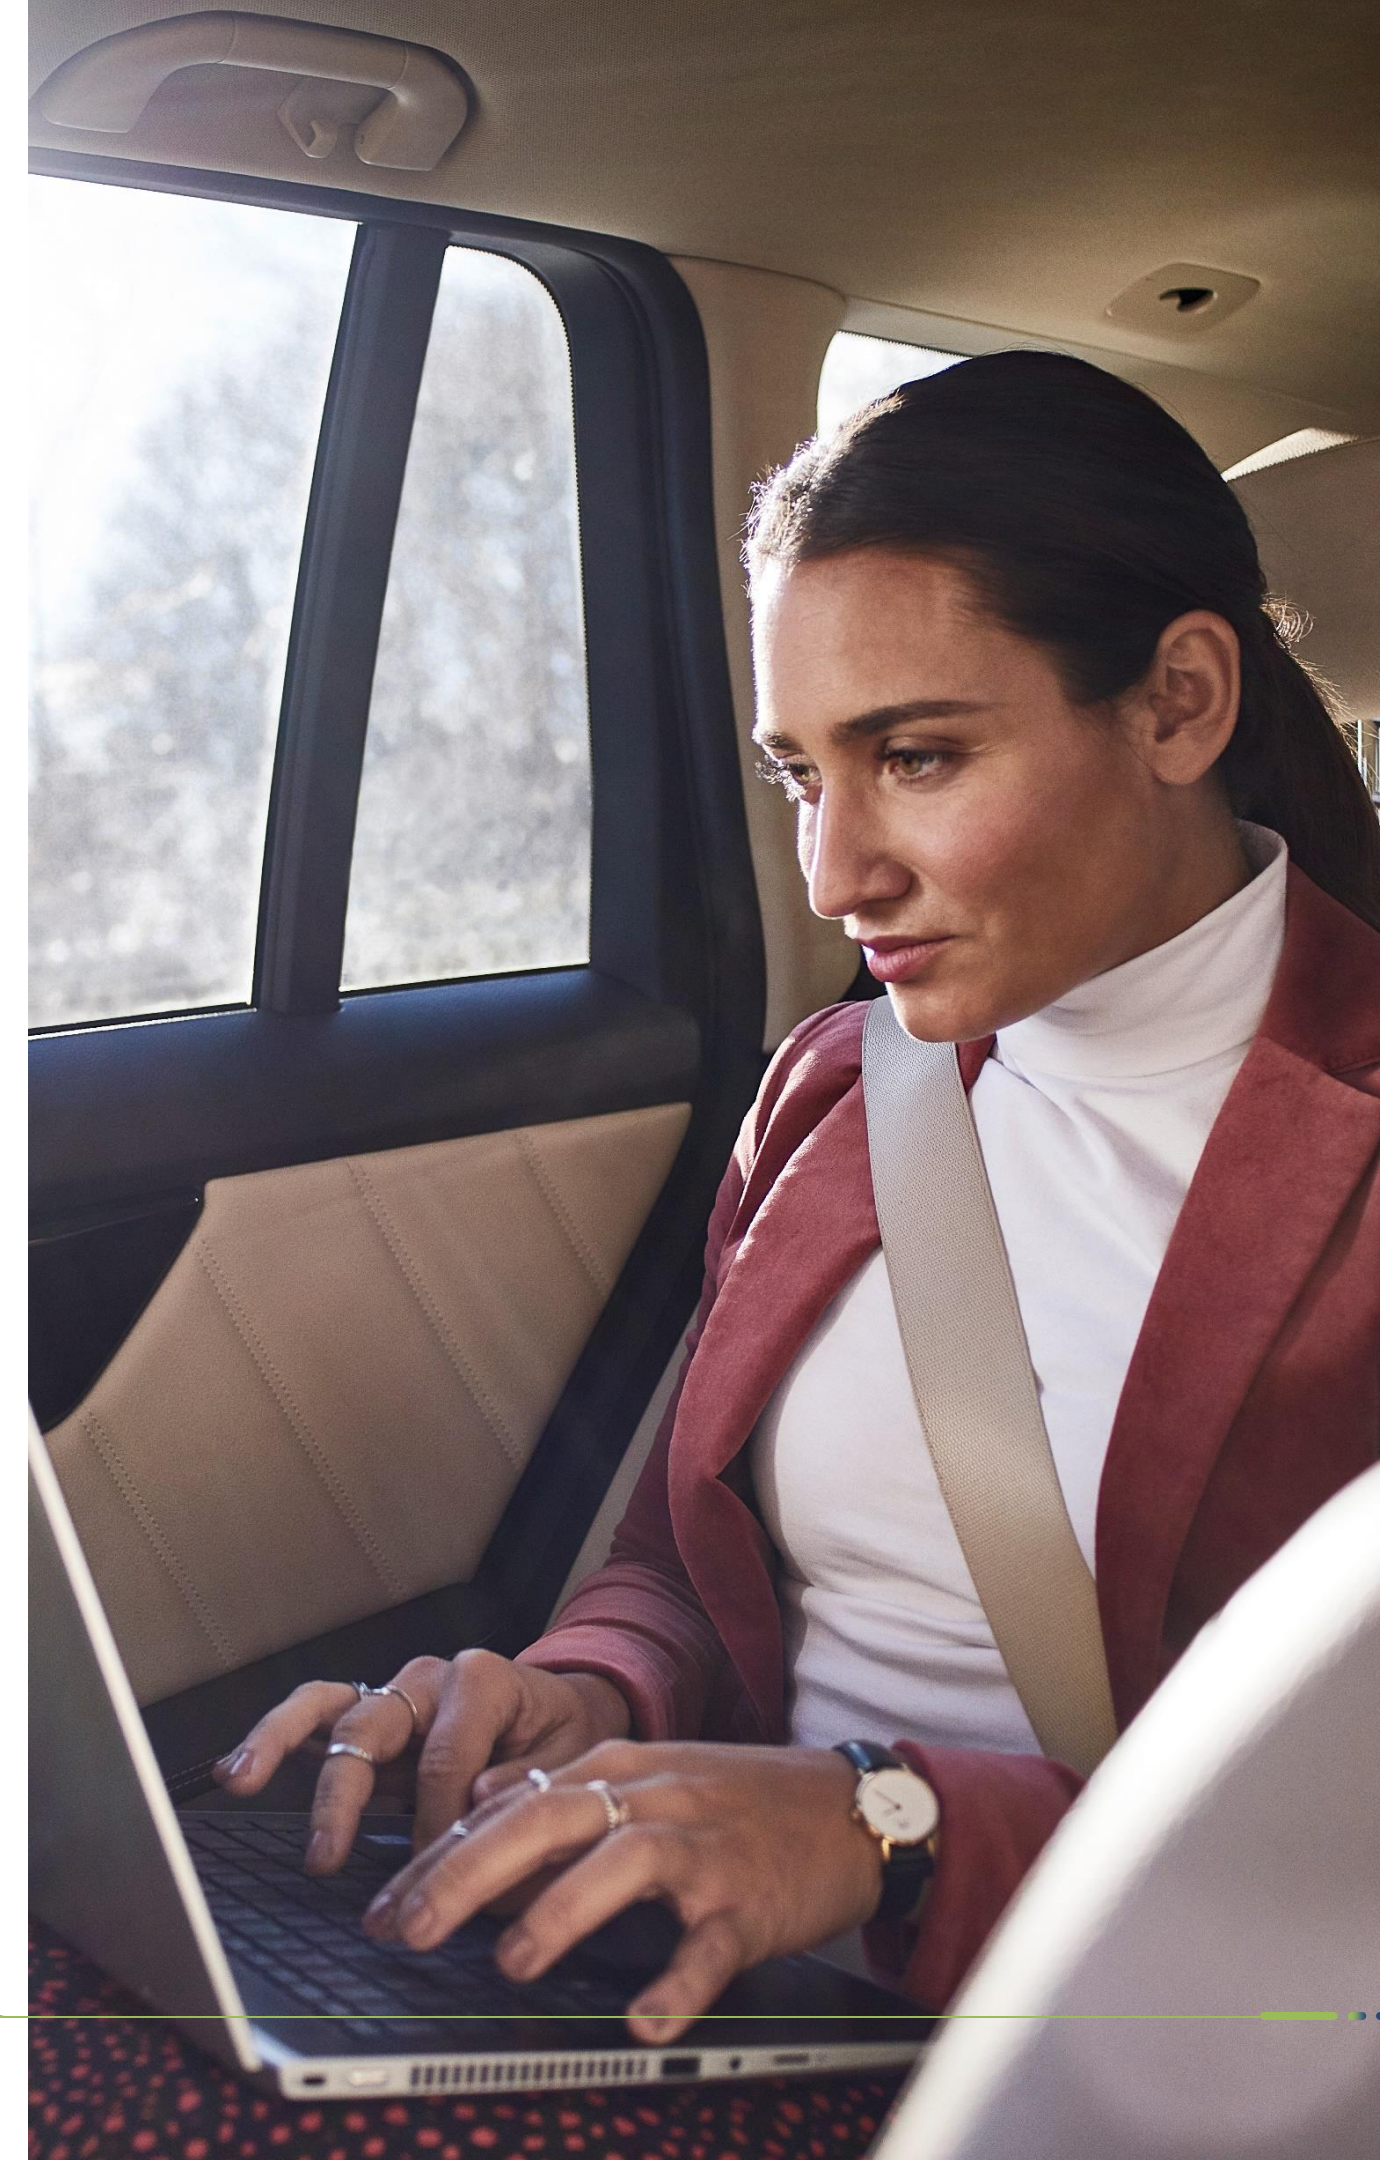

Realize true mobile integration

Unify business communications including combined call history, voicemail, and presence across devices.

Reduce costs of redundant services and devices

Trim costs on redundant fixed-line services as well as the number devices and hardware to purchase, manage, and support.

Operator Connect Mobile v1 features

- 1 Make and receive calls from your smartphone's native dialer or Teams endpoints using your single business-provided mobile number.
- 2 Move between devices and Teams endpoints during a call without dropping the call.
- 3 Transfer calls to colleagues on Teams by uplifting the call to Teams on same device.
- 4 Combined call history across Teams and native mobile dialer.
- 5 Presence integration enabling status updates to "In a call" when on a call on the native dialer.
- 6 Unified voicemail & business unanswered settings on all Teams endpoints and email with business enforced archival periods.
- 7 Enterprise grade calling policies and compliance implemented on employee's mobile calls on Teams and native dialer.
- 8 Show mobile number or company's main number as outbound caller ID when making outbound calls from the native dialer or any Teams endpoint.
- 9 Add mobile number to company call queues and PBX.
- 10 Reliable calling via cellular voice network or internet connection.

Operator Connect Mobile launch

Launch details

- Preview started in Q3 CY2022
- Initial GA in H2 CY2022
- Five operators in initial wave (coverage largely throughout North America and Europe); further expansion planned during late 2022

Licensing requirements

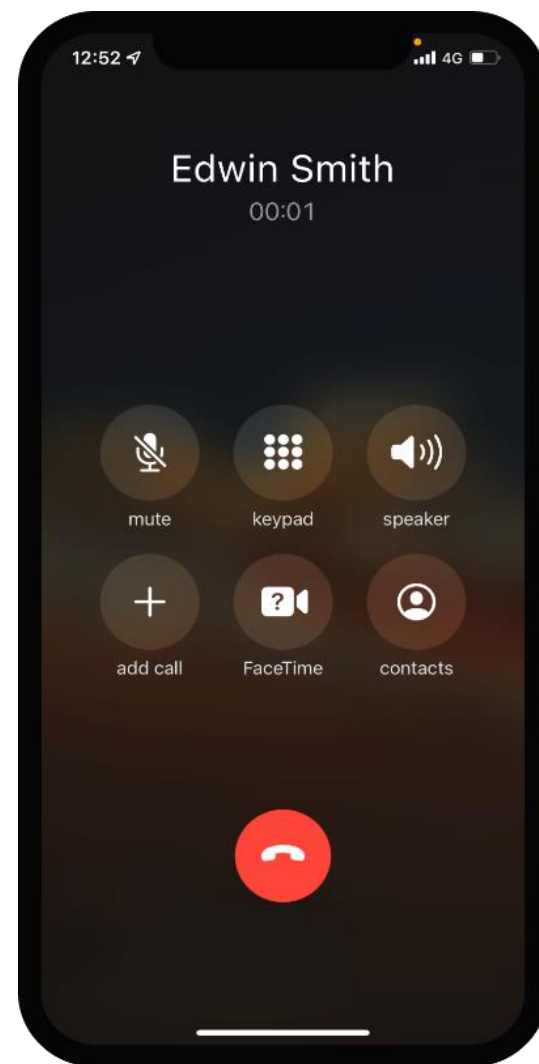

- Teams Phone Standard/E5
- Operator Connect Mobile add-on SKU*

** Potentially be part of a suite as well*

Simultaneous ringing in Teams and native dialer

Reduce the chance of missed calls with alerts on multiple endpoints.

Native dialer

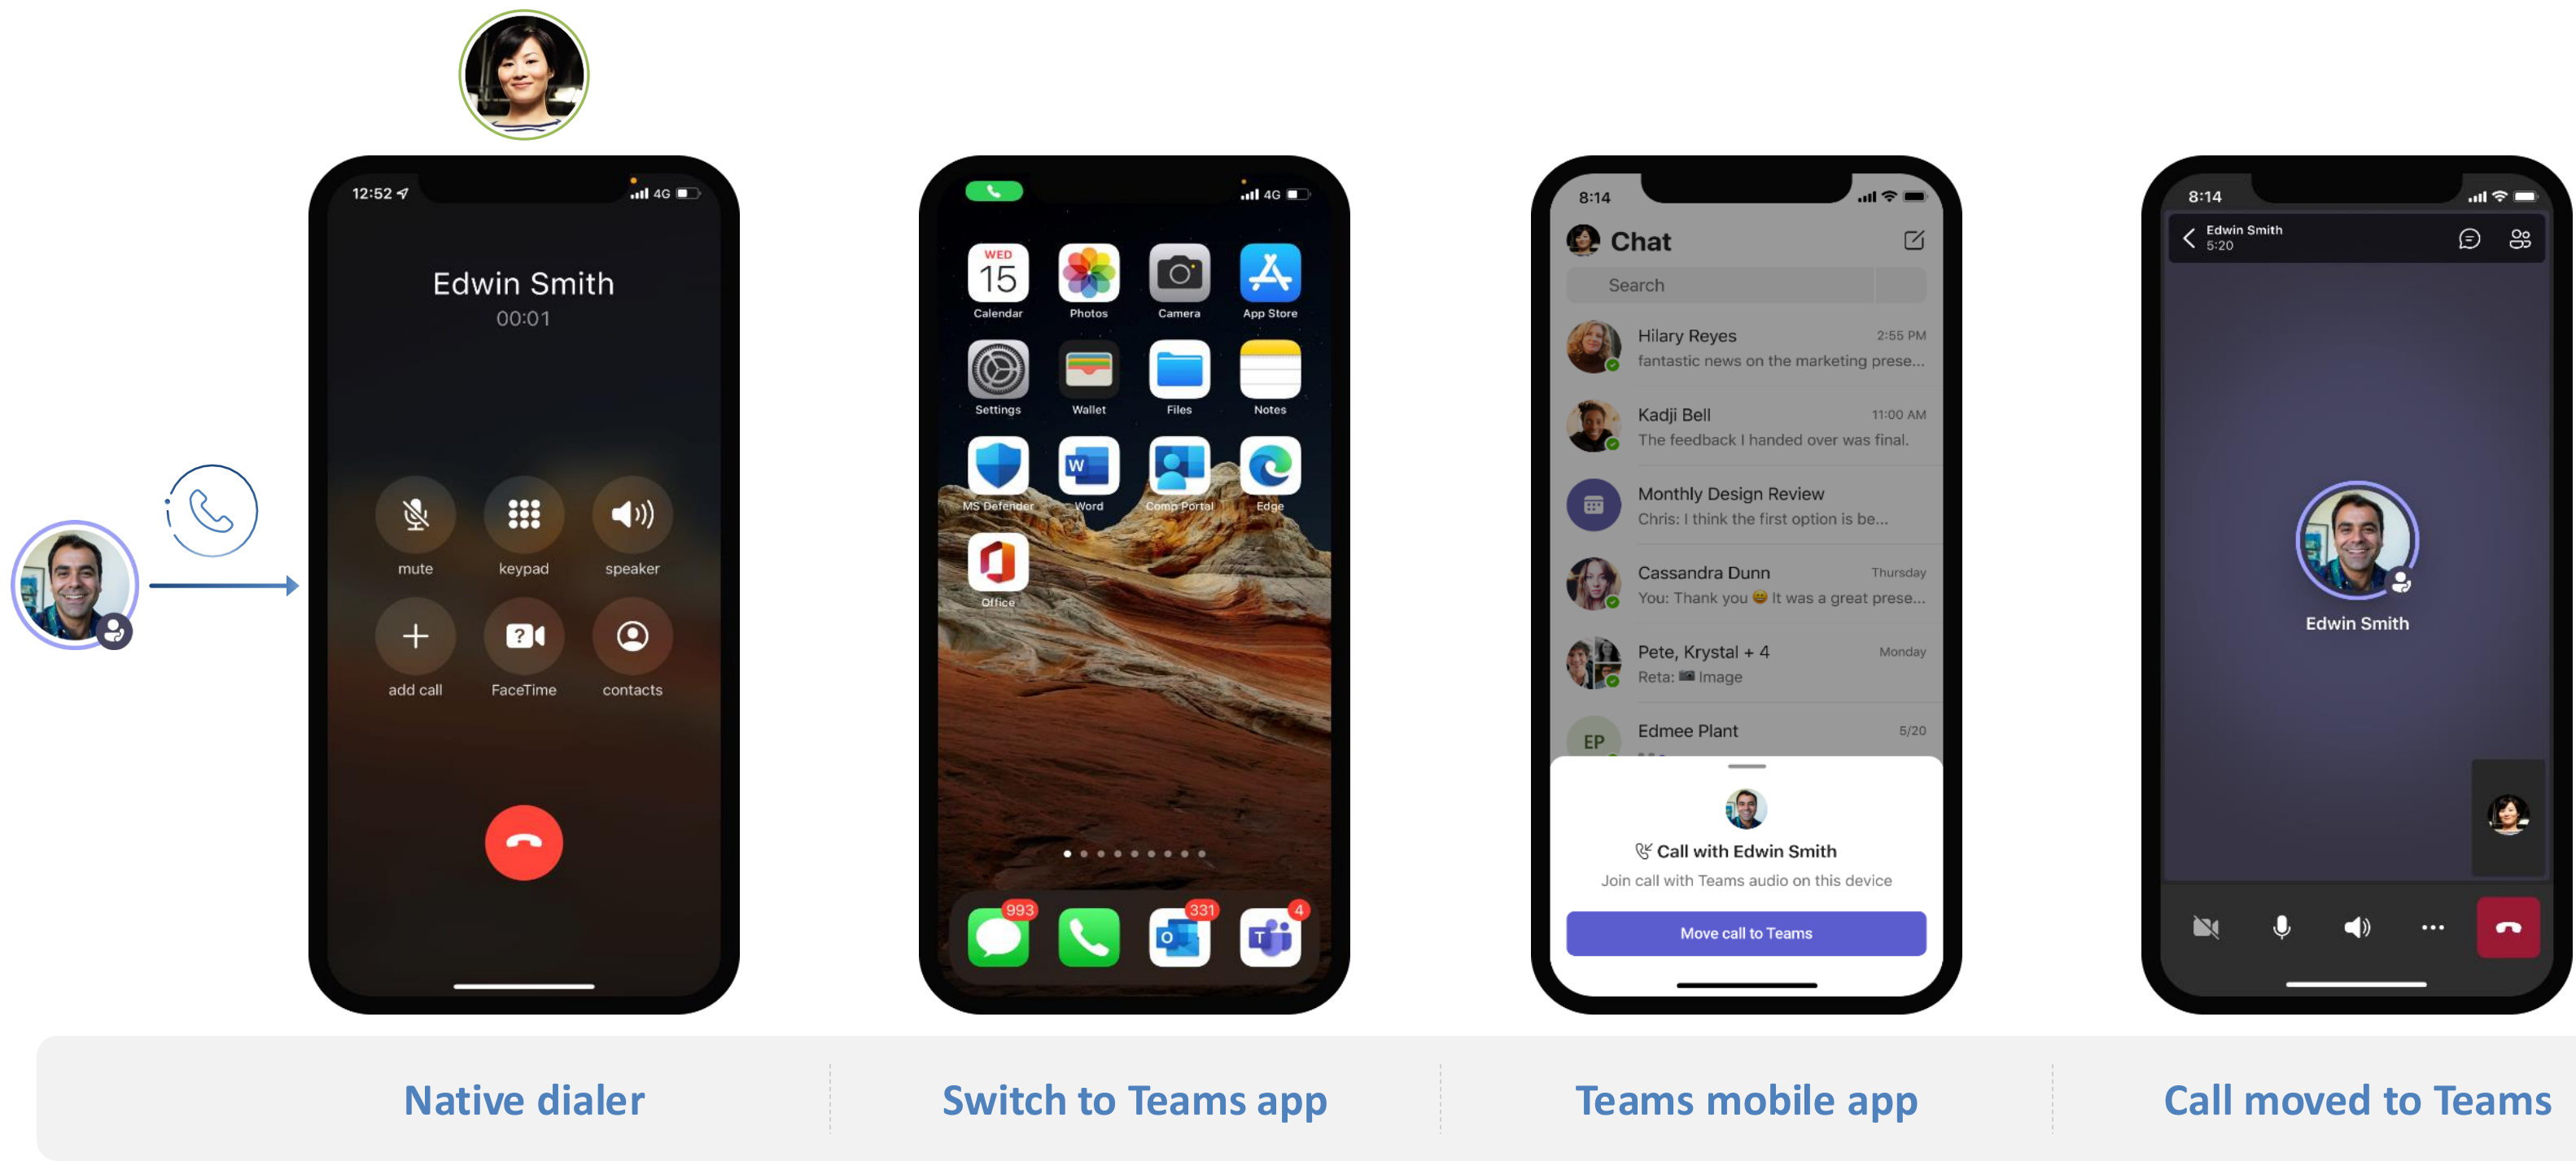

AND

Teams desktop/tablet app

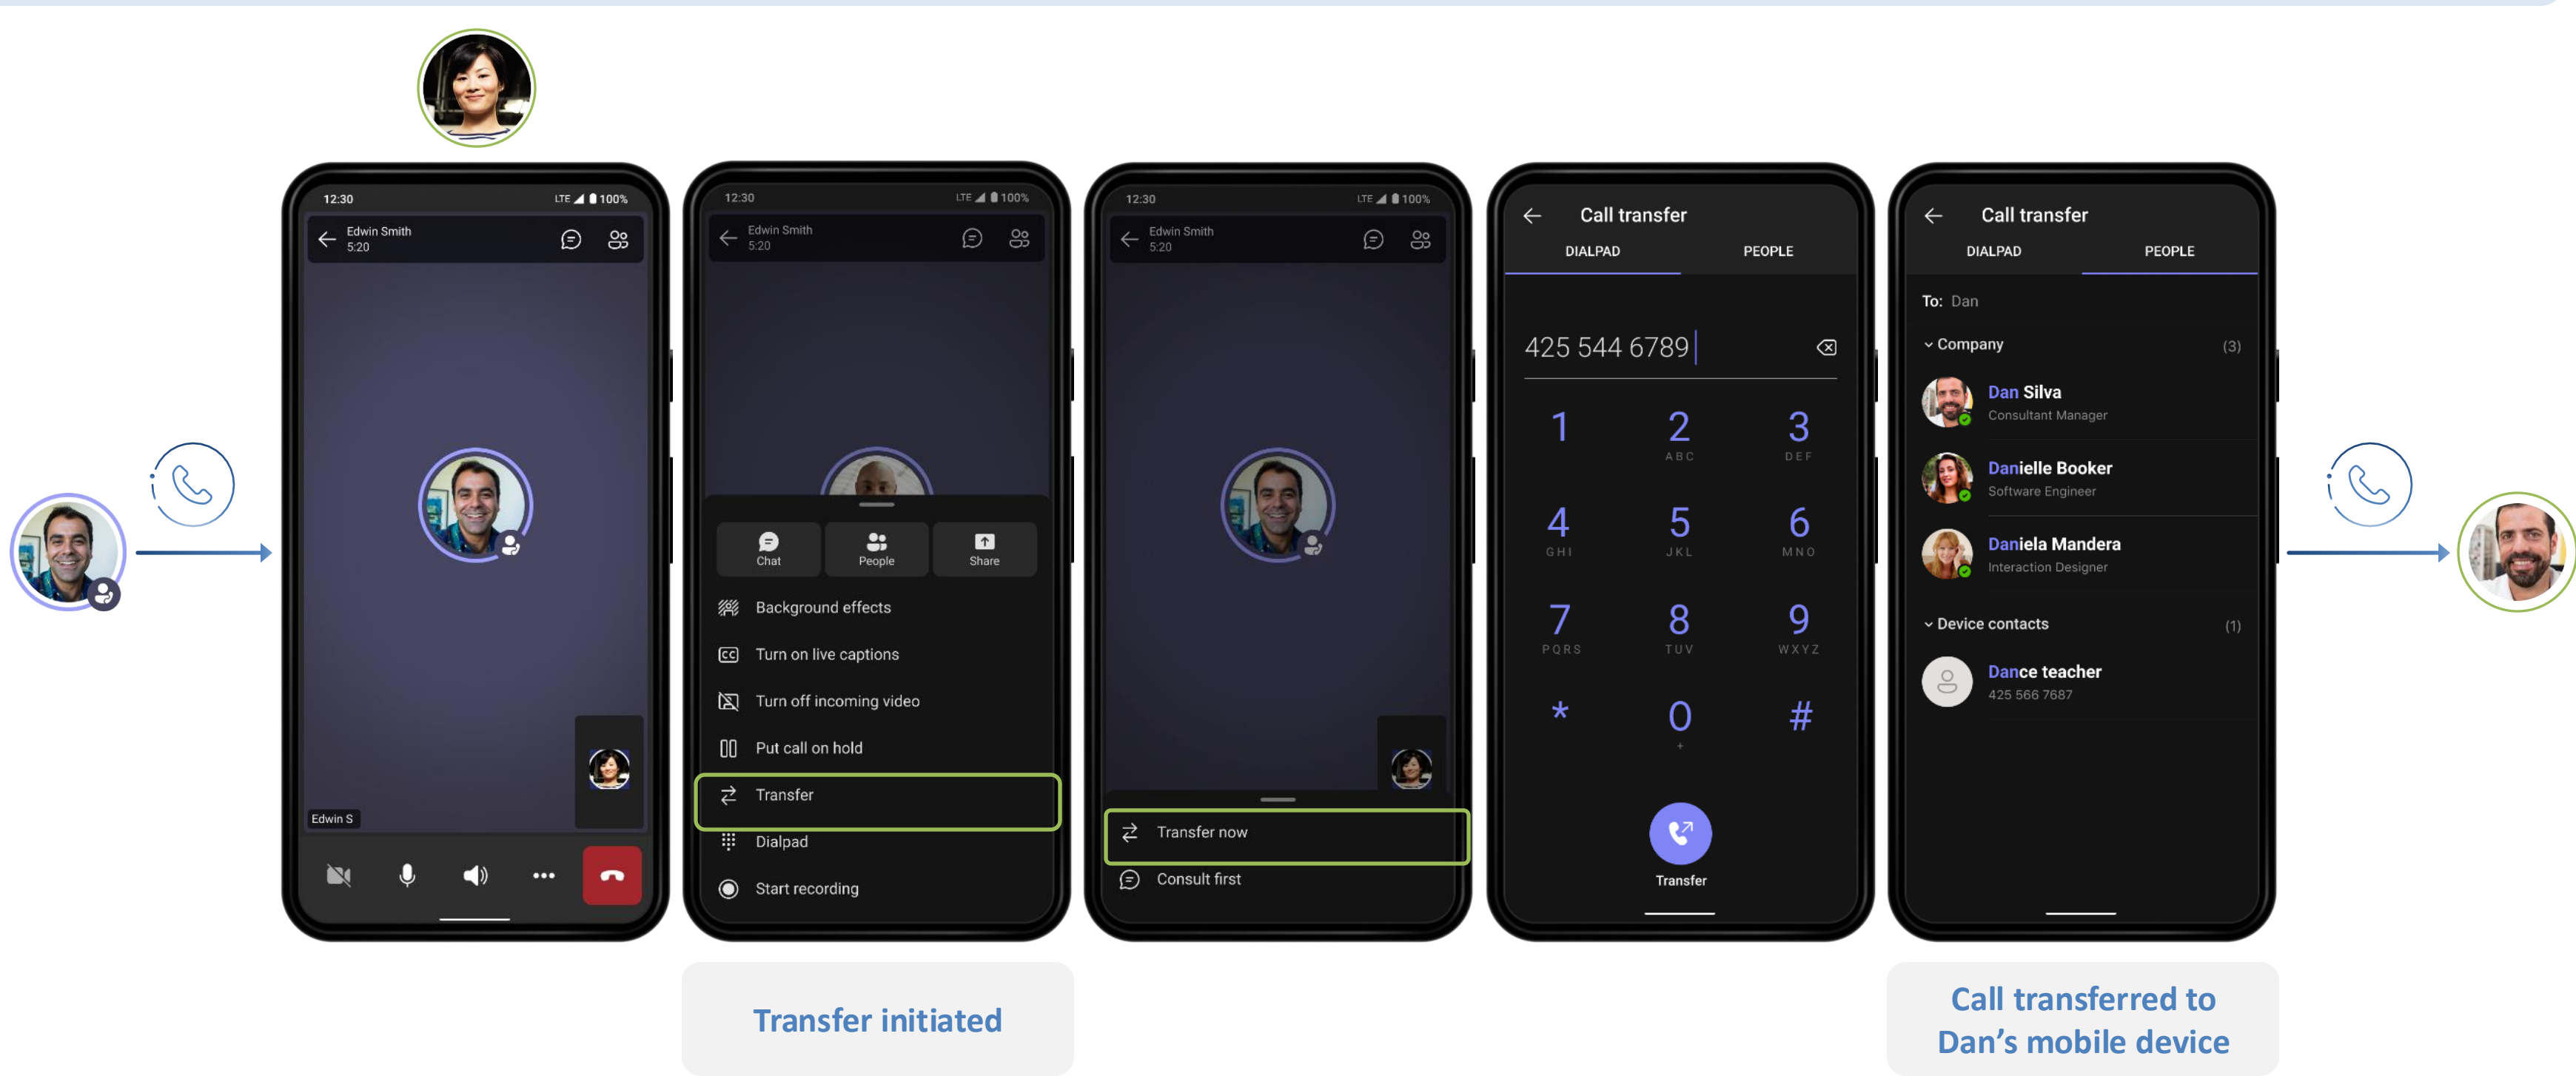

Easily “uplift” native calls to Teams

Begin calls on native dialer and move to Teams on mobile or desktop.

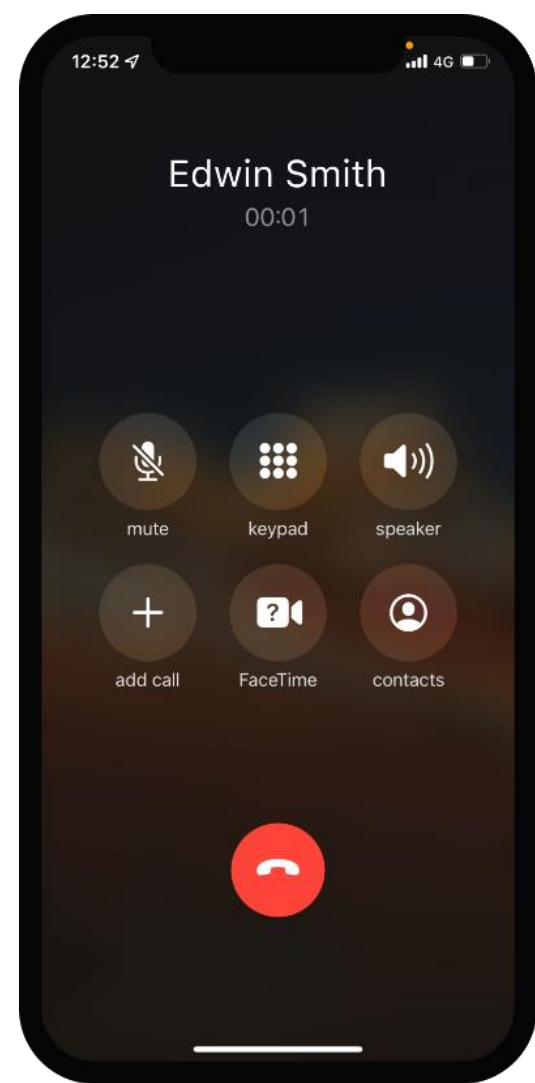

Transfer calls in Teams or the contact's mobile device

Route calls easily to a recipient's Teams profile or their mobile number.

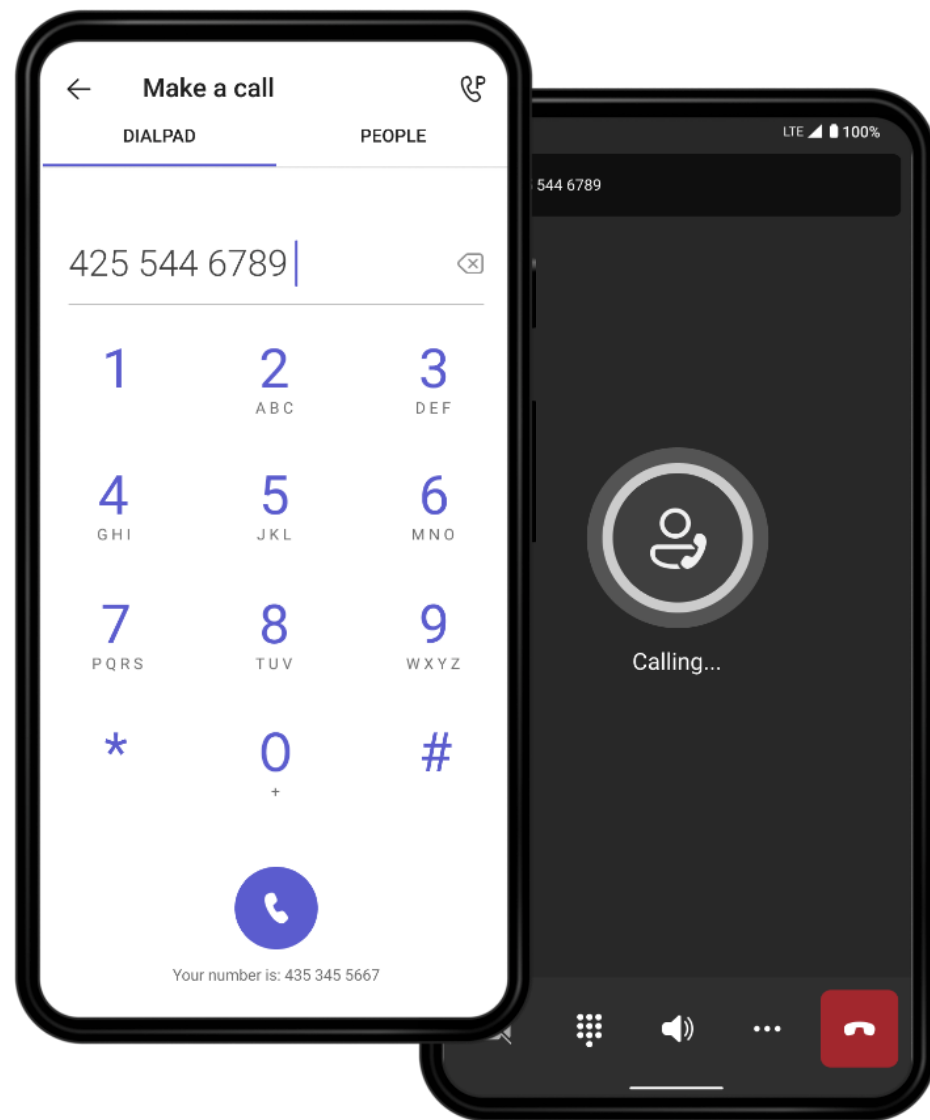

Show business ID for calls from native dialer or Teams

Protect caller's mobile number and maintain company branding for calls to customers.

Edwin calls his customer from his native dialer

OR

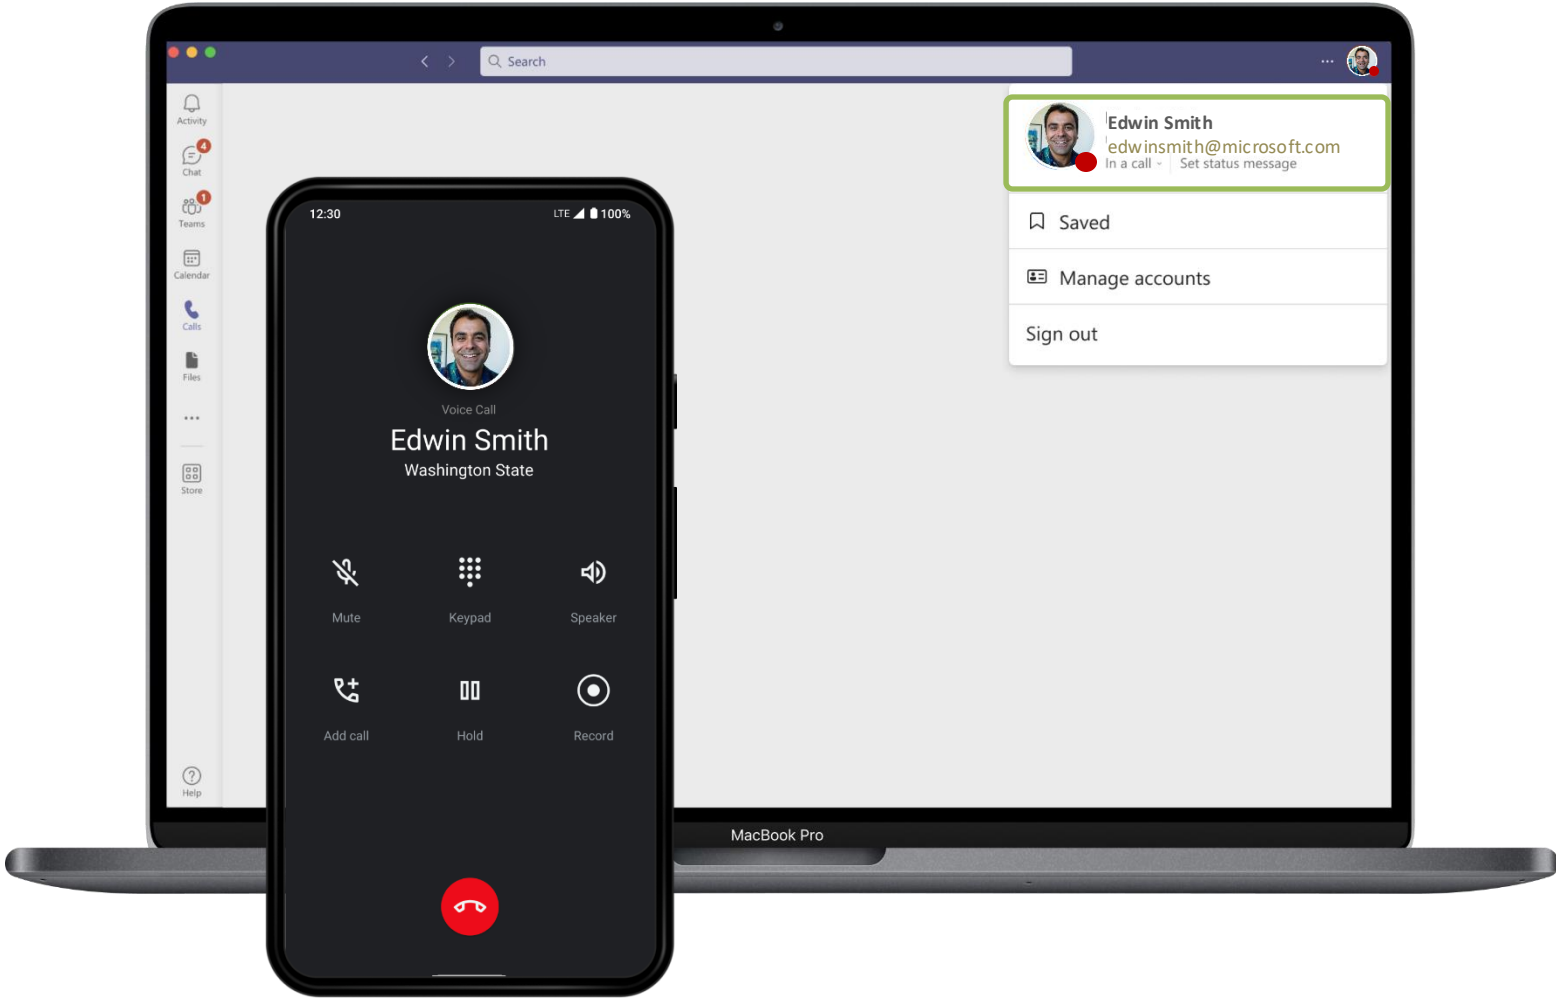

Edwin calls his customer on Teams

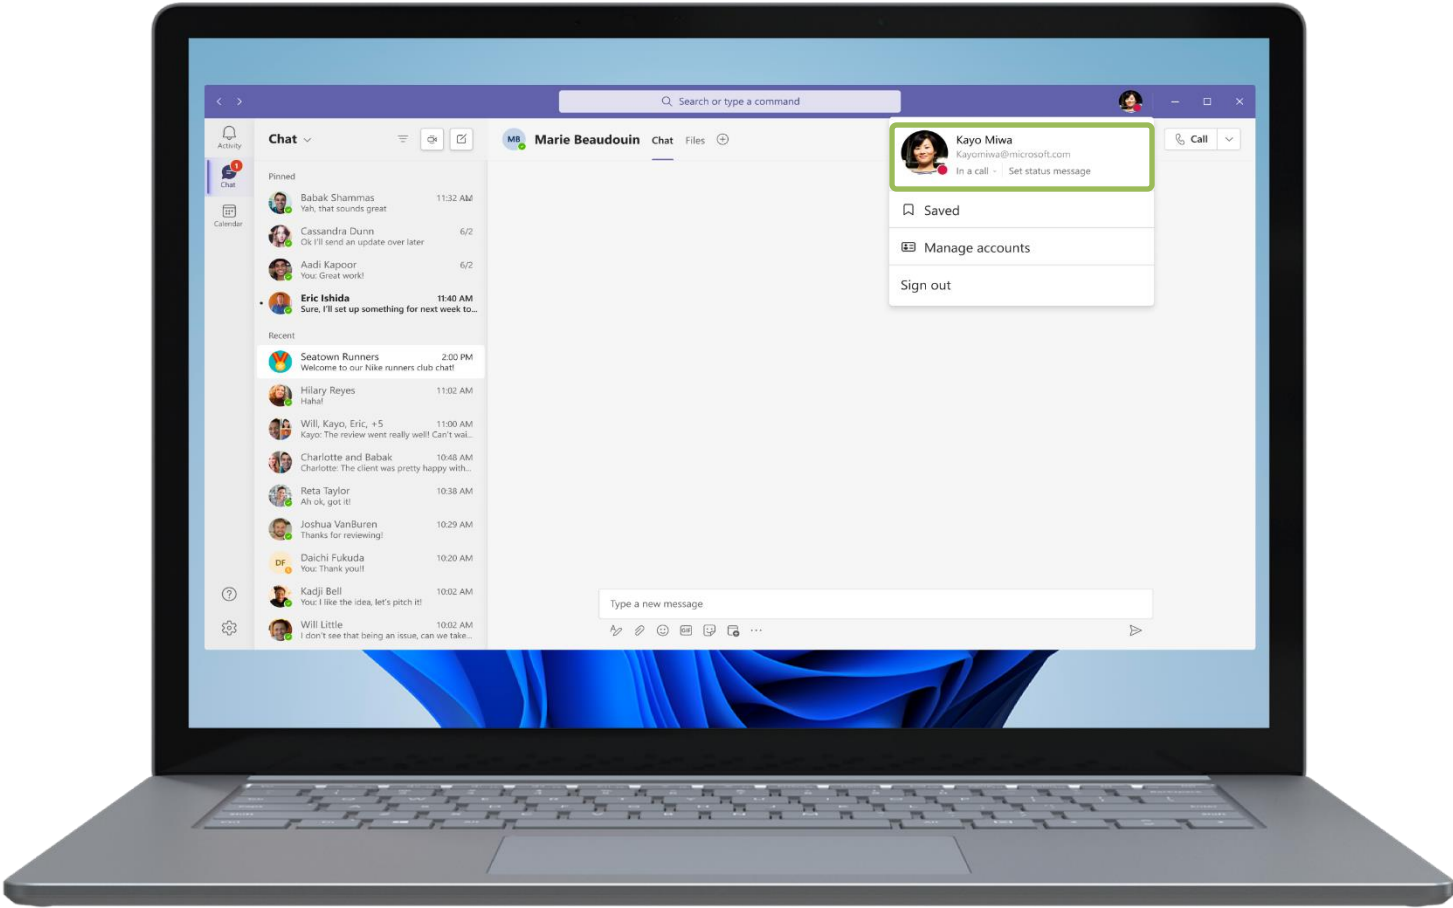

Caller ID reflects Edwin's company name and number

Unified presence reflects calls using native dialer

Set Teams presence to reflect active native dialer calls as “In a call”.

On a native dialer call

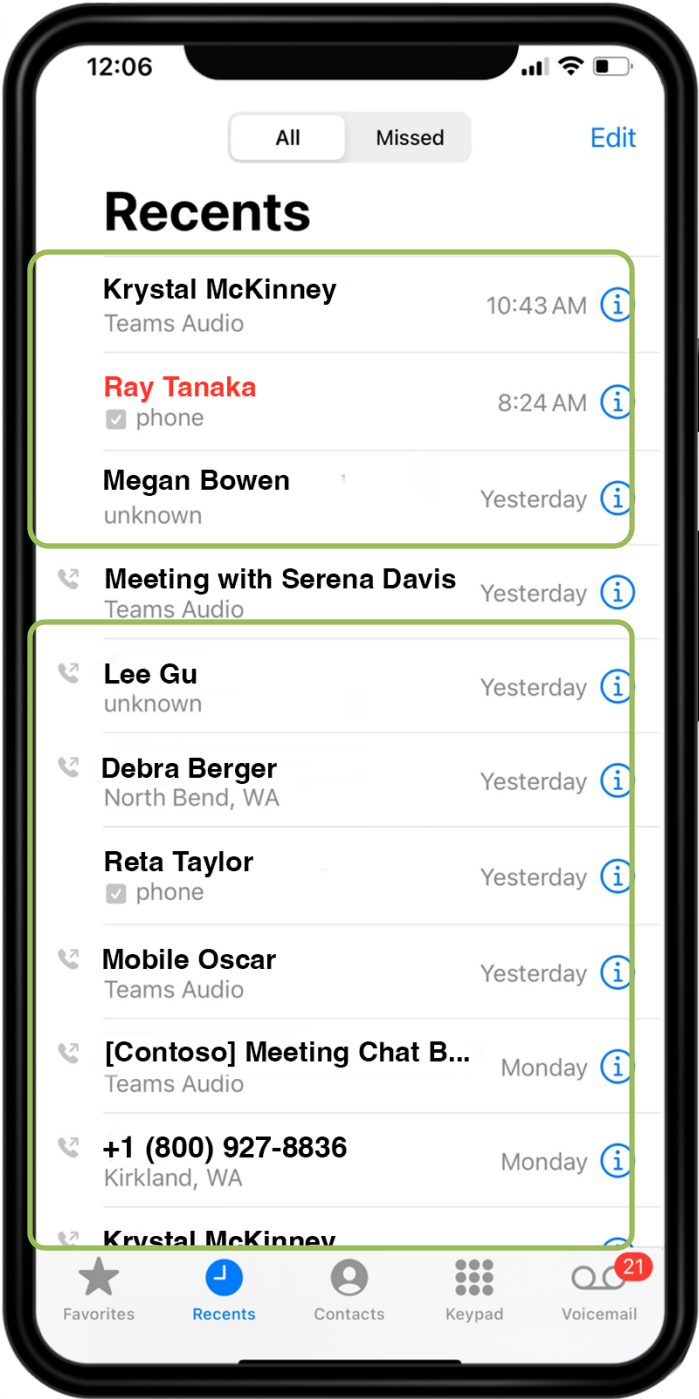

Native dialer presence reflected in Teams

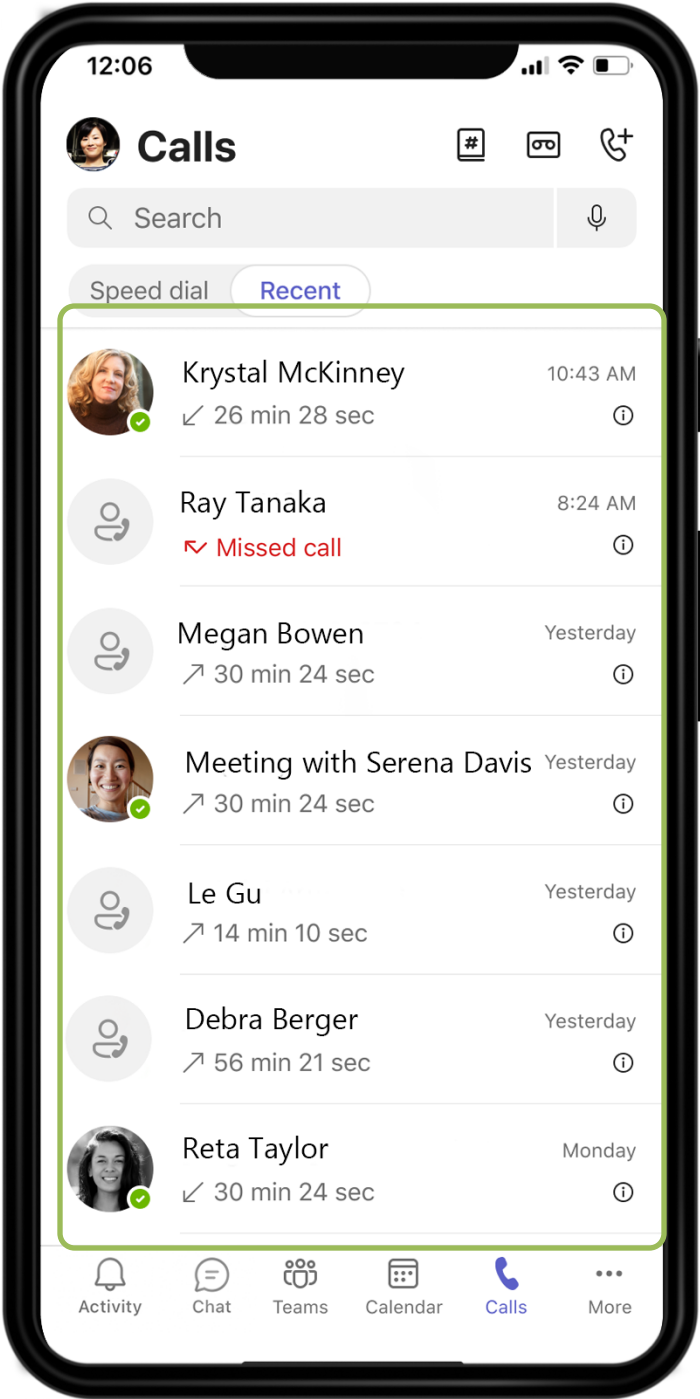

Unified call history across native dialer and Teams

Azure cloud backup for call history

Call history on native dialer

Call history in Teams

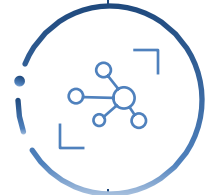

Operator Connect Mobile future capabilities

Enable differentiated personal and business multi-identity experiences powered by AI

BYOD

Allow users to use their personal numbers and devices with Teams.

5G/IOT

Enable advanced mobile capabilities.

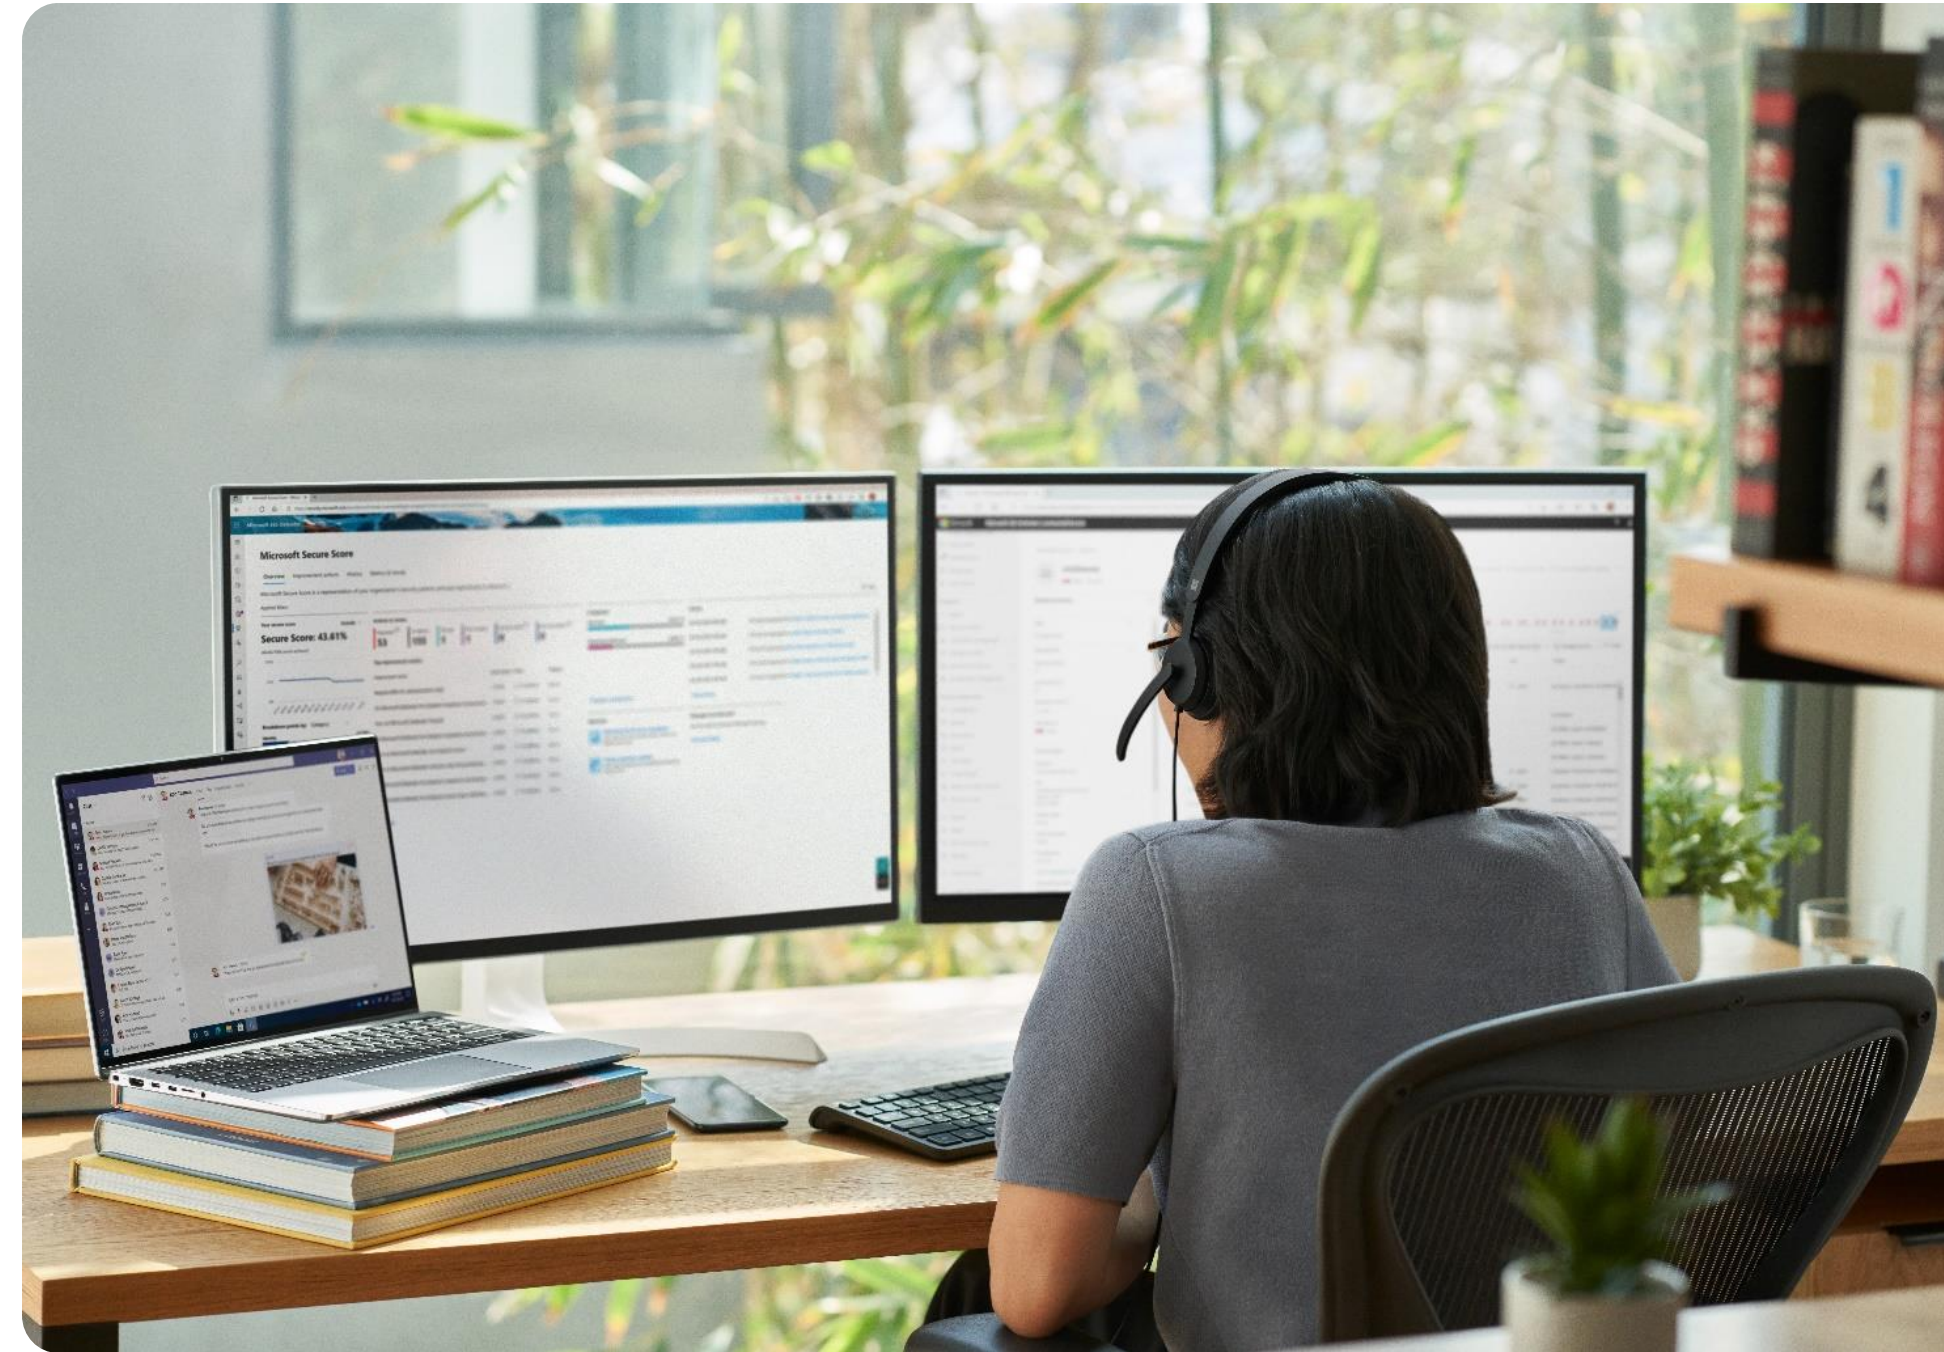

Messaging

Integrated Teams and native device messaging.

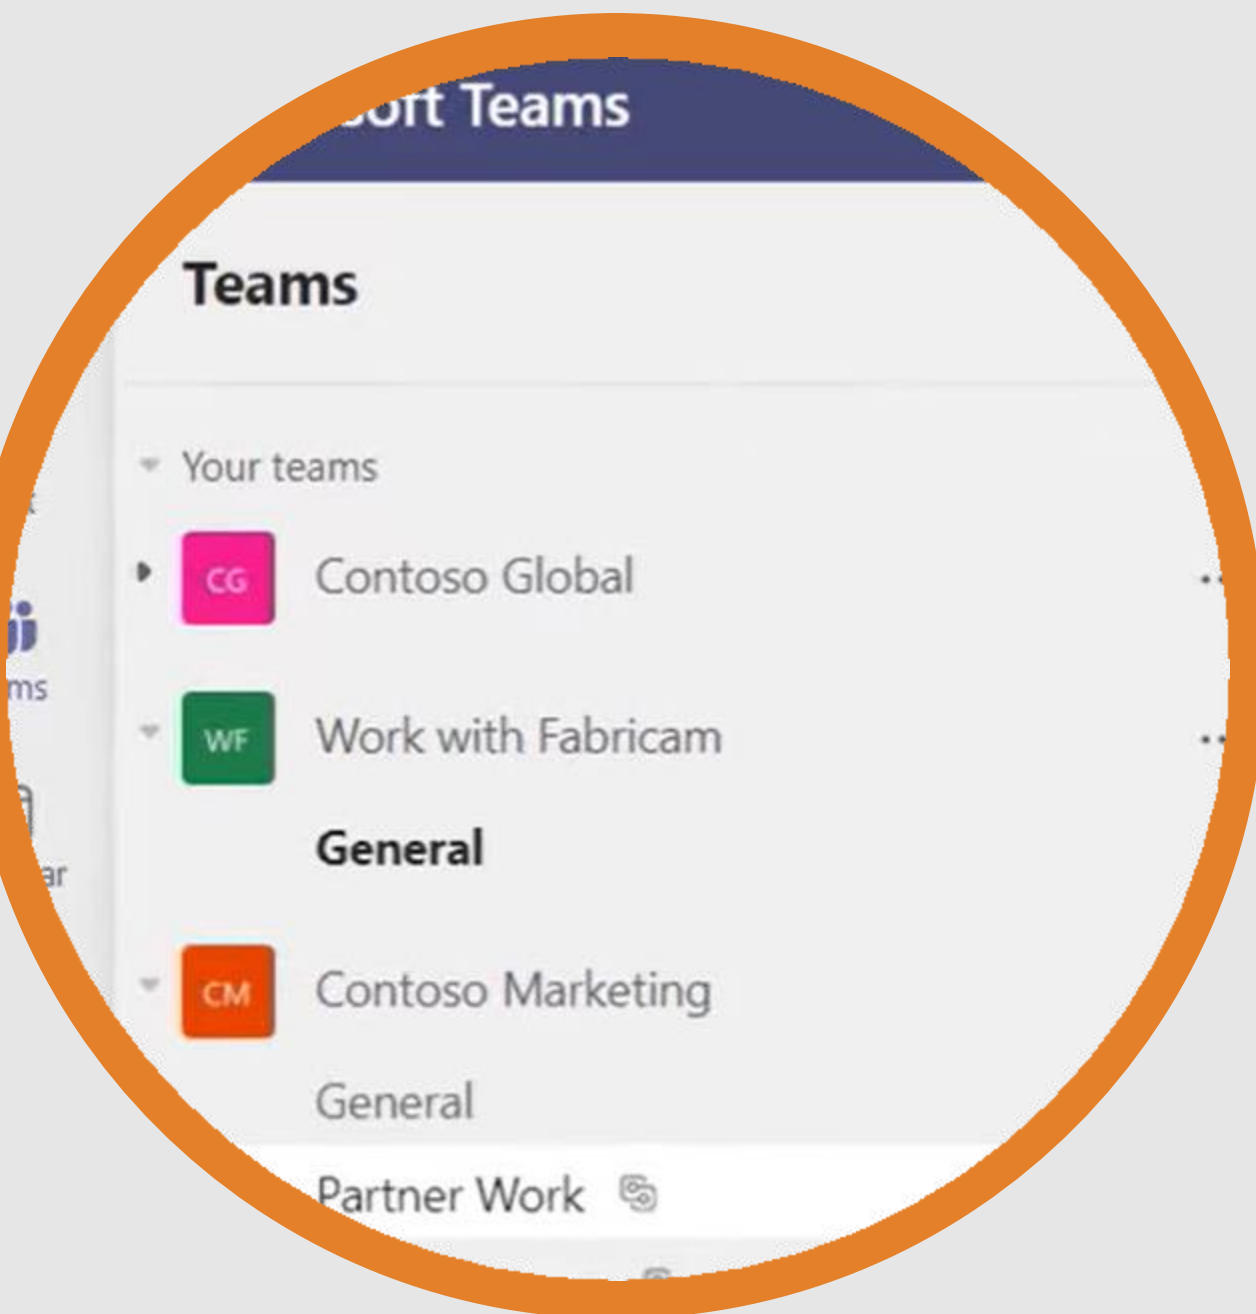

Multiple identities

Enable multiple numbers in Teams.

Teams Connect (aka Shared Channels)

Teams Connect (aka Shared Channels)

	Pre Shared Channels	Con Shared Channels
Guest account	Gestione account multipli in AD, identity non univoca	Shared Channels si appoggia su B2B direct connect, non vengono più creati account Guest
Guest account	Per accedere alle informazioni contenute in un Team condiviso, bisogna fare Tenant Switch	Gli Shared Channel condivisi da altri Tenant sono visibili e utilizzabili nel PROPRIO Teams account, assieme ai PROPRI Team e Canali
Condivisione interna tra Team	Era spesso necessario creare molti Team diversi e replicare le informazioni	Si possono ora creare Shared Channel e "distribuirli" su Team diversi, mantenendo un flusso unico e organizzato delle comunicazioni
Condivisione con esterni	Era spesso necessario creare un Team dedicato alle comunicazioni con i Guest	Si può ora creare uno Shared Channel dedicato agli utenti esterni

Create a channel for the Photon launch team

Channel name

Photon training

Description (optional)

Channel for collaborating with training companies to develop training collateral.

Channel type

Standard - Everyone on the team has access

Standard - Everyone on the team has access

Private - Specific teammates have access

Shared - People you choose from your org or other orgs have access

Cancel

Create

Teams Connect (aka Shared Channels)

Gli Shared Channels non utilizzano gli account Guest per dare accesso a utenti esterni, ma si appoggiano alla nuova funzionalità di Azure AD External Identities B2B direct connect.

In questo modo:

- non vengono più creati account Guest
- ci si appoggia all'account Azure AD del collaboratore esterno per tutti gli aspetti legati all'autenticazione

Organizational settings

Default settings

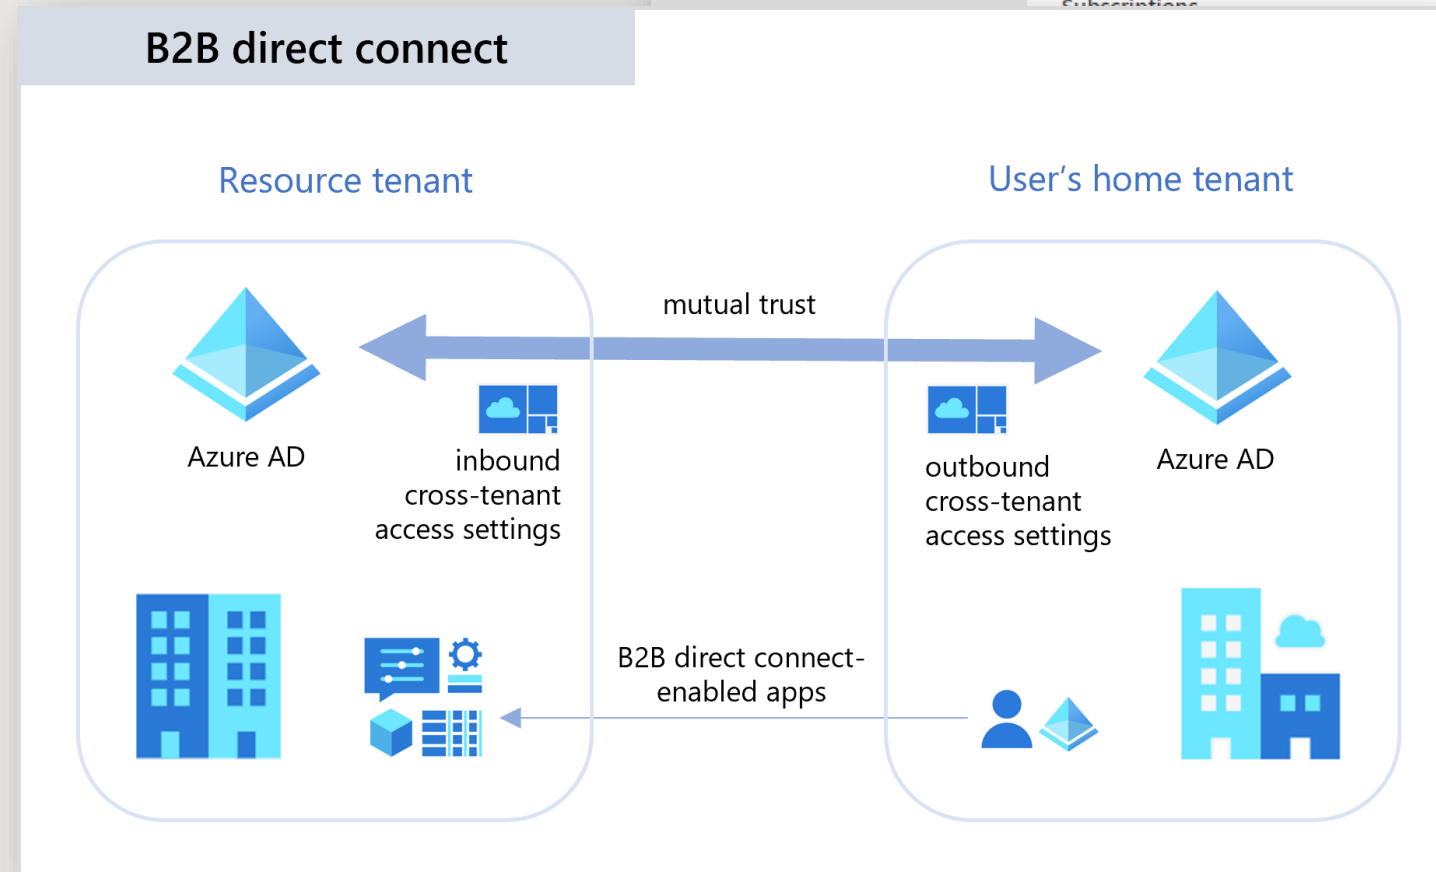

Default settings apply to all external Azure AD organizations not listed on the organizational settings tab. These default settings can be [Learn more](#)

Inbound access settings

Edit inbound defaults

Type	Applies to	Status
B2B collaboration	External users and groups	All allowed
B2B collaboration	Applications	All allowed
B2B direct connect	External users and groups	All allowed
B2B direct connect	Applications	Some allowed
Trust settings	N/A	Disabled

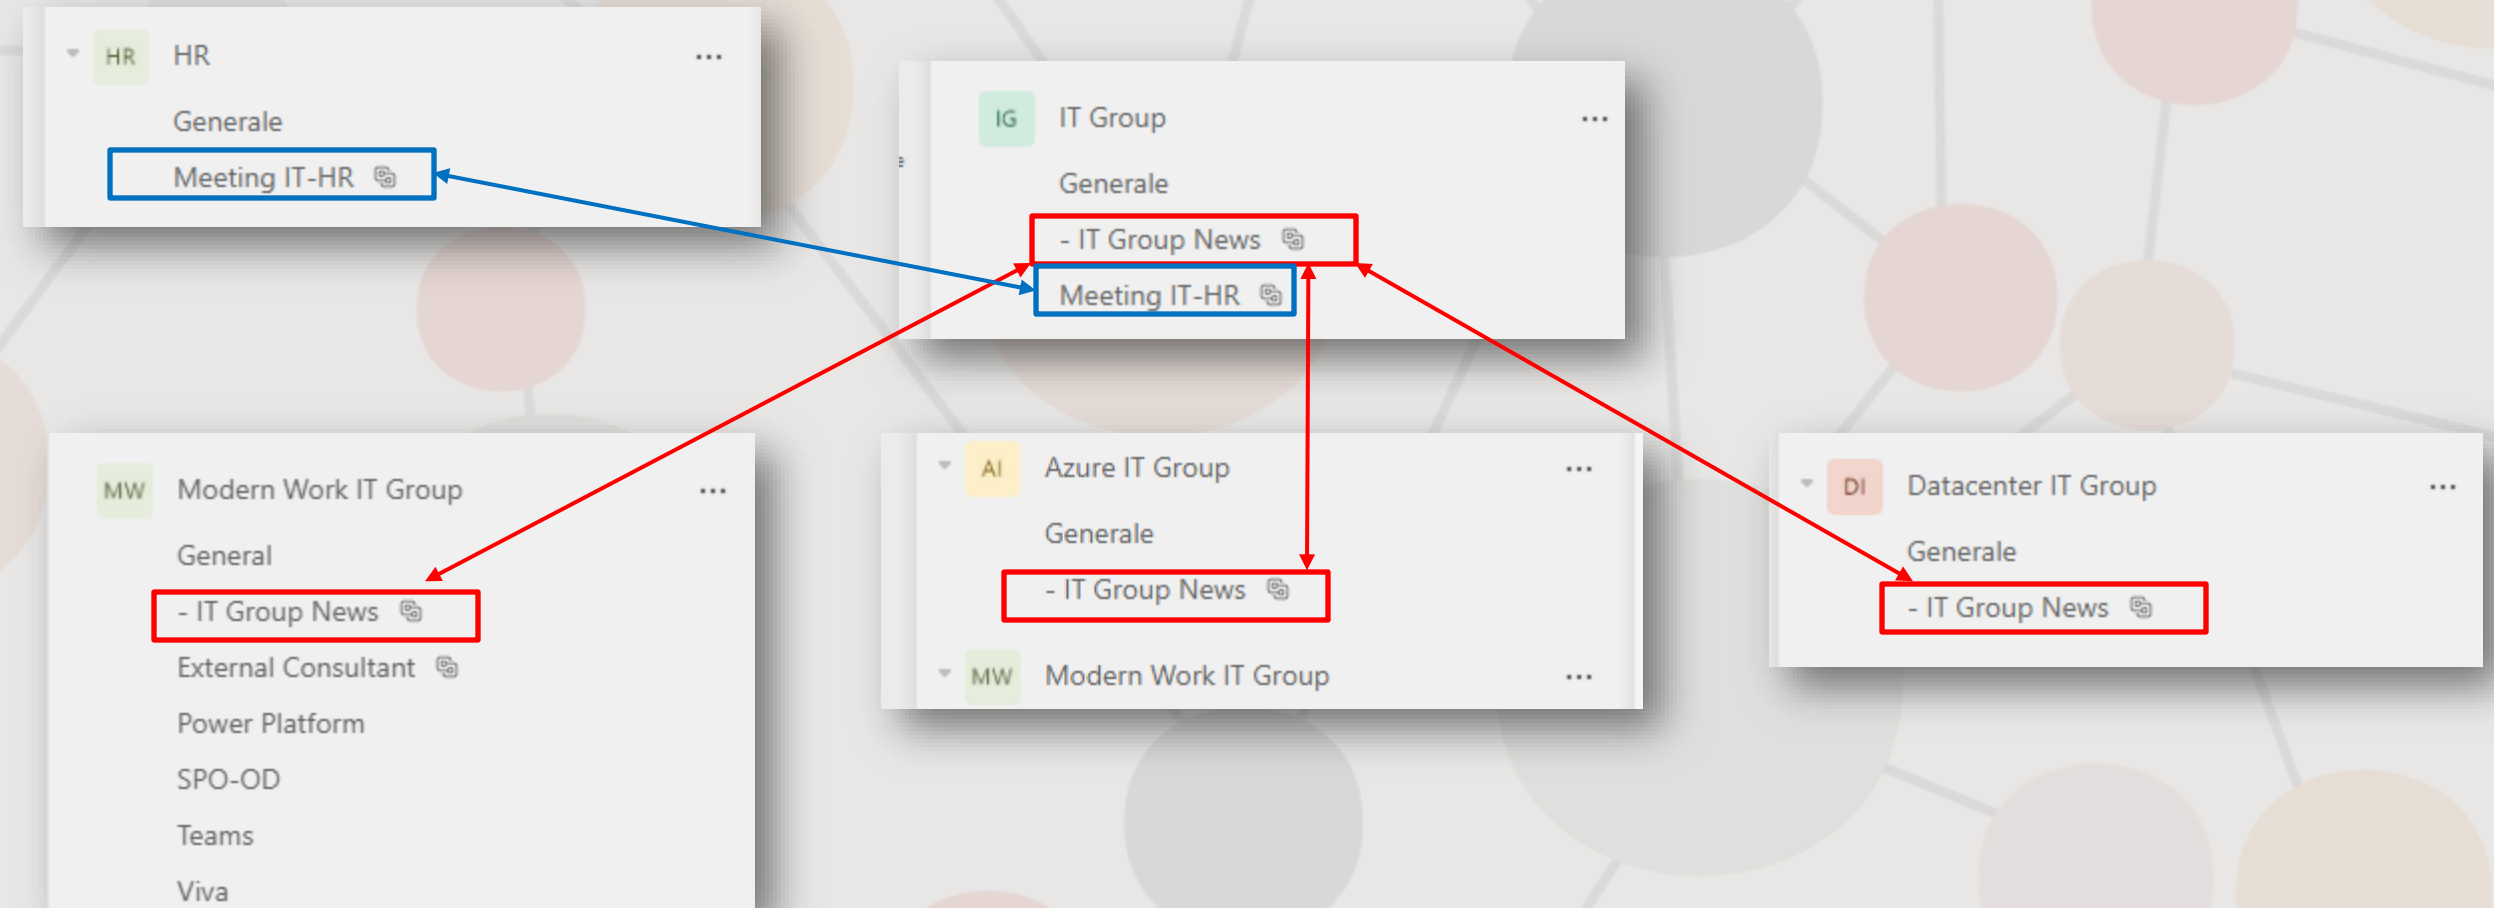

User's home tenant

Teams Connect (aka Shared Channels)

Gli Shared Channel sono utilissimi anche nella condivisione delle informazioni tra vari Team.

Si possono ora creare Shared Channel e "distribuirli" su Team diversi, mantenendo un flusso unico e organizzato delle comunicazioni, invece di molti Team diversi con repliche delle stesse informazioni.

Teams Connect (aka Shared Channels)

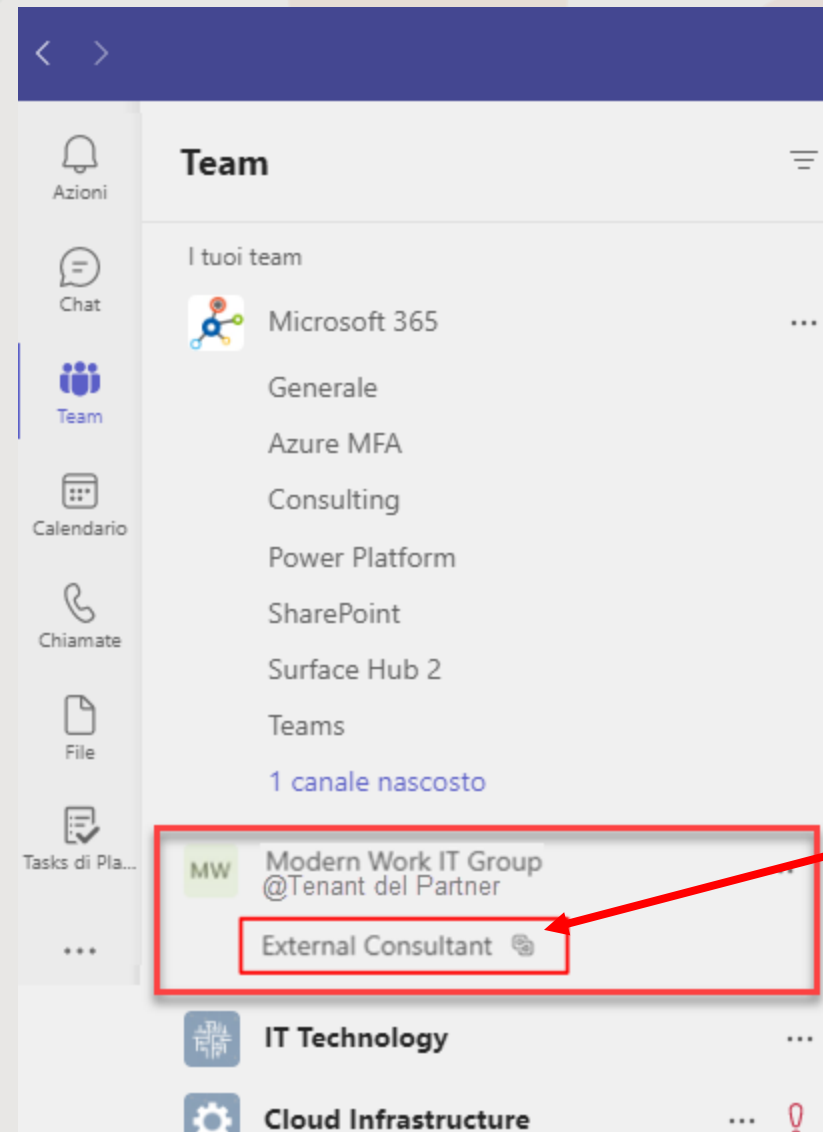

Account esterno del consulente
Autenticazione tramite Azure AD
B2B direct connect

Condivisione con esterni

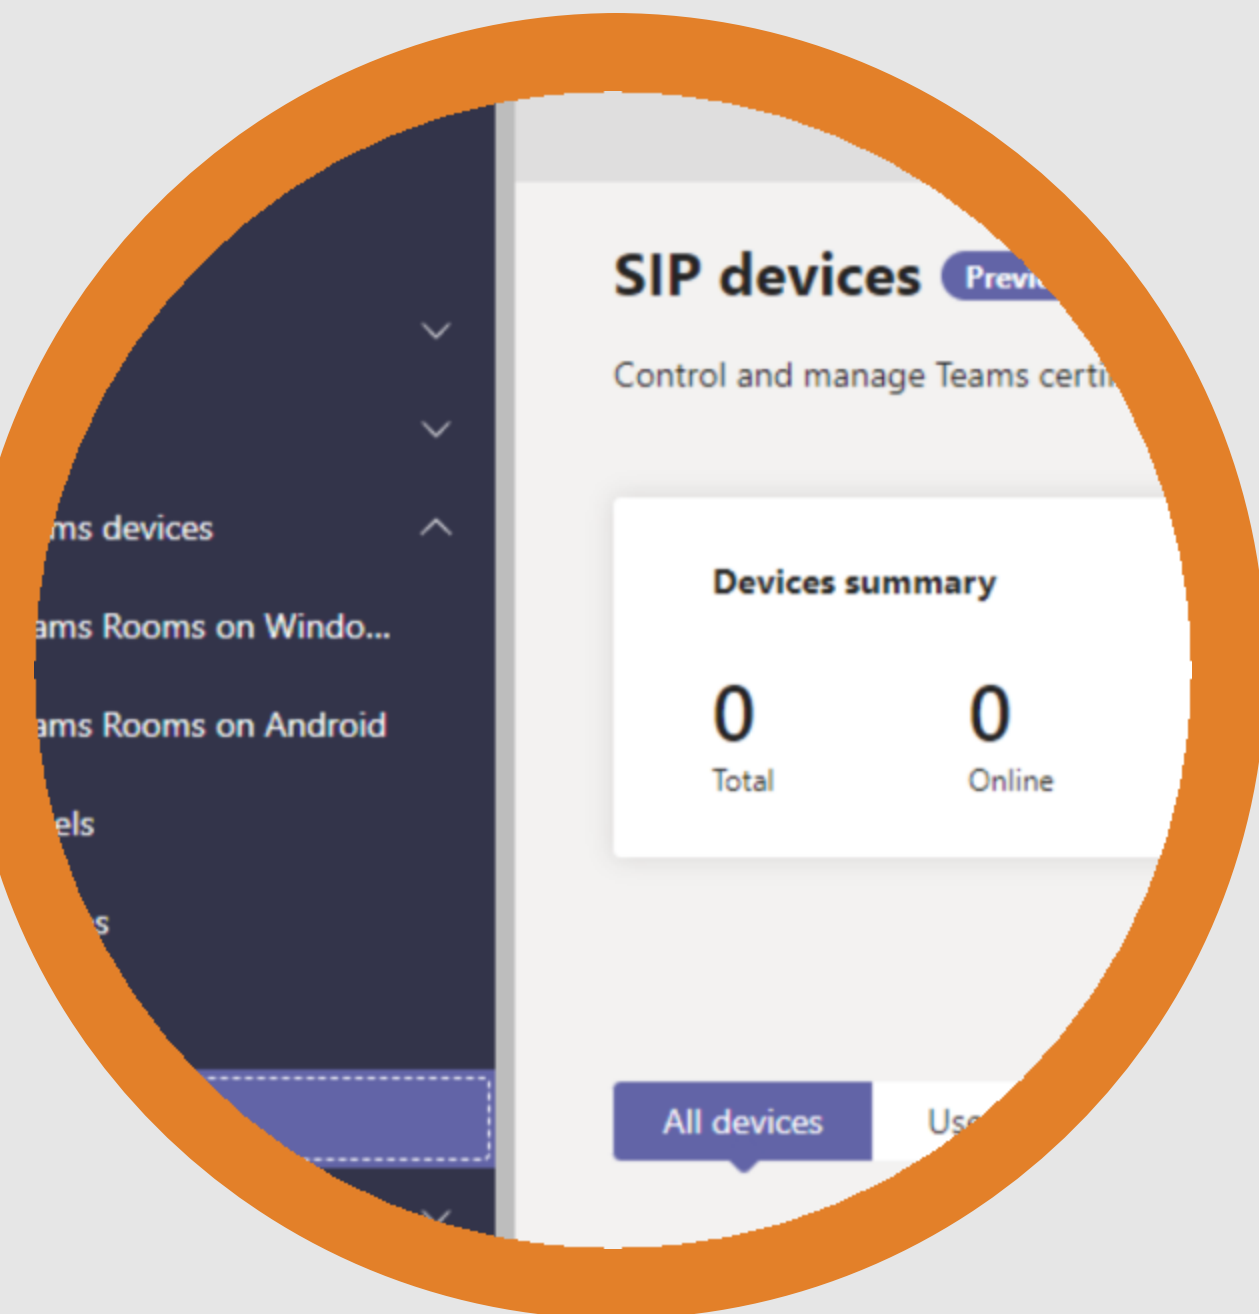

Con gli Shared Channel si può finalmente dare accesso a un solo, specifico canale di un Team senza che questo comporti automaticamente l'accesso a tutti i Channel standard (come avviene con i Guest)

Gli Shared Channel condivisi da altri Tenant sono visibili e utilizzabili nel PROPRIO Teams account, assieme ai PROPRI Team e Canali

Non è più necessario fare Tenant Switching

Integrazione DECT

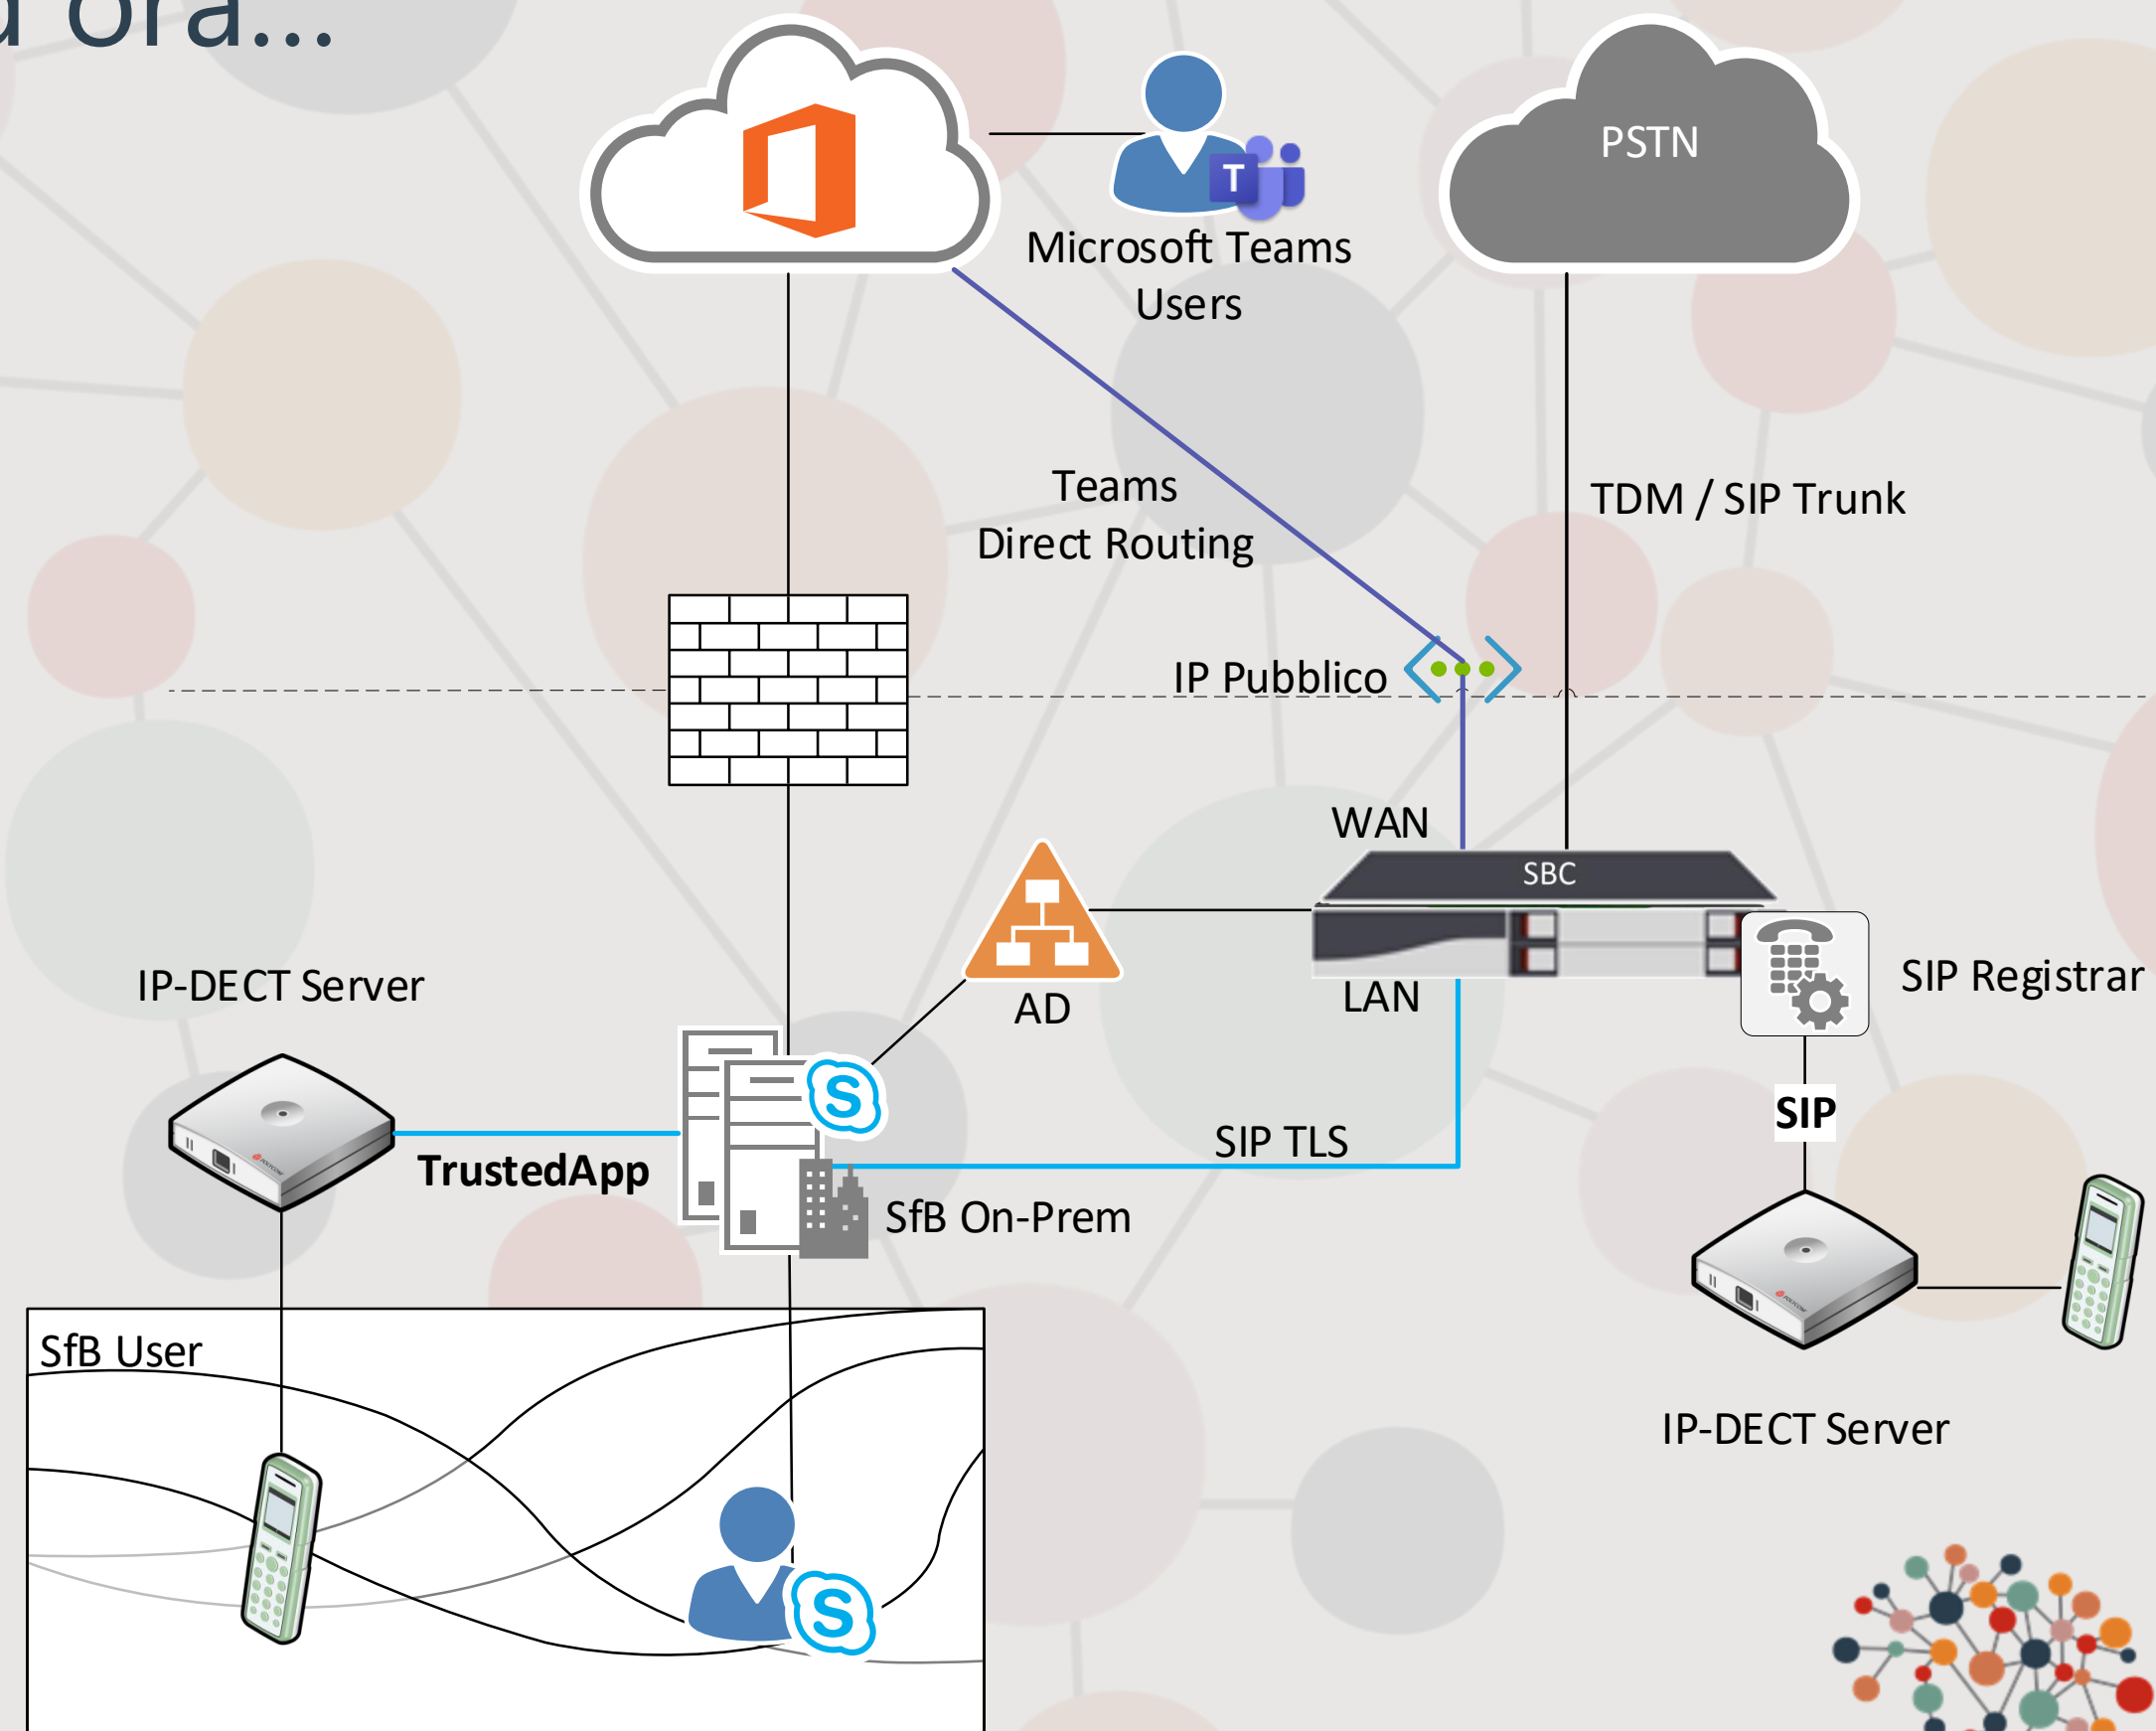

Integrazione DECT fino ad ora...

Per le Aziende che avevano soluzioni IP-DECT integrate con Skype for Business, la migrazione a Teams richiedeva una completa riconfigurazione e ripianificazione della soluzione, con impatto sugli utenti e disservizi.

Fino ad ora l'unica soluzione supportata era basata sulla registrazione dei device DECT su un SIP Registrar, solitamente ospitato sugli SBC.

Questa soluzione presentava alcuni problemi, tra cui:

- necessità di usare un numero parallelo (Tandem)
- mancato allineamento della Presence tra client Teams e DECT

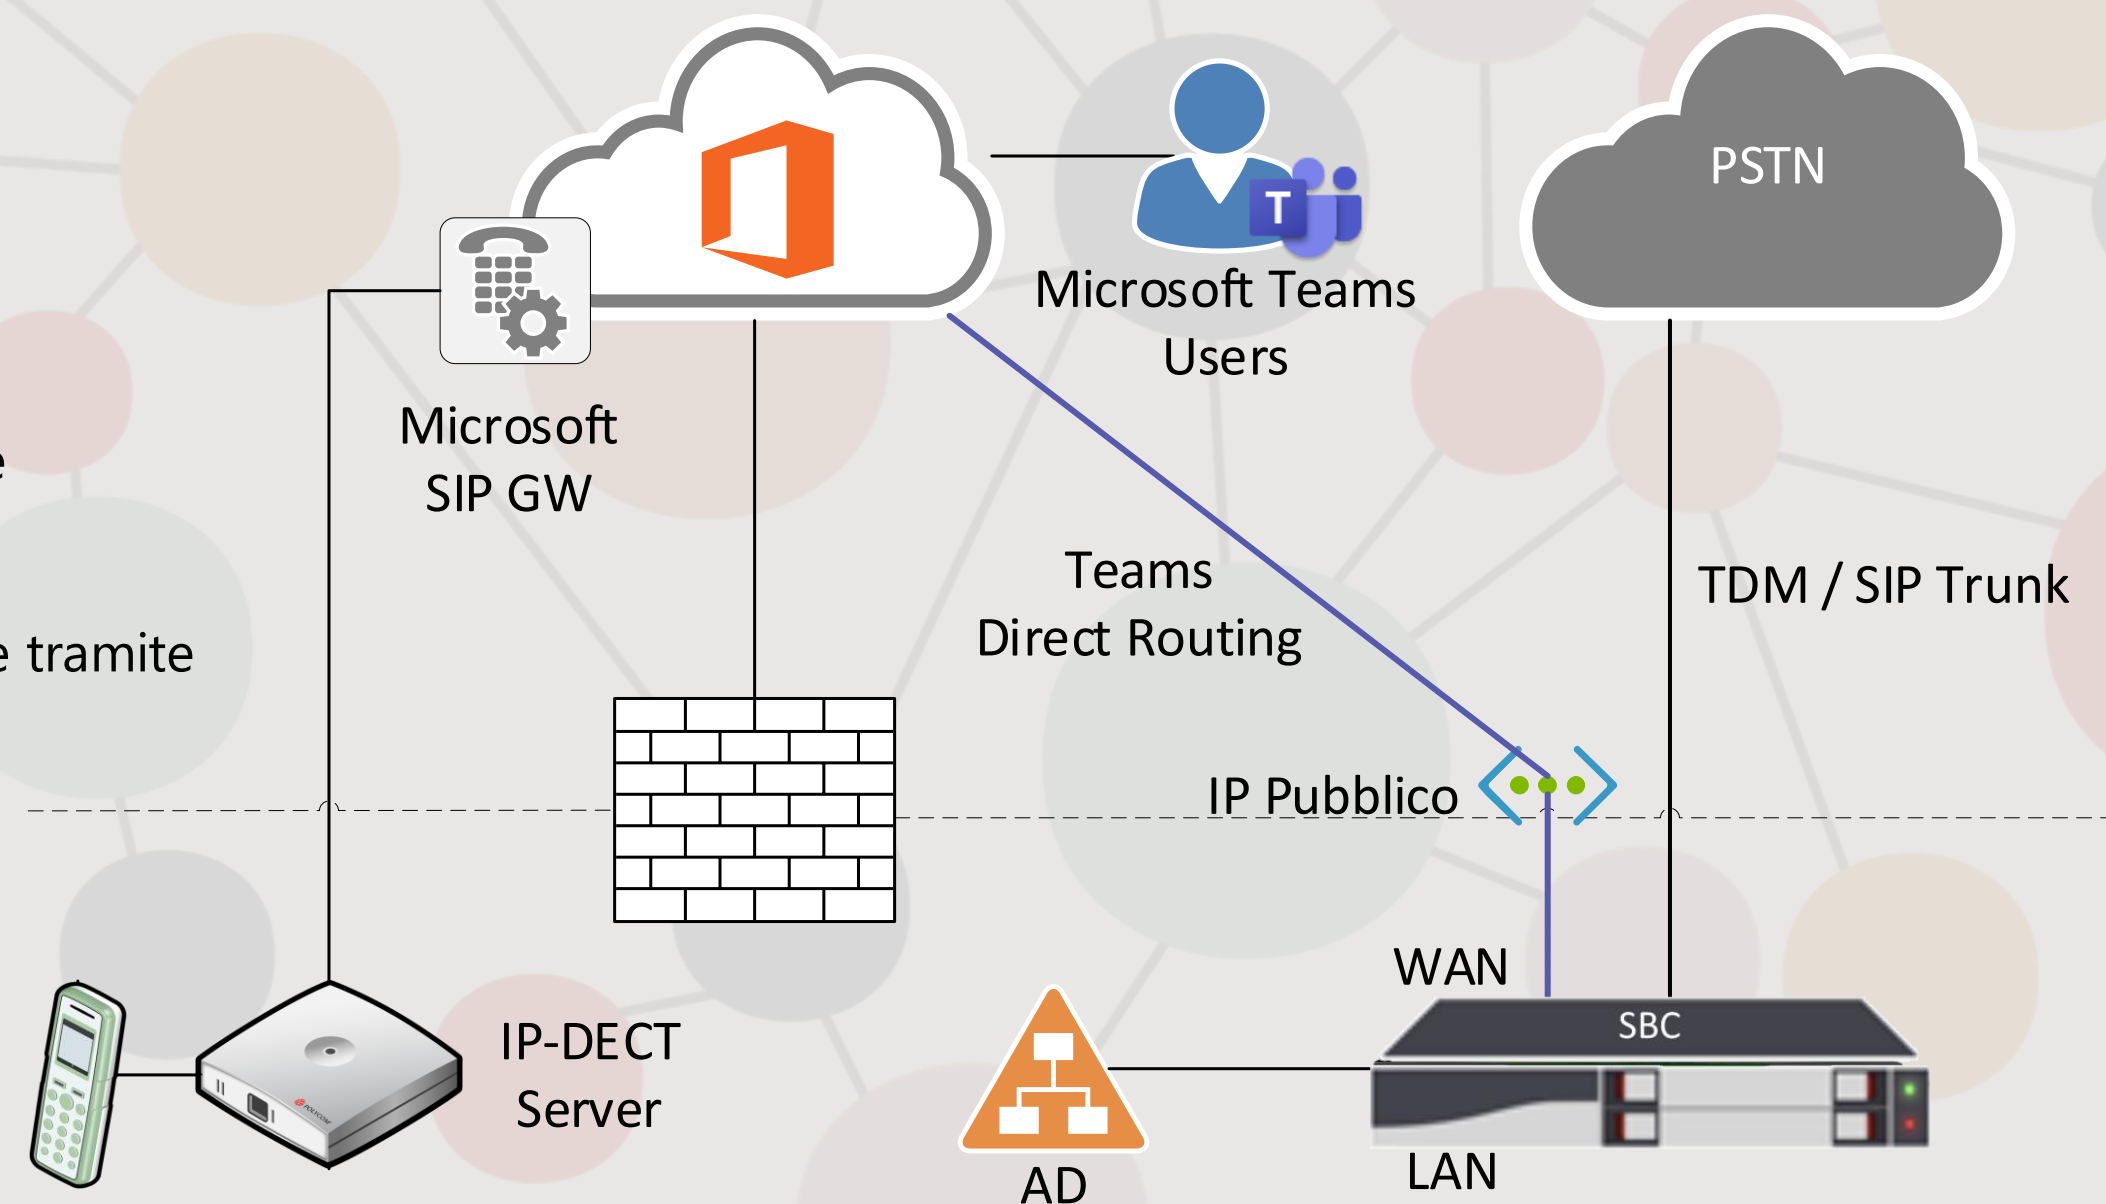

Integrazione DECT con Teams via SIP GW

Grazie al Teams SIP GW sarà possibile registrare i sistemi DECT e associarli direttamente all'utente.

La User Experience sarà molto simile a quella che era disponibile tramite SfB Trusted App, tra cui:

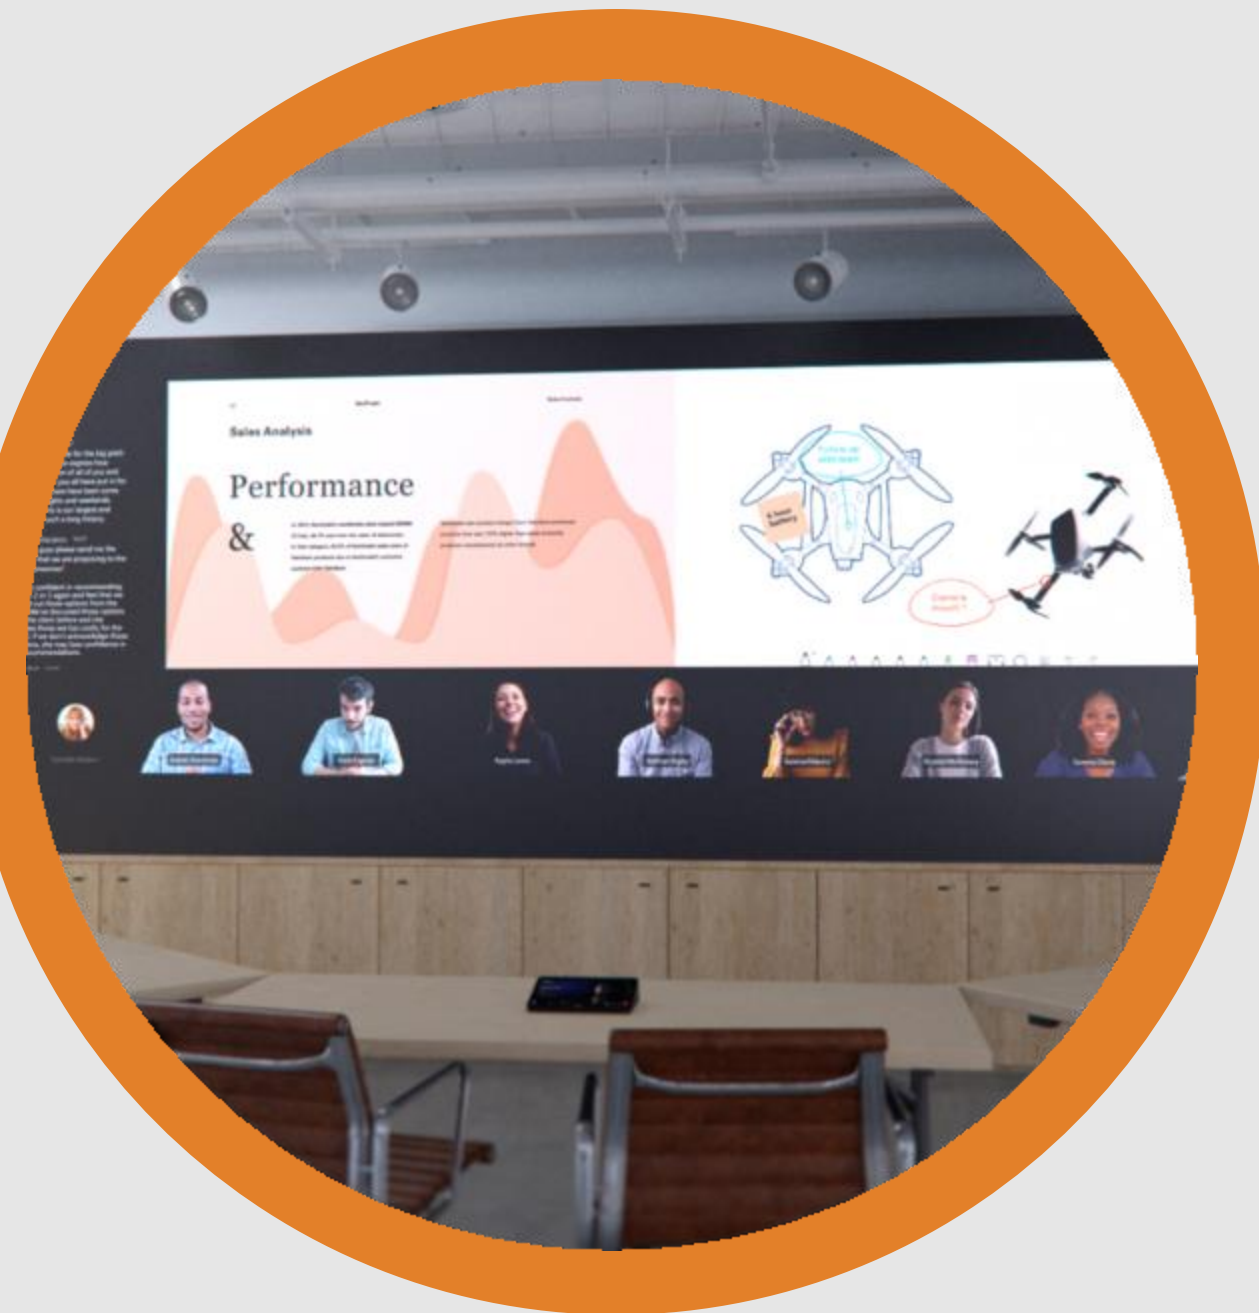

- numero unico (non serve il numero parallelo)
- Presence allineata tra i client Teams e DECT

Dispositivi supportati al momento:

- Spectralink (IP-DECT 200/400/6500/Virtual IP-DECT - handsets 72xx/75xx/76xx/77xx)
- Ascom (IP-DECT Access Points IPBSx, Gateway IPBL, Virtual Appliance IPVM - handsets d43/d63/d81/d83/Myco3)
- Poly (base stations Rove B2/B4, handsets Rove 30/40, repeater Rove R8)

Front Row for MTR

Front Row for MTR

Questo nuovo layout per le Microsoft Teams Rooms è progettato per migliorare le riunioni ibride e fornire ai partecipanti in sala un contesto più ampio di ciò che sta accadendo in vari aspetti della riunione.

Con Front Row, la galleria viene visualizzata orizzontalmente nella parte inferiore dello schermo, all'altezza degli occhi.

Questo posizionamento replica la posizione delle persone sedute nella stanza e offre un'esperienza più naturale.

Front Row for MTR

Language Interpretation for Teams

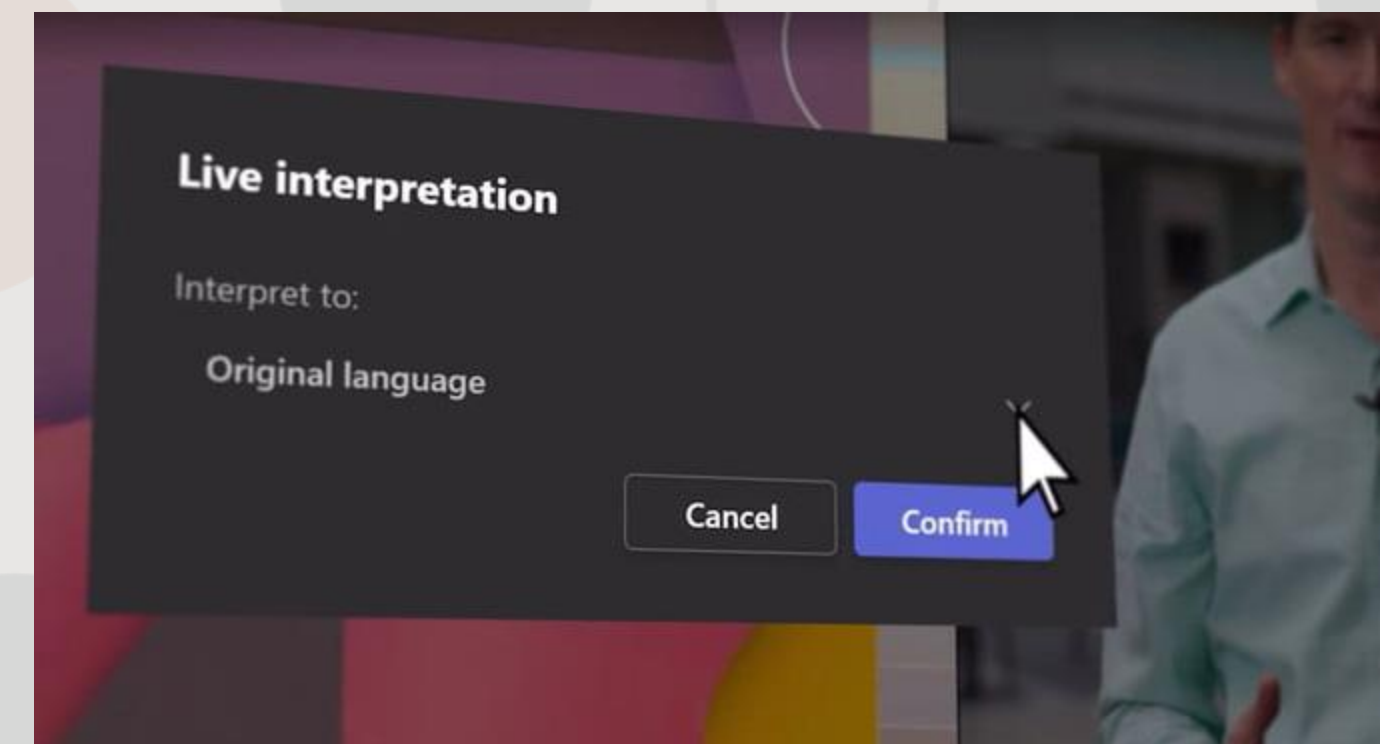

Language Interpretation for Teams

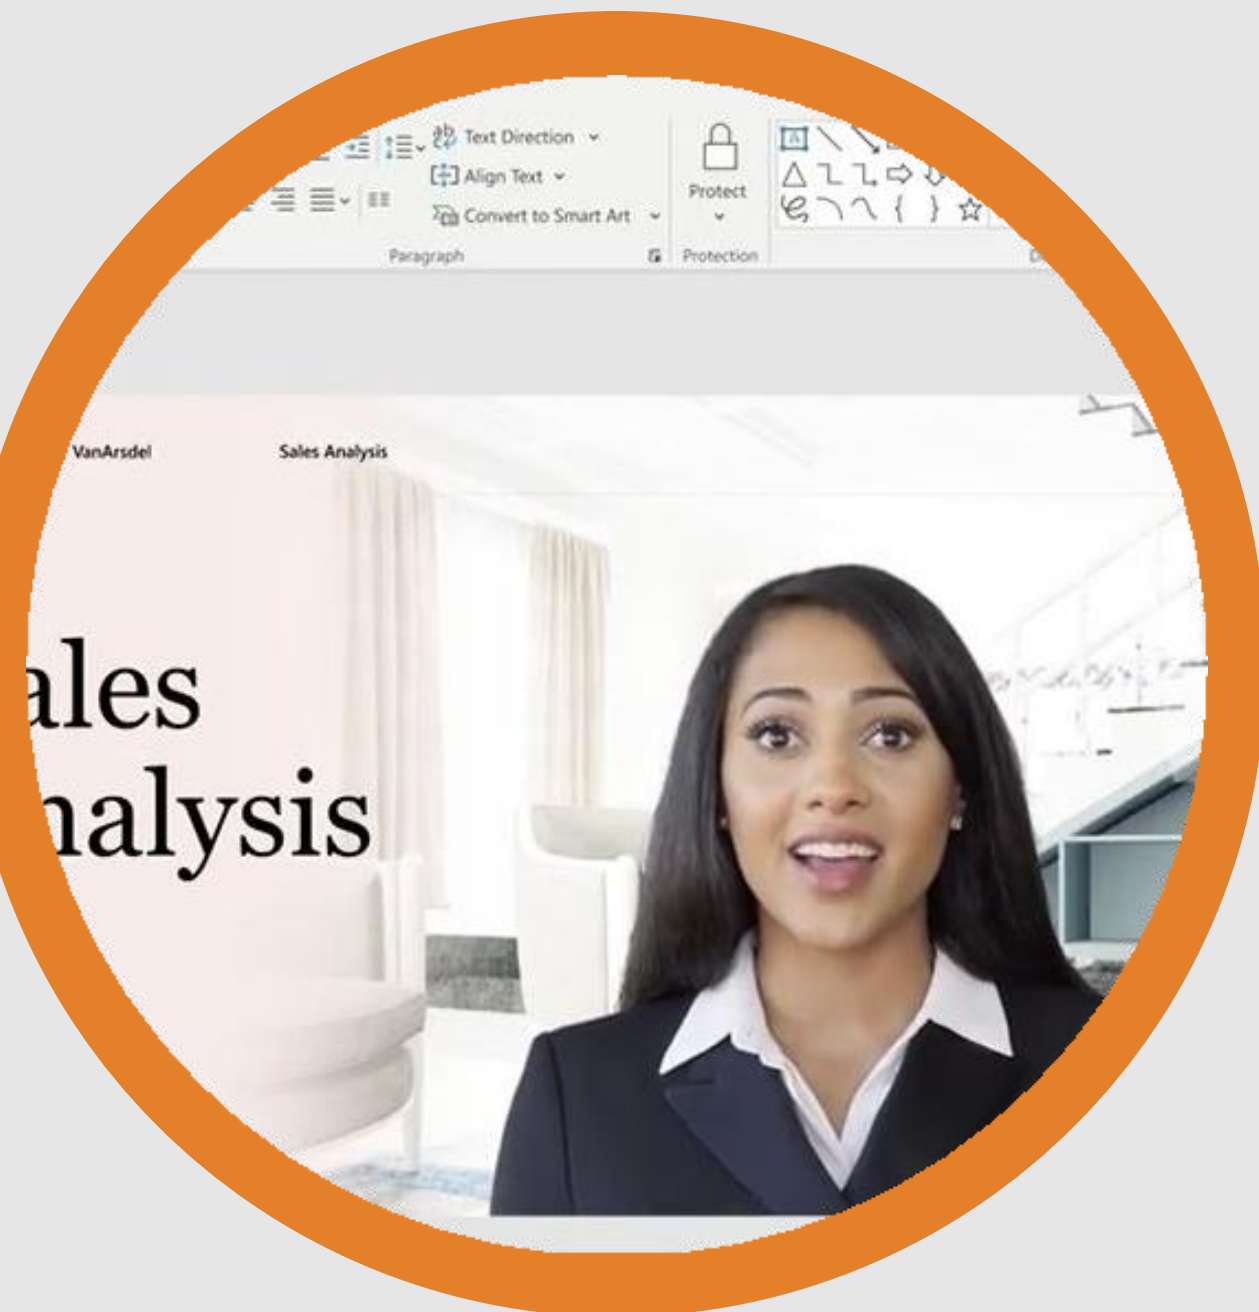

Questa nuova funzionalità consente agli interpreti di tradurre i meeting quasi in tempo reale in varie lingue, rimuovendo le barriere linguistiche per la condivisione di audio, video e contenuti e creando esperienze di riunione più snelle.

Presto si potranno organizzare riunioni multilingue in Teams, supportati da interpreti professionisti, senza avere l'esperienza start-and-stop dell'interpretazione ritardata.

L'interpretazione linguistica sarà disponibile nei prossimi mesi.

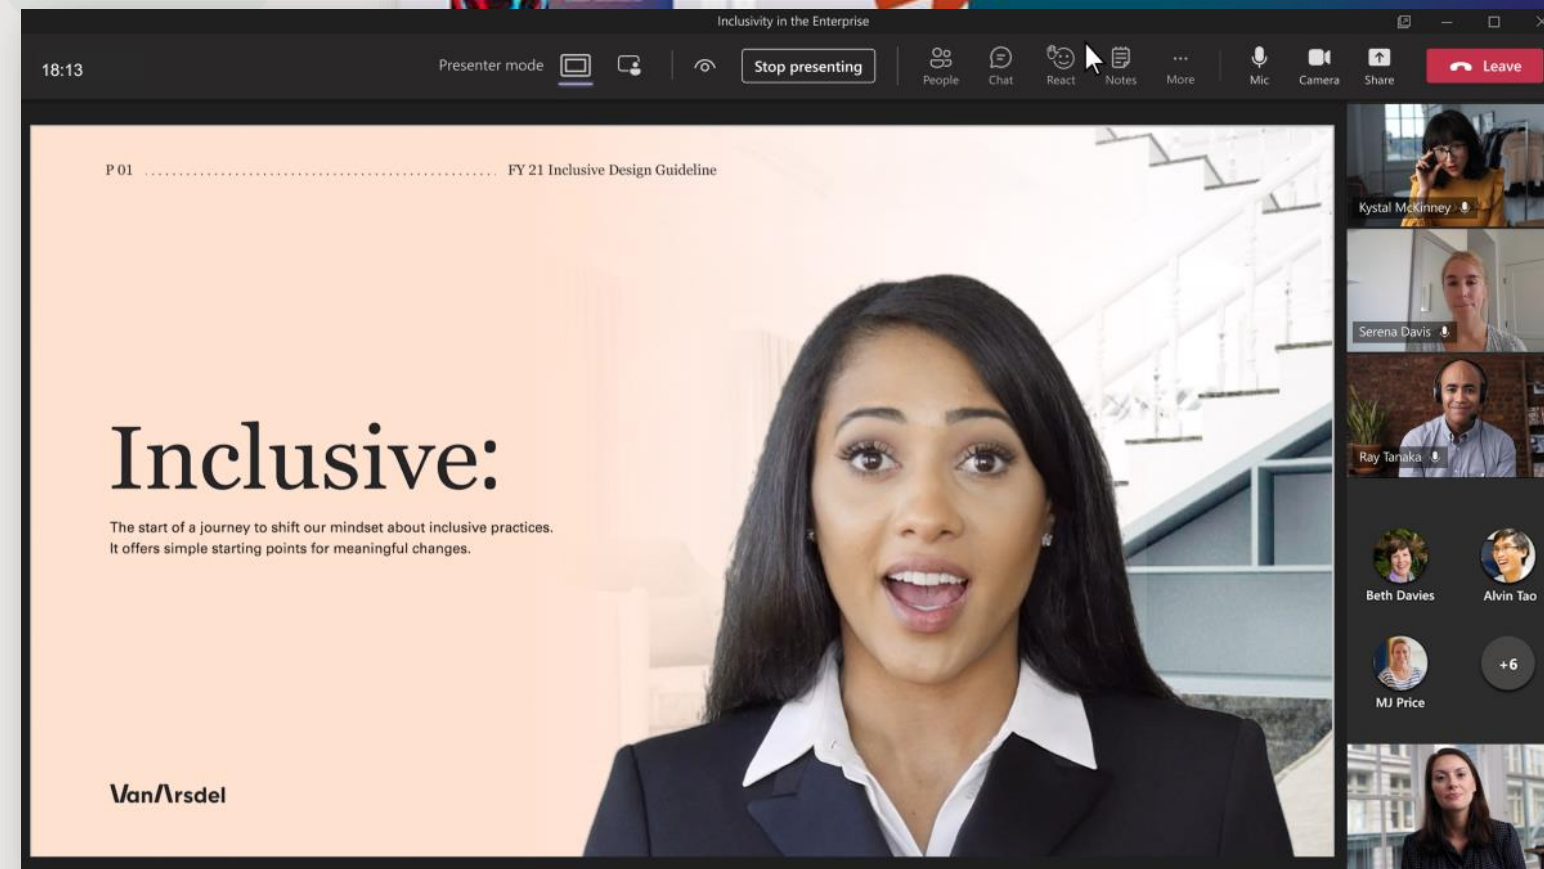

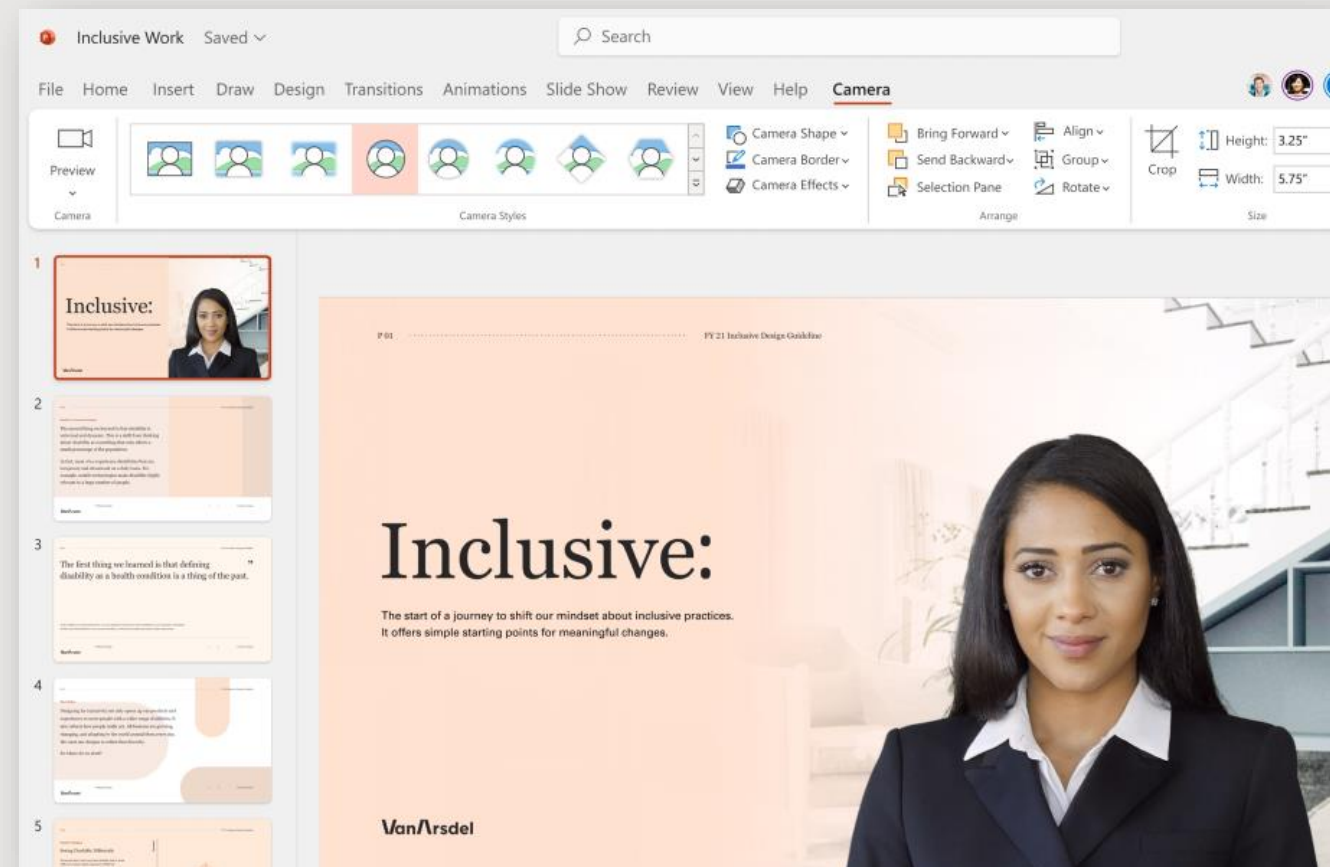

PowerPoint Cameo

PowerPoint Cameo (Preview)

Cameo permette di integrare la propria Webcam all'interno delle slide, in modo da decidere dove essere visualizzato durante le presentazioni con Teams
